The friends of missions will be made sad by the statements put forth by the American Board, respecting its financial prospects. The amount received into its Treasury during the three months, ending September 1st, was less by $22,000 than during the corresponding month of last year, and the Presidential Committee call earnestly on the Church for relief from the calamity of a heavier debt than has ever burdened the Board. There can hardly be any doubt that money will be given by some wealthy men, by which this evil may be prevented, yet the fact is suggestive of too much apathy among the supporters of the Board at large, that so much less has been contributed. The work of missions must depend for its permanent prosecution, not on individ-

uals who have large hearts and long purses, and can be relied on to make up deficits, but on the living spirit of Missions in the body of the Church, by which all the members may be moved to contribute in their measure. Decline of this spirit is ominous, and pastors and men of influence should endeavor to cultivate it as much as possible, and especially among the young, and those likely to give nothing, because they can give but little. It is possible that the American Board, one of the most noble Missionary organizations on earth, has been damaged rather than benefited by the feeling in the Church, justified by the facts of the past five years, that whatever may be the negligence of the mass, somebody will come to the rescue of the Treasury before the annual meeting, and this negligence will do no harm. A great debt would be a great evil, for many reasons, yet if it should be permitted to have its proper educating influence on the Church, it might be overruled for the good of the cause.

Religious Intelligence.

PACIFIC COAST.

City Missionary Society.

The first quarterly meeting of the San Francisco City Missionary Society, was held last Sunday evening at the First Congregational church. Short addresses were made by Rev. Dr. Atkinson, of Oregon, and Rev. Dr. Stone. Reports were read by the Secretary and Treasurer, and Rev. J. P. Moore, the Superintendent, gave a detailed account of his labors during the past 3 months, showing the necessity of the work in which he is engaged, the success which has attended his efforts, and the wants of the Society, which should be met promptly by the public. The following are some of the most interesting items from the report: receipts for the quarter, $1,129; expenditures, $1,094; tracts distributed, 6,840; Bibles and Testaments, 297; children gathered in Public Schools, 20; Sabbath Schools, 42; people induced to attend church, 35; coversions, 8; signed Temperance pledge, 4; number furnished with employment, 58; physician and medicine, 42. Mr. Moore related many affecting incidents which served a very useful purpose in preparing the audience for the closing exercise—a collection of money for the cause.

Church at Chico.—We are glad to learn that the efforts which have been made to establish a Presbyterian church at Chico, are likely to be successful.

We have received the following letter from a citizen of the place, who is taking an active part in the new movement.

Chico, July 27, 1868.

On Sabbath (yesterday) we were favored with good old Presbyterian preaching, for the first time in this town, by Rev. J. S. McDonald, of Sacramento. There are quite a number of Presbyterians here, who have been anxiously waiting for some steps to be taken to give them a home in the Church of Christ. This visit of Mr. McDonald brought forth a response truly gratifying—seventeen names being given as ready to perfect an organization, and several others ready to come in by profession of faith. An astonishing feature in connection with this movement is, that out of the seventeen, eight are males, and all are earnest for the work of organization to go ahead.

Until we can be supplied by the Mission Board, Mr. McDonald has assured us that we shall be supplied from San Francisco, and elsewhere; and that Mr. Fackler will be with us next Sabbath. We hope that the influence of your valuable paper will be used to get permanent supply, and that we may speedily be organized into fellowship with the Synod of the Pacific. W. C.

A Good Idea.—Several of our city pastors having recently returned from their summer vacations have furnished their congregations with sermons on the Sierras, Yosemite Falls, and the like appropriate themes.—*Christian Advocate.*

Burned.—The Congregational church at Walla Walla, Oregon, was burned on Saturday, July 9th.

Repairs.—The Baptist church, at Nevada City, is being repaired and painted.

EASTERN.

Romish Sabbath Desecration.—The Protestant community of New York and Brooklyn, is justly roused by the recent repeated outrages of the Romanists on the quiet and order of our Sabbath. On the very heels of the procession of the German Roman Catholic Central Union, with military bands of music and Papal banners, through the streets of New York, during the hours of worship, there came another desecration, by the Irish Romanists, in connection with the laying of the corner-stone of the Cathedral of the Immaculate Conception, of Brooklyn, on last Sunday. The processions of innumerable societies commenced at 10 o'clock, from all quarters, and continued till 4 in the afternoon, taking up roadways and sidewalks, obstructing foot travel, stopping long lines of street cars, and filling the air with sounds of brass bands, shouting and confusion, and making it impossible for a number of congregations to worship God in peace.

Do the Catholics own the streets of New York and Brooklyn? Can those who claim so largely our tolerance afford to insult the sense of the Protestant community? The last number of the New York *Tablet*, in an angry article against the timely protest of the New York Sabbath Committee against the recent disturbance in New York, boldly boasts that the "American feeling must get accustomed to Catholic pageants." We would deprecate any political complication of religious questions. But if this question comes to the polls, the Roman Catholics will have nobody to blame but themselves. We allow them every liberty, but cannot allow them to interfere with our liberty, and to rob us of our Sabbath, under which we have grown strong, prosperous and free.—*N. Y. Observer.*

The General Assembly of the United Presbyterian Church, met in Argyle, N. Y., May 27th, and adjourned June 3d. Rev. James Harper, D.D., was elected Moderator, and Rev. A. G. Wallace was elected Assistant Clerk.

A report of the Board of Home Missions showed that $44,000 will be necessary to cancel present indebtedness, and meet the expenses of the present year. The report of the Board of Foreign Missions estimated that about $60,000 in coin will be needed during the ensuing year.

The Board of Publication report a large increase of business.

The contributions of the Church for all purposes for the year amounted to $729,639, being an increase of $94,735 over 1867, an average for each member of $11 12, being an increase of $1 12. The average of the salaries paid to pastors was $861 21, being an increase of $21 50. The membership amounts to 65,612, ministers, 541, licentiates, 53, students, 34, congregations, 735, and 37 new organizations.

Resignations.—The Rev. Dr. S. J. P. Anderson has been compelled, by the state of his health, to seek a dissolution of the pastoral relation he has so long sustained to the Central Presbyterian Church of St. Louis, Mo.

Rev. Leonard Swain, D.D., of Providence, R. I., has resigned his pastorate.

Rev. James B. Dunn, for the last six years pastor of the Central Presbyterian Church, in West Twenty-third Street, New York City, preached his farewell sermon a few Sundays since. He stated that during his pastorate of six years, 354 persons have united with the church, 180 of these coming from the Sunday Schools.

Bishop Eastburn has resigned the rectorship of Trinity Church, Boston, which office he has held nearly twenty years.

Rev. Albert Barnes, in his recent charge to Rev. Herrick Johnson, at his installation as pastor of the First Presbyterian Church of Philadelphia, said:

"You enter on this work, I trust, for your whole life as a pastor. In the long history of this ancient church, now nearly an hundred and seventy years—one of the oldest, if not the very oldest, in our connection—not one pastor has been dismissed to another pastoral charge; not one has gone from this to any other field of labor."

Congregationalism in Ohio.—The sixteenth annual meeting of the Congregational Conference of Ohio, which met at Painesville on the 10th inst., was the largest ever held in the State. The narratives of the state of religion in the churches, were generally encouraging, large accessions having been made to the churches at Mansfield, Mount Vernon, Oberlin, Toledo, and other places. Sunday Schools have been especially blessed, and an increased interest has been manifested in the cause of temperance. —*Congregationalist.*

James Buchanan's Will.—The will of the late ex-President Buchanan contains, among others, the following bequests: $2,000 to the poor of Lancaster, in addition to $4,000 previously donated; $1,000 to the Presbyterian church, Lancaster, of which deceased was a member. It also provides for the payment of the expenses of publishing a biographical work of the deceased by Wm. B. Reed, and gives Mrs. Reed a legacy of $5,000 for the work her husband has undertaken to perform.

Rev. Stephen H. Tyng, Jr., whose trial for alleged violation of the cannons of the Episcopal church lately excited so much interest, preached a few Sabbaths since all day in the Park St. Church, (Congregational) Boston, without gown or bands, and without using any part of the prayer-book liturgy, but conforming entirely to the useful service of the place.

The venerable Dr. Duffield, of Detroit, was stricken with paralysis, while addressing the Christian Convention on the 24th of June, and died on the next day. He was 74 years of age, and has been for many years Pastor of the First Presbyterian Church of Detroit.

Ritualism.—Dr. Washburn, of Calvary Church, New York, in a sermon to his congregation, defined ritualism, as now practiced in some of the churches, as "the buffoonery of religion." His text was, "God is a spirit, and they that worship Him, must worship Him in spirit and in truth."—*N. Y. Obs.*

Board of Domestic Missions.—At a meeting of the Board, held at the Mission Rooms on Tuesday, June 16th, the Rev. Cyrus Dickson, D.D., now pastor of the Westminster Presbyterian Church, Baltimore, Maryland, was elected Corresponding Secretary of the Board.

An Evil.—We put it on record as a curious and monstrous thing, that, at a late meeting of the Lutheran Synod, in Philadelphia, a resolution was passed declaring that prayer-meetings conducted by laymen are an evil in the Church.—*Chris. Banner.*

The Universalists of Ohio held their annual Convention at Dayton, recently. A very large number were present. It was voted to raise the sum of $50,000 for the purpose of establishing a denominational school.—*Christian Intelligencer.*

New Orleans.—Dr. Palmer had 24 accessions to his church on the 21st of July. During the last ecclesiastical year the accessions to the churches in New Orleans have been greater than in any previous year.

Large Churches.—Plymouth Church, Brooklyn, has 1,700 members; the First Church of Oberlin, Ohio, has 1,400 members; the two largest churches in the country.

Suspended.—The Presbytery of Pittsburgh, the largest in the Reformed Presbyterian Church, has suspended its relations with the Synod that suspended George H. Stuart.

Old Church.—The church of Sag Harbor, Long Island, has been organized one hundred years, and held a centennial service Sabbath and Monday, June 21st and 22d.

Rev. Charles Cleveland, of Boston, is ninety-six years old, thirty-five of which have been devoted to missionary labors among the poor of that city.

Rev. Dr. Archibald, formerly pastor of the First Presbyterian Church of Madison, Indiana, has accepted the Presidency of Hanover College.

Rev. James Kent Stone, LL. D., late President of Kenyon College, Ohio, has been chosen President of Hobart College, Geneva.

Call.—The Third Church, Indianapolis, Ind., has called Rev. Robert Sloss, of New York, to become their pastor.

Rev. Dr. R. W. Patterson, of Chicago, celebrated his silver wedding July 11th, receiving $4,000 in presents.

Dr. McCosh is expected at Princeton by commencement time.

FOREIGN.

Graves of Humboldt and Neander.—Eight miles from Berlin, is Tegel, a quiet place in the forest, with only a modern castle and its appendages. From the castle by a winding foot-path, at first through an over-arching jungle of lilacs, and then through native woodlands, one is led a long distance, till he is unexpectedly brought to a little dell with an enclosure of graves covered with ivy. One of the sleepers in this place of quiet beauty, is Frederick Henry Alexander Von Humboldt; who was born in 1769, and died at the age of ninety years. At the head of the enclosure is a neat monument of red granite, surrounded by a beautiful figure of "Hope," in white marble. Long arms of oak, reaching out horizontally towards the sleeper, some of them fifty feet long and ever green with the moss of many years, give to this secluded spot a venerable surrounding. The April breeze whispering through the boughs of spruce and cedar, told the visitor to speak low and walk softly, and my feelings were in a mood readily to hear and heed the gentle monitor.

In one of the church cemeteries, not half a mile from my lodgings in Berlin, in a retired corner, are the remains of Augustus Neander, the eminent church historian. A plain headstone has sculptured on it, a side view of his attractive face. Under the work of the sculptor is this inscription: "A sister to an unforgotten brother." Professor Tholuck, speaking to me yesterday of his lovely traits and great excellence, said, "if it were the custom now to have saints, Neander would surely be canonized." I love often to step in, and take a fresh look at the serene face of Neander. Not old, but ripe; he died at sixty-one; and evidently worthy of the laurel in his department of life's work.—*The Advance.*

A Missionary Nursery.—Near Basle, in Switzerland, is the Pilgrim Mission, where there are some sixty or seventy brethren receiving instruction in a three years' course of study and fitting themselves for missionary work. Missionary experience is gained in the sixty neighboring town and villages. Manual labor is combined with mental pursuits. Nearly seventy acres of land and meadows are being cultivated by their hands, and all the clothes and shoes for the institution are made upon the premises. They bake their own bread, take care of the gardens and stables, manage the kitchen, the washing, and all the rest of the household work. The missionaries who go forth from this institution have no salary, but are satisfied with the Apostle's rations: "Having food and raiment, let us be therewith content." About 120 are pastors and schoolmasters among the Germans in North and South America; and they have three mission fields of their own, in Palestine, Egypt, and Nubia.—*Advance.*

The *Friend of India* gives the following statistics in proof of the success of missions in India within the last half century:

"Missionary Societies in the United Kingdom, the United States and Germany, are represented by 540 white and 200 native ministers, and 1,800 native assistants, catechists, etc., working in 400 central stations, with 2,300 branches. They minister to 50,000 adult communicants, and to congregations of 250,000. They teach, in colleges and schools, 80,000 boys and 30,000 girls. All this work, including book-making and Bible translations, is carried on at a cost of £300,000 a year.

The Matable Mission, under the care of the London Missionary Society (Congregational), is carried on far in the interior of South Africa, and lies only a few days south of the celebrated Victoria Falls. The old King, Mosilekatse, of whom Dr. Livingstone so often speaks, though anxious to enjoy the benefit of the presence of the missionaries, has never had any sympathy with the Truth, and has discouraged his people from learning to read. At last he has given his unqualified assent to the requests of the missionaries, and they feel greatly encouraged with the prospect that their eight years' labor shall begin to produce fruit.

The Lutheran Church in Paris.—The Lutheran Church in Paris numbers 40,000 souls. It has fifteen churches, twenty clergymen, 48 schools or infant schools, with about 5,000 children. For nearly thirty years, or since 1840, it has had in Paris a mission, the object of which is to propagate a knowledge of the Gospel in connection with the general work of the Church holding the Augsburg Confession of Faith in France. It labors not only amongst the French, but also among the great mass of Germans who come to France, and especially amongst those who are settled in Paris.

Changing Front.—Twenty years since, the Protestants in the world numbered 64,000,000, and the Romanists 167,000,000, being not quite two Protestants to five Romanists. Now, Protestants number 93,000,000 and Romanists 185,000,000—not two Papists to one Protestant. There is a steady decline in the leading Papal powers, and a steady advance in the leading Protestant powers.

South America.—We find the statement that the number of ordained Protestant missionaries in the various countries in South America is as follows:

"In New Granada and Bogota, 3; Peru, 1; Chili, 8; Patagonia, 2; Buenos Ayres, 9; Brazil, 7. Besides these are the Moravians in Guiana. In all, about one to every million of the inhabitants."

Rev. W. M. Punshon, the distinguished minister of the Methodist Church in England, recently on a visit to this country, has taken up his residence in Toronto, Canada.

Dr. Robert Payne Smith, Professor of Divinity at Oxford, is the Bampton Lecturer this year.

Impressions of the Old School Assembly.

BY A RETURNED DELEGATE.

Probably no General Assembly of this branch of the Church has ever been regarded with greater interest by the people at large than that which has recently closed its sessions. It was no ordinary privilege to be permitted a seat among its members and to listen to their deliberations. The usual business of the Church—such as judicial matters, and hearing the reports of the Boards—while it received, it is hoped, due attention, possessed an interest only secondary to the great question of reunion, which for several years has occupied so prominent a place in the minds of Presbyterians. The action of the Assembly on this question, while it was not such as was likely to awaken much surprise in the minds of those who were acquainted with the state of feeling in the various parts of the country on the subject, has no doubt been in some measure a disappointment to the friends of reunion, and regrets have been freely expressed that the matter has been left by the Assembly in such shape as to discourage the hope that the work so happily begun would be successfully accomplished.

I am not surprised that such an impression should fix itself in the minds of those who have only read the report of the proceedings of the body. My own impressions, derived from a personal hearing of that which transpired on the floor of the Assembly, are quite different. At the close of the deliberations relating to the subject of reunion, I felt (I think it was the prevailing sentiment of the friends of reunion throughout the Assembly) that the prospect for the accomplishment of our wishes was never so good as it was then. It is true, the sense of satisfaction would have been more profound had our Assembly been able to act upon the subject with something like that unanimity which characterized the action of the New School Assembly. But this, we all knew from the beginning, was more than could be expected. To bring into perfect harmony the discordant elements incorporated in that large body would have been little less than a miracle. That the vote in favor of indorsing the Basis of the Joint Committee was so far beyond a two-thirds majority was indeed a subject for general congratulation.

The discussion of the Basis of Union of the Joint Committee, by the ablest advocates on both sides of the question was thorough and exhaustive. Those who were *in a liberal and charitable* manner, yet decidedly and conscientiously opposed to the reunion —upon the present basis—of the two branches of the Church, composed the greater part of the opposition, and how much soever many of their brethren dissented from them in opinion, we felt that they were to be honored for their conscientious conservatism, for their firm and unwavering support of that which they thought to be right.

Those, on the other hand, who expressed themselves wholly *adverse to union on any terms*, were but few and possessed of very little influence. In fact, the effect of their speeches was such as was only to be feared by those who were with them in the debate, since the manner and the spirit of their addresses added no strength to the opposition.

The great body of the Assembly was wholly united, and, from the beginning manifested the unwavering purpose to endorse the Basis of the Joint Committee.

The feeling in favor of reunion was stronger at the close of the Assembly's sessions, after the hearing of the debate, than at the beginning, and I observed that some who, in the early part of the discussion, spoke against reunion, voted in favor of it when the roll was called, so that we could not but feel, as we separated, that the cause had made a degree of progress which encourages the brightest hopes.

Allow me to say, still further, that, with regard to the resolution passed by the Assembly subsequent to the taking of the vote upon the Basis reported by the Committee, my own feelings (and indeed I may say the feelings of all those who voted in favor of that resolution,) were quite different from those expressed in your issue of July 11th.

That resolution was merely a suggestion of a modification in the doctrinal article of the Basis, and that modification contemplated the removal of a clause which was thought to embody a sense of distrust toward the New School body. However it may have been "construed" by some, it was in reality designed as an expression of increasing cordiality and confidence. Those who offered the resolution, those who spoke in favor of it, and those who voted for it, had no desire thereby to "affirm old issues," but rather thus to convey to the other Assembly the assurance that when they said they were ready to unite with us on the adoption of the same system of doctrine, we were also ready, and no *questions* or *qualifying clauses* were required to *test the sincerity* of either party. That was the significance of this last resolution, and while the majority of the Assembly, previous to the taking of the vote upon the Basis of the Joint Committee, would allow no change to be made in the articles composing that basis, that majority at once, after the vote, and for the reason already given, made this suggestion to the other Assembly, and we were very sorry to hear that it was not possible at that time to accept a proposition so valuable to the interests of the cause.

For my own part, I do not regret that this work, which is indeed a great work, and its accomplishment to be a grand consummation, has not been hastily performed. I think it will be no disadvantage in the end that it has progressed somewhat more slowly than many of us would have desired, for, while every unnecessary delay is to be deplored, my hope is, that, in God's good time (and that, I trust, not now far distant), we shall behold these divided numbers the more firmly, because the less hastily, united, and "the whole body *fitly* joined together, and *compacted* by that which every joint supplieth, * * * * * * * * making increase of the body unto the edifying of itself in love."

The work is one of so much magnitude and importance that we should be willing, "if it tarry," to "wait for it" with patience, but my hope almost amounts to conviction that in its final accomplishment, it "will surely come, and will not tarry."

W. R.

Old Story with a New Point.—When Æsop wrote, he little thought his words would set forth what men should see and hear centuries after. A little tract entitled, "Is it honest?" was extensively circulated among Protestant clergymen some months since by Roman Catholics, in which certain questions were asked, and answers solicited. This tract was answered by Rev. R. W. Bacon, of Brooklyn, N. Y., in a series of sermons, which were printed in the Brooklyn *Times*. Whereupon, "*The Catholic World*," the ablest magazine of the Roman Catholics in this country, reviewing the sermons, defends the tract, in terms which seem more discourteous than sound in reply. Whatever Æsop had in mind in the following, history does not tell; the reader can apply for himself. "In olden times was a poisonous Viper, which having crawled into a blacksmith's shop, immediately commenced gnawing everything he met there. A sharp file lay most opportunely before him, and the Viper having coiled himself round it, set to work to bite it. His mouth coming in contact with the teeth of the file certain drops of blood appeared; and judging by these, that he had so bitten the file as to wound it, he further proceeded to bite it more. But the file said, "your heart is too poisonous by far! you cannot harm others, and on the other hand you only harm yourself." Extended comment is needless. The discussion of controverted points was invited by the Roman Catholics themselves. The tract issued, laid specific charges at the door of Protestants, which must awaken in the minds of their own communicants whose attention would not otherwise have been drawn to the subject, grave doubts respecting the working of their own system. If the result of the controversy thus begun, should prove altogether contrary to the hopes of those originating it, and members of that communion be led to a candid and thorough examination of the questions at issue, Protestantism can suffer no loss, whatever may betide the Roman Catholic Church.

S.

Notes of a Trip to Europe.

On the 19th of July, at 9 o'clock at night, I left Paris for Switzerland with two friends. We strike the Saone and the Rhone, both noble rivers. By half-past 8 o'clock the next morning we were in the midst of the Jura Mountains. At 9 o'clock A. M., 20th July, I caught my first sight of the Alps, uncertain whether they were cloud or earth.

We followed the Rhone, rushing impetuously shrough rocky gorges, creamy and almost white with the soil it carries along from the Alps. By and by, before we reached Geneva, it disappears, like the fabled lap-wing, underground for something like two miles. At half past 11 o'clock, we reached Geneva. View of Mount Blanc from my window, but concealed by clouds till next day. Lovely lake with its waters, right before me. The impatient Rhone, blue as the Gentian, rushes like an arrow out of the lake, as if breathless to get away. On Sunday morning, on my way to the English Chapel, I saw Mount Blanc sixty miles off, towering up into the skies, pale, shining, white, the lesser peaks surrounding it, like a staff of glittering officers around their chief. A thousand images thronged my imagination. There was the "Mole," a mountain in front, rising like a black pyramid, and far off and behind was Mount Blanc, immensely higher, with its dazzling white cathedral dome and towers, beneath the noon-day sun. Then I beheld the setting sun bathe those sky-piercing pinnacles in violet and rose. Then I saw them turn *ashy pale as death* at the loss of the sun.

Next morning we set out on the top of the *Diligence* for Chamouni. The view grows finer and finer. At length we enter within the great walls and towers of the Alps. My neck ached in bending down beneath the low roof of the Diligence, that my eyes might scale the tops of these gigantic bulwarks. A cataract of a thousand feet lets fall its graceful riband; this riband parts into fringes of drops, waving far and wide, and scattering pearls; prismatic shades floating over the whole.

In the mean time Mount Blanc was nearing, and up its precipitous, glittering, snowy sides, near the top, Professor S. thought he discerned through his glass three persons making their perilous descent. The *mountain grows upon us.* It mounts higher and higher. It fills the view! We can see nothing else!

We turn from the mountain to the vales, and it seems as if the green of nature had been distilled

and concentrated, and had steeped them in a verdure deeper than elsewhere on earth; and so we enter Chamouni. In another direction are the *Glaciers*, rough and soiled, and yet an indefinable green playing over and through them.

All sorts or tourists are thronging this country, especially English and Americans. Young men and maidens with their "Alpine Stocks," marked with their several achievements, such as "*Fete de noir*," "*Col de Balm*," etc. A pretty little English church, half Gothic and half Swiss, stands in the green plain of Chamouni,

Next morning at 8 o'clock, I started with my friends on our donkeys, and a guide, for Martigny, by the "Col de Balm." Hardly ever were mortals so favored as we, with clear skies, while in Switzerland. We might have been there a month and not seen as much as we saw. It seemed as if God had rolled away the clouds for five days, in special reference to our short opportunity of seeing His works. On we rode for two hours nearly on a level road. By and by we left a young lady and brothers on their way to the "Fete de Noir," she on her donkey, and the young Englishmen sturdily trudging on foot.

Now we began to ascend. The loveliest flowers —rhododendrons, blue-bells of Scotland—oh! how large; and the little Gentian, almost without stalk, blue as if the very sky had dropped into it—were all there. Saddle pretty uncomfortable, in spite of my horsemanship; higher and higher we go, till at last we reach the rude hotel at the top of "Col de Balm." What a view! In one direction Mount Blanc in its glory; in the other a world of mountains—Alps on Alps—among them and far off the Bernese Alps! We look down into a far deep valley, the bottom of which we were to explore *to our cost.*

Having fortified ourselves with soup, and meat, and wine, we commenced our descent of seven thousand feet. Our guide led the donkeys, and we followed on foot. Oh, my prophetic soul! For two hours we performed a zigzag, or spiral, constantly paralleling our course. Hot, out of breath, limbs failing, at last I found myself at the bottom, and after a little halt mounted my mule. A lucky "gude wife" stood at a cottage, with smiling face, to sell me wine, and girls tempted me with cooling spirits. Then we began to ascend again, and were treated with farther views of grandeur and beauty. But alas, "what goes up must come down," and so we began to come down to Martigny. The zigzag doubled and re-doubled; the spiral turned and returned, and twisted and re-twisted. Four hours on a donkey, which had a fashion of hitting his belly with his hind leg every third step, almost making me sea-sick; the path plunging more and more perpendicularly, and never apparently to end; I growing tireder and tireder; Martingny receding! At last when we entered it, as we thought, miserable that we were, we had to ride through it and beyond it, through dirty streets, and in the midst of unsympathizing crowds, to *another Martigny*, till at last our misery came to an end. At the Hotel de Cygnes we found plenty of water, and a nice tea and bed.

The Alps are awful. "Power belongeth unto God." That is their voice. Beauty—rare, exquisite beauty—mingles in the scene. But the predominating feature is power. "The strength of the hills is *His*."

On this my return from Martigny I skirted all along the exquisite shore of the Lake of Geneva, where Voltaire, Rousseau, Gibbon, and Byron lived. Who can wonder at their choice of a home? You look out on this picturesque water, with the Jura Mountains on the opposite shore mirrored in a blue summer sea. Sloping down from the heights, the green earth, terraced and gardened, and dotted with pretty villages and superb hotels and villas, till you reach the very edge of the waves. It was here that Byron wrote his memorable description of a thunder storm.

"Far along from peak to peak the rattling crags among
Leaps the live thunder! Not from one lone cloud,
But every mountain hath found a tongue,
And Jura answers, through her misty shroud,
Back to the Alps, who call to her aloud."

—*S. S. P., in Hartford Churchman.*

APPLETON'S EDITION

OF THE

Waverley Novels,

NOW PUBLISHING,

From New Stereotype Plates, uniform with the new edition of Dickens, containing all the Notes of the Author, and printed from the latest edition of the Authorized Text.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JULY, 1868.

July 6th—MONTANA, Captain Cavarly, connecting with HENRY CHAUNCEY, Capt. Grey.
July 14th—CONSTITUTION, Captain Comstock, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN CITY, Captain Lapidge, connecting with RISING STAR, Capt. Conner.
June 30th—GOLDEN AGE, Capt. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identity themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George E. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

Office, No. 40 Wall Street.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

SAN FRANCISCO, SATURDAY, AUGUST 1, 1868.

THE FOLLY OF MOCKERY.

We live in days when real argument respecting the claims of the Bible and the demands of religion has less influence than a method of meeting these, which for want of a better term, may be called *mockery*. In answer to evidence from history and the nature of things upon the necessity of revelation and religion as a basis of a worthy character, as a safeguard of public morals, as guides to eternal life, we get an article, or a series, in some popular periodical, saturated with a refined contempt for them, supported by nothing but the rhetoric and the wit of the infidel author; or a story, whose whole design is to create *distrust* of what cannot be set aside by sound reason; or a newspaper editorial, holding up what we insist should be treated with sober regard, to ridicule or jibes; or, alas! that it is true, some pulpit-thrust at the settled opinions of the Church, on religious faith or practice. And when these dishonorable replies, or assaults, are declared to be hostile to everything good, from the same sources comes the cry of cant, bigotry, priestcraft, scouting the idea that any evil can result from this breaking up of the foundations; and, all over the land, there are multitudes who never read a sober argument on the subjects involved, who never seriously thought upon them, but echo the cry, and think themselves wise above their fellows.

This is evidently the dog of *mockers*, with whom it is reply enough to the logic either of the intellect, or of events, in support of what they do not like, to say "Nonsense!" They find it a sufficient reason for losing confidence in truths that rest on the authority of God, that some artful and pleasing writer plays upon them with his shafts of satire, or that the heroine of some tale expresses her disbelief in things that grate harshly on her sympathetic and intensely delicate nature! So that we are surrounded by young persons especially, they are in our families and among our friends, who smile at the folly of taking for true, what is so genteelly and beautifully ridiculed in the reading which they like. Perhaps no evil threatens us now, more insidious, more irrepressible, yet more abounding and dangerous, than this mockery of religious things, this turning over to cool contempt, those who desire to retain established truths, which have ever been full of blessing to the world. It is doing far more to undermine the hopes of the Church, than the free-thinking, and open infidelity of past times ever achieved, and the full extent of its mischief can hardly be known.

For this disposition affects mens' judgment of *acts*, as well as *truths*. Those who admit its control, determine all sins from their point of vision, and whatever accords with their tastes and wishes loses its deformity. They are never given to *argument*, they merely *laugh* at what are quoted as the declarations of the Bible; they merely mock at the fear that God will punish those who disobey Him, whether they do this in a manner refined or gross. We see this disposition in the judgment of many respecting the Sabbath. It is crowding the avenues of intemperance with such a throng of notions. It is rendering vice less and less hideous, until by thousands it is embraced as a good, when dressed in a guise they fancy. It is making even common honesty, that stern, inflexible adherance to justice in every particular, which were once so honored, almost too rare to be expected among the mass of business men. All this comes of the apparently growing inclination to sneer at evil consequences from conduct and habits, that would have *marked* a man in the the days of our fathers. It shows that the distinctions between right and wrong, virtue and vice, sin and holiness, are becoming faint, in the minds of many; and it has possible issues that will be fearful, if they are really experienced.

The folly of those who cherish this disposition, is seen in many particulars, but especially in the nature of the disposition itself. It is the very lowest form of reply to appeal or logic, and employed, for the most part, by the weakest minds. Any one can scoff, can cavil, can mock. There is no proof in this, of either ability or skill, and much would be gained, if the multitnde of self-conceited persons, who pass judgment so readily on the most serious matters of belief and practice, could be made to see the folly of what they flatter themselves is proof of superior insight. Go to five men who propose entering upon some speculation, and prove to them that it will be disastrous, give them facts and figures in every part of the proofs; any one of them can toss his head, and say, "that is all nonsense," and go on with his schemes. It requires no thought or capacity to do that. But only careful, sensible, reasonable men, will heed your statements and give them due weight. When one will listen to reason, there is some hope of success in convincing him, but what hope is there with him, who receives all that you say with cold jeers, and puts aside the strongest evidence with mockery, and puerile contempt? There is no opportunity for anything but *pity* for such a man, and we leave him, to go on, as we leave the brutes to perish.

THE LAST RESOLUTION.

Nearly one-third of the Old School Assembly voted against the doctrinal basis of union with the New School; and more than one-fifth of the entire body protested against it.

The Assembly by a unanimous vote, adopted a resolution defining how this doctrinal basis is to be interpreted;—forbidding the preaching of doctrines, the licensing and ordaining of candidates to the work of the ministry who maintain doctrines, condemned by either Assembly. Possibly the unanimous adoption, at the close of a long and thorough discussion, of this resolution, was "a serious misfortune." But if any one in either branch of the church objects to it, or if it shall have the effect of hindering union with the New School, its adoption was wise and necessary. A member of the New School Assembly writes to THE OCCIDENT, "that this resolution must be repudiated by the ministry and membership of the Old School, or negotiations for union must cease."

That is if this writer represents his body, in order to union with the New School, we must consent to the propagation of doctrines, which have been condemned by both our Assembly and by the New School Assembly for thirty years. What sort of union is that, which tolerates heresies, which have distracted both branches of the church, and which both have united to condemn? I am inclined to believe that the great body of the New School will cordially adopt this resolution of our Assembly. It certainly is reasonable and equitable. We cannot recede from it. We cannot vote for union on a doctrinal basis, whose meaning authoritatively defined by our General Assembly, is repudiated by either party. My heart's desire and prayer to God, is for union with our New School brethren. Not with them alone: but with all who contend earnestly for the faith and deliverance to the saints.

So our Savior prayed, and has taught us that the spiritual union of his followers, manifested by perfect coöperation, if not by organic union, will be to the world, a convincing demonstration of the truth. Spiritual union may exist without organic union; and the latter may exist without the former.

The union of two bodies so alike, well organized and independent as the New School and the Old School is not necessary to the growth and prosperity of either. It may be necessary to the highest efficiency of both.

If satisfied on this point, the only question to be desired is that of agreement of doctrine. Perfect agreement in doctrinal views, is not to be expected among thinking men. Nor is it necessary to organic union. But a certain agreement there must be. The points of disagreement must be well understood, clearly defined and stated. The limits within which liberty of opinion shall be allowed, must be fixed and respected by both parties. Let us be agreed in our modes of viewing and stating gospel truth. Let us understand wherein we disagree, and agree in some things to differ, for the sake of unmasked usefulness. Those are the main points compared with which the disposition of our property, and the management of the books are small matters. Let us unite as brethren and solemnly agree to work with all our might for God and for man.

Then will our union be real, not seeming; a blessing to all concerned, not a vexation and a calamity. Such a union requires time, deliberation and prayer. Let us take sufficient time. Nothing can be lost by cautious delay and thorough consideration. Those who most earnestly desire union, who if it takes place will most faithfully abide by the terms of the compact, and most vigorously promote its objects, should be very careful in the preliminaries.

"And the glory which thou gavest me I have given them; that they may be one, even as we are one: I in them, and thou in me, that they may be made perfect in one; and that the world may know that thou hast sent me, and hast loved them, as thou hast loved me."

F.

Hebrew Baptisms.

In the very important ceremonial ablution for the cleansing of the leper, which, by the authority of Professor Ripley, is to be included among the *baptismoi* of the Hebrew economy, while as yet we have found no *immersion*, but a most abundant *sprinkling*, no less than seven times repeated, and so important in efficacy that the subject of this ablution, after its administration, was to be declared, by the officiating priest, clean—purified from the obnoxious defilement, so essential to the process of purification was this ablution by *sprinkling*, yet as Prof. Ripley has called attention to the washing following in the 8th and 9th verses, we must look for the immersion in them. "These ablutions," says the Professor, *appear* to have been *entire*, not partial, and refers us to these texts for proof. Appearances are sometimes deceptive. Let us examine these washings carefully. The stress laid upon them in the commentary, as authorizing the conclusion: "Hence, the original word here used—*immersion*," demands it, we find in the 8th and 9th verses, to which the commentary refers us: "And he that is to be cleansed shall wash his clothes, and wash himself in water that he may be clean, and on the seventh day * * * he shall wash his clothes; also, he shall wash his flesh in water, and he shall be clean."

Now, how were these *washings* performed? If by immersion, then it must be conceded that the texts to which we are referred establish the point that some of these divers *baptismoi* were by immersion; but if by the original no immersion is indicated, then it must be conceded that the Professor has signally failed to establish his point, even from the text of his own selection, and that he has been deceived with the *appearance* of *immersion*, when in fact there was none.

It will be found, by examining the original Hebrew, that *kabas* is used in these texts to signify the washing of clothes, and *rahats* to signify the washing of the person; and that *tabal*, which signifies to immerse in Hebrew, does not appear in these texts at all, no more than it does in any others where *ceremonial washing* is commanded, for it is a fact established by consulting the original Hebrew, "that no washings of persons are enjoined by the word *tabal* (to immerse), even in a single instance, *nor by any word that denotes immersion*, but, without exception, by the word *rahats*, which denotes to *wash*, or *purify*' without any reference to mode.

Tabal is synonymous with the Greek *bapto*, and the English *dip*, or *immerse*. The Hebrew and the Greek are both properly translated *dip*, whenever they occur in the Scriptures, as all scholars testify. But *rahats* has its Greek synonym in *louo*, and its English synonym, *wash*, by the same authoritative testimony. Had it pleased the Holy Spirit to put *tabal* in the Hebrew, it would have shown that the ablution was entire, not partial, as Prof. Ripley claims, for *tabal* means immerse; but as we find, not *tabal*, but *rahats*, the original demands not *immersion*, but *washing*. *Tabal* has, indeed a preparatory subordinate part to perform in the ceremonial ablutions, for when the officiating priest *dips* the living bird in the mingled water and blood, *tabal* is used; but the official cleansing (see Lev. 14: 6, 7) is in the *sprinkling*, and the *washing*, for so reads the text.

I have heard our Baptist brethren remark, somewhat facetiously, that the only baptism in the Pedo Baptist administration of the sacrament, was when the officiating clergyman dipped his hand in the water. There seems to be a parallel to this in the ablution of the leper, the only immersion we can find is in the preparatory dipping of the bird and hyssop, while the effectual cleansing, which by the Holy Spirit is called a baptism, is in the sprinkling which follows; and this seems to us about a fair statement of the case in respect to Christian baptism.

But, to return to the cleansing of the leper, since there is no word which in the Hebrew designates immersion, in view of that fact, I must insist that Prof. Ripley has failed to make good his claim that these ablutions, both of persons and things, were entire, not partial, and therefore immersions, for it is beyond the power of any scholar to find in the Hebrew Scriptures any of these personal ablutions designated by *tabal*, that is, by *immersion*. It should be noted that as part of the ablutions bathing is enjoined, as in Numbers 19: 19: "And on the third day he shall purify himself and wash his clothes, and bathe himself in water." But as the original for bathe is still *rahats*, giving us the same established idea of cleansing, and not immersion, the position I have assumed is not at all affected thereby, though, in the English term bathe a person might or might not immerse himself.

The three specific kinds of uncleanness among the Hebrews were, "every leper, every one that hath an issue, and whosoever is defiled by the dead." As the second class of defilements were all cleansed by bathing (Hebrew: *rahats*), as before, I do not consider that any additional light will be thrown upon the subject by their consideration.

Let me review the ground passed over:

1st. We find in the Epistle to the Hebrews reference made to the temple services: "in which were offered both gifts and sacrifices," which could not make him that did the service perfect, as pertaining to the conscience, which stood in "meats and drinks and divers washings" (Greek: *baptismois*), and carnal ordinances (i. e., ordinances pertaining to the flesh, or person).

2d. The Apostle, in the scope of his argument, which looked forward to the better and more perfect work of Christ, includes among these ordinances the *baptismoi* of the Hebrews, and from these, by direct specification, he singles out the water of separation or purification, which was administered by *sprinkling* (see 13th verse): "For if the blood of bulls and of goats and the ashes of a heifer, *sprinkling the unclean*," as the most eminent illustration of the purifying blood of Christ, therefore the most notable of these *baptismoi*.

3d. That these "divers *baptismoi*" of the Hebrews, as we have discovered by reference to the manner of their administration, as set forth in the Scripture appointments, looking carefully at the meaning of the Hebrew terms, were not confined to any one mode, but represented a class of personal ablutions performed by sprinkling, washing, and bathing, but never in any case by immersion, since the Hebrew *tabal*, which means to *dip*, or *immerse*, and is translated by *bapto*, or *baptizo*, in the Septuagent, and dip in the English version, is never used by the inspired writers to designate the manner in which the purifying element was applied to the person in these ritual ablutions.

4th. Hence, *baptismos* was used by the Apostle in Heb. 9: 11, writing through the inspiration of the Holy Spirit, as a generic term, to indicate the various ablutions of the Hebrews, all of which coincide in the ritual use of water as a purifyer, though the element be applied in various modes, and hence properly answering to the terms used by the Apostle—*diaphorois, baptismois, divers washings*. F. B.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 802 Montgomery Street. (Second Floor, Room No. 1 San Francisco, Cal.

Congregational Singing.

ROBINSON'S SONGS OF THE SANCTUARY. Hymns and Tunes for Congregational Singing. 35,000 copies already sold. Editions for Congregational, Presbyterian, and Baptist Churches. Price, $2 50. A liberal deduction to churches for first introduction.

HENRY WARD BEECHER'S PLYMOUTH COLLECTION. 75,000 copies sold. Congregational and Baptist editions, $2 50.

EPISCOPAL COMMON PRAISE. Appropriate Tunes for all the Psalms and Hymns in the Book of Common Prayer, with select chants. Just published. $2 75.

A. S. BARNES & CO.,
Publishers, New York.

For sale by H. H. Bancroft & Co., San Francisco.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published; with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

CURRENT LITERATURE.

WORKS FOR THE YOUNG.

He is worthy of much praise who is able to produce books for children that may faithfully present and illustrate the subjects included in their education, yet be so pleasing in style that they will be as eagerly sought and read as are the mere stories that now abound. Those who attempt to render these subjects attractive, so often produce only a dilution that is of no real worth, or an exhibition of nonsense which none will discover sooner than a child, that many think it foolish to place any books in the hands of children which have this design. Yet, parents who have seen the works of Jean Macé, the translations of which, have been made by Harper & Brothers, New York, must confess that they deserved to be excepted from this judgment. So far as we are acquainted, in method and style, he is the prince of writers for the instruction of children. Whether he undertakes to conquer the difficulties that beset the beginning of mathematics, as he does by the magic of his "Grandpapa's Arithmetic;" or to gather charms around the rudiments of natural science, and physiology, as he does in his "History of a Mouthful of Bread," and "Servants of the Stomach;" or his object be to present instruction of a more general character, in garments of beauty, as he does in his "Home Fairy Tales," he is always successful. We are ready to regret that one who has so many delightful opportunities to mingle moral lessons with his other teaching, does not more generally do this, adding the grace of his rhetoric to their worth in themselves. Yet the inference can hardly fail to be drawn, when it is not expressed, and the effect of the books, in all respects, is good. If placed within their reach, it is certain that children will read them all. Sold by Bancroft & Co.

DICTIONARY OF SHAKSPERIAN QUOTATIONS.

There is an element of bravery in one who adds another to the hundreds of books already published, relating to Shakspeare and his works. The presumption is that all the changes that are possible have been rung upon the subject. Yet the appearance of this volume from the press of Claxton, Remsen and Haffelfinger, of Philadelphia, is evidence that the variety was not exhausted. The principal peculiarity this has, as compared with others similar in some respects, is that the quotations are not arranged in alphabetical order as to the themes they illustrate, but are more extended than those found in most books of this kind. The lovers of the great dramatist will like it the better because it contains so much of his writings, so agreeably arranged. The book can be bought at the store of H. H. Bancroft & Company.

WE have also received from H H Bancroft & Company,

THE SABBATH SCHOOL INDEX, by R. G. Pardee, A. M., who is known over the country as a man most familiar with everything connected with Sunday Schools, since he has devoted his life to this department of Christian work. This book is a summing-up of his study and experience on the subject, and must be very valuable to all engaged in a service around which he gathers so many charms, and which he shows to be so essential to the success of the Church. It is neatly published by J. C. Garrigues & Co., of Philadelphia.

THE GARLAND, a very fine collection of our best poetry, issued by J. B. Lippincott & Co. Rarely is so much that is excellent, and so little that is inferior, bound together in one volume.

DRIFTING AND STEERING; by Lynde Palmer, one of a series of books called the "Magnet Stories," and well calculated to have a healthful influence on the young. Published by Moore & Nims, of Troy, New York.

A VERY pleasing book, to be sold in numbers, and by subscription, has been handed to us by the agent, Alfred Hirst, called "Scripture History for the Young;" by Rev. John Howard, A. M. The design of the author is to render the principal narratives and facts of the Bible so attractive, by illustrations and simple compilations, that children will be glad to become familiar with them. This design has been well executed in the numbers we have seen.

WE have been more and more in favor of the form in which THE OCCIDENT is published from the beginning, but have become thoroughly confirmed in our choice since the first volume has been bound and presented to us by the publishers. The volume is exceedingly *neat*. We will leave to those who have read the paper to say whether it is worth such tasteful preservation. If, however, any are of this opinion, and would like to purchase copies, the publishers have a few which they can furnish.

LITERARY ITEMS.

LIBRARIES.—There are 31 libraries in California, containing each 1,000 volumes or more, and an aggregate number of 130,000 volumes. The largest of these institutions, the State Library, contain a little more than 30,000 volumes. In addition to the above, there are about 40 smaller libraries in the State, belonging to the various towns, Public Schools, literary associations, etc., and containing from 300 to 1,000 volumes each, making a further aggregate of about 20,000 volumes.—*Cronise's Natural Wealth.*

PORTLAND, Oregon, has now four daily papers. *The Evening Commercial*, is the name of the one lately established. In its editorial of July 15th, we find the following;

"The small sum of 25 cents, expended in the support of a newspaper, devoted to the interests of a city like Portland, and a State like Oregon, is more judiciously laid out than in any other manner."

A PET monkey lately climbed to the top of a bookcase in the monastery of *Mekitarista* in St. Lazare, Venice, and threw down a dust-covered bundle of papers—which turned out to be a long correspondence between Lord Byron and the monks of St. Lazare, with whom he once resided.

MR. BURLINGAME says the Chinese have more books, encyclopedias, pamphlets, magazines, etc., than any other people. Their principal encyclopedia embraces five thousand volumes.

THE London *Spectator*, considers the "Spanish Gypsy," by Geo. Eliot, the noblest sustained poetical work ever produced by a woman, not excepting Mrs. Browning's poems.

SALEM DAILY RECORD.—This sprightly little sheet, has suspended publication, in order to settle up accounts and make arrangements for a still better paper.

To every 100,000 persons, one telegram to 37 letters is received in Belgium; one to 69 in Switzerland, and one to 121 in the United Kingdom.

LORD BROUGHAM, it is said, has left an autobiography, which his brother and successor in the title, hesitates to publish on account of its personality.

THERE is a Bible in the library of the University of Gottingen, written on 5,476 palm leaves.

LONGFELLOW will spend the summer in Europe. He is engaged in writing a new poem.

THE Sacramento people are trying to inaugurate a course of lectures.

"ECCE HOMO," has gone into the ninth edition in London.

FOR SALE.—The Idaho *World* office is offered for sale.

PRINCE GEORGE, of Prussia, has written a tragedy.

Educational.

Menticide.

There are cases of alleged neglect of the education of certain youth by their guardians, under the influence of selfish motives. One of these is that of the prince Charles Edward, commonly called the "Young Pretender." His tutor was Sir Thomas Sheridan, who is charged with slighting his pupil, under the influence of bribes received from Sir Robert Walpole. The latter was the stay of the House of Hanover, and took this method of blasting the rising hope of the banished Stuarts. Another case is that of William the Third. For him, the Pensionary De Witt, is said to have provided a tutor of mean abilities, in order to depress the intellectual energies of the future champion of Protestantism and liberty in Europe. For the credit of human nature, however, we trust that the opinion of Jesse, in his "Lives of the Pretenders," is correct; to wit, that neither of these stories has much foundation on fact. For the same reason we hope that Horne Tooke, as reported by Rogers, in his "Recollections," drew the following assertion, not from observation, but from fancy. "A man with a little mind will educate his son below himself, and keep him there; that he may say, What a wise man my father is! my father is a rich grocer!" Even the alleged trustworthiness of such facts, however, is an indirect testimony to the value of education. That such testimony is not needed, is too much to affirm. Faith in the power of teachers to evolve anything from their pupils which will not otherwise be evolved by circumstances, is none too common. Belief in the existence of much poverty, folly and crime in the world, because certain schoolmasters, ten years ago, were not skillful, is by no means universal.

C. R. C.

How to Act in Danger.

Children should be instructed how to act in circumstances of danger. One warning is, when fire is near not to wait for clothing. This kind of delay seems to have cost the life of the young girl just burned to death on Ellis Street, in San Francisco. Warnings for the danger of drowning are suggested by the Oakland ferry disaster. A young lady saved her life on that occasion by quickly remembering three rules: to keep her mouth closed, her eyes alert, and her feet moving. She sank twice, but, by keeping her lips compressed, swallowed no water. She caught sight of the object (a man's coat) to which she clung till she was drawn aboard the steamer, by looking briskly in every direction on coming to the surface. And she hastened her coming to the surface, and remaining there, by con-

stantly and vigorously treading the water with her feet. Presence of mind is not always presence of ingenuity. It is often merely presence of memory. What seems to be a happy inspiration is only a happy recollection. The mental faculty oftenest stimulated by danger is memory. Let us store the memories of our young folks, then, with precepts suited to dangerous emergencies. — C. R. C.

Leave out the Flourishes.

A little boy, after puzzling his brain over a few lines of poetry, which his teacher had given him to commit to memory, came to his mother ready to weep over his failure, saying: "Ma, I can't read the flourishes." The truth was, the young lady, who wrote well, had an ornamental style, which obscured the plain reading with the fanciful strokes of the pen, and the poor boy was bewildered and sad over the almost hieroglyphical manuscript.

The complaint of the child is touchingly suggestive to parents, teachers, and ministers. It is a cruel thing to obscure precious, eternal verities with flourishes. And how often does the vain desire of personal display, the ambition which seeks popular notice, lead the herald of the cross, no less than the instructor of children, away from the simplicity of the Gospel; and the listener feels, if he does not speak it, the perplexing difficulty of this child—"I can't understand the flourishes."

It is indeed a blessed and comparatively rare thing in any teacher of immortal minds, to be direct and simple—Christlike in self-forgetful endeavors to reach and save others.—*American Messenger.*

Personal.

Seth W. Payne, the pedestrian, has lately arrived in this city from the East. He will walk over California and Oregon, and then go to Asia. It is probable that he will not cross the ocean on foot.

J. F. Jordan, sub-master in the Washington Grammar School, was stoned, knocked down and brutally beaten by some of the larger boys of the school on Wednesday last.

Westmoreland beat Hartson in the Petaluma primaries, although Sonoma County, as a whole, decides for Hartson; also the counties of Lake, Mendocino, and Napa.

Rev. Geo. H. Atkinson, D.D., has been elected for life to the pastorate of the Congregational church in Corvallis, Oregon. He is now making a visit to this city.

Professors Wallace and Wilson are instructing the people of the Sacramento Valley in the mysteries of horse-breaking.

Gen. O. H. Lagrange is the choice of the Republicans of Oakland for Representative to Congress from the Second District.

E. J. Silvey recently fell from the balcony of his hotel in Suisun and received fatal injuries.

General Halleck has gone north on a visit to Victoria, Sitka, and intermediate points.

Hon. C. E. DeLong, of Nevada, sailed from New York on the last steamer.

L. B. Ayer has withdrawn from the management of the Marysville *Appeal.*

Holland Smith has been appointed Postmaster of San Francisco.

A. D. Paddock is Governor of the new Territory of Wyoming.

Rev. E. Thomas, D.D., arrived in this city on the last steamer.

Conness, Cole, and Gorham are on the way to California.

Gen. Crook has been assigned to the command of Alaska.

General Ord has been making a visit to Nevada.

J. W. Winans will sue the *Examiner* for libel.

Elder Knapp has gone to San Diego.

WILLIAM JAMES, Newark, N. J. DAVID MEEKER, J. COBBLEDICK, San Francisco.

MEEKER, JAMES & CO.

Nos. 12 and 14 Pine Street, San Francisco,

Importers and Wholesale and Retail Dealers in

Wagon and Carriage Materials,

Embracing all the Wood Materials for the manufacture of

WAGONS, TRUCKS, CARTS, OMNIBUSES, CARRIAGES, COACHES, EXPRESS WAGONS, BUGGIES, SULKIES, Etc.

Also, Importers of

DOLE'S SPOKE TENONING MACHINES,

DOLE'S HUB BOXING MACHINES, DOLE'S PATENT ADJUSTIBLE HOLLOW AUGERS, THIMBLE SKEINS, PLATED AND IRON-TURNED HUB BANDS, AXLE CLIPS (best hand make), TOP PROPS, FELLOE PLATES, CLIP KING BOLTS,

Wilcox's Shaft Couplings, Pole, Shaft and Yoke Tips, Malleable Iron Castings for Vehicles, all kinds.

SANDER'S NEW YORK BEST HALF PATENT AXLES, CONCORD AXLES, SIDE SPRINGS, Etc.

Having the advantage of a long experience in this line of business, and abundant facilities, we are well prepared to fill any orders with which we may be favored, upon the best terms, and with the same care, promptness, and attention as heretofore.

ORDERS FROM THE COUNTRY SOLICITED.

If from persons unknown to us, they should be accompanied with the cash or city reference.

Merchants and others bringing orders to us, will be met with liberal terms.

Persons ordering goods will please be particular in describing what they want, so as to prevent mistakes.

☞ Catalogue and Price Lists sent on application.

I. S. Van Winkle & Co.

IMPORTERS AND DEALERS IN

Norway and Bar Iron, Cast, Plow, and Toe Steel, Boiler Tubes, Gas Pipe, Fixtures, and Rivets; Case-hardened and Capped Half and Full Patent Carriage and Coach Axles. Also, Concord, Kinsley's, and Boston Axles, Bright and Tempered Warranted Springs, Bolts, Files, Rasps, etc., which we offer at Lowest Market Rates. Country orders solicited.

Corner of Battery and Bush streets, San Francisco, and 93 I St., Sacramento.

Agents Wanted

At once, to canvass for the

MOST POPULAR SUBSCRIPTION BOOKS

Of the Season.

The following works are now being canvassed in several counties of the coast and with the best of success, and good men can do well on any one of them in territory which has not been canvassed.

MACKENZIE'S 10,000 RECEIPTS.—The best book of the kind ever published. SIX HUNDRED COPIES have been sold in a single county in California, and the county not finished.

BEYOND THE MISSISSIPPI.—Containing over 200 illustrations. In several instances the commissions of our canvassers upon this work alone have amounted to over $100 a week.

BANCROFT'S MAP OF THE PACIFIC STATES.—Fifth edition; revised to the present time. Decidedly the best map of the coast in existence.

WELLS' EVERY MAN HIS OWN LAWYER.—As high as sixteen orders in a single day have been taken for this work. It is useful to every one.

PEOPLE'S BOOK OF BIOGRAPHY.—A new work, just ready, by the popular writer, James Parton. A great number of the subjects are self-made men, "Who paved their own way in this world," who were "architects of their own fortunes." Reading like this inspires the young with courage and stimulates them to emulate such examples. A very large sale is expected.

NATURAL WEALTH OF CALIFORNIA.—Comprising Early History, Geography and Scenery, Climate, Agriculture and Commercial Products, Manufactures, Mining, Railroads and Commerce, Population, Educational Institutions, and a detailed description of each County: together with much other valuable information. One large octavo vol. The finest work ever gotten up on the Pacific Coast. Published by H. H. BANCROFT & COMPANY, San Francisco.

LOST CAUSE.—The only Southern History of the war published. Very large sales have been made in the territory now already worked. A new revised and enlarged edition is now ready.

THE AMERICAN WHEAT CULTURIST.—Practical details for selecting and producing new varieties and cultivating on different kinds of soil. A new work just ready.

HISTORY OF THE SECRET SERVICE OF THE UNITED STATES.—"The most exciting and interesting book ever published."

In addition to the above list we have many other first-class works which offer good inducements to active men and new works constantly received.

Those desiring an agency on any of these works will please apply at once for terms to agents, etc., etc., and name two or three counties that will be satisfactory, when their first choice will be given if possible.

Subscription Department,
San Francisco, Cal.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

AGRICULTURAL.

How to Make Gravel Walks.

In the first place, remove all the soil and vegetable mold, where the walk is to be made, to the depth of six or more inches, so that there will be nothing to promote the growth of grass roots. If this precaution is not taken, grass roots will soon spread from the sides of the walk, and grass will cover the entire foot-path. After the way has been excavated to the desired depth, let the depression be filled with course gravel, if it can be obtained, and the surface be covered with clean, small gravel, about one or two inches in depth. Then roll the surface with a heavy roller. If any stray spires should appear in the walk let them be pulled up at once. A more effectual way, however, is to sprinkle salt over the walk, or apply a weak brine with a watering-pot. A weak brine will effectually destroy all vegetation in a walk, at an expense of only a few cents for the salt.

Another way to form the body of a walk, is to fill the excavation with blacksmiths' and iron-moulders' cinders, or pieces of old brick, old mortar, lime siftings, oyster and clam shells, or anything else of a similar character. Then cover the surface with about two inches of sharp, clean gravel, that is free from mold or anything that will promote the growth of vegetation. If gravel must necessarily be carted a long distance, the surface of rubbish may be covered with only a thin coating of clean gravel. Let it be borne in mind that one barrel of salt sowed over the walk will save much labor and expense in keeping down weeds and grass. This is a very cheap and satisfactory manner of making a loose or open gravel walk. Where the soil is heavy, and there is only a thin stratum of mold on the surface, resting on a compact subsoil, in which there is little or no vegetable matter, nothing but the thin stratum of mold need be removed, where a walk or carriage drive is to be made.—*New York Times.*

How the Chinese Make Dwarf Trees.

We have all known from childhood how the Chinese cramp their women's feet, and so manage to make them "keepers at home;" but how they contrive to grow miniature pines and oaks in flower pots for half a century has always been much of a secret. They aim first and last at the seat of vigorous growth, endeavoring to weaken it as much as may be consistent with the preservation of life. They begin at the beginning. Take a young plant—say a seedling or cutting of a cedar—when only two or three inches high, cut off its tap-root as soon as it has other rootlets enough to live upon, and replant it in a shallow earthen pot or pan. The end of the tap-root is generally made to rest on a stone within it. Alluvial clay is then put into the pot, much of it in bits the size of beans, and just enough in kind and quantity to furnish a scanty nourishment to the plant. Water enough is given to keep it in growth, but not enough to excite a vigorous habit. So, likewise, in the application of light and heat. As the Chinese pride themselves on the shape of their miniature trees, they use strings, wires, and pegs, and various other mechanical contrivances, to promote symmetry of habit, or to fashion their pets into odd fancy figures. Thus, by the use of very shallow pots the growth of the tap-root is out of the question; by the use of poor soil and little of it, and little water, any strong growth is prevented. Then, too, the top and side roots being within easy reach of the gardener, are shortened by his pruning-knife or seared with his hot iron. So the little tree, finding itself headed on every side, gives up the idea of strong growth, asking only for life, and just life enough to look well. Accordingly, each new set of leaves become more and more stunted, the buds and rootlets are diminished in proportion, and at length a balance is established between every part of the tree, making it a dwarf in all respects. In some kinds of trees this end is reached in three or four years; in others ten or fifteen years are necessary. Such is fancy horticulture among the Celestials.—*The Technologist.*

Regularity in Feeding.

Every good farmer knows that any domestic animal is a good clock—that it knows, almost to a minute, when the regular feeding-time has arrived. If it has been accustomed to be fed with accuracy at the appointed period, it will not fret till that time arrives; after which it becomes very uneasy and restless until its food comes. If it has been fed irregularly. it will begin to fret when the earliest period arrives. Hence, this fretting may be entirely avoided by strict punctuality; but it cannot be, otherwise. The very moment the animal begins to worry, that moment it begins to lose flesh; but the rate of this loss has never been ascertained—it is certainly worthy of an investigation—and can only be determined by trying the two modes—punctuality and irregularity—side by side, under similar circumstances, and with the same amount of food, for some weeks or months together.

There is one precaution to be observed in connection with regular feeding, where some judgment is needed. Animals eat more in sharp or frosty, than in warm and damp weather. Hence, if the same amount by weight is given at every feeding, they will not have enough when the weather is cold, and will be surfeited when it is warm and damp. Both of these evils must be avoided, while a little attention and observation will enable the farmer to do it. —*Tucker's Rural Affairs.*

Cutting Timber.

Complaints having been made to the Registrar of this District of the great waste which is being committed on public lands in the timbered counties of the Coast Range, particularly in Santa Cruz County, a government agent has been designated to visit that county and other places and report the facts for further action. There is less excuse now than heretofore for waste, as much more of the timbered lands have been made accessible through school warrants, scrip, etc. Nearly all the bark used for tanning purposes in Santa Cruz County has heretofore been taken from the public lands. The beautiful chestnut oak is cut down, the bark stripped off, and the denuded trunks are left to decay on the sandhills and in the cañons. The red-wood forests have been devastated, the trunks of the best trees taken to the mills for lumber, and what the woodman did not destroy, the fires of autumn have lapped up. Nearly the same condition of things is true of Mendocino County. Heretofore it has been difficult to acquire title to lands which have not been officially surveyed. Possessory claims have been held good under State laws. Parties have gone on to the lands, in many instances temporarily, and sold the timber to owners of saw-mills. No possessory or preëmption claim involves the right to denude the lands of timber. The title is in the Government until the patent issues. Until this is done the occupant can only use so much of the timber as is necessary for fences, buildings, and the actual improvement of the property.—*S. F. Bulletin.*

Fairs at Horse Races.

There has been considerable discussion, whether it is wise to have have horse-racing at agricultural fairs. The question would seem to suit the exact state of things in these days better, if it took the shape whether it is best to have agricultural fairs at our State and county horse-races. We have no doubt that, other things being equal, the better Christian a man is, the better he enjoys the graceful movements of a fine horse, and a relish for driving at 2.40 speed, argues no dreadful depravity, especially if the horse enjoys the thing. But that the race-course, with its gambling, brutalities and dissipation is a very different thing, with which no real gentleman can have sympathy, needs no argument. That all the evils of the race-course have been transferred to our fair-grounds, everybody with two eyes knows. We greet with much satisfaction, therefore, the resolution of the Illinois State Board of Agriculture, that "no trial of speed by racing will be allowed" on their fair grounds this year, and commend their example to all the State and County Agricultural Societies of the land, which have failed as yet to take any similar action. Now let us have war on the fat women shows, and brass jewelry swindlers, and a long step will be taken toward making our agricultural fairs more worthy the attendance of self-respectful people, and less dangerous to the public morals.—*Advance.*

MINING.

Mining Under the Sea.

The miner's life can hardly be a cheerful one, exposed as he is to the many dangers of explosions from fire-damp, of crumbling walls, of falls down fearful shafts, and the general unhealthfulness of working where the purifying sunbeams are ever excluded. But mining under the sea must have its peculiar trials and terrors.

There is a vast copper mine in England, where shafts extend many hundred yards under the bottom of the sea. The moaning of the waves as they dash against the rocks is forever sounding in those gloomy aisles. When the storms come, the sound of the waters becomes so terrific, that even the boldest miners cannot stay below, but leave their work and come out upon the firm upper earth. Overhead, are masses of bright, pure copper, streaming through the gallery in all directions, traversed by a network of thin red veins of iron, and over all the salt water constantly drips, drips down from tiny crevices in the rock. Immense wealth of metal is contained in these roofs, but no miner dare give it another stroke with his pick-axe. Already there has been one day's work too much upon it, as a huge wedge of wood driven into the rock bears witness. The wedge is all that keeps back the sea from bursting in upon them. The roof is probably not over three feet in thickness, and in many places may be less. Yet here are three tiers of galleries, where men work day by day, not knowing but at some fatal hour the flood may be upon them, rendering all escape as hopeless as it was in the days of Noah.

The awe-stricken visitor hurries away from the scene, with a heart appalled in view of its hourly dangers. Who could win money at such a risk, with that sullen roar of the ocean forever sounding its warning in his ears?—*New York Times.*

Coal on Green River.—The Reese River *Reveille* of the 14th inst. says:

"We were shown this morning a letter written at Green River City on the 5th inst., in which the writer claims to have made important discoveries of coal. We give the following extract from the letter: 'Myself and companion located a section of land twenty-two miles from here on Bitter Creek, for the purpose of mining for coal. We have 19 coal veins in the section; the one we are now opening is five feet thick, and extends through the whole section of one square mile. From the mouth of our tunnel to the railroad track the distance will be only about 300 feet. The coal is of the anthracite quality. We have built a stone house on the claim, and have made openings on the four quarter-sections. Our tunnel is now about thirty feet long, and we are taking out about four tons of coal per day. There is no market for it at present, but we can afford to wait for the market. The railroad company are pushing the work ahead, and their camps dot the road every two miles between this place and the North Platte, where the cars are now running, and they will reach this point by the middle of September. This town has a population of 1,000 inhabitants, and about every other house is a whisky mill.'"

Mining in Russia.—As a gold-producing country, Russia ranks next to the United States, and the colony of Victoria, the present annual yield being about $15,000,000. The mines are all in Siberia, in the eastern slope of the Ural and on the northern slope of the Altai mountains. The former chain runs with the meridian from latitude 45° to 67°, and is auriferous for most of its length, but its chief wealth is on the Siberian side.

And the Altai chain runs nearly parallel with the equator, about latitude 50°, and the auriferous river

beds and hills extend as far as 60°, or even further. The Altai remins us of the Sierra Nevada; both chains separate high and desert table lands from districts with rich soil and abundant streams; and the side which has the streams abounds in gold, while silver is found on the other side.

The climate of Siberia is very severe, and in most of the placer districts the ground is constantly frozen at a depth of three and a half feet, the cold of winter penetrating much deeper, and the thawing influence of summer only reaches to that depth. Washing is only possible between May and September, so that half the year is lost for mining purposes. The mines are owned by the government or by wealthy proprietors, and the laborers are ignorant and poor men, who bring neither intelligence or zeal to their aid. Each laborer receives from his employer a certain ration of meal, and his money wages amount to about half an ounce of gold for a year, or something like half an ounce of silver per month—50 or 60 cents a month.

The methods of placer working are not described fully in any of the authors whose books are accessible in this country; but it seems evident that the amount of earth washed is considerably less, in proportion to the number of laborers, than in the Anglo-Saxon mines. It is said that the Californian modes of washing have been introduced to a limited extent in a few of the districts; but we have no correct account of large ditches, of deep hydraulic claims, of ancient river beds, or of various other interesting facts which mark mining in California. —*Ross Browne's Report.*

FIRST CRUSHING OF ORE IN SWEETWATER.—The *Sweetwater Mines*, of July 3d, published at South Pass City, says:

"The first crushing of ore ever done in Sweetwater was done Friday, June 26th, at the splendid power arastra of Messrs. Fairfield, Bronson & Marshall. The occasion was one of considerable importance to our young mining country, and was so considered by quite a number of our estimable citizens, who showed their interest by visiting the works during the day."

RICH STRIKES IN MARIPOSA.—The *Mail* says an exceedingly rich gold quartz ledge, five feet thick, has been discovered on the Buckingham Mountains, some ten or twelve miles from that place. Another rich strike is reported near Cariboo, in the vicinity of Mariposa.

NEW AND STRANGE.

The Chicago Waterworks.

No waterworks machinery in the country is contained in a finer room than the machinery of the Chicago Waterworks. This (the main room), when finished, will be 124 feet in length and 65 feet deep. It contains three pumping engines, one of which was erected in 1853, and one in 1857, and one (the lately erected engine) in 1867, the valve motion being Gill's rotary cut-off. The new engines are models of workmanship. The first time they were run to pump water for the City of Chicago, they worked with the utmost smoothness, and were kept running day and night for seven weeks without a moment's cessation. Yesterday, they had been running for over three weeks, and yet worked with the smoothness and perfection of a watch. The air vessel, twenty-six feet in height and four feet in diameter, and cylindrical in form, is made of wrought iron, and painted to represent New England granite. One of the most prominent points of attraction about the machinery is the fly-wheel, which is a gem of mechanism. It is twenty-four feet in diameter, weighs twenty-five tons, and is polished from its centre to its periphery. The whole of the wheel has been turned, not a bolt or nut being visible. Extending entirely around the engine-room is a beautifully designed iron foot-walk, for the convenience of the engineers. The well-curb is 37 feet in diameter, and is sunk 23 feet below the surface of the lake. The interior of the curb is cylindrical in shape, and in it is situated the foundation of both engines. Indeed, within a space of 37 feet, including the above, there is a foundation that supports a weight of over 2,000 tons, including the engine foundation, the well, and their adjuncts. In this connection may be mentioned the main delivery pipe, which all visitors look at with curiosity, as the communication between themselves and the lake. This pipe is 28 inches in diameter. Above it is a guage, which works so accurately that the dial hand is almost immovable, though under ordinary circumstances it would be constantly vibrating.

In the boiler rooms are two boilers. These rooms are 45 feet in length and 38 feet in width. The two boilers in them are each 12 feet three inches in diameter and 22 feet in length.

In another portion of the yard may be seen the places where communication is made with the shore end of the lake tunnel. The tunnel terminates in a great chamber 16 feet in diameter, composed of five compartments, which receive and distribute the water to the different pump wells. This chamber is 40 feet deep.

The Board are preparing to sink another well on the south side of the building, preparatory to the erection of another engine.—*Chicago Republican, April 30th.*

Iceland.

In the cold North Sea, a little below the Arctic circle, lies the island called Iceland. Presenting somewhat the form of an irregular ellipse, it occupies an area of about 37,000 square miles, affording the dull diversity of valleys without verdure, and mountains without trees. Desolation has here fixed its abode. It broods among the dells, and looks down upon the fiords. The rocks and hill-sides are sculptured with signs of an igneous origin, while the whole island is still the sport of convulsion. The ground trembles with the throes of the earthquake; the Geyser spouts scalding water; the plain belches mud; while the great Jokull, clad in robes of eternal snow—true priest of Ormuzd—brandishes aloft its volcanic torch, and threatens to become the incendiary of the sky.

The interior of the island is traversed with difficulty even during the summer. Here may be seen peaks that the Alpine club dare not climb. The scanty population dwell in thinly-settled hamlets, along the fiords and streams, leaving the greater portion of the territory to the fox, the reindeer, and the occasional Greenland bear that floats over on the berg.

Only two quadrupeds, the mouse and the fox, are indigenous. So sterile is the soil, and so brief the summer sun, that life is supported only by a struggle. Indeed, the neighboring ocean is more hospitable than the dry land—for, of the thirty-four species of mammalia, twenty-four draw their food from the roaring main. The same is true of the birds, fifty-four of the ninety species being water fowl. Here and there may be seen patches of meadow, a few pastures, and tracts of arable land; yet so poor is the soil, that man, like the lower orders, must eke out his subsistence by resorting to the sea. —*Round Table.*

Bridging the British Channel.

The *Courrier du Pas-de-Calais* publishes the following account of an audience granted by the Emperor to M. Boutet, engineer, the promoter of a plan for making a railway across the Channel: "The reception was of the kindest description. The Emperor is conversant with the subject in all its points of view. 'Draw me up,' he said, 'a detailed memorandum of the means of construction, with all the plans, an estimate of the cost, the time required for the execution, and a calculation of the profits of the undertaking. I will examine all these myself, and we will support you. This project,' added the Emperor, 'is far more practicable than all the tunnels and other expedients proposed, in none of which I have any confidence.' A large plan of the project was spread out on the floor; the Prince Imperial, in leaving the room, jumped over it. 'Monseigneur,' said General Fave, who had introduced M. Boutet, 'you have been the first to pass the bridge.' The Emperor smiled, and in retiring repeated the words, 'We will support you.' The enterprise has therefore, made a decisive step in advance, inasmuch as it has just received the Imperial support."

The Wonders of Seed.

Is there upon earth a machine, is there a palace, is there even a city, which contains so much that is wonderful as is inclosed in a single seed—one grain of corn, one little brown apple-seed, one small seed of a tree, picked up, perhaps, by a sparrow, for her little ones, the smallest of a poppy or blue-bell, or even one of the seeds that are so small that they float about in the air invisible to our eyes? Ah! there is a world of marvelous and brilliant beauties hidden in each of these tiny seeds! About a hundred and fifty years ago the celebrated Linnæus, who has been called "the father of botany," reckoned about 8,000 different kinds of plants; and he then thought that the whole number in existence could not exceed 10,000. But a hundred years after him, M. de Candolle, of Geneva, described about 40,000 kinds of plants, and he supposed it possible that the number might even amount to 100,000. Well, have these 100,000 kinds of plants ever failed to bear the right kind of seeds? Have they ever deceived us? Has a seed of wheat ever yielded barley, or the seed of a poppy grown up into a sunflower? Has a sycamore tree ever sprung from an acorn, or a beech tree from a chestnut? A little bird may carry away the small seed of a sycamore in its beak to feed its nestlings, and on the way may drop it on the ground. The tiny seed may spring up and grow where it fell unnoticed, and sixty years after it may become a magnificent tree, under which the flocks of the valleys and their shepherds may rest in the shade.—*Rural New Yorker.*

General Selections.

Nothing but Leaves.

Nothing but leaves; the spirit grieves
Over a wasted life;
Sin committed while conscience slept,
Promises made but never kept,
Hatred, battle, and strife;
Nothing but leaves!

Nothing but leaves; no garnered sheaves
Of life's fair, ripened grain;
Words, idle words, for earnest deeds;
We sow our seeds—lo! tares and weeds;
We reap with toil and pain
Nothing but leaves!

Nothing but leaves; memory weaves
No veil to screen the past:
As we retrace our weary way,
Counting each lost and mis-spent day—
We find, sadly, at last,
Nothing but leaves!

And shall we meet the Master so,
Bearing our withered leaves?
The Savior looks for perfect fruit—
We stand before Him, humbled, mute;
Waiting the words He breathes,—
"Nothing but leaves?"

—*Hymns of the Ages.*

Paul on Mars Hill.

What is that bold, projecting rock, just under the temple-crowned Acropolis, and sloping on the northeast into the plain below? It is the Areopagus, or Mars Hill. And who is that dauntless man that stands there in such tranquil grandeur? It is the great Apostle to the Gentiles.

The ascent is by sixteen stone steps cut in the rock, from the sotheast. It is called Mars Hill, say some, because Mars was once arraigned there, and tried and condemned for a criminal offense; others, because he there sat as judge; others still, which is more probable, because, in the early history of Athens, it was the site of a temple erected to this god of war. Here held its sessions that celebrated Court, called the Areopagus, composed of the old archons—the choice, tried men of Athens. They were generally elected for life, or until banishment overtook them; for Athens, capricious, poetic Athens, that nurtured more wise men than any other of the ancient cities, oftener banished them, and almost as often, repenting of her haste, called them back again.

These judges had charge of cases political and ecclesiastical, municipal, provincial, and sometimes national. The number, at different periods, varied from nine to thirty. Here they sat on these uncushioned seats of solid rock; and during the trial of criminals, that they might not be swerved from justice by the sight of accuser or accused, they sat in the night. They would listen to no eloquent pleas, lest sophistry might beguile them from equity, but only to testimony and a plain statement of facts. The blue heavens was their only canopy, and the pure, free air, their encompassing walls. Until the time of Pericles, this Court was the purest, noblest, and most patriotic body of men in Greece—Themistocles, Aristides, and Alcibiades being chief among these Areopagites.

So unifying was the spirit of this old Court that new members, who had not by previous culture and discipline been brought into its patriotic and legal affinities, were soon judicially regenerated, and assimilated by its organizing forces.

The Bema, hard by, was the popular branch of government, where the orators bore sway, and the people clamored. This democratic body tended to factions and anarchy; the other, oligarchical and aristocratic, to castes and despotism. The populace was capricious and fickle; the judges, demure and inflexible; and together, they gave Athens the best government of any of the Grecian states.

The apostle had mingled with his own people in the synagogue, and preached unto them "Jesus and the resurrection," but they did not believe. He encountered the stoics and Epicureans, whose schools were hard by in the Agora; the one a school of Gallios, the other of wine-bibbers and gluttons. Between these two, the degenerated Greeks of that day were divided. The apostle was at home in their language and literature, their philosophies and their theologies. And it is no wonder that "his spirit was stirred in him," in a city "wholly given to idolatry," where gods and goddesses were plentier than men or women. They had erected a temple, or a statue, or an altar, for every god they knew, and sometimes all of them to one; and, besides these, there was an altar with this inscription: "To the unknown God." No wonder Paul thought them very *religiously disposed*, "in all things," *given to worship*—which is here a more exact rendering of the Greek term than the common one, "too superstitious." It was partly a compliment, and partly a quiet sarcasm.

When he announced to them Jesus and the resurrection, they thought he was introducing two new divinities, and as this was against the Roman law, and as neither of these was catalogued at the Pantheon, the more serious regarded him as a disturber; and the frivolous and profane as a "babbler." But their inquisitiveness and desire to hear "something new," prevailed over their scruples. They led him up those steps, and bade him explain to them his "new doctrine."

He addressed them by a title of which they were ever proud—"men of Athens"—and pointing to the altar erected to the unknown God, "whom ye ignorantly worship, Him declare I unto you." It is not a new nor strange God that I propose for your adoration, but the only true and living one. He "made the world," and can he be confined to "temples made with hands," though chaste as yonder Doric Parthenon? "He giveth to all life and breath and all things." How can he be carved in stone, and "worshipped with men's *hands*, as though he needed" these costly shrines? Since "we are his offspring," as Aratus, Cleanthes, and others of your own poets have said, and as *we* are not made "of gold or silver or stone," we ought not to think that the Godhead is made like unto that gold and ivory statue of Minerva, "graven by art and man's device."

But there were times of "ignorance"—those classic days of Solon and Pericles, when your fathers reared these model temples and carved these magic statues; intellectual noon indeed, but moral midnight, without the glimmer of a single star; and God was forbearing and "winked at" it. But now that the sun has risen, he "commandeth all men everywhere to repent." For there is another seat of judgment, loftier than this rock, and another judge, wiser and more just than the old archons, before whom we must all appear.

What a sermon! what a preacher! what a pulpit! It is impossible to conceive, without standing on the spot, the power of this appeal to their poets—of this sober contempt poured upon their most glorious works of human art. Ascending the steps over which the Athenians led this bold apostle, I took out my Greek Testament and read the whole passage. It was to me like a new revelation. As I stood where he stood, and looked upon the objects of nature and of art that came under his eye, wanting only some of the statues and altars and entablatures to complete the view;—as I there read his discourse in his own words, I felt its fitness and beauty and power as I had never done before, and as it can be felt nowhere else.

The great Plato, after his return from Egypt, where he had learned from the Jews the doctrines of Theism and Divine Providence, partially concealed his sentiments, lest he should be arraigned on Mars Hill and tried for heresy. Socrates, a better man than Plato, with more grace and grit, yet only dared not disavow his belief in these primal truths, when it was proved upon him. In Paul alone we behold the dauntless champion of truth. Socrates and Plato were moralists and philosophers. Paul was both these, and more—he was a Christian preacher. They were timid, and shrank from the danger of assailing error. The love of Christ constrained him, and a sense of the pestilential influence of error left him no alternative but a fearless attack upon it, in a skilful promulgation of the Gospel.

This sermon has been pronounced by some Christian preachers, a comparative failure. They think it too scholastic, too much about natural theology, and too little about Christ. I should not like to sit in judgment on one who spake as did the apostle,—"not in words which man's wisdom teacheth," even if I could not perceive the pith or point of what was said. I should not like to call a sermon ill-shaped, or out of time or place, which was the means of gaining one loyal subject to the great King, or of helping a single struggling saint on the way to heaven, or of proclaiming to benighted heathen the unknown God that made the world and governs it, and is the Judge of men—though not one of them gave heed to it.

It would require not a little moral audacity to assume to know better than the apostle, better than the Holy Ghost, what was befitting the time, the subject, the speakers, and the auditors.—*Prof. Lawrence in Hours at Home.*

The Chinese Embassy.

There is an old saying that everything has a handle, if we only knew where to find it. For ages it has been the complaint of the civilized world that China had no handle. We could not get at it or into it, or do anything with it. The result shows that there was a way nevertheless, for Mr. Burlingame has found it. He has pronounced "Open Sesame," and the everlasting hinges begin to creak, the huge gates begin to turn, and the deep recesses of ancient empire are opened to light. We enter and China becomes part of the world.

And what do we see here to-day? Live Ambassadors from an empire which traces its origin back, through the mists of antiquity almost to the time when the smoke of sacrifice went up from the heights of Ararat, and Nimrod hunted the buffalo and boar on the plains of Shinar—an embassy from the very nation whose primal founder and lawgiver, before Pythagoras began disputing in the schools, laid it down as an unchangeable law that all the outside world were barbarians and that "there should never be legislation for barbarians." The "Infallible Medium" of Confucius has given place to *Wheaton's Law of Nations.* The imperial descendant of Kubla Kahn who has stood still for two thousand years has all of a sudden commenced swinging round the circle.

In good truth, this sudden movement of the Chinese Government is one of the greatest events of this eventful decade. It is the introduction of a new and vast element into the activities of the world—an element which is to change the aspect of general civilization, and particularly to tell upon the future interests of our own Republic. The mere making China our next neighbor, as will quickly be done by the completion of the Pacific Railroad, we are accustomed to say, is fraught with prodigious consequence to all of our commercial interests; but we need something else than mere physical neighborhood to secure that. Were China to maintain its old *moral* alienation from ourselves and the rest of the human family, the Pacific Railroad would not help us a tittle to any new commercial relations. For all commercial purposes, so far as China is concerned, it might as well stretch toward the moon. The best thing about this Embassy is that it is a practical assurance that the old moral barrier which divided China from us has disappeared forever, giving our future intercourse with it the moral facilities and securities without which successful commerce can no where exist.

It is curious how inadequate is the common estimate of the greatness and development of the Chinese Empire. We can scarcely avoid a patronizing air in showing the Envoys all our fine things, when the truth is that they have to be very polite to avoid laughing in their sleeves while we do it.

We talk of our glorious history, when, in fact, our country is as the babe of yesterday compared to theirs. Before the founding of Rome, prior to the first monarchs of Israel, China had attained the dignity of a settled State, if not with its present greatness, yet with all the germs of that greatness.

Our territorial extent, of which we are so proud, is no larger, even with frozen Alaska in, than their "Flowery Land." A glance at the map will show that China embraces no less than thirty-eight degrees of latitude and seventy-four degrees of longitude. And the resources of this vast area are quite equal to ours. It has about the same extent of coast line, and occupying every conceivable altitude

from the sea level to the snow-line, its soil can supply every material want known to man.

We boast of our population, but probably our Chinese visitors are quietly wondering how such a handful of people venture to call themselves a great nation. Their land, according to the last census, has four hundred millions, nearly a third of the entire human race, and far more than all the population of North America and South America combined. Several of their eighteen Provinces, answering to our States, have each more people than our whole Republic. They have a plenty of cities, each with a larger population than the largest of our States. Our New Yorks and Philadelphias are but villages in comparison. Neither is this immense population stationary as we are apt to imagine. In fact they are even more locomotive than Americans. Travelers have said that the amount of internal traveling in China is really extraordinary—that there are continuous streams of travelers on horse, on foot and on litters from Canton to the Great Wall, some 1,500 miles, in many parts so crowded as to impede one another, and so numerous as to leave no traveler out of sight of others, before and behind. Among these are long lines of merchandise. Nor is this locomotion all internal, as we have pretty good proof in the incessant movement which has been going on from China to California ever since the discovery of gold in the latter.

Nor can we assume any superiority on the score of our great inventions and discoveries. Our visitors will see little here, from the printing art to the mowing machine, with which their ancestors were not familiar a thousand years ago—the same ancestors who originated the manufacture of porcelain, and first gave to mankind the mariner's compass. As for the art of all arts, the art of fertilizing the ground, and getting much food from little space, the Envoys doubtless consider us altogether primitive. Familiar as they are with that elaborate system by which every particle, liquid or solid, of the refuse of of their great cities is saved and applied as manure to the fields, they cannot but stare at the recklessness or stupidity which suffers all of the offal of our streets to be carted or washed off into our bays and rivers, defiling the waters, and worse than absolute waste.

We talk a great deal about our unparalelled *progress*, and are fond of making that our unique distinction among the nations. Well, as to that there may perhaps be some doubt whether China has not the precedence,—the same China that we used to laugh at as the most backward of nations. At all events we have the word of Mr. Burlingame to the contrary. In his banquet speech, the other evening, he claimed for China this very distinction of unequaled progress. His emphatic language was: "*I aver that there is no spot on earth where there has been greater progress made, within the past few years than in the Empire of China;* she has expanded her business; she has reformed her revenue system; she has established a great university, where modern science and foreign languages are to be taught." China has been pushing on to this position in spite of being engaged at the same time in repelling the attacks of the two strongest nations of Europe, and in putting down a domestic rebellion of incomparably greater magnitude than our own. Surely this argues that China is not superannuated yet, and that old as she is, she still retains wonderful inherent energy. Christianity, everywhere the most potent of all elements in advancing national development. Under the present system, all the old bars to the introduction of Christianity have been removed, and the most unrestricted scope is given to this as to every other civilizing agency. China is hastening to its rightful development. It is preparing to play a part in this wonderful period which no imagination can over-estimate. Our people are doing nobly in so hailing the Embassy which heralds it.—*New York Times.*

REV. P. V. VEEDER.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

FAMILY READING.

A Great Man.

That man is great, and he alone,
Who serves a greatness not his own,
For neither praise nor pelf;
Content to know and be unknown:
Whole in himself.

Strong is the man, he only strong,
To whose well ordered will belong,
For service and delight,
All powers, that in the face of Wrong,
Establish Right.

And free is he, and only he,
Who, from his tyrant passions free,
By Fortune undismayed,
Hath power upon himself to be
By himself obeyed.

If such a man there be, where'er
Beneath the sun and moon he fare,
He cannot fare amiss;
Great Nature hath him in her care;
Her cause is his.

Who holds the everlasting law,
Which neither chance nor change can flaw;
Whose steadfast course is one
With whatever forces draw
The ages on.

If such a man there be, where'er
Beneath the sun and moon he fare,
He doth not fare alone.
He goeth girt with cohorts' powers,
The monarch of his manful hours,
Whose mind's his throne.

He owes no homage to the sun;
There's nothing he need seek or shun;
All things are his by right;
He is his own posterity;
His future in himself doth lie;
His soul's his light.

Lord of a lofty life is he—
Loftily living, though he be
Of lowly birth; though poor,
He lacks not wealth, nor high degree
In state obscure.

The merely great are, all in all,
No more than what the merely small
Esteem them. Man's opinion
Neither conferred, nor can recall
This man's dominion. —*Owen Meredith.*

Five Minutes.

Not one young man in fifty knows the value of five minutes—not the general value, as it used to be talked to us in school, when we appreciated the time only as it divided us from our marbles or our game of ball. We mean the actual value of five minutes as appreciated by the man who has accustomed himself to save every five minutes which he has an opportunity to waste—the actual value as seen at the end of a year in which not more than five a day have been saved in gaining information.

"How shall I save the five minutes?" By a few weeks' course of discipline, during which a habit of turning to a book, whenever one has nothing else to do, is formed. This habit is worth more to a young man than even the habit of devoting half an hour a day to reading. The stronger the habit grows, the more time will be saved.

We do not mean that it is well to have a book near the counting desk. On the contrary, we believe that in business hours nothing but business should be attended to. By dividing the attention, little is gained in this way of literary information, and everything is lost in the way of business promptness. It is in the hours of business that so many five minutes are wasted.

In waiting for breakfast, for instance—some of us now and then get down before the last bell rings—there may not be time to take up a book. Take it up, nevertheless; it is easily laid down again, and some delay in the kitchen may give you five minutes time. Some thought, or date, or fact, may catch pour eye in that five minutes, which will be of use and pleasure to you in after life—to think of, if for nothing else.

So, too, in waiting for the dinner bell and for supper, and during the evening, there are many times in which there is a spare five minutes, and which is usually spent in thinking of business or staring into the fire. Now it is no exertion to take up a book and to read, but one who has not acquired the habit of doing so never thinks of the things, except at stated periods, or when he has abundance of time and wishes to kill some of it. A person who has acquired this valuable habit takes up a book unconsciously. He acquires information without realizing that he is doing so, and without the least exertion.

Acquire this habit, then, reader, if you have not already done so. It will require some exertion at first, but it will soon become, like other habits, second nature. You will then be constantly accumulating knowledge. Your mind will be growing as unconsciously as your body grew in childhood. Remember: pick up a book—open it—if you only look at its title-page, or a preface, and are obliged to close it—everywhere—at all times—subject, of course, to the demands of business and the rules of propriety. —*N. Y. Evening Mail.*

The Sick Room.

A sick room is no place for curiosity. If no good word can be said, or kind services rendered in a sick and dying room, it is the last place to which one should go as a spectator. Every new face, the tread of every uncalled-for footstep, the demands upon the air for breath, by the breathing of such as must be in attendance, is an injury in sickness, and especially when debility is great.

Nine out of ten feel as if it was an act of rude neglect if they were not invited into a sick room, and a direct insult if told that they must not go. Some persons go into a sick room and sit hour after hour, with eyes fixed on the sick person, occasionally whispering to some equally indiscreet one that may chance to be nigh. This is absolutely intolerable. Others will hang about the door and peep at the sufferer, as they would steal a look at some show. This, too, is intolerable.

A sad mistake, common in a dying chamber, is to suppose that the dying person has lost perception and sensibility, because unable to speak. So far from this being the case, it is believed that the perceptions are more keen and delicate than when in health. Always let it be remembered in a dying room, that the departing friend may hear all, and see all, when the persons present will little suspect it. How important, then, that in a dying room everything should be made what it ought to be, for the salvation and quiet of one who is being broken away from all that is dear on earth, and approaching all that is serious in eternity. The sacredness and stillness of the scene should be disturbed with great care and caution.

One word more in regard to a sick room. A very great mistake is made in regard to the length of prayers and loud and excited speaking in prayers in the sick room. This is an error too common, and often the occasion of great suffering to the sick and dying.—*Reformed Church Messenger.*

"You See if I Do!"

Privileged to spend a Sabbath in company with one of the most venerable of our ministers in the West, under the roof of one of his sons, also a minister, I availed myself of the opportunity to learn good lessons from his experience. God has given him several sons, all of whom are already useful ministers, or hopefully preparing for the ministry. They seemed to be an exceedingly happy family. One incident from the family history seems to me highly instructive, and I trust I shall give no offense by putting it in print. When one of the sons was a child of two or three years, the father said to him:

"To-morrow afternoon we shall all hear you cry—oh, how loud!"

"What for, papa?"

"Because, a horse and carriage will come to the front gate, and mother and little brother will get into the carriage, and drive away, and you cannot go with them. You will want to go so much, and O how you will cry!—all the neighbors will hear you!"

The little fellow comprehended the whole, and had opportunity to consider how badly such crying would sound, and how unfit for him it was to be such a baby. In a very firm tone and decisive accent, he replied:

"*You see if I do!*"

When the time came, the child stood in the door, saw the carriage drive away with mother and little brother in it, felt all the pain and had all the struggle, but remembered his purpose and did not cry. He bore it all in manly silence.

Is it not wise thus considerately to give a little child opportunity to prepare himself for a severe effort at self-control? Might not some of our little ones be saved from some of their most bitter and most useless struggles? Would it not tend to give us more self-governing men, capable of wisely governing and teaching others also? I thought it too good an instance to be lost.—*Christian Herald.*

Looking Out for Slights.

There are some people always looking out for slights. They cannot pay a visit, they cannot even receive a friend, they cannot even carry on the daily intercourse of the family, without suspecting some offense is designed. They are as touchy as hair-triggers. If they meet an acquaintance in the street who happens to be preoccupied with business, they attribute his abstraction to some motive personal to themselves, and take umbrage accordingly. They lay on others the fault of their irritability. A fit of indigestion makes them see impertinence in everybody they come in contact with. Innocent persons, who never dreamed of giving offense, are astonished to find some unfortunate word, or some momentary taciturnity, mistaken for an insult. To say the least, the habit is unfortunate. It is far wiser to take the more charitable view of our fellow-beings, and not suppose a slight is intended, unless the neglect is open and direct. After all, too, life takes its hue, in a great degree, from the color of our own mind. If we are frank and generous, the world treats us kindly. If, on the contrary, we are suspicious, men learn to be cold and cautious to us. Let the person get the reputation of being touchy, and everybody is under more or less restraint; and in this way the chances of an imaginary offense are vastly increased. Your people who fire up easily miss a deal of happiness. Their jaundiced tempers destroy their own comfort, as well as that of their friends. They have forever some fancied insult to brood over. The sunny, serene contentment of less selfish dispositions never visits them.—*Christian Union.*

Love of Children a Sign of Good.

A man may have many vices upon him, and have walked long in a bad course; yet, if he has a love of children, and can take pleasure in their talk and play, there is something still left in him to act upon—something which can love simplicity and truth. I have seen one, in whom some low vice had become a habit, make himself the plaything of a set of riotous children with as much delight in his countenance as if nothing but goodness had ever been expressed in it; and I have felt as much sympathy and kindness toward him as I have of dislike and misgiving toward another who has gone through life with all due propriety, but with that cold and supercilious bearing towards children which makes them shrink-ind still. I have known one like the latter attempt, with uncouth condescension, to court an open-hearted child, who would draw back with an instinctive aversion; and I felt as if there were a curse upon him. —*R. H. Dana.*

DO IT OVER AGAIN.—A theological student once called on Dr. Archibald Alexander, in great distress of mind, doubting whether he had been converted. The doctor encouraged him to open his mind. After he was through, the aged disciple, laying his hand on his head, said:

"My young brother, you know what repentance is—what faith in Christ is. You think you once repented and once believed. Now, don't fight your doubts; go it all over again—repent now; believe in Christ now; that's the way to have a consciousness of acceptance with God. I have to do both very often. Go to your room and give yourself to Christ this moment, and let doubts go. If you have not been his disciple, be one *now*. Don't fight the devil on his own ground. Choose the ground of Christ's righteousness and atonement, and then fight him."

Young Folks.

Looking Through Glass.

"Lucy," said Frank, one day, to his sister, "I think cousin James is nothing but a spooney after all."

"And what is a spooney?" asked Lucy, smiling.

"Oh, you know. He knows Latin, and all such things, but he don't know anything that's worth knowing. When we were on the pond, yesterday, I told him to take hold of the rudder, and what do you suppose he did? He took the oar. Now, if that is not being a spooney, what is?"

"Then, that is your definition of a spooney, is it?" said Lucy.

"Yes. You know any one may be smart enough, and yet know nothing about practical matters."

"But James is two years younger than you, and has never been in the country before."

"Well, I guess I should have known better than that, if I'd never heard of the country," replied Frank, contemptuously.

Lucy said nothing more at the moment, but waited till the children were all assembled in the sitting-room, after tea. Then she said to James,

"Did I not hear you say you had been to visit some glass-works, a week or two before you came here?"

"Yes; I went with Uncle John."

"I wish you would tell me something about them," continued Lucy. "I have never seen anything of the kind."

"Well," said James, "in the first place, of course, you go into the great rooms where the sand is heaped up."

"What's the sand for?" asked Frank.

"To make the glass, of course," said James, rather scornfully.

Frank looked a little abashed.

"If they make glass out of sand," said he, "I think this would be a splendid place to make it, for here is the whole seashore, with such nice, white sand."

"Poh!" said James, "they wouldn't look at such sand as this to make glass. It would be too coarse for barn windows."

"Perhaps they refine it," suggested Frank. "I don't know where they could get any better."

"Oh, there are plenty of places. This that we saw came from Berkshire County, where there are whole hills of fine, white sand, which looks almost like snow. Then they have to mix other things with it to make glass."

"Yes," said Frank, "water, I suppose, to boil it down."

James tried hard not to laugh, but he could not help it.

"I don't remember everything; but one of the principal things is potash, and for nice glass, red lead. And oh, Lucy, you ought to see the lead! They have great bars of it, and it looks as dull as you please. But they put into great ovens, that are heated so hot you can't stand within a rod of them, and melt it. And you never saw such a beautiful color. A man stands by with a long iron rod and works it over and over. O, I wish you could see it! Uncle John said that even vermillion did not begin to express the depth and splendor of it; and it varies from silver to scarlet. It is perfectly beautiful! Oh, then—I forgot—I suppose I ought to have told you, in the first place, how they make the pots for melting the glass. They have a peculiar kind of clay, which comes from Germany, I believe, and this they put into great bins. And how do you suppose they get all the air out of it?"

"I suppose they have some enormous great press," suggested Frank.

"No. They tried to use a machine, but found it wouldn't answer. The men tread out the clay barefooted. They tread, tread, tread, all day long, and there is nothing like it for making the clay compact and pressing out all the air."

"How dreadful!" said little Mary; "I shouldn't want to do that."

"Nor I," said James; "but the men said they liked it well enough. Then they take the clay and knead it, just like bread, and make it into long rolls, and make the pots of these, pressing them on, one by one, with their hands. So the pots are very strong; and they let them stand and dry six months before they use them, or else they would crack as soon as put into the furnaces. They are the funniest looking things! It was as good as to go to a menagerie. There was a great room full of these pots that were drying, and they looked for all the world like elephants that had lost their trunks."

"I should think," said Lucy, "that, even after they are dry, they would be likely to crack when put into such heated furnaces."

"Of course," replied James; "I was just coming to that. They put one of these pots into a furnace without a fire at first, and heat it gradually till the new pot is exactly as hot as the old one. Then they tear away the brick from the furnace where the glass is melted, and roll in an iron truck and drag out the broken pot. That's a beautiful sight, too. Then in a minute you see some men come rushing along with another truck with this great red hot elephant on it—and this goes into the furnace, and then they brick it up again."

"And now," interrupted Frank, "what about the glass?"

"Oh, I'm just coming to it," said James. "After they have mixed the sand and potash and lead, etc., all together, they put the mass into these furnaces. The fire is never allowed to die out, and you may believe they are hot. I think it takes six weeks to heat them hot enough to use. All around the furnace are openings that they call 'glory holes,' where you can look in. Then men come with long iron rods, and put them into the melted glass, and so take out some of it on the ends of the rods. These rods are hollow, and they blow into them, and the glass then puffs out into just the shape they want. I tried to blow, but I blew too hard, and although I had but a little piece on the rod, it puffed out as big as a pumpkin, and it was the funniest shape! They have to learn to blow steadily."

"Then you wasted the glass. Did they like that?" asked Frank.

"O, that was no matter," said James; "when they break glass, the only loss is the loss of work—for the pieces are put right in with the cullet, and melted over again."

"What is cullet?" asked Lucy.

"Broken glass," said James. "They always have barrels and barrels of it. They send boys around the city to gather up all the pieces they can find."

"Can they blow a whole pitcher, for instance, with a handle on it, all at once?" inquired Frank.

"Of course not," said James. "There is hardly anything that can be blown entire, unless it is lamp chimneys. They blow a little and then roll the glass over and over on a smooth iron table, then they blow a little more, and so on. Then they take big shears and cut off the parts they don't want. With these shears they do ever so many things. For instance, in making a goblet, they make a little hole with the point, and keep turning them round and round till they get it big enough for the mouth of the goblet. Then they do just the same thing with the foot of the goblet, only they don't make it so large, and take the side of the shears and smooth this down, till, lo! there is a standard."

"I don't see how they could blow the diamonds on our goblets," said Mary.

"O, those are not blown," said James. "They are not so nice as blown ones. It doesn't take a minute to make them. There are great iron moulds just the shape you want. Somebody drops some melted glass into the mould. Then somebody else comes down, *clap!* with a great press, and then raises it again, and a boy puts in a kind of narrow pitchfork and pulls out the goblet, all made."

"But how do they put the handles to the pitchers?" asked Frank. "Do they press those on?"

"O no. When the pitcher is done, a boy comes along with a lot of melted glass on his rod and claps it against the pitcher for the top of the handle, and then he gives it a little swing and claps it against the place where he wants the lower part of the handle to be, and the thing is done; and it hardens so quick that it stays put, splendidly."

"So now we have our pitcher and goblet ready to use," said Frank.

"Not quite," said James, "they have to be annealed first, or they would be good for nothing, as they would break so easily. So they are put on a railroad in an oven, [here Mary's eyes opened very wide,] and are moved along gradually till they pass over a cooler part of the oven, and then cooler and cooler, till at last they have no heat under them. If they are well annealed, they will not break easily."

"I should like to see such a factory," said Frank. "Didn't you bring anything away as a memento?"

"Yes," said James, "we bought several things. Uncle John bought a silver door-knob."

"A *silver* door-knob!" repeated Frank, in surprise. "I shouldn't think that was a memento of a glass factory."

"Well, of course, it wasn't real silver; but I'll tell you how they make such things. They make a glass door-knob, in the first place, then they put on the thinnest possible coating of quicksilver, and then another coating of glass; and then it looks just as if the whole was silver—and it is better on some accounts, because it never needs polishing. They make goblets in the same way; but you can tell those in a minute, because they are so much thicker than real silver, and yet as light as glass."

"Did you see them color class?" asked Lucy.

"Yes, in two different ways. Sometimes just a few grains of some matter, thrown into the great bin where the sand, potash, etc., are mixed, will change the whole appearance of the glass. Then the way they make these handsome lamp-globes, is this: they first make the globe of flint-glass; then they put on a coating of red or blue, or whatever they want, and then another coating of this opaque glass. Then they send it to the cutting-room and have figures cut in it, and of course, where it is cut, we see the edges of the flint and colored class."

"They cut with diamonds, don't they?" asked Frank, wishing to appear intelligent.

"Ho! Ho!" laughed James, in spite of himself. "There are not enough diamonds in the world to do all the cutting which they do in a day. They have wheels which turn very fast, and are always kept wet, and they hold the glass against the wheels, and cut it in that way. The wheels are of all sizes, some so small that they engrave with them. That is very beautiful. They engrave animals and flowers and fruit and birds, and all sorts of pretty things. And it takes such *little* wheels to do it. I saw a man engrave a tiny bird, and he drew the eye with a wheel no bigger than a pin-head."

"And do they not paint on glass too?" asked Lucy.

"O yes, we saw a great deal of very beautiful painting, for lamp-shades and things of that kind."

"I should think it would wear off in a little while," said Frank.

"So it would if it was'nt burnt in; but after they paint the glass, they put it into a furnace and keep it there till the colors are firm."

"I should that would melt the glass," said Frank.

"O, they don't put it into the fire, but only where it is very hot."

"How very nice it must be to see such things!" said Frank, sighing, half enviously.

"Well," said James, "when you come to see me, I will show you all kinds of such things."

When Frank said "good night" to Lucy, he whispered in her ear,

"I don't think now that James is such a spooney, after all. I am afraid I should have known less than he does about the country, if I had never lived in it; and he knows *heaps* of things I don't know."

—*Little Corporal.*

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
34 Montgomery Street, opposite Lick House.

News Summary.

PACIFIC COAST ITEMS.

The City Missionary, in his quarterly report, says: "In an attic, I found a widow with four children. They have been here but a short time. She came from a comfortable home in Boston. When she landed she had enough to keep her a month. At the end of that time I found her. The last dollar paid for rent; her clothes and bedding pawned for food, and she vainly trying to support herself by making shirts for a well known firm in this city for the sum of 12½ cents each. I found her better and steady work. She is now able to live comfortably, though working hard."

A Very Good Little Boy.—Little Walter Draper is a very good little boy, according to all the rules laid down for good little boys. Last Sunday he asked permission of his mother to go down to the Gould & Curry reservoir, which his mother refused, on the ground of its being the Sabbath. Good little boys sometimes cry a little, and Walter began blubbering.

"Why, Walter," cried his mother, "I am astonished! The idea of your wishing to go down to the reservoir on the Lord's holy Sabbath to go swimming with a lot of bad little boys!"

"Boo, hoo!" blubbers Walter, "I didn't want to go a swimmin' with 'em, ma; I only wanted to go down an' see the bad little boys get drownded for goin' a swimmin' a Sunday—boo hoo!"—*Virginia Enterprise.*

We understand that several of the peach orchards in this county, will be a partial failure. In the Shepard orchard, we are told that the peaches are dropping off prematurely. We have heard no reason for this singular circumstance. The peaches in market are inferior in size and quality—the poorest ever grown in the State.—*Sacramento Union.*

Deep Well.—Mr. Rogers has lately sunk a well near the three Mile House, on the San Leandro road, to the depth of 98 feet. At that depth a formation of quicksand was struck and the water commenced to rise with great rapidity, rising 38 feet in a few hours. This well is said to be the deepest common well in the county.—*Oakland News.*

We learn from the *Sentinel*, that hazlenuts are very plenty in every mountain and dell, and on every hillside near Santa Cruz. The bushes are full of nuts, large and sweet, and equally as delicious as the filbert, imported and sold at a high price. Hazlenuts are quite plenty in the San Francisco market.

Capt. William Hayne, of Sacramento, is now feeding about a million of silkworms, and the *Bee* says he will sell from 800 to 1,000 ounces of eggs, most of which will go to Europe, where California eggs are in great demand, as superior to the silkworm eggs of any other quarter of the globe.

There is a field of corn growing in Los Nietos, twenty-five acres in extent, which is of such luxurant growth, that the owner is confident it will turn out one hundred bushels from every acre. It stands from fifteen to seventeen feet high.—*Los Angeles Star.*

There is a snake running around loose in Calaveras County, 15 feet long and as large as a stove-pipe. A man saw it. If the man hadn't seen it, we should not believe there was any such snake there.

All our cities grow most on the west side. San Francisco is an exception. Being on the Pacific, there is no more west, and it extends southward toward Mexico and South America. —*S. F. Times.*

The Stockton *Independent* has been shown an apple thirteen inches in circumference and four inches through the centre. It was brought from an orchard near the San Joaquin River.

A farmer at Sacramento was sun-struck last week while unloading grain. Sun-stroke is rarely heard of in California, even when the thermometer ranges at 110 in the shade.

An artesian well has been bored on the desert, 20 miles east of Wadsworth. The well is 45 feet deep, and will supply all the water the Company will need.

The Indians are again becoming troublesome in Humboldt County. Many of the citizens east of Hydesville, have been obliged to seek refuge in that town.

The *Bulletin* says there are three piano manufactories in San Francisco. The principal one has turned out 510 instruments since its commencement.

Fifty-four tons of wheat, worth $2,200, were thrown into the river and lost by the upsetting of a barge at Tuolumne City last week.

A gentleman in San Francisco, has the only complete set of U. S. coins in private hands in the country. It is worth $50,000.

The Mormons are busily engaged on their railroad contract, and the work is making rapid progress.

Reno wants to be county seat.

The Sacramento Woolen Mills are expected to be in operation by the middle of October next.

The Red Men will lay the corner-stone of their hall on Bush street, on the 18th of August.

The receipts of the Sancelito Ferry Company for the month of June, were $6,285.

The Good Templars will hold a convention at Vallejo, on the 4th and 5th of August.

All but 24 miles of the railroad is now completed between Sacramento and Vallejo.

The small pox is still very prevalent in this city. Everybody is being vaccinated.

They had a slight shock of earthquake in Sacramento on the 24th ult.

TELEGRAPHIC.

Eastern.—43 persons were drowned by the floods at Baltimore and Endicott's Mills....Jeff. Davis is going to Europe....A frightful cattle disease has appeared in Illinois, introduced by Texan stock....$3,000,000 worth of property was destroyed at Baltimore by the flood, caused by heavy rains....Wooley sues General Butler for $100,000 for false imprisonment.

Southern.—Gen. Canby has turned over the State Government of South Carolina to the civil authorities....The Georgia Assembly asks Congress to remove all political disabilities from persons in that State....Gov. Bullock, of Georgia, was inaugurated on the 22d ult. He favors Republican policy....Orders have been issued reorganizing the Southern military departments....J. Hill and H. V. Miller have been elected U. S. Senators from Georgia....Gens. Grant, Sherman, and Sheridan are in Missouri.

Congressional.—Warner, Senator elect from Alabama, was sworn in ...Holland Smith has been confirmed as Postmaster at San Francisco....The Senate ratified the Chinese Treaty, but will not probably pass the Sandwich Island Treaty....The House refused to vote on the bill giving Goat Island to the Pacific Railroad Company....The House passed the Freedmens' Bureau Bill, over the President's veto ....The President signed the Tax Bill with a protest....Congress will have a recess until the 3d Monday in September.

Foreign.—Lord Cranforth, an eminent Liberal peer, died on the 27th of July....The British are reported to have taken possession by force, of a Portugese station on the coast of Guayana....A conspiracy has been discovered by the police at Rome....There is said to be a prospect that Japan will be divided into two kingdoms....The crops in Russia will be poor....The British Government will buy and manage all the telegraph lines in the kingdom.

WEEKLY MARKET REPORT.

Wednesday, July 29, 1868.

Flour—The stock of old Extra is much reduced; quotable at $7@7 25. The quotations for new (local production) are as follows: Superfine, in sks, ℔ 196 lbs, $5 50@5 75; Extra, in sks, $6 50@6 75.

Wheat—Sales include 300 sks low grade, $1 80; 1,800 sks choice white, $1 80. We quote good shipping at $1 85 ℔ 100 lbs. At the close, 1,480 sks fair, $1 75@1 80 ℔ 100 lbs.

Barley—sks new $2 10; 317 sks do, $2 07½; 400 sks do, $2 10. Old brewing is jobbing from store at $2 25@2 40 ℔ 108 lbs.

Oats—The jobbing rates from store have been advanced to $2 50@2 75 ℔ 100 lbs, latter figure for extra choice.

Potatoes—The market continues to improve, the quotations to-day being $1@1 12½; some dealers quote as high as $1 25. Sales aggregate 550 sks Mission, chiefly at $1 10@ $1 12½ ℔ 100 lbs.

Onions—Are firmer, good to choice Yellow commanding $1 75@2 ℔ 100 lbs.

Corn—There is none in first hands. Jobbing at $2 30@ $2 50 ℔ 100 lbs.

Rye—A small invoice of 80 sks sold yesterday at $2 ℔ 100 lbs.

Buckwheat—Light sales; quotations nominal at $1 62½ @$1 75 ℔ 100 lbs.

Beans—Prices are well maintained. We quote jobbing rates for first quality as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; Pink, 6c; and Red, 3c ℔ lb.

Bran—The supply is more abundant and prices easier—say $25@26 ℔ ton.

Middlings—Fine have declined to $40, and feed descriptions $32 50@35 ℔ ton.

Hay—About 100 tons sold in lots within the range of $10 @15 15 ℔ ton, outside figure for very choice.

Oil Cake Meal—Is in fair request at $30 ℔ ton for small lots.

Dairy Products—Fresh roll Butter has advanced to 37½@40c; California firkin, 32½@35c; Cheese, 14@16c for California dairies, and 16@18c for Eastern dairies; Eggs, 37½c for Hen, and 32½@35c ℔ dozen for Duck.

Poultry—Live Turkeys are quoted at 18@20c; dressed do, 20@22c ℔ lb; Hens, $8@8 50; Roosters, $6@7; Spring Chickens, $5@6; Ducks, $4@4 50 ℔ doz; Geese, $1 75@2 ℔ pair; Venison, 10c ℔ lb.

Provisions—Cured Meats are generally firm. We quote jobbing rates as follows: California smoked Bacon, 15@16c; Oregon do, 12½@13½c; California Hams, 17@18c; Oregon do (scarce), 16@17c; California Lard, 13½@14½c; Eastern do, 12½@13c½ ℔ lb.

Wool—Quotations for spring clip are nominal at 17@18c for clean grades; 15@17c for medium, and 10@14c for burry —with sales for the week of 280,000 lbs within the range; also, 4,700 lbs fall clip at 13c.

Hides—Continue in fair demand at 14½@15½c for usual selection of California dry; some small lots of very choice have realized 16c. Sales since last Wednesday aggregate 2,000 dry. The invoices of Mexican received by the last steamer were for shipment East.

Tallow—Sales since last Wednesday aggregate 10,000 lbs good Beef to candle factory, at 7¼c; 2,200 lbs do, 7½c ℔ lb.

San Francisco Cattle Market.

The demand and supply are quite evenly balanced, and hence rates are steady.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 6@8c ℔ lb.
do 2d do 5@6c ℔ lb.
Veal—The general range is 7@10c ℔ lb.
Mutton—Steady at 5½@6c ℔ lb.
Lamb—Good to choice, 7@8c ℔ lb.
Pork—Undressed, 4½@6½c; dressed, 7@9c ℔ lb, outside figures for milk or grain fed.

CURRENT TOPICS.

The Earl of Shaftsbury, whose name is distinguished and honored among all philanthropists as well as Christians, has recently come under the severe censure of those who represent the High Church in England. He has violated their ideas of ecclesiastical propriety, and refused to confine his influence for good within the limits they assign. He insists that he has a right to recognize and work with Christians wherever they may be found. He even appeared on the platform of Exeter Hall, in company with Mr. Spurgeon, the noted Baptist preacher. Afterwards he presided over certain meetings, which those who assume to be his guides to duty on such points, do not approve, and for all these things he is rebuked. The style of his reply is such as we might expect from so noble a man, and the spirit he manifests might be possessed by many others with profit. After declaring himself to be a sincere member of the Church of England, and his purpose to maintain the vigor of that Church, he adds: "Although I do not concur in all Mr. Spurgeon's sentiments, nor always approve the language in which they are conveyed, I regard him as a man of great ability, of great earnestness, and doing a great work. And in these days of trouble, rebuke, and blasphemy, I will, if requested, give the right hand of fellowship to him and every other, who will preach Christ to the masses of the people." There is the ring of Christian fidelity in these words, and neither bigotry nor bitterness can effectually check the spirit by which they were prompted.

To-day, the Mechanics' Fair is to be opened, with very cheering promise of patronage, both as to the articles to be on exhibition, and those who will throng to see them. The accommodations are more convenient and ample than in any former year, and the various departments of industry and skill in the State, will have opportunity for such display as will surprise all who have not kept themselves posted respecting the progress California has made in agriculture, trade, and manufactures. It is hoped that the Fair will be continued long enough to give all on the Coast a chance to profit by the exhibition, who may be able to visit the city, for the benefit will be universal and great.

The Presbytery of Blairsville, at a late meeting, adopted a resolution, that no young man who is an adherent member of any College Fraternity shall hereafter be taken under the care of Presbytery, as a candidate for the ministry. No doubt, the motive for this action was good, yet we cannot believe that it was justifiable, or wise. There are hundreds of the best men now in the ministry who fully believe that they are much indebted in every way, for their success in preaching the Gospel, to the College Societies, of which they are members, and there will be multitudes who will come from College with the same feeling. Why should these servants of God, whose works praise them, or whose spirit commends them to esteem and coöperation, be shut away from both, because they cannot deny the good influence they have experienced, or refuse to disavow so friendly an aid? Indeed, what right has any body of ministers to declare a man unworthy of their fellowship, upon any ground not clearly defined in the Scriptures? They may express an opinion, they may endeavor to educate to a better way of belief those whom they think to be in error, they may seek to reform others upon any matter of faith or practice. But what right have they to close the doors that lead into the ministry of the Word, against all who cannot accept their judgment upon a question, respecting which division of sentiment is possible among good men?

The manner in which Chinamen are treated in this city, and in other places on the coast, calls for something more than mere expressions of indignation, on the part of those who believe that those who are on our soil, should have their due share of protection fron our government. So frequently that the repetitition of the outrage should awaken serious attention, do we read accounts of assaults by men and boys, on these foreigners, of their being beaten, robbed, injured, and it is apparent that the evil will increase if it be not thoroughly punished. The new position of all classes of men, who come to us from other lands, and the power made possible to them, now that the amendment of the 14th Article of the Constitution is declared to be in force, should lead us to give some heed to their claim on us, even if the demands of humanity fail to be regarded. We cannot now escape the opportunity they may have, in time, to avenge the treatment they are receiving, while our people feel that it is safe to abuse them. It may be seen to be politic, as well as just, to visit severe punishment on those who seem to suppose they may maltreat Chinamen with impunity.

Since the appropriation of Congress to complete the purchase of Alaska, attention has been attracted to that country with new interest. Men of business are making their plans for gain from its resources, and it is said that emigration has commenced to a degree that could hardly have been expected. We learn that the Jesuits have already sent on representatives in sufficient numbers to care for their interests among the people, and it is not unlikely that the influence of the Russians who remain there, may be thrown in favor of their success. The efforts of Protestants in Alaska, have as yet, been only incidental, or those of individuals, so far as we know, but it is manifest that our missionary agencies should not neglect the opportunities for obtaining a position there in its early history as a part of our country.

The annual Convention of the Young Men's Christian Associations in this country, held in Detroit, collected statistics, which show that these organizations are by no means losing their power for good. In the large cities they are doing much for the moral and spiritual culture of young men, and for the support of various agencies for general usefulness, and in smaller towns they are made efficient allies of the Church in the promotion of interests connected with religion. The difficulty of maintaining them is less than at first, since they have demonstrated their ability to do good, and many who are not Christians are willing to give money into their hands for the purposes to which they devote it. The Association in this city is preparing itself for more extended usefulness, with many tokens of favor from our citizens, but there is danger that some will assume that it is now well established, and therefore fail to continue the support, without which, no company of workers can make progress. They must depend on those whom they really represent in their efforts to reach and save the large number of young men among us. Their new building, which will be an ornament to the city, as well as a source of blessed influence, of which all may feel the benefit, should be freed from the debt that must hinder the success of the Association, and sufficient funds should be furnished for the economical prosecution of their work. We do not know that money is just now solicited, but those who witness the results of their efforts should not wait for these young men to ask for what is necessary that they may continue these efforts.

The Labor Convention, lately in session in the City of New York, expressed some interest in the condition of those women who are obliged to support themselves by their work, but there seems to be little probability that much profit will result to the sufferers from their resolution and debate. It is a singular fact that no change is made, as respects the wages received by females, notwithstanding so much is written and said on the subject. As a rule, they receive less than half what men get for similar labor, and in those branches of business, in which they alone are employed, they are paid only starvation prices oftentimes. The injustice is manifest, and the evil comes to be a most serious affliction, in the case of multitudes who must support their families on so meager an income. We noticed, some weeks since, a movement in San Francisco, which promised some practical relief in this direction, but have not been aware of its success. Christian philanthropy can find here a most worthy field for its exercise.

More than three thousand recruits for Utah have been landed in New York within two months, and

most of them are now able to judge whether the blessing of Mormonism are equal to the representations of the glib-tongued emissaries Brigham Young has sent abroad to represent him. The account given of the appearance of these ignorant and degraded people as they were collected at Castle Garden, is itself a commentary on the sentiment which has attracted them to their new home. They are evidently fit subjects for the delusion they have adopted, and will find themselves in congenial society when they reach Salt Lake. Yet the fact that an establishment like that of the Mormons, supported by such means, exists and grows strong in the interior of our Territory, may well excite the serious reflection both of patriots and Christians.

Religious Intelligence.

PACIFIC COAST.

Baptist Church in Oakland.—The Oakland *News* gives a description of the new church which is being erected on the corner of Brush and Fourteenth Streets. The main building will be 52x70 feet inside. In the rear of the building, and communicating with it, is another building 32x90 feet, which will contain Sunday School rooms, Pastor's Study, Ladies' parlor, Library rooms, etc. The style of the building will be Gothic. There will be two towers on the north end, one containing a bell, and surmounted by a roof, and the other surmounted by a spire 130 feet high. The building will be of wood, on stone foundations, and will cost about $16,000. It will be the largest church in the place, and will be an addition to the architecture of the city, of which the citizens may well be proud.

Rev. M. A. Williams, of Southern Oregon, has been spending a short vacation in and near San Francisco. His application to his duties has been close and protracted, and the period of rest which he allowed himself was much needed. He officiated last Sunday in Calvary Church, with much acceptance. His morning sermon was a demonstration of the identity of the Christ of the New Testament with the Jehovah of the Old. We have heard many sermons on this interesting subject, but have rarely enjoyed so clear an apprehension of this great truth, as under the sermon of Mr. Williams. Our best wishes for his prosperity attend him on his return to Oregon.

Calvary Mission Church Festival.—We are pleased to learn that this church, under the pastoral care of Rev. Jas. H. Marr, is in a prosperous condition. A festival, for the benefit of the Society, took place recently at the church on Howard Street, between 21st and 22d, and afforded unusual opportunities for enjoyment to a large number of people of all denominations who were present. The exercises consisted of music, reading, *tableaux*, refreshments. The readings, etc., were conducted under the direction of Mr. White. The receipts were over $300, a result regarded by the originators of the festival as highly satisfactory.

Church at Chico.—Last week we published a short note from a correspondent respecting the prospect of a Presbyterian church to be organized in Chico. We have since learned that the facts are even more encouraging than might be inferred from that note, and that several of the prominent men of the town are ready to connect themselves with the church, when it shall be formed. Rev. J. G. Fackler, of this city, has gone to pass the next Sabbath with them, and it is not unlikely that he may organize the church.

Festival.—The ladies of Vallejo have nearly completed their arrangements for the Presbyterian Fair which is to come of next week. It will be a pleasant affair, and will undoubtedly furnish a large amount of money for the object proposed—to pay for the repairs recently made on the Presbyterian church. The Vallejo papers say that the building is now an ornament to the city, and urge the citizens to respond liberally to the appeal which is made to their generosity.

Flourishing.—The Methodist Church South, is prospering at Yuba City, under the care of Rev. Mr. Edwards, who recently baptized five persons, 4 by immersion, and one by sprinkling.

Church Union.—A meeting of the Church Union was held last week at the rooms of Rev. Mr. Loomis, at which the subject of our duties toward the Chinese in our midst was discussed.

Tea Party.—The ladies of the Baptist church at Santa Cruz, were to give a tea party, with grab-bag, and other accompaniments, on Friday last, for the benefit of the Society.

Purchase.—The Methodists in Stockton, who have long felt the need of a suitable house of worship, have bought the Agricultural Hall in that city for $8,000.

First Church.—Three persons were received as members of the First Presbyterian church at the last communion service, Sunday, August 2d.

To Clergymen.—The clergymen of our denomination are requested to send to The Occident, announcements of marriages and deaths.

EASTERN.

The Young Men's Christian Association and the Church in Vermont.—There are in Vermont (says the *Congregationalist*), 37 Young Men's Christian Associations, all but five of which have been organized within a year. The total membership is 2,021. The Associations have recently attempted to procure statistics of all the evangelical churches in the State. Three hundred and two churches report conversions, averaging 11 to a church, and additions averaging 12 to a church. Several churches reported more than 100 conversions each. The aggregate resident membership is 25,154—the largest membership being 340, and the smallest 10. Only one in 11 are men under 40 years old.

The Bible in College.—The Bible as a text-book has a marked prominence in Lafayette College, Easton, Pa. During two entire terms the Greek Testament is used as a text-book for daily recitations. Through the whole course, Biblical Exercises upon the English Bible, Chronology, History and Geography of the Bible are required weekly. In the senior year Hebrew is pursued as an optional study. Throughout the course, the language of the English version is constantly examined and referred to as standard English. In Political Philosophy reference is made to the Hebrew Commonwealth. The truths taught in the Bible in relation to the character, powers, and duties of man, are inculcated as fundamental in Mental and Moral Philosophy, and the Philosophy of History is identified with the History of Redemption.—*Chicago Presbyterian.*

Knox College.—A clergyman writing from Illinois on the first day of July, says: "The commencement of Knox College came off last week. The Board of Trust elected unanimously Rev. Dr. Gulliver, of Chicago as President, to the apparent satisfaction of all concerned; for which we thank God and take courage."—*Religious Herald.*

Free Seat System.—On Sabbath morning, the 21st of June, the free seat system was inaugurated in the First Church of Cincinnati. In the sermon delivered on the occasion, the pastor said, as reported in the *Presbyter*:

"It is not our purpose to make this a poor man's church, or a rich man's. We expect all regular attendants to contribute to the support of the Gospel; only we do not say, if you contribute so much you may sit forward—but if you can give but so much, sit here under my footstool, or yonder in a corner. Footstools and corners shall alike be honorable, and every man alike independent. Give as you choose—as the Lord has prospered you—and sit where you like."

Form New Churches.—Rev. Dr. Hornblower, of Paterson, N. J., with whose people we had the pleasure recently of worshipping, spoke to them of the necessity of forming a new church on the outskirts of the present congregation. "All of you who live beyond ——— street, go out there and be organized into a church: if it leaves half of these pews vacant, we will see them filled again in a few years, and you shall have our prayers and blessings if you will go." This is the right spirit; and, if our New York ministers would talk to their people in the same way, we would have new churches springing up in our destitute localities every year.—*Observer.*

German Theological School.—At its recent stated meeting, the Newark New School Presbytery resolved upon the establishment of a German Theological School within its bounds. This action was taken in view of the large immigration of Germans to this country, and especially to the region embraced within the limits of the Presbytery, and of the importance of raising up from among their own number those who can preach to them in their own language, and who shall at the same time, be imbued with our American ideas, so as gradually to assimilate them with us.—*Lutheran.*

New Synod and Presbyteries.—The late Assembly at Albany erected a new Synod within the bounds of the Southern States. It is composed of three Presbyteries, to wit: Catawba, Atlantic, and Knox. The latter is composed exclusively of colored ministers and churches. The ministers were set apart to their work by one of the Southern Presbyteries.

The Assembly also erected two new Presbyteries in the far West—the Presbytery of Santa Fé in New Mexico, and the Presbytery of Colorado in the territory of that name.—*Presbyterian.*

Baptist.—Of the missionary funds of the Baptists, it is stated to be a fact that one-half of the churches contribute nothing, and that one-half of the members of contributing churches give nothing; while the highest average of contributions, that of Massachusetts, is no more than one dollar, and the same average among all the churches would provide double the amount of $225,000 called for by the committee.—*Christian Instructor.*

A Ritualistic Church Excluded.—After a long and exciting debate, the motion to admit the ritualizing Church of All Saints, recently organized in Pittsburgh, into union with the General Convention of the Diocese of Pittsburgh, was lost, and the matter postponed for a year by a vote of clergy 21 to 17, and of parishes 19 to 7. The Low Church party felt that they had achieved an unexpected success.—*N. W. Presbyterian.*

All Irish.—The *Universe*, (Roman Catholic) in speaking of the twenty-three young men ordained priests at the Provincial Seminary at Troy, N. Y., same days since, says every name on the list but one is from Ireland. The one name is Mutsaers. It asks as soon as Irish emigration stops where will vocations be found?

Amherst College has lately had a gift of $30,000 from William Stearns, son of President Stearns, and a wealthy merchant of Bombay.

Open Communion.—The late Rev. Dr. Wayland, one of the lights of the Baptist Church, writing to Rev. G. H. Ball, said:

"There is no precept in the Scriptures requiring or justifying the restriction of the Supper to immersed believers. It is only an inference at most, and we ought never to bind the conscience of our brother on a mere inference."

The Tract Society of the Methodist Episcopal Church have awarded the prize on the evils of tobacco to Henry Gibbons, M. D., editor of the *Pacific Medical and Surgical Journal*, his essay being considered the best of some fifty competing manuscripts.—*Christian Instructor.*

Rev. Geo. M. Boynton, former pastor of our church in Riverdale, N. Y., was installed over the Third Congregational Church of Guilford, Conn., on Wednesday, June 24th. Sermon by Rev. President Woolsey, D.D., of Yale College.

The corner-stone of the new Presbyterian University at Wooster, Ohio, was laid on Tuesday, July 14th, in the presence of the Board of Directors, and a large assemblage of citizens, with appropriate services.—*N. W. Presbyterian.*

The Roman Catholic Archbishops of Baltimore, Cincinnati, New York, and St. Louis, have issued a protest against the proposed enlistment in this country of troops for the service of the Pope.—*Christian Intelligencer.*

Call.—Rev. Henry N. Simmons, of the last class of Auburn Seminary, has received and accepted a call to the Presbyterian church of Salina, or Syracuse, First Ward.—*Am. Presbyterian.*

Nineteen Churches Organized.—During the last fortnight we have noticed accounts of the organization of nineteen churches, thirteen of which have become Baptist societies.—*Observer.*

Forty-two persons united with the Congregational church in North Cornwall on July 5th—forty-one on profession of their faith.—*Hartford Religious Herald.*

Spontaneous Combustion.—The Episcopal church in Brattleborough, Vt., came very near being destroyed by fire recently from spontaneous combustion.

Installation at Sharon.—Rev. A. B. Bullions was installed pastor of the Congregational church in Sharon, on the 28th ult.—*Relig. Herald.*

Phi Beta Kappa.—Rev. Charles Beecher is to deliver the Phi Beta Kappa oration, on Thursday of commencement week at Bowdoin College.

There are 313,000 people cared for in the charitable institutions of New York.

Hop raising has been condemned by the Free Will Baptists of Wisconsin.

Yale College is 167 years old, and still in its prime.

FOREIGN.

The Abyssinian Bible.

It was thought that the literary department of Abyssinian antiquities might prove very rich, and Sir Robert Napier, the commander of the English expedition, obtained permission to photograph several of the illustrations with which their Gospels are adorned, and also a few pages of the Gospel of St. Matthew. These have been sent to England, and a few specimens have been reproduced in the *Illustrated London News*. The Gospels are written in the old Ethiopic characters, inscribed with black ink, with the exception of the tenth line, which is in red ink. All the characters are very clearly and finely executed. The illustrations are exceedingly rude. One represents the creation of Adam and Eve, where God appears as a great man, holding Adam and Eve by the hand, while a number of human heads are distributed around, all "after His own image." Another is the Crucifixion, where Jesus is crucified between the two thieves, and numerous spectators are placed all over the surface of the picture.

The leaves of the Bible are made of excellent parchment, while the whole volume measures eighteen inches by twelve, and is very thick. It is a curious specimen of book-making. Its contents have not yet been fully examined. Heuglin says that it contains one entire book more than our own Bible—namely, the book of Henoch, and a sixth book of Moses; but the latter is only a commentary on Genesis and Exodus.—*N. W. Presbyterian.*

The English Church.—The Anglican Church, while claiming to be the only religious organization entitled to respect in Great Britain, does not treat the lower orders of the clergy in a way calculated to support the dignity of the Establishment. For instance, in the *Guardian* there recently appeared an advertisement headed: "A curate and his sister wanted," and then proceeding: "the curate to assist the rector; the sister to be daily governess to the rector's children; the curate in time to take part in educating the children. The stipend at first to be according to the qualification and experience of the sister."

This method of treating an assistant as a hireling will do more to break down the Established Church than all the efforts of Gladstone to regulate the Irish Church. Of this result many good Churchmen are conscious, and are now complaining that curates are advertised for without any regard for their spiritual calling. "Wanted, a gardener and wife," or "a footman and housemaid," appear in the same columns in which a situation is offered to a curate and his sister.—*Phil. Ledger.*

Icelanders at Church.—A group of male and female peasants may be seen gathering about the church, waiting the arrival of their pastor, all habited in their best attire, after the manner of the country; their children with them, and the horses which brought them from their respective homes grazing quietly around the little assembly. The arrival of every new comer is welcomed by every one with the kiss of salutation; and the pleasures of social intercourse, so rarely enjoyed by the Icelanders, are happily connected with the occasions which summon them to the discharge of their religious duties. The priest makes his appearance among them as a friend; he salutes individually each member of his flock, and stoops down to give his almost paternal kiss to the little ones who are to grow up under his pastoral charge. These offices of kindness performed, they all go together to the house of prayer.—*Exchange.*

Canada Presbyterian Church.—Connected with H. M. Committee's operations, are 77 missions, with 150 preaching stations, and 56 supplemented congregations—5,509 families, an adult membership of 6,155, average attendance, 15,091. These congregations contribute, besides board for missionaries, $21,762, and receive $9,583,759. There is a slight decrease in the number of missions, but an increase in the supply given to them, to the amount of $1,184, and in the amount contributed of $3,374. Of supplemented congregations, there is an increase of 11, with 910 communicants. Arrears amount to $1,074. The list of missionaries contains 11 ministers, 4 lay catechists, 22 divinity students, and 14 student catechists.—*Am. Presbyterian.*

Progress of Education.—In 1835 there were in all Greece only 17 primary schools; with 821 pupils; 21 secondary schools, with 2,528 pupils; and 3 incomplete gymnasiums. In 1866 these had increased to 948 public schools for boys, with 44,000 pupils, and 39 private schools, with over 2,000 pupils; and other schools, with an attendance of 8,600. There were, besides, 123 public secondary schools, with nearly 7,000 scholars and 294 teachers; 6 private schools of the same class for boys, with 250 scholars, and 6 for ladies, with an attendance of 680; and 6 gymnasiums, with 1,900 students and 100 professors. The total number receiving instruction in the schools was 76,000. The University of Athens has 1,200 students and 62 professors.—*Am. Educational Monthly.*

A. ROMAN & CO.

Publishers, Booksellers & Stationers,

417 & 419 MONTGOMERY STREET,

Correspondence.

Letter from Santa Cruz County.

Santa Cruz, August, 1868.

Your correspondent does not propose writing a sketch of Santa Cruz, town nor county. How many people have acquired here a "local habitation and a name" he does not know. Nor can he tell how many horses, cattle, sheep, swine, turkeys, geese, etc., this county is supplied with; nor the number of bushels of grain and potatoes, and pounds of fruit, its acres have borne; nor the thousands of feet of lumber, sides of leather, and barrels of lime, shipped from the port. Those reading in hope of gaining such information will avoid disappointment and save time and patience by skipping this letter and consulting the statistics of the State Agricultural Society.

Santa Cruz is known as the Nahant of the Pacific. Tourists by profession, tourists by accident, and tourists by necessity, have all written up this town. The number and length of its drives, its Court House, churches, schools, hotels, mills, furnaces, tanneries, *et id omne genus*, have been graphically done by local editors and ambitious specials for the city dailies. This letter aims at no such greatness. Your correspondent has asked no favors, and has therefore no one to puff. His object will be gained if any resident of San Francisco, wearied of fog, wind, and dust, or some one condemned to bear the heat and burden of the day in Sacramento, Marysville, Stockton, Placerville, or any of the interior towns, shall be induced to come here for a few weeks or days, and enjoy fine drives, diversified scenery, pure air, safe and delightful sea-bathing, and—those who care for it—excellent trout fishing and hunting. Such enjoyment is productive of good. Invalids will find the change from the cities of great benefit, and those who swelter through the heated term in the mountains, and smother with the dust of the valleys, should try these breezes which bring such vigor to an overtasked or reduced system.

There is so much variety here that no one can easily tire. Rides or walks to the beach for baths, or to gather the rare and beautiful mosses, so delicate in color and outline; or to simply sit and watch the ever-varying views the ocean affords; picnic parties to the Big Trees, Natural Bridge, or Pebble Beach, Eagle Glen, or the Ruins, give new interest to each day's stay, and furnish not only present pleasure, but happy remembrances for the months to come.

Then it is good for men to become accustomed to the smell, and sight, and sound of the ocean. The odor of the air from the sea, with its strange exhilaration, even when the mist creeps down the long line of surf, hangs lazily around the cliffs, or floats slowly toward the hills, does invigorate the lungs and quicken the blood. And it seems almost impossible for any one to look out over the waves breaking upon the sands, and stretch his eye away beyond to where the billows kiss the sky, without having his thoughts fixed at last upon the immensity bounded by no finite shore. Nor can he hear the tide beat its stately march as it comes through the coves, overtopping out-jutting bluffs and jagged rocks, keeping always its own solemn rhythm, without having his soul stirred as if the Infinite spoke with him face to face. Body and spirit are both strengthened by this intercourse with the sea, and they do well who linger here to acquaint themselves, somewhat at least, with the constant multiplication of new delights and new wonders.

If any care to visit Santa Cruz, the steamer *Senator* will bring them safely from San Francisco; or they can come by cars to Santa Clara, and from thence, over a finely graded mountain road, in good stages, with careful drivers, and some dust. Given an outside seat, with cheery companions, and with "George," the favorite driver, to draw the rein over his six stout horses, and courage which will not start at sharp curves and deep ravines, suggestive of fearful results if one should be overturned, and the traveler may enjoy a ride of no little interest and pleasure. On arriving here, he will find a good hotel, or private boarding-house—the latter of which is in much demand—and, generally speaking, it will be his own fault if he does not decide that Santa Cruz is a good place to spend a few days, or weeks, in a very enjoyable way. If any do not believe it, let them come and see for themselves. Visitor.

Rio Vista.

We take the following items from a letter dated July 25, 1868:

Rio Vista is among the Montezuma Hills, north of Mount Diablo, and 73 miles from San Francisco, on the Sacramento River. The location of the town is the best on the river, and the daily sea-breezes give it a desirable climate. Population, 250.

The Catholics are building a church. It is nearly finished. The Congregationalists are also about ready to build.

Daily we send you immense quantities of fresh fish. Our wheat crop is good. This county is just beginning to be farmed. A few years ago the land was not worth taking up. Now it is worth $20 per acre—has increased in value 100 per cent. during the last year.

For small farmers it is a desirable place. We are so near the city that for butter, eggs, and chickens we find a good market. We want more inhabitants. Farmer.

California and Palestine.

The striking similarity of the climate, scenery, and productions of Palestine and California, has been frequently remarked. For the benefit of your readers, I will note a few points of similarity which have mostly come under my own observation.

The prediction in Amos, "That the ploughman shall overtake the reaper, and the treader of grapes him that soweth seed," is literally true of this valley. I noticed last fall that the vintage was not over, when, directly after the rain, the plough was in the furrow and the seed sown. In Proverbs we read, that "The sluggard will not plough by reason of the cold." The ploughing here is mostly done in the winter, and can only be done when the ground is soft by rain, as it soon hardens in the sun, although there is but little snow and ice, yet the rains are chill and penetrating, and a lazy man is apt to put off necessary work, and thus "Beg in harvest and have nothing." "When the almond tree shall flourish," is a simile well understood here. For two months our almond trees have been in blossom, fragrant as apple blossoms, and very much the same in appearance. The many allusions to the "first ripe figs," is appreciated here, inasmuch as there are two crops—the first ripens in July, and the second in November. When we read in Deuteronomy of a "Good land, a land of brooks of water, of fountains and depths that spring out of valleys and hills, a land of wheat and barley, and vines and fig-trees, a land of olives and honey," we are not at loss to know the exact meaning of it; for the wheat and the barley, and the vine and the fig-tree and the olive flourish luxuriantly here side by side, and the honey is not wanting. The abundance and excellence of the grapes of Palestine is frequently alluded to in the Old Testament. But it is hardly possible that it could have been more so than here. In the valleys and on the hills alike the vine flourishes, and whatever else fails, we are almost sure of an abundant yield, and the fruit is peculiarly refreshing and healthful in this semi-tropical clime. Some vines in certain localities bear enormously; as, for instance, one in Santa Barbara, which bore last year six thousand large clusters. I cannot speak of the "new wine" specially, as I am not "given to wine;" but it is largely made and used, and the "wine drunkards of Ephraim" have their imitators and equals here. It is well known here that wine, pure wine, does intoxicate. Visiting a friend to-day, I noticed some olive trees, and at once understood the simile, "Thy children shall be like olive plants around about thy table." Circling each tree was a number of young shoots growing quite symmetrically. I did not fail to look for the "Two or three berries on the top of the uppermost boughs," and there they were, gleaming among the dark green leaves. The fruit ripens in November, but stays on the tree until March. It is a perennial, and quite ornamental as a shade tree. "A sweeping rain that leaveth no flood," is an autumn storm that comes early before the wheat is removed from the field, and which utterly destroys the grass on the hills, which, although dry, is nutritious. As for the "Mustard seed," we well know what it is, a great pest to farmers, attaining a sufficient height "So that the fowls of the air may lodge under the branches of it," especially in the southern part of the State. If the hedge of thorns referred to in Hosea ii. vi., was as formidable as the one I saw a few weeks since as I passed by an old mission, it must have been a sufficient barrier. This was a species of cactus, with enormous leaves bristling with innumerable sharp points, interlacing with each other, and some twelve feet high. I thought at the time the good Padres were well protected. Speaking of trees, our live-oaks with their dense foliage correspond with the "Thick oaks" of Syria, and we can well appreciate the unfortunate predicament of Absalom, and how it came to pass. I have often rode by them on horseback, but seldom under them on account of the branches being low and snaggy. Were a procession to march through this valley, our sycamore trees would be exceedingly convenient for men like Zaccheus, "Little of stature," as they branch out wide and low.

"Floods" and "droughts" have almost as full and terrible meaning to us as to the Israelites anciently, especially droughts. When it says the "Heavens were as brass, and the earth iron," we know the world of meaning couched in the figure. "The field is wasted, the land mourneth, for the corn is wasted, the new wine is dried up. Be ashamed, O ye husbandmen, howl, O ye vine dressers, for the wheat and for the barley, because the harvest of the field is perished. The vine is dried up, and the fig-tree languisheth, and the apple-tree, even all the trees of the field are withered. The seed is rotten under the clod, the garners are laid desolate, the barns are broken down, for the corn is withered. The herds of cattle are perplexed because they have no pasture; yea, the flocks of sheep are made desolate; for the rivers of water are dried up and the fire hath devoured the pastures of the wilderness." This is a graphic description of the great drought here in 1863, as described to me by those who were here at the time; the cattle died by thousands, and extensive fires destroyed what the drought spared. The State has not yet recovered from the immense losses of what is technically known here as the "Dry Season." We can also fully appreciate the difficulty Ahab and Obadiah had in finding "Grass to save the horses and mules alive," when "It rained not on the earth by the space of three years and six months." The apt allusion to dust, in the Bible, is quite well understood here, as in the summer it becomes well nigh intolerable; and were we to adopt certain Eastern customs, as "They threw dust into the air," and "Cast dust on their heads," and "Repent in dust and ashes," it would be perfectly easy, as the dust is but too abundant.

Our experience of fire is kindred to that of the Psalmist: "As fire burneth the wood, and as the flame setteth the mountain on fire." Riding down the coast last season, I was eye-witness to the fact that "The flame setteth the mountain on fire." Among the red woods and heavy underbrush in the deep canyons, and over the high ridges of the coast

range, fire was raging with a destructive sweep and power, and running out through the grain stubble on the ranches, compelling the farmers to fight it day and night until subdued. The natural divisions of the country, I apprehend, are very similar. Level valleys and immense deep ranges of hills are the marked features of this State. Judea was described as "A land of hills and valleys." The sight of "The cattle on a thousand hills," is familiar to us. Those living in the valleys speak of the people in "The hill country," and as the hills are largely given to pasture we may say with Joel, "The hills shall flow with milk."—*Zion's Herald.*

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

Gov. H. H. Haight,	Hon. H. P. Coon, M.D.,
Rev. C. Wadsworth, D.D.,	H. H. Bancroft, Esq.,
Rev. Jas. Eells, D.D.,	J. D. Thornton, Esq.,
Rev. H. M. Scudder, D.D.,	F. Henderson, Esq.,
Rev. Thomas Frazer, A.M.,	R. B. Woodward, Esq.,
Rev. F. Buell, A.M.,	H. M. Newhall, Esq.,
Jas. B. Roberts, Esq.,	N. G. Kittle, Esq.,
A. Campbell, Esq.,	Erwin Davis, Esq.,
A. J. Ralston, Esq.	

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Thomas H. Selby & Co.

IMPORTERS OF METALS,

As follows: Bar Iron, Cast Steel, Boiler Plate, Axles and Springs Tin Plate, Sheet Iron, Iron Pipe, Zinc, Water Cocks, Plumbers' Tools, Iron Wire, Rubber Hose, Tinman's Tools and Machines Blacksmith's do., Cumberland Coal, etc., etc.

Nos. 116 and 118 CALIFORNIA STREET.

SAN FRANCISCO AND PACIFIC

Lead Pipe and Shot Works,

Corner First and Howard Streets,

Manufacture Lead Pipe, Sheet Lead, Bar Lead, Shot, etc., etc.

St. Augustine's Grammar School, for Boys, Benicia.

The next term opens

AUGUST THIRD, 1868.

Dean of the College.

APPLETON'S EDITION

OF THE

Waverley Novels,

NOW PUBLISHING,

From New Stereotype Plates, uniform with the new edition of Dickens, containing all the Notes of the Author, and printed from the latest edition of the Authorized Text.

TO BE COMPLETED IN TWENTY-FIVE VOLUMES.

PRICE 25 CENTS EACH.

Printed on fine white paper, clear type, and convenient in size.

PRONOUNCED A "MIRACLE OF CHEAPNESS."

ORDER OF ISSUE.

1. Waverley.	14. Fortunes of Nigel.
2. Ivanhoe.	15. Peveril of the Peak.
3. Kenilworth.	16. Quentin Durward.
4. Guy Mannering.	17. St. Ronan's Well.
5. Antiquary.	18. Redgauntlet.
6. Rob Roy.	19. The Betrothed, and Highland Widow.
7. Old Mortality.	20. The Talisman.
8. The Black Dwarf, and A Legend of Montrose.	21. Woodstock.
9. Bride of Lammermoor.	22. Fair Maid of Perth.
10. Heart of Midlothian.	23. Anne of Gierstein.
11. The Monastery.	24. Count Robert of Paris.
12. The Abbot.	25. The Surgeon's Daughter.
13. The Pirate.	

On receipt of SIX DOLLARS we will send the entire set of Waverley Novels, as published, and a copy of a new

STEEL-PLATE PORTRAIT OF SIR WALTER SCOTT,

from a painting by Sir Thomas Lawrence, suitable for framing; the Books and Engraving to be sent free of postage to any part of the United States.

Either of the above sent to any address on receipt of the price, 25 cents per volume.

On receipt of TEN DOLLARS a complete set of Dickens, in uniform style, 17 volumes, and Waverley, 25 volumes, will be sent postpaid. The cheapest Ten Dollars' worth to be found in the whole range of Literature. Forty-two volumes for $10.

Extraordinary Opportunity for the Million to Purchase a Set of Sir Walter Scott's World-renowned Waverley Novels.

CLUB RATES.

One Complete Set, 25 vols., $6 00	Five Sets, $26 00.
Three Compete Sets, 25 vols, 16 00	Ten Sets, $50 00.

Mailed at our expense.

Any person obtaining Four Subscribers for the Waverley Novels, and remitting us $24, will be entitled to a set of Dickens, 17 vols., GRATIS. All mailed at our expense.

Any person obtaining eight subscribers, and remitting $48 00, will receive a copy of the "Waverley Gallery," containing 25 Steel Engravings of the Female Characters in the Waverley Novels, bound in elegant morocco, price $15 00.

Canvassers wanted in every town in the United States. A great opportunity is afforded to industrious men and women to make money, as every man, woman, and child will purchase the WAVERLEY NOVELS, at this low price.

For Special Rates, apply to the Publishers,

D. APPLETON & COMPANY,
443 and 445 Broadway, N. Y.

REMOVAL.

Rowland, Bailey & Co.

Have removed their stock of

GROCERIES AND PROVISIONS

From 516 and 518, Washington st.

To 535 & 537 Clay St

Four doors below Montgomery St. and nearly opposite the Pacific Fruit Market.

They have on hand every article sold in a first-class grocery store, and prices are as low as the lowest.

RAILROAD CONTRACTOR.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR AUGUST, 1868.

August 6th—SACRAMENTO, Captain Parker, connecting with ALASKA, Capt. Gray.
August 14th—MONTANA, Capt. Cavarly, connecting with OCEAN QUEEN, Capt. King.
August 22d—CONSTITUTION, Captain Comstock, connecting with RISING STAR, Capt. Conner.
August 30th—COLORADO, Captain Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George E. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

SAN FRANCISCO, SATURDAY, AUGUST 8, 1868.

THE CHRISTIAN'S VOCATION.

It is with difficulty we realize what it is to bear the family name of God. We speak of the "vocation with which we are called," as though it were a sounding vanity, an idle designation, or at least one to be recognized only after we have passed through our mortal life. But when we learn its real design, we find the reverse of all this to be true.

Look around the little circle gathered in your home, and kept apart from the great world, as properly your own. Every face pleads more eloquently than words; every child—even the little one who can scarcely speak—as he lisps your name when giving his own, rouses your whole being for its welfare. If there is one of that group who needs sacrifice on your part, or special care, or peculiar nurture, his relationship to you, the ties that bind him to you, as your own, all symbolized in his *name* you have given him, will allow no doubt that he will not be neglected. If you have made it worthy of such regard, that name will be an honor to each child, wherever he may go, among those who have known you. It will be a passport to favor. It will be an introduction to good. It will be confessed with pride, and he will be moved to become worthy of the name he bears, and the advantages it gains for him. Your interest in that circle will not be exhausted in a day, or because one or two may require more than ordinary care and sympathy. That they are as dependent on you to-day as they were yesterday is enough to tax you to the utmost to-day; and that you have gathered them into that sacred, blessed, separate company you call your family, to endear and hallow the place you call your home, gives to every one the special privilege he would have no right to claim but for you agency in thus associating him in life.

Now, who can sufficiently magnify the grace of God that He makes this family oneness of interest and affection, and name, the type of our relation to Himself! We are called by His name, we are gathered into His household, we are brought into covenant with Him; and herein is the pledge that not one shall be put aside, or forgotten, or only partially blessed. Our vocation, the family title, what unnumbered tokens of love, and expressions of favor, does this secure for us! In one of the rewards promised to those who overcome, by Him who appeared to John in his vision, was the peculiar item: "I will give him a white stone, and in the stone a new name written, which no man knoweth, saving he that receiveth it." May not the thought we are considering throw light on this promise? That name is not different in each case, but the same in each case; yet *new* to every soul that receives it. It is the name of his Father, and is given to be an assurance to him, in any circumstances, and to the end, that he belongs to the household—may plead the privilege of a child. It is not given to a few, whom we might deem most worthy to receive it, and most likely to honor it, but to every one, to be his encouragement, and ground of hope. Is there any weak, weary, grieving spirit, who has the white stone and would not surrender it for worlds, yet has feared to open it and read the name, lest it might be presumption to attach it, with all its attending blessings, to his own? Let not Satan cheat you of your birthright, by inducing you to believe it wicked to appropriate what your Father put into your hands only. That Name, that dear and revered name, written for your eye—all the more dear because designed for no other, is God's delicate mode of telling you beforehand what may be your emergencies, and what will be your relief. It says: "You will come to hard passes in the Christian course; you will be buffeted by the devil, you will be traduced by your own evil heart; you will be tempted by the world; the days will sometimes be dark, the nights will sometimes be dreary, it may be you will be almost ready to believe that your hope is vain. My child, in those cheerless seasons go by yourself and take this white stone; open it. The name of your father will never fade from it, and as you read, it shall give you delight in praise, it shall give you courage, and comfort, and peace, and itself shall be the earnest of triumph and life." It is a beautiful and touching figure, by which to remind His children of their Father's love. It is a charming revelation of the sacred privilege granted to every member of the family. It is God's method of stating what may be the advantage of the vocation wherewith His grace has called us.

THOUGHT AND PATIENCE.

Many men permit what they have learned to be unarranged and floating in their minds, not of real value to them because not incorporated into themselves, by the process of careful thought. They talk without thinking, they read without thinking, they act without thinking, and as a consequence they attain no fixed opinions, and no solid character. These persons have but a very indefinite perception of good or evil, and very vague ideas of what is to be included in life. Not long ago I visited the clay model of a figure that is to adorn a public place, and while admiring the work, I asked the artist how he formed it. He replied, that he first decided by days of study and many different sketches, what should be the attitude and expression; then made an iron frame for its support; then put on the clay of a small portion at a time, patiently moulding it into the outline of muscles, and features, and form, removing it when defective, studying each part most narrowly, and adapting all the parts to each other, until the whole was complete, majestic, and beautiful, as it stood before me. Such is the province of thought—to form the *model* of the character and life. It can be produced by no other agent. There must be study, and anxtiety, and patience, part after part must be perfected in shape, the whole must be carefully arranged, until a result worthy of a man shall be finished at last. There will be those who will pass by one thus engaged, and toss their heads and ridicule his work, as useless, yet the creation of such a model for sentiment and conduct, is the most noble achievement of a human soul. The very process allies man to God, and introduces the light in which He views right and wrong, the good and the evil. Still, when this is gained, all is not accomplished to which we should devote ourselves. Few men are brave enough to be always true, even to the convictions they possess, to move on in the path they see clearly opened before them, to express what is within them, in what they show themselves to be, and in what they undertake to do. For this is our *life-work*, to copy the model that is perishable, into the enduring marble of character and conduct, with tireless industry and all our skill; humbly and prayerfully, as feeling our need of help from Heaven, to transfer part after part till the perfect form shall reward our toil. As no one will form the model without *thought*, so no one will copy it without *patience*. Errors will be frequent, and must be corrected. Failures will make us sad, but they must not be allowed to mar the figure. The work will be long, and often it also must be prosecuted in sight of those who will laugh at, because they cannot appreciate so high ambition. Nevertheless, let no one who has commenced it, be dissuaded from unwearied progress, for he is carving for immortality, and when its light shall beam upon his completed labor, he shall have his *reward*.

STRANGE CHRISTIANITY.

The *Alaska Herald* is a paper commenced, a few months ago by a man who came here with recommendations from the cities of the Atlantic, as a man of ability and a Christian, and who is known as "Father Agapius," from his connection with the Greek Church. The feeling of all who are interested in the introduction of good influences into the vast domain lately purchased by our Government, was enlisted in favor of this paper, which was designed for circulation there chiefly, and it has been watched with the hope that it might grow into a power for good. Several articles, however, have somewhat surprised us as we have read them, and the last number, of August 1st, has two pieces which are, at least, remarkable exhibitions of Christianity, as we understand it. One of these is a contribution, with editorial endorsement; the other is written by the editor himself; and they are as follows:

"EDITOR ALASKA HERALD:—Your remarks in the last number of the *Herald*, on the subject of the Jesuits, are so entirely correct as to demand the serious attention of the public. At the same time, allow me to state, as an eye-witness of Protestant missionary effort in India, China, Japan, and the Sandwich Islands, that the difference between the success of the Jesuits, and the barren results of the Protestants, arises from the fact that the Papal preacher is devoted to his cause, at all hazards, while the reformed preacher is wholly devoted to himself, his ease, and his pocket. As for civilization, your true civilizer is the merchant to trade, and the soldier to protect, and it is fortunate for the human (heathen) species that these stand between the fanaticism of rival religions, both flourishing on the credulity of the—*Faithful*.

"[As for the pocket, we happen to be personally acquainted with the fact that J. King, D.D., of Athens, amassed a pretty fortune of over half a million while "ministering to the benighted Greeks" at Athens. What a pity Moses did not cut off *all* the worshippers of the Golden Calf.—ED.]

"Five years ago we were in Turkey and have many times since had occasion to draw a comparison between Turkish and Christian morality. From our observations we are compelled to admit the superiority of Turkish over Christian doctrine in producing a sound morality in the masses. In temperance, honesty, justice, and toleration, the Turks are far superior to the Christians."

Comment is not necessary. Those who know what is true in relation to Protestant missionaries, and especially the venerable Dr. King, will be indignant at this statement in a professedly religious paper. And those whose knowledge of history informs them of the difference between the results of Mohammedanism and Christianity, will almost pity the attempt in the few lines here quoted to prove false what the world knows to be true. Others would not be influenced by anything that might be said in defense, either of our missionaries or their religion. This much is certain, the religion that thus expresses itself is not the type we would propagate in Alaska.

THE SUSPENSION OF GEO. H. STUART.

In your paper of July 11th, in the article on the suspension of Mr. George H. Stuart from the Elder

ship in the Reformed Presbyterian Church, you do an injustice to the principles of that body of Christians.

The law of that Church has no reference to any individual version of the Psalms of the Bible, but is wholly and solely confined to the Psalms of the Scriptures, as the only legitimate and authorized medium of singing the praise of God. The version which you term "Rouse's version of the Psalms," is the *authorized* version of that Church, and was was made and sanctioned by the Westminster Assembly of Divines (a body of men dear to the heart of every true Presbyterian), and continued to be used by the *whole* of the Presbyterian family until about the year 1760, when the *imitations* of the Psalms by Watts were *allowed*, not *authorized*, by the American Presbyterians.

The Church of Scotland (Established and Free), United Presbyterians, and all the various Presbyterians of that country (the birth-place of them all,) still continue to use the Westminster Assembly's version of the Psalms. The Assembly appointed a committee to make that version, and on that committee was Sir Francis Rouse, a member of Parliament, a man distinguished for his great learning, piety, Calvinism, and an extraordinary peculiarity of poetical genius, and who, no doubt, took the leading part in the version reported to the Assembly, which was debated, and amended, and finally adopted, and continues to the present time, and will continue until a better one can be furnished to the Church. And I believe that if it was not for the subject of Psalmody, the Presbyterian churches, without exception, would form a union in this country.

All the Psalm-singing Presbyterian churches, the Reformed and the United Presbyterians, believe the mode of conducting the praise of God in public worship, and the preaching of His Word, to be equally important. If you or Dr. Wadsworth were to take into the pulpit "Pilgrim's Progress," Baxter's "Saint's Rest," Doddridge's "Rise and Progress of Religion in the Soul," or any other good book of human composition, and preach from them instead of the Bible, I am almost certain that your Presbytery would serve you in the same way that the Reformed Presbyterian Synod served Mr. Stuart; at least, I have no hesitation in saying that they should do so, and I think you will agree with me.

It was Chillingworth, I think, who first asserted the great Protestant principle that "the Bible is the religion of the Protestant." The Reformed Presbyterian Church, in her standards, declares as follows: "The Book of Psalms, which is of divine inspiration, is well adapted to the state of the Church, and of every member, in all ages and circumstances; and these Psalms, to the exclusion of all imitations and uninspired compositions, are to be used in the social worships." Mr. Stuart confessed that he broke this law of the Church.

In conclusion, Mr. Editor, I would simply ask you what is the use of law if discipline does not follow the violation of it? If the law is wrong, repeal it, but while it is on your books, enforce it, even if the penalty should fall on the head of as good and pious a man as George H. Stuart. Subscriber.

Are Public Schools Unfriendly to Religion?

"There is a unanimous recognition of the rapid spread of unbelief in some of the tenets which they consider the substantial bases of Christianity. It is referred to the public school system, which encourages exacting investigation without excepting religious faith."

We clip this from a generally kindly written article on reunion in the *Alta*. We have read it with the greatest surprise. The writer seems to think that Christianity is endangered by the light and knowledge of the present day, especially by the spirit of enquiry engendered in our public schools, "which encourages exacting investigation, without excepting religious faith." We have not seen of late a more injurious imputation on Christianity, or one more inconsistent with its spirit. Christianity fearing investigation! It courts it. Religion suffering by investigation! It lives by it. *It fears only indifference.* Opposition developes its power and energy, and the candid consideration of its claims discloses the inestimable value of its truths and the unshaken foundations on which they rest.

Religion has some reason to fear from the present public school system, not because its claims are acknowledged and considered, but because, by the very principle of the system, as now understood and practiced, religion and the Bible and Christianity are kept out of sight and treated as matters of no account in State education. The danger, I repeat, comes entirely from a different quarter than that which the *Alta* apprehends. The State, in place of establishing some system of religious faith, and wrongfully imposing it upon the people, has swung to the other extreme, and ruled out of the public schools the source and fountain of all religious truth, and has set the example of disregard and indifference by ignoring the Word of God itself, whose principles lie at the foundation of morality and religion, of public and private virtue, of social order and civil liberty. Suppose we grant, for the time being, that in the divided state of public sentiment on religious questions, the Bible shall not appear in our public schools: its very absence, for whatever reason, is what we deprecate. We wish that Jesus Christ, the author of our religion, might appear in our public schools, to be studied, investigated, torn to pieces if it may be, studied through His teachings, through His sermon on the mount, through His miracles, through His death, through His resurrection. "If this counsel or this work be of man, it will come to naught; but if it be of God, ye cannot overthrow it." We are willing, glad, to have Christianity searched to the bottom. We know, if Jesus Christ be the study, the conviction will find utterance with the candid investigator: "Truly, this was the Son of God." We know, if His doctrine be the study, the result will be, "never man spake like this man." If His works be the study, "no man can do these miracles which thou doest except God be with him."

We only wish our youth could be toned up to such earnest investigation; we wish they had the nobility of the Romans, who "searched the Scripture daily to *see* whether those things were so." We ask for anything but indifference; or worse, the kindly care for religion which deprecates or shields it from thorough investigation, lest a rough handling should endanger its precarious existence. F. B.

Congregational Singing.

ROBINSON'S SONGS OF THE SANCTUARY. Hymns and Tunes for Congregational Singing. 35,000 copies already sold. Editions for Congregational, Presbyterian, and Baptist Churches. Price, $2 50. A liberal deduction to churches for first introduction.

HENRY WARD BEECHER'S PLYMOUTH COLLECTION. 75,000 copies sold. Congregational and Baptist editions, $2 50.

EPISCOPAL COMMON PRAISE. Appropriate Tunes for all the Psalms and Hymns in the Book of Common Prayer, with select chants. Just published. $2 75.

A. S. BARNES & CO.,
Publishers, New York.

For sale by H. H. Bancroft & Co., San Francisco.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

CURRENT LITERATURE.

FROM THE OAK TO THE OLIVE.

With this pleasing title, Julia Ward Howe adds to her other works the *Record of a Pleasant Journey*, an account of what she saw and felt and thought in her third visit to Europe. It is not easy at this day, to write a volume including the material that must be gathered from a mere tour in Europe, in such style as may be a warrant for the repetition of what so many have undertaken to describe. Were the tourist only to present us with what he saw, scarcely any beauties of rhetoric would so much adorn the facts that one would be tempted to read them again. Were he only to tell us the feelings by which he was affected, in the presence of the varied scenes and objects to be encountered on such a journey, there would hardly be a presumption in favor of much profit from the reading. Were he only to make known his reflections, as a moralist, or as a philosopher, suggested by the texts that have so often furnished themes for similar thought, the announcement would fail to awaken general interest in his book. But if he can combine all these, and describe beautifully, reveal his emotions naturally, and philosophise wisely, in such mingled manner as to bring about his work the charm of novelty and the attention of genuine worth, he deserves to be read, and he will be. The writer of these notes of travel has done this more successfully than have most who have attempted the same thing, and for this reason her book will be popular. We quote some passages which illustrate the style throughout:

SWISS REPUBLICANISM.

"It would be I, think, an instructive study for an American to become intimately acquainted with the domestic features of Swiss republicanism. It is undoubtedly a system less lax and more carefully administered than our own. The door is not thrown open for beggary, ignorance, and rascality to vote themselves, in the shape of their representatives, the first places in outward dignity and efficient power. The old traditions of breeding and education are carefully held to. Without the nonsense of aristocratic absolutism, there is yet no confusion of orders. The mistress is mistress, and the maid is maid. Wealth and landed property persevere in families. Great changes of position without talent are rare."

"Hotels, railways, and depots in Switzerland are comfortable, and managed with great order and system. The telegraph arrangements are admirable, cheap, and punctual, as they might be here, if they were administered for the people's interest, and not for the aggrandizement of private fortunes. Living and comfort are expensive to the traveller, not exorbitant. Subordinates neither insult nor cringe. Churches are well filled; intelligent and intelligible doctrine is preached. Education is valued, and liberal provision is made for those classes in which natural disability calls for special modes of instruction."

"Swiss Catholicism has not the slavish ignorance of Roman Catholicism. The little painted crucifixes by the wayside indeed afflict one by their impotence and insignificance. Not thus shall Christ be recognized in these days. In some places their frequency reminded me of the recurrence of the pattern on a calico, or a wall paper. Yet, as a whole, one feels that Switzerland is a Protestant power."

THE VENICE THAT IS TO BE.

"But these prosaic recounts are only the record of actual steps. The charm, the delight of Venice they do not and cannot express. My recollections of the city invest her with a solemn and stately personality. She can never be what she has been. The present world has no room for a repetition of he, former career. But she can be a prosperous and happy Christian commonwealth, with her offices and dignities vested in her own sons, with education and political rights secured to all her children. And this is better, in the present day, than to be the tyrant of one-half of the world, the fear and admiration of the other. For Peace, now, with open hands, bestows the blessings which War formerly compelled with iron grasp and frowning brow. The true compulsion now is to compel the world to have need of you, by the excellence of your service. Industry has a deeper mine of wealth than piracy or plunder can ever open. A man's success is in strict proportion to his use; and the servant of all is the master of all. So the new Venice for which I look is to be no more like the old Venice than the new Jerusalem will be like the city of David. Moral grandeur must make her great. Justice must make her people happy. And so beautiful and delightful is she, that I cannot help echoing the Psalmist's exclamation, "Pray for the Peace of Jerusalem! They shall prosper who love thee!"

"A wash of waters, a play of lights, a breeze that cools like the perfumed water of the Narguilé, a constant interchange of accents musically softened from the soft Italian itself, which seems hard in comparison with them; rows of palaces that have swallowed their own story; churches modelled upon the water like wax-flowers upon a mirror; balconies with hangings of yellow-brown and white; dark canals, that suggest easy murders and throwing over of victims; music on the water; robust voices, of well-defined character; columns and arches, over which Mr. Ruskin raves, and which for him are significant of religion or irreligion; resolute-looking men and women; a world of history and legend which he who has to live in to-day can scarcely afford time to decipher,—this is Venice as I have seen her, and would see her again. Rejoice, O sister cities, that she is free. Visit her with your golden rain, O travellers; with your golden sympathy, O poets! Enrich her, commerce! Protect her, Christian faith of nations, for she is free—free!"

PROTESTANTISM AND THE GREEK CHURCH.

"In the presence of the contradictions alluded to above, the position of the Greek church and of American Protestant missionaries becomes one of mutual delicacy and difficulty. The church allows religious tolerance. Yet it naturally holds fast its own children within its own borders. The Protestants are pledged to labor for the world's Christianization. When they see its progress opposed by antiquated usage and insufficient method, they cannot acquiesce in these obstacles, nor teach others to revere them. Here we must say at once that no act is so irreligious as the resistance of progress. Thought and conscience are progressive. Christ's progressive labor carried further the Jewish faith and tenets which were religious before he came, but which became irreligious in resisting the further and finer conclusions to which he led. "I come not to destroy, but to fulfill." Progress does fulfill in the spirit, even though it destroys in the letter. Protestantism acknowledges this, and this acknowledgment constitutes its superiority over the Greek and Catholic churches. Religion of this sort leads away from human mediations, from confessions, benedictions, injunctions and permissions of merely human authority. It confesses first to God, afterwards, if at all, to those whom its confessions can benefit. It brings its own thought to aid and illustrate the general thought. It cannot abdicate its own conclusions before any magnitude either of intellect or of age.

"The Protestant, therefore, would be much straitened within the great limits. He is forced to teach those who will listen to him that God is much nearer than the priest, and that their own simple and sincere understanding of Christian doctrine is at once more just and more precious than the fallacies and sophisms of an absolute theology."

There are views of religion and society, and politics, expressed occasionally, from which we must dissent, but there is much within the volume that may be read with satisfaction and profit. Not the least of its attractions is the beautiful dress in which it is published by Lee & Shepard, of Boston. Sold by H. H. Bancroft & Co.

The same publishers have also just issued another of the *Rosa Abbott Series*, entitled *Upside Down*, and *Farm Talk*, or conversations on various common farm topics, by George E. Brackett, both of which are pleasing books of their kind, and may be bought of Bancroft & Co.

We have received from A. Roman & Co., the *Overland Monthly*, for August, which is even a better number than the first, and leaves no doubt that our Pacific Magazine can be ably sustained.

From the Pacific Coast publishers, H. H. Bancroft & Company, we have *Putnam's Magazine*, for August. This magazine is always welcome, and this number, especially, well repays careful reading. "Our Civil Service," and "A Sketch in Oils," are among the best of the articles.

BOOKS AND PERIODICALS RECEIVED:

SONGS OF THE TEMPLE.—A collection of tunes, chants, etc., original and selected, for the use of Christian churches of all denominations, adapted to the wants of Musical Associations, Conventions, and the Home Circle, containing a system of practical instruction for Singing Schools. By B. F. Baker and J. F. Fargo. Boston: Lee & Shepard.

PACIFIC MEDICAL AND SURGICAL JOURNAL, for August. San Francisco: H. H. Bancroft & Co., containing among other things, interesting articles on Small Pox and Vaccination.

CONGREGATIONAL REVIEW, for July. Boston: M. H. Sargent.

SPIRIT OF MISSIONS, for July. New York: Published for the Board of Missions.

THE FAMILY TREASURY, for June. New York: T. Nelson & Son.

LITERARY ITEMS.

THE *Independent* has discovered a classical precedent for the conduct of King Theodore after his defeats, which, by the way, has grown much in romantic interest since the first reports:

"One of the most pathetic incidents in Virgil's tale of Dido, is that which represents the African Queen selecting as the instrument of her suicide, the sword which Æneas, when on more friendly terms, had given her:

'A boon she had not asked with this intent.'

The very same story is told in plain prose of the African King Theodore. The pistol with whose bullet he had pierced his own brain, was found to bear an inscription certifying that it was presented to the King by Queen Victoria, as a token of regard and thanks for his kindness to Mr. Consul Plowden. Were we inclined to press the analogy between the epics of poetry and real life, we might remind the reader that Theodore, like Dido, was an aspirant for the hand of the enemy by whose friendly gift he perished."

THE New York *Post*, says William Young of that city has made the best anagram of this century. Louis Napoleon Bonaparte—An open plot. Arouse, Albion!

THE *Tribune*, a new paper published in Paris, has received permission to be sold in the streets, although opposing the Government.

THE *Evening Post*, with its customary good taste, declares for "woman" in preference to "lady;" and so do all the best authorities.

THE San Jose *Patriot* appeared last week in an enlarged form. This would seem to indicate the prosperity of the paper.

FREDERICK SEWARD is writing the life of his father, Hon. W. H. Seward, at one time a somewhat influential politician.

THE only copy of the first newspaper printed in America, known to be in existence, is in the British archives in London.

M. THIERS, is now 71 years old.

M. Eugene Forcade, the political writer of the "*Revue des Deux Mondes*," and chief editor of a financial paper, has gone crazy,

On or about the first of September next, the San Francisco *Call* will issue a weekly in conjunction with its daily.

Chas. Dickens, is about to give a farewell series of readings in England and Scotland.

Three hundred hands are employed at the Riverside Press, at Cambridge, Mass.

Sacramento has four Daily, two semi-weekly, and three weekly newspapers.

The Columbia *Press* will be removed from Umatilla to Walla Walla.

Chas. Dickens' paper, the *Daily News*, is sold at one penny per copy.

Nearly 100,000 copies of Pollard's "Lost Cause" have been sold.

A woman's rights paper is published in Lisbon.

Educational.

Labels.

The fine collection of paintings left by Hon. James Bowdoin to Bowdoin College, suffers from the lack of a descriptive catalogue. No such accompanied it, and the pictures are shorn of much of their value by the fact that the names of the artists who executed them must remain unknown. We have heard, also, of a fine collection of minerals in Connecticut, which labors under a similar disadvantage; whose value, indeed, is almost wholly destroyed by the absence of labels of locality. A young person in making a collection of minerals, shells, or flowers, should be careful and write the labels at once. Improve them, if you can, afterwards, but write the best you can without delay. Moreover, remember mice. We have just received some ores from Chili, which were well labelled, to be sure, but which were not so well put out of the way of these little paste-loving rodents. C. R. C.

"The memory of God is the archives of the skies."—*Dr. Scudder's sermon Sunday Evening, August 2.*

A Suggestion.

When Superintendent of a Sunday-school, I had a novel and simple arrangement which proved very valuable, and may assist others. A small wooden box, nicely painted, bearing the inscription "Questions," was securely fastened to the wall near the entrance; and through an opening in the top of it, any who desired might thrust in from time to time, any religious or moral questions. Once a month our box was unlocked, and its contents produced before the school, giving any one an opportunity to answer the queries. Eventually our box only received questions upon the lessons of the day, which were deposited by teachers and scholars on entering the room. The first plan awakened a great interest among the members of the school and of the community, many of the latter coming expressly at such times to listen to the answers. But the second plan had a wonderful influence, awakening great interest in the lesson. It gave me what I was so anxious to obtain, and could obtain in no other way, some knowledge of what the scholars had been thinking during the week, and at the same time it aided me in my work of catechising, for it furnished material and secured attention.—*American Presbyterian.*

Personal.

N. M. Orr is the Republican candidate for the vacant Senatorship in San Joaquin County.

The following are the Presidential Electors nominated by the several Districts: 1st District, J. O. Hoffman, of Santa Barbara; 2d District, A. Reddington, of Sacramento; 3d District, C. Westmoreland, of Humboldt. At large: Gen. LaGrange and J. B. Pelton.

Rev. E. Birdsall, of Stockton, Rev. A. S. Nicholson of Napa, and Rev. D. E. Willes of Brooklyn, have resigned their respective parishes. Mr. Nicholson goes to Vancouver, W. T., and Mr. Birdsall comes to San Francisco.

Rev. Mr. Pond, of Petaluma, has, we understand, closed his connection with the church in that place, and will become Pastor of the Third Congregational Church in this city.

R. W. Heath is said to have been the California delegate who immortalized himself and the Chief Justice by casting his vote for Chase in the New York Convention.

Rev. Mr. Daly, of Stockton, delivers two lectures at the Mercantile Library, in this city, on Thursday, 6th, and Monday, 16th. Subject: "The Holy Land."

Rev. W. I. Nichols delivered a lecture at the Central Methodist Church last Sabbath evening, on the "Moral Significance of the Transcontinental Railway."

Rev. Mr. Allen has been detained in this city by the illness of his family, and has not yet been able to take charge of his church at Chico.

Rev. Louis Lootens, who has been appointed Bishop of Idaho, will be consecrated at the Catholic cathedral on Sunday next.

Rev. H. G. Perry, formerly of Suisun, has been appointed agent for the Episcopal College at Benicia, for San Francisco.

Rev. E. B. Walsworth of Oakland has received the degree of D. D. from Ingham University, N. Y.—*Spare Hour.*

Rev. J.R. Hammond is giving a series of Sabbath evening lectures at Placerville, on the "Evidences of Christianity."

Rev. J. G. Clarke, D.D., of Waterbury, Conn. has been elected Rector of the Episcopal church at Stockton.

Rev. A. C. Treadway, of Oswego, N. Y., has been called to the Church of the Ascension at Vallejo.

Hon. H. Edgerton has returned to California, and will take the stump for Grant and Colfax.

A. D. Sargent of Nevada county, is the Union candidate for Congress in the Second District.

Chancellor Hartson, of Napa, is the Union candidate for Congress in the Third District.

Rev. C. B. Wyatt, of Trinity church, San Francisco, preached in Napa on Sunday last.

John Bigler is announced as U. S. Land Commissioner to examine the C. P. R. R.

J. Ross Browne, U. S. Minister to China, sailed on the *Japan* on Monday, August 3d.

Rev. E. C. Bissell edited the *Pacific* during Mr. Benton's absence last month.

Rev. Wm. Monteith has resigned the Presidency of Albany College, Oregon.

Commodore Alden has taken command of the Navy Yard at Mare Island.

J. A. Donahue has been elected President of the San Francisco Gas Company.

W. K. Parkinson, State Controller, sailed from New York on July 20th.

Newton Booth delivers the opening address at the Mechanics' Fair.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque . . . . . 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, ... $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, ... $5

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, ... $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

AGRICULTURAL.

Walking Horses.

The best gait a horse ever had for everyday use is a good walk. Colts are not trained to walk in all the Eastern States. Young America wants more speed. Kentucky has more good walking horses than any other State, for there horseback traveling has long been in fashion for men and women, over a country where muddy roads at some seasons, renders any other gait impossible, and so horses have been bred to the saddle and trained to a walking gait. This is also the case in all the Western States, and perhaps might have been so in New England when our grandmothers went to meeting on pinions behind our grandfathers. But one-horse wagons have put horseback riding out of fashion, and now a good walking-horse is more rare than one that can trot a mile in 2:40. At the Springfield, Mass., horse show of 1860, the writer was one of a committee to award prizes to the best two walking horses. Out of seventeen entered, the committee found but one that was considered a first-rate walker. This was a Morrill mare, which walked five miles an hour with ease. Two others were fair walkers, and the others knew no gait that could be called walking. At the New York State fair the same state of facts was again developed. A letter from Wisconsin says: "I think horses trained to walk fast would be a greater benefit to farmers in general than fast trotters, as almost all his work has to be done on a walk. I once knew a man in Massachusetts, who, before railroads were built, kept from two to four teams to work on the road, and never allowed them to trot at all, and made the distance in quicker time than his neighbors, who made their horses trot at every convenient place. He said that when a horse commenced to trot, he walked much slower than his common gait if kept on a walk, and thereby lost more than he gained. Will farmers think of this, and pay more attention to walking horses?"—*Solon Robinson.*

Dutch Dairies.

The farmers' boys and girls of America, I am confident, would like to go with me into a Dutch farm-house. Stable and house and dairy are under the same roof. The house which we visit stands on the bank of the canal—the water in the canal being almost on a level with the ridge pole. One of the dairy maids has been out to the canal to wash her pans and dishes; and now she is taking them back to the house, drawing them in a little cart. Look at her shoes—wooden ones, turning up at the toe like a skate—clump, clump, clump they go as she steps. She leaves them outside the door, and puts on a pair of slippers as she enters. She has a bonnet so curious that I shall not attempt to describe it, but of just such a pattern as those worn by her grandmother. Some of the cattle are in the fields, blanketed to keep them warm.

A girl with red cheeks and bright eyes opens the door of the stable, and takes us along the stalls to see the cows—26 cows standing by their cribs, or lying down chewing their cuds, fastened with rope halters—and, funniest of all sights, each cow has her tail drawn up to the ceiling by a cord and pulley, so that in time their tails grow straight up into the air! There are great tubs filled with milk and curds and whey; there is a fire-place in the stable where they scald the milk, also the cheese-press. We enter a little room and see pots of butter and rows of cheeses—not such great ones as the Vermont and New Hampshire girls turn out, but cheeses almost the size of a 64-pounder cannon ball, not quite round, but like the earth, flattened a trifle at the poles. If you were to go with me into some of the warehouses of Amsterdam, you would see cart loads of these cheeses, enough to freight scores of ships. They are kept for months and years even, and never lose their goodness. You have read how a Dutch Admiral, in a sea-fight, after having fired away all his cannon-balls, kept up the battle with cheeses—just such cheeses as these which the bright-eyed dairy-maid takes pleasure in showing.—*Carleton.*

Transplanting by Night.—A gentleman anxious to ascertain the effect of transplanting at night, instead of in the day, made an experiment, with the following result: He transplanted ten cherry-trees while in bloom, commencing at four o'clock in the afternoon, and transplanting one each hour, until one in the morning. Those transplanted during daylight shed their blossoms, producing little or no fruit; while those planted during the darker portions maintained their condition fully. He did the same with ten dwarf-pear-trees, after the fruit was one-third grown. Those transplanted during the day shed their fruit; those transplanted during the night perfected their crop, and showed no injury from having been removed. With each of these trees he removed some earth with the roots. The incident is fully vouched for; and, if a few more similar experiments produce the same result; it will be a strong argument to horticulturists, gardeners, and fruit-growers.—*Christian Intelligencer.*

Salt and Lime to Prevent Grain from Lodging.—Two years since I noticed in one of my agricultural papers, that a mixture of salt and lime would stiffen the straw of growing wheat, and to a certain extent prevent it from lodging. I resolved to try the experiment. I made a mixture in the portion of two parts (weight) of lime to one of salt. I permitted the mixture to lie in the heap some three or four weeks before applying it. I then spread it over a part of a field at the rate of a ton and a-half to the acre. The result was, that on that part of the field my wheat all stood well, while on the remainder it went down before the heads were entirely filled. I need not tell you how much easier the former was to cut than the latter. The yield was decidedly better, and in addition to these advantages, I found the clover on that part to which the mixture had been applied, larger and finer than where it had not been.—*Cor. Farmer and Gardener.*

California Wheat and Flour.—It may not be known that there is a handsome gain to shippers of our wheat, in the matter of *gain in weight* by reason of its absorbing moisture in passing from the Atlantic to the Pacific. In some cases the gain is a large per centage.

California wheat is gathered in such a perfect manner—so dry and pure, that in passing to a humid atmosphere, it will absorb largely; yet, we do not believe the actual gain has always been known so as to be realized.

In the matter of flour, we are informed by the best authorities,—bakers that purchase and use our California extra flour—that it will absorb twenty, thirty, even forty pounds of water more than a barrel of Atlantic flour; thus, they actually gain from ten to twenty per cent. more weight, besides having a superior flour. These facts are worthy of note.—*California Farmer.*

Corn Meal for Milch Cows.—The statement is often made, through the agricultural press, that corn meal is the best feed for cows as a milk producer. Why this should be repeated, when the experience of almost every farmer is to the contrary, we cannot tell, unless it be for the reason that corn meal is the best grain for cows not giving milk. There is no grain so good for keeping up animal heat and producing flesh and fat, and it is used in winter by most dairymen for this purpose; but as a milk producer it is the poorest grain that can be given. Oat meal and wheat bran are far superior. These statements are based upon actual experiment and the experience of many farmers.—*Ohio Farmer.*

MINING.

Accidents by Blasting.

How frequently do we hear of the painful fact that a man has lost his life by blasting! Why does this occur? I believe that in nineteen cases out of twenty it is through carelessness—from a want of consideration that they are dealing with gunpowder. Let the charge of powder be put into the hole, not all at once, but whilst it is being done, settle it down twice or thrice with the swabstick, and when all in, ram it down with the same tool—not with the iron ramming bar—and cover it tightly and firmly with a piece of dry clay. This done, at once dip the end of the swabstick in water, or better still, into the wet sludge that has been made in the process of boring, and with it free the sides of the hole from the dust of powder which must, of necessity, have adhered to them in pouring in the charge, and which, if not removed, will be likely, by a spark from the ramming-bar, in tamping, to convey fire to it. Well wipe out your hole with the wet swabstick. Having done this, put in a layer of fine, properly prepared tamping, and softly and carefully settle it down and "floor" with the ramming-bar alone—using no hammer for the first layer. I say put in a large layer, because if the first layer be a small one, it will be the more liable to be forced down by the ramming-bar and disturb the powder. Settle down the first layer of tamping in this way, and then, with impunity, the hammer may be used—taking care at the same time to keep the ramming-bar free from the safety-fuse. Let these little matters be attended to, and no fear of explosion in tamping need be apprehended—all will be safe—life will not be sacrificed. As a matter of course, proper material for tamping should be selected. I have frequently known miners, when working on hard, fiery ground, to carry tamping from home daily to the mines with them—stone of a soft, yielding nature, and well bruised before used—bruised, coarse potsherd is good. There seems to be an idea existing very generally that tamping requires to be driven with great force with the hammer, so much so that, as before said, the mallet is sometimes employed; but this, as has fatally been proved, is not necessary—nay, if the hole be judiciously placed, even the hammer, generally speaking, need scarcely be used. I say fatally proved, because it is well known that on the first layer of tamping being hammered down explosion has taken place, the burden of the hole has been removed, and the poor unfortunate miner has lost his life.—*S. F. Mining Press.*

The Mining Business.

The London *Mining Journal* says: It can now be scientifically determined whether ground is ore-bearing, and the skill of the mining engineer enables him to prepare an estimate of cost more accurate than is found in any other department of work. It may occur that the lode lies deeper than was expected; that it turns out poorer than the first yield could justify any one in supposing; that an incursion of water should happen, or some "fault" be discovered; but the mishaps incidental to building such a ship as the Great Eastern or the Warrior; of laying down a line of railway, tunneling a mountain or under a city; of creating extensive irrigation works, or a ship canal, are of more frequent occurence. Yet men will invest in such undertakings, and neither be warned or intimidated by loss after loss; while if every mine is not found to be a "lode of wealth," the utmost disappointment is experienced, and the business itself characterized as too uncertain for legitimate investment. If there were more hazard to the adventurer, which I deny, there is also more chance of splendid success. Which, of all the department of industry deemed most successful, has heaped upon its persevering followers such rich rewards? Great fortunes have been made in cotton-spinning and weaving, but wide spread loss and ruin have again and again swept away the property of the cotton districts.

Ship building has enriched enterprising persons, but how often has the storm scattered the fleets? The colonial produce-grower, in the cotton-field, the indigo, or coffee plantation, etc., has often come home the victim of disease, and more frequently ruined by the failure of crops. Now, in mining, no such perils exist. The lode fails less frequently than the foreign produce crops. An innundation does not occur so frequently as a shipwreck, the storm that spoils the merchant, sweeps over the miner harmlessly; he is, in fact, more free from the danger of losing the fruits of his capital then any other adventurer whatever; and, every farmer, every grower of produce, every cattle breeder, merchant, and manufac-

turer is an adventurer as much as the investor in the mine, without having ground so sure to work upon, or chance so glorious of a magnificent result.

La Porte.—La Porte stands on gold, 'tis built on a number of small white quartz gravel hills, all of which are "pay dirt," The town is being washed away as fast as possible. The roar of the water in the hydraulic claims close by is constant. A half dozen houses have been moved away on one side of the town this season to allow the miners to go on with their work, while on two other sides the encroachments of mining work is nearly as close. A half mile distant is the site of the former town of Spanish Flat, once one of the most lively of mining towns; but now not a house is to be seen there, everything being sluiced down to the bedrock. It requires no mystical lore to see that such in a few years will be the fate of La Porte. A half mile south of here are what are known as Secret Diggings; two hundred thousand dollars were taken out there from less than a single acre, while the whole extent mined over has yielded over $2,000,000. These diggings look like a very big hole in the ground, being nearly a mile in length and about 200 yards in width, and an average depth of over 100 feet. There are other diggings nearly as extensive in this vicinity, but none that have paid as well. The mines are still yielding largely, as is abundantly evidenced by the fact that the Express running from here frequently carries away $50,000, in gold at a single time. Wages for mining are uniformly $3 50 per day.

Placer Mining by Steam.—The Montana *Post* describes a method of working placer mines by steam machinery, that cannot fail to interest many of our readers. Machinery on the plan described was recently completed, and is now in successful operation in one of the gulches adjacent to Helena City. We believe the method to be entirely new. The *Post* says: "A ten-horse power engine drives the whole machinery, which is nothing more than a huge windlass, hauling two cars over two separate tracks, 135 feet long, up an incline with a grade of 33 feet to 100 feet, to an elevation of 45 feet above the gulch, to which point 70 inches of water are brought in a flume. The elevation attained permits the string of sluices to be set at a grade of eight inches to every sixteen feet, affording ample room for dump. At the present time the average hourly number of car loads, each containing 1,500 pounds, is thirty-two to both tracks. As soon, however, as more cars and the necessary turn tables are erected one car load per minute will be the average."

Struck it in Wales.—A Welsh miner who sold out the Docile mine to Frank Smith & Co., of San Juan, went to his native land and started prospecting in the Manchochogg mountains. A letter recently received from him by D. H. Williams, states that he struck a very rich, gold bearing quartz ledge. Such a thing as gold mining was never known in that locality before. The discovery has created great excitement in the country.—*Nevada Transcript.*

A Large Yield.—A crushing of 53 tons of ore, from the Garrison mine in Cortez district, Nevada, produced bullion to the value of $19,474. This shows a yield of $370 per ton.—*Nevada Gazette.*

A Monster Lump.—The Sonora *Democrat* of the 11th ult., says: The lucky proprietor of the Hines claim, at Columbia, picked up a lump of gold last week worth $5,500.

MEDICAL.

Medicine among the Moors.

The temperate habits of country-bred Moors carry them through disorders which would be fatal to blood inflamed by stimulants. The rapidity with which their flesh heals after serious wounds, would create astonishment in the wards of the best-arranged European hospital. So long as a vital part is not touched, recovery is nearly certain. Insanity, which is fearfully prevalent, knows no treatment or restraint. Viewed as a mark of Heaven's favor, in withdrawing the mind from all capacity for worldly business, that it may contemplate things above, madness is allowed to have its way; and the most dangerous lunatics go at large, often inflicting deadly injury upon themselves and on incautious passers-by. Many of these poor raving creatures attain to a kind of canonization after death, and, as a reward for the wildness of their excesses, are elevated into the rank of Santons, and have their tombs besieged by a crowd of suppliants for the cure of bodily infirmities. It is assumed that the mere process of dying transforms them into public benefactors; for during the period of their earthly lives they never cease to be a dangerous and intolerable nuisance.

But there is one branch of Moorish medical practice, that is well worth consideration, and which certainly deserves a trial amongst us. The bite of a mad dog, which in European countries becomes a sore puzzle to the faculty, meets with a treatment in Morrocco, as effectual as it is summary. Anything which may help to lessen the chances of hydrophobia is a public benefaction; and in a country where canine madness prevails to an almost incredible extent, it is fortunate, that native ingenuity has hit upon a remedy which admits of instant application. A Moor is pretty sure to have some gunpowder in his pouch, so he takes out a handful, and having deepened and enlarged the wound with his knife, with as much coolness and indifference as if he were the most practical hospital surgeon, rubs the powder into the sore. Having made a little pyramid on the flesh, he allows it to dry for a few minutes in the sun. A match is then applied, and the operation terminates with a fizz, which has the double effect of cleansing the wound and staunching the blood. As a rule, no evil consequences follow upon this rough-and-ready sort of treatment, beyond an ugly scar, testifying to the courage and endurance of the operator. When hot iron is at hand, it is applied as a surer remedy than even the blasting process. Criminal practice makes the Moors familiar with its use.—*St. James Magazine.*

Vaccination.

Dr. K. Favor, at the close of an article on this subject, in the August number of the *Pacific Medical and Surgical Journal*, gives the following conclusions, which he proves by the proper authorities and statistics:

"1st. That kine-pox and small-pox are the same disease; that the former is the latter modified, rendered milder and non-contagious by having passed through the cow; that when it protects the vaccinated, it is upon the well known principle that the human system is subject to variola but once.

"2d. That, if it is not an absolute protective against small-pox, it is so near it that the vaccinated may be considered insusceptible to that disease for years, perhaps for life.

"3d. To insure perfect protection, there must be as many as four vaccine vesicles, and one of them at least must go through all its stages without being disturbed.

"4th. That when vaccination is properly performed, with *pure vaccine* matter, upon a healthy subject, it is free from any danger to the person vaccinated.

"5th. That vaccination with matter taken from an imperfectly developed vesicle cannot be relied upon as affording any protection.

"6th. That vaccination with matter taken from a patient affected with any cutaneous disease is liable to produce a similar disease in the person vaccinated.

"7th. That vaccination of a person suffering from a vitiated or impoverished condition of the blood, even though pure vaccine matter is used, is sometimes followed with very serious results.

"8th. That where doubt exists that an individual is protected, revaccination will insure protection."

Small Pox.—Dr. Aubert published last week, in the *Courier de San Francisco*, a letter to the Board of Supervisors, in which he objects very strongly to the manner in which this disease is treated in American cities. He contends that the fear of the disease, which is so great in many instances as to cause the abandonment of relatives and friends who contract it, is entirely groundless, and that the summary removal of the sick to the pest house is an unnecessary cruelty. He says that the small-pox has for a long time been treated in the hospitals of France like other diseases, and with no special care or precaution, and that no evil results have followed. If this is true, and several French gentlemen have assured us that it is so, it deserves the attention not only of the Supervisors, but of the public generally, and should have the effect to allay to a great extent what the *Pacific Medical and Surgical Journal* calls "the needless panic which prevails in San Francisco."

Poison Oak.—The following is a sure remedy, as we know by experience. Its efficacy, however, is increased by steeping wormwood in the water before applying it.

"Hot water, as hot as can be borne, will infallibly destroy the effects of poison oak. Cloths dipped in scalding water, and laid over the surface, cause an exquisitely itching sensation, which is followed by immediate relief. For those to whom it is convenient, the steam bath, causing profuse perspiration, will soon prove a cure."

Antidote to Strychnia.—An interesting scientific discovery is mentioned in one of the Paris journals. The Calabar bean is found to be an antidote to strychnia. The latter destroys by spasmodic contraction. The first, taken alone, paralyzes, and thus directly neutralizes the action of strychnia, if given after that poison. The bean has been found successful in cases of lockjaw.

BACON & COMPANY'S Excelsior Press SAN FRANCISCO

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 802 Montgomery Street, (Second Floor, Room No. 1) San Francisco, Cal.

Serrez Les Rangs.

I.

When of old first we heard the war-thunder
Roll round us, above us, and under,—
In our ranks those dread chasms were torn,
As the hail-storm sweeps paths in the corn,—
When those terrible gaps first we felt,—
Felt like snow-flakes, our men from us melt,—
Like a spirit's call, piercing and clear,
Rang the word of command on the ear—
"Close the ranks!"

Through each heart the resistless tones thrilled;
Not knowing whose places we filled,
Obedient together we pressed,
In serried ranks charging abreast,
Still shoulder to shoulder were ranged,
Though the comrades be mournfully changed—
Closed the ranks.

Not a moment the charge must be stayed,
For no pity the battle delayed,
On we pressed in close ranks, by our dead,
Left our wounded where fallen they bled;
At all costs the day's work must be wrought—
For our dead and our wounded we fought.
For their sakes not a pause might we dare,
For their sakes lying helplessly there,
For their sakes on we pressed on our way,
Closed the ranks, sped the charge, won the day.

II.

And now in the battle of life,
In the thick of the old ceaseless strife,
When those terrible gaps come again,
On the heart smites the blank and the pain,
And we know, in our angnish, too well,
What we lost when thus stricken they fell;
Still that word of command on the ear
Through the blank and death-silence rings clear:
"Close the ranks!"

For the sake of the comrades who died,
Press on, where they fell, side by side;
For their sakes of whose stay we're bereft,
Press closer to those who are left;
In serried ranks charging abreast,
Still shoulder to shoulder compressed,
Linking tighter the links still remaining,
True to death one another sustaining;
Not a moment the charge must be stayed,
For no weeping the battle delayed,
For their sakes not the feeblest despairs,—
The fight and its triumph's still theirs!—
Press forward where they led the way,
Close the ranks, speed the charge, win the day!
"Close the ranks!"

—*Author of the "Schönberg Cotta Family"*

Divine Revelation: Difficulties Insuperable.

Ye shall be as gods, knowing good and evil.—*The Serpent.*

God has revealed not only the fact but also the method in which He designs to save and bless us by making us "partakers of the Divine Nature." As regards us, this method is the *means* by which we rise from our "death in trespasses and sins" unto a new and holy "life in God." As regards God, it is His revealed *plan of salvation. Revelation* is the specific work of the son of God. This is indicated by His title, the Word. As it is the office of a word to reveal thought, so the Divine Word reveals God. "No man hath seen God at any time: the only begotten Son which is in the bosom of the Father, He hath revealed him." The Son is the Revealer. Is a revelation of God made in creation? He has "created all things by Christ Jesus." Does universal providence testify of God? "By Him (the Son) all things consist." Do angels talk with men? It is usually the Jehovah-angel, the Messenger of the Covenant, the Son of God, who is worshipped when recognized; and when it is not Himself, it is one who serves him. Do prophets foretell future events? They study their own prophesies, "searching what, or what manner of time the spirit of Christ which was in them did testify." Is the last, greatest, highest revelation of God to be made to man? "God sent forth his Son, made of a woman;" "God was manifest in the flesh;" "The Word was made flesh and dwelt among us, and we beheld His glory, the glory of the only begotten of the Father, full of grace and truth." More has been learned of God by the life and death and teachings of Jesus of Nazareth than by all other means together, a thousand fold. He who in detached portions, at long intervals, and by different methods of communication, spake in former times to our ancestors, hath in these last days spoken fully, completely, and directly to us by His Son, who is Himself the brightness of God's glory, and the very counterpart of His essence. Nor did his communications cease when he ascended into heaven. After that Stephen saw Him; Paul was taught by Him; and John received messages to the seven churches of Asia, and the universal church of the future. The revelations thus made are brought to mind, recorded, understood, believed and practised only by the aid of the Divine Spirit whom the Savior sends for this purpose. He is not the revealer. He speaks not of Himself. He takes of the things of Christ and shows them unto us. He brought all things which Christ had spoken to the remembrance of the sacred writers that they might record them for our benefit. These holy men of God spake and wrote as they were moved by the Holy Ghost. They spake and wrote in the exercise of all their faculties, with studied thought and precision, yet in their speaking and writing they were *borne along* by the Holy Ghost. They used their own pens, their own mouths, their own tongues, their own minds. They studied diligently, as all men do who write well. Divine inspiration did not obliterate, destroy, or suppress in the least the faculties of their minds. On the contrary, it sustained, strengthened, elevated, and intensified them to the utmost, and thus preserved them from error. In the exercise of their faculties in this respect they were steadily *borne along by the Holy Ghost.* And yet, even by His aid, it was not possible for them to overcome all the difficulties of the case. It would not be possible, it is not possible, for God himself to overcome all the difficulties attending a revelation of Himself to creatures; for many of these belong to it just because they are creatures. Now, the revelation of God's plan for making man partaker of the Divine Nature includes, nay, *is* a revelation of God, a revelation of the Infinite. And this revelation is made to the finite. But the revelation of the Infinite to the finite, of the Creator to the creature, is necessarily limited, restricted, conditioned by the capacity of the creature to whom it is made. The creature cannot *comprehend* the Creator. He cannot comprehend even other creatures. Much less can he comprehend God. Only God can fully know and understand God. The immediate perception of God as he is, is not possible to creatures. No man hath seen God at any time. It is vain to think of comprehending him. We can only *apprehend* Him, on the one side or the other, as He is revealed unto us. Whatever knowledge of God reaches us in one way or another—whatever glimpses we catch of the excellent glory, from one side to another—adds a little to our knowledge of Him, but only a little. And the total sum is very small. And all we can say is, "Lo! these are parts of His ways! But how little a portion is heard of Him!" We know only in part. We see as through a glass darkly. Even the most exalted of angelic creatures, who stands nearest the throne of God in Heaven, knowing most of Him, is further removed from God in intellectual grasp than the beasts are from us, and can form notions of God most imperfect and feeble compared with God's own notion of Himself, the only adequate notion of Him. How puerile, then, in comparison with the reality, must be the notions of creatures so far below the lowest of the angels, in the scale of intelligence, as we!

Yet every revelation of God to man is, of course, so far as it is made, entirely accurate and truthful. Truth is an essential element of the Divine Nature. The fact that revelation is only impartial and incomplete does not affect its exact accuracy so far as made. It makes no pretensions to completeness. On the contrary, it explicitly asserts its own fragmentary character. There is no danger of mistake or error in accepting it as revealed, and resting confidently upon it for time and for eternity. But when men attempt to combine their few, different, partial apprehensions into a complete philosophical plan, there is danger. The endeavor to do this is the ambitious endeavor to substitute comprehension for apprehension—to "be as gods." It becomes, in the process, the reduction of infinite truth to the small measure of our finite capacity, or even to the smaller measure of our very imperfect human language. Truth concerning God is truth *so far as revealed.* What comes after may be gross error. When we pass from the sphere of the finite to the infinite, from the human to the divine, and apply to this the rules and processes which belong to that, the more strict our application, and the more rigid our reasoning, the more erroneous may be our conclusion. We should learn, first of all, in our researches after truth, that our own ignorance and incapacity are not its measure. The revelation of Himself which God has made for man is *sufficient* for the end which He proposes. Yet we are under strong temptation both to add to the facts revealed, by logical inference, in order to form a complete scheme of theology; and to reduce those facts to such minute proportions as may allow us to remit them to appropriate places in our scheme. It is just to warn us of this danger, to guard us against this temptation, that we are warned: "Add thou not unto His words, lest He reprove thee; and thou be found a liar;" and "Ye shall not add unto the word, neither shall ye diminish aught from it."—*Round Table.*

Foreign Consulates.

A great number of consulates might advantageously be abolished; and the system of appointing deputies, or vice-consuls should be abrogated altogether.

At present, consuls are virtually appointed by Congressional delegations. They urge them upon the Executive and the State Department, and attend to their confirmation in the Senate. In most instances these delegations know nothing of the man they recommend, except that he is recommended by somebody they know, and that the political church requires his nomination. After the nomination and confirmation have duly taken place, the new-fangled consul is informed by the Secretary of State of his good luck. The fellow jumps in the cars, and all of a sudden an altercation takes place between the doorkeeper of the State Department and some rough-looking customer, who insists upon seeing the Boss, and claims to have come all the way from Kankakee or Ashtabula to get "them" papers. The officials of the State Department—some of whom gravitate toward the Virginia and Maryland old-fashioned style of good breeding, while others luxuriate in all the stolid placidity of the countrymen of Rip Van Winkle—give to the new consul a rather chilling reception. Of course, he is not admitted to the presence of the "Boss," who reserves himself for a few foreign ministers, and for cabinet meetings. He has about half a second's interview with Fred. Seward, who, with a smile of imperturbable sweetness, hands him over to one of the gentlemen of the office, who hands to the consul a handsomely-bound volume, which contains the consular regulations. Very soon after this episode, a flaming article appears in the *Liberty Bell* or *Bungtown Bugler*, announcing the fact that "the Hon. Jeremiah Napoleon Ezekiel Jupiter Jones, so eminently popular in this district, and remarkable for his diplomatic talents, has arrived at Washington; had a lengthened interview with the Secretary of State, who gave him official instructions of the highest importance, and then departed in hot haste for his post of destination, it being rumored that on his way to Sauerkrautenthal he is to meet Count Boum, at Mr. Seward's special request." In the meanwhile, Jones passes a miserable evening at the Seaton House, in a most unsatisfactory *tete-a-tete* with his "instructions." The book which the gentleman of the State Department handed him with such a bland smile, simply contains the general consular regulations applying to all countries of the world, and without any particular reference to the particular duties which he may have to fulfil in the particular place to which he is particularly appointed. He soon gives the book up in despair, but has the happy inspiration to buy a "Bradshaw." After having discovered the latitude and longitude to which he is assigned, he is next seen stalking about with a most consequential air on the deck of one of the cheap Inman steamers. He is never again seen at the State Department. All they know is that he regularly draws for his salary, and occasionally he copies, from one of the local papers of the place in which he resides, extracts of commercial statistics, with great flourish of trumpets, as if he had been their original compiler. If any language excepting

the Ashtabula or Kankakee dialect is spoken at the post of his destination, he holds himself rather "aloof" from society. He is generally taken for an Aboriginal American, and sticks to his post through thick and thin, until, one day, Brown steps in, and says: "Jones you are smashed!" Jones does a little swearing, invites Brown to take a drink, picks up his traps, and the next we hear of him is through our old friend, the *Liberty Bell* or *Bungtown Bugler*, in the following strain: "We are happy to announce the safe return to this district of the Hon. Jeremiah Napoleon Ezekiel Jupiter Jones, from his mission to Saurkrautenthal. After having spent several years years abroad, he speaks, of course, the different languages of Europe, and has had access to the most exclusive circles of the nobility and gentry, and is versed in all the arts of the statesman and diplomat. Our best citizens paid their respects, last evening, to the honorable gentleman, at his quarters at the Tomahawk House, where, with his wonted urbanity, he treated his friends to a handsome supper. We may add, that the honorable gentleman is proposed as the member in the seventy-fifth Congressional district, the intention being, in the event of his election, to make him chairman of the Committee on Foreign Relations, for which post he is so preëminently fitted by his familiarity with the history and laws and systems of foreign nations."

Under the present circumstances, consuls do little or nothing for the promotion of commerce. At a stated annual period they are called upon to make a report to the State Department, and in most cases their mental activity finds its climax in this annual report, which, moreover, is generally copied from other reports, and but rarely the result of pains-taking, original, and exhaustive investigation.

By raising the character and qualifications of consuls, as proposed in the Patterson bill, it is probable that a better class of men will devote themselves to this branch of the public service, and make it, as it ought to be, an auxiliary to the commerce and industry of the country.

As regards diplomatic posts, the country has been rather fortunate, since the accession of Mr. Lincoln, in 1861, when Mr. Motley was sent to Vienna, Mr. Marsh to Italy, Mr. Adams to London, Mr. Dayton to Paris, and Mr. Joy Morris to Constantinople. Within the last year Admiral Farragut has, in reality, been the principal American representative at the European courts. It is surprising that naval commanders are not permanently invested, in times of peace, with foreign missions. They generally make an admirable impression abroad, and, as has been shown by Commodore Perry, in Japan, succeed in the most delicate missions when civilians generally fail. There is something upright and straightforward in a sailor's bearing and address, which inspires confidence, and the very magnetism of his simplicity acts as a tacit rebuke toward those American diplomatists who make themselves ridiculous by attempting to mimic the worn-out style of diplomatic craft and mummery.

Some of our foreign ministers actually belittle, by their sneakish manners, the great country whose strength is the only bulwark of their position. Instead of making European people feel how much grandeur there is in freedom, they cringe before persons of title and rank, as if they were thankful even for being snubbed by a duke.

Those who have a genuine regard for the genuine gentlemen and gentlewomen of America, cannot but feel sickened at the sight of these sycophants; and to think that some of these miserable creatures are ministers is positively revolting. Fortunately their number is very limited; but if there is only one of them in the whole list of the United States ministers he should be removed, as if he were a felon. He really brings more discredit upon the American name than a downright rascal.

While we send some of our best men abroad, as Everett, Motley, Bancroft, etc., foreign goverments are still treating to this country *de haut en bas*, by accrediting Washington second and third rate diplomatists. While we send a first-class mission to England, England sends only a second-class mission to the United States, such as she would not send to France or Russia, or even Austria. Napoleon sent the consul of New York as minister to Washington, and then he sends a gentleman who had never been in any foreign mission, excepting, for a short time, in China, and whom he would not send to London or Berlin.

No greater compliment can be paid by one nation to another, than by selecting a representative from the most illustrious citizens; and in this respect America is still treated gingerly by foreign powers, as if she still were a small English colony, instead of being the most powerful nation of Christendom.

We have no doubt there will be more discrimination in future in regard to the confirmation of foreign ministers. By reserving foreign missions for the best cultured men of the country, and by making ministers give more comprehensive reports of and take a more lively part in the resources of foreign countries, and of their own country; the sinecures, and dining out, and gala element which now pervade, more or less, all foreign missions, might at last find an invigorating, counteracting influence.

The reforms of which we have pointed, all-important as they were at all stages of our history, are particularly so at the present time, when the Southern members return to Congress, and clamor for their share in offices, and when the new cyclus of States clustering round the slope of the Pacific, assert more and more their supremacy in the control of patronage upon what they call the decayed old Atlantic States; just as some of our Atlantic publicists speak of the effete old European countries.—*From our Civil Service in Putnam's Magazine.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

FAMILY READING.

Facts Worth Knowing.

The Dean of Carlisle, in a recent lecture on the use of tobacco, calculated that the entire world of smokers, snuffers, and chewers consume two million tons annually, or four billion four hundred and eighty million pounds weight—as much tonnage as the corn consumed by ten million of Englishmen, and actually at a cost sufficient to pay for all the bread-corn eaten in Great Britain. Five millions and a-half of acres are occupied in its growth, chiefly cultivated by slave labor, the product of which, at two pence per pound, would yield thirty-seven millions of pounds sterling. The time would fail to tell of the vast amount of smoking in Turkey and Persia. In India all classes and both sexes indulge in this practice; the Siamese both chew and smoke. In Burmah all ages practice it—children three years old and of both sexes. China equally contributes to the general mania; and the advocates of the habit boast that about one-fourth of the human race are their clients, or that there are certainly one hundred million smokers.

It costs more than education or religion, the army or navy. It costs England and America a sum sufficient to support fifty thousand ministers with a salary of one thousand dollars; or more than one hundred thousand missionaries. The students of one college pay more than six thousand dollars for cigars yearly. It tends to idleness, poverty, strong drink, and the whole family of vices. It tends to debility, dyspepsia, palsy, cancers, insanity, delirium tremens, and sudden deaths. It weaves a winding sheet around twenty thousand in our land every year! It is estimated that in New York City more than twice the amount is puffed away in cigars than is expended in bread!

Some eighty diseases are traced by Dr. Shew to the use of this vile narcotic. It injures the health of the body, mind, and soul. The habit is indecent, the example is pernicious on the rising youth. The expenditure is wicked, the gratification of a vitiated appetite. It leads to strong drink. Said a poor Indian, "I want three things; all the rum in the world, all the tobacco, then more rum; I smoke because it makes me love to drink." The use of this pernicious drug blunts the moral sensibilities, grieves the Holy Spirit, hinders prayer. "I beseech you, as strangers and pilgrims, abstain from fleshly lusts which war against the soul."

The excuses for using the dirty tyrant are frequent. One uses it for his teeth; another, for his general health; a third, for his corpulency; a fourth, for his leanness; a fifth, for a watery stomach; a sixth, to help digestion; another, because some ignorant, sottish, wine-bibbing, tobacco-chewing, or smoking doctor recommends it; thus and thus, until the catalogue of excuses and subterfuges is filled out.

It is a matter of devout and hearty thanksgiving to God, that the most respectable, learned, and eminently successful of the medical faculty, with united voice, veto the "accursed thing," and warn their patients to lay it aside forever.

"Friend, do not excuse yourself," says the Hon. Gerritt Smith, "by saying that some great and good men use tobacco. The great and good men who do so are in danger of sinking into very little and very wicked men before they die. Tobacco and rum—what twin brothers! What mighty agents of Satan! What a large share of the American people they are destroying. As Paul said to Timothy, so we say to you, 'Keep yourself pure.' Be clean in your person, and be clean in your heart. But, depend upon it, you can be neither if you use tobacco."—*American Phrenological Journal.*

A Domestic Sketch.

It is the duty of mothers to sustain the reverses of fortune. Frequent and sudden as they have been in our own country, it is important that young females should possess some employment by which they might obtain a livelihood, in case they should be reduced to the necessity of supporting themselves. When families are unexpectedly reduced from affluence to poverty, how pitifully contemptible it is to see the mother desponding and hopeless, and permitting her daughters to embarrass those whom it is their duty to assist and cheer!

"I have lost my whole fortune," said a merchant, as he returned one evening to his home; "we can no longer keep our carriage. We must leave this large house. The children can no longer go to expensive schools. Yesterday I was a rich man; today there is nothing I can call my own."

"Dear husband," said the wife, "we are still rich in each other and our children. Money may pass away, but God has given us a better treasure in those active hands and loving hearts."

"Dear father," said the children, "do not look so sober. We will help you get a living."

"Weat can you do, poor things?" said he.

"You shall see, you shall see," answered several cheerful voices. "It is a pity if we have been to school for nothing. How can the father of eight children be poor? We shall work and make you rich again."

"I shall help," said the youngest girl, hardly four years old. "I will not have any new things bought, and I will sell my great doll."

The heart of the husband and father, which had sunk within his bosom like a stone, was lifted up. The sweet enthusiasm of the scene cheered him, and his nightly prayer was like a song of praise.

They left the stately house. The servants were dismissed. Pictures and plate, rich carpet and furniture were sold, and she who had been mistress of the mansion shed no tears. "Pay every debt," said she; "let no one suffer through us; we may yet be happy."

He rented a neat cottage and small piece of ground a few miles from the city. With the aid of his sons he cultivated vegetables for the market. He viewed with delight and astonishment the economy of his wife, nurtured, as she had been, in wealth, and the efficiency which his daughters soon acquired under her training.

The eldest one assisted her in the work of the household, also instructed the younger children. Besides, they executed various works which they had learned as accomplishments, but which could be disposed of to advantage. They embroidered with taste some of the ornamental parts of female apparel, which were readily sold to a merchant in the city.

They cultivated flowers, and sent bouquets to market in the cart that conveyed the vegetables—they plaited straw, they painted maps, they executed plain needle work. Every one was at her post, busy and cheerful. The cottage was like a bee-hive.

"I never enjoyed such health before," said the father.

"And I never was so happy before," said the mother.

"We never knew how many things we could do when we lived in a great house," said the children, "and we love each other a great deal better here. You call us your little bees."

"Yes," replied the father, "and you make just such honey as the heart likes to feed on."

Economy as well as industry was strictly observed; nothing was wasted. Nothing unnecessarily purchased. The eldest daughter became assistant teacher in a distinguished female seminary, and the second took her place as instructress to a family.

The little dwelling, which had always been kept neat, they were soon able to beautify. Its construction was improved, and the vines and flowering trees were planted around it. The merchant was happier under his woodbine-covered porch, in a summer's evening, than he had been in his showy dressing-room.

"We are now thriving and prosperous," said he; "shall we return to the city?"

"Oh, no, no," was the unanimous reply.

"Let us remain," said the wife, "where we have found health and contentment."

"Father," said the youngest, "all we children hope you are not going to be rich again—for then we little ones were shut up in the nursery, and did not see much of you or mother. Now we all live together, and sister, who loves us, teaches us, and we learn to be industrious and useful. We were none of us happy when we were rich, and did not work. So, father, please don't be a rich man anymore."—*Lydia H. Sigourney.*

The Body and Soul.

"Brother," said the Soul to the Body, "we must shortly part; and now let us reckon together."

"Let us reckon, sister," said the Body.

"You have been active in labor, toiling early and late, and have gathered much gold; will you keep it with you, or shall I take it with me?" said the Soul.

"Alas!" said the Body, "how can I take it among the darkness, and dust, and corruption of the grave? What will it profit me there?"

"Nay," said the Soul, "but how can I carry it where earth and earthly things are not suffered to enter? It is, after all, but yellow earth."

"True. Then shortly it will be neither thine nor mine," said the Body, sorrowfully.

"Our reckoning is not over," said the Soul.

"How are we to meet again—for we must meet again—will it be in sorrow or joy? You have never allowed me to look heavenward, but have taken away my freedom, and used all my powers to minister to your selfish pleasure."

"Alas!" cried the Body, "You tempted me, and now you cry out against me!"

"What if we meet as fellow tormentors," said the Soul, "united together in eternal misery? I am defiled as you are. You have cared neither for my cleansing, nor for your own. I am without a right to heaven, as you are. So, then, this love of self will be our mocking accuser in eternity, and I shall forever reproach you with having destroyed me."

The Body answered: "I had a right to look to you for a governing purpose, which should have resulted in our mutual salvation. I now realize with deep grief that we have been unfaithful each to the other; we mutually are to blame for our common destruction. Alas! and is there no hope?"

"Brother," the Soul replied, "holy words, long since forgotten, come to my remembrance; words spoken to the truly penitent by Him who created us—Him whom we have forgotten, Him whom we have disobeyed—'I, even I, am he that blotteth out thy trangressions for mine own sake, and will not remember thy sins."

"Sister," said the Body, "I have sinned and done evil in his sight. We do well to consider our ways; to-day to hearken to his voice. Let us kneel, in sorrow, in penitence, and in love, before Him who gave himself for us, who for our sins hung on the accursed tree; and though our sins be as scarlet, they shall be white as snow; though they be red like crimson, they shall be as wool."

"Brother," said the Soul, "let us now heartily give ourselves, with all we have and are, with our powers and affections, with the gold and silver, to Him that loved us and gave himself for us."

"Yea," said the Body, "forgiven, cleansed and purified, I shall become a temple of the Holy Ghost, and live or die for his praise."

"Brother," said the Soul, "you will die to rise again; but be comforted; He passeth with us through the dark valley. My soul does magnify the Lord, and my spirit hath rejoiced in God my Saviour. Let us together praise him for our salvation."—*Leaflets for Letters.*

In a pretty littte village near Boston, a love of a little Episcopal chapel having just been finished, a benevolent parishioner sent off to a "proper authority" in a very ecclesiastical city, an order for a new surplice of whitest, finest lawn, as a present to the church. The vestment arrived, and so did the officiating minister, who, donning the delicate fabric, was a little mystified at some extra embroidery across the neck-band, which, in his reverential mood, he deciphered as containing the letter—"G. O. D." Just what might be the symbolism of this, did not at once occur to him; but, thinking that some enthusiastic antiquary had struck a fresh vein of apostolic decorative art, he went composedly through the service. Leaving the church with the benevolent parishioner aforesaid, this gentleman asked the clergyman if he noticed anything unusual about the surplice he had worn.

"Yes," said the other," I noticed the name of the Supreme Being embroidered on the collar, and could not quite understand exactly what that was for."

"Oh," rejoined the donor, "that was a blunder of the maker. I ordered him to mark the *parcel*, when

he sent it, C. O. D. (cash on delivery), and the fool went and put these letters, as you see, *on the surplice itself!*"

A slight touch, this, beyond St. Albans.—*Congregationalist.*

Young Folks.

Pen Pictures.

A row of bright little faces,
A patter of dear little feet;
And love's arms closely entwining,
Mother's warm kisses to meet.
Three little cups on the table,
Three little chairs by the wall,
Three little curly heads nestled
Each on its pillow so small.
Ah! who cannot read me this riddle of joy?
They're mother's own darlings, each dear little boy.

Three little tear-stained faces,
Little bare, unwashed feet,
Shrinkingly, timidly stealing
In terror, lest blows they meet.
Bare dry bread on the table,
Cold, hard bench by the wall,
Straw, and a scanty torn blanket,
That will hardly cover them all.
No kisses to-night on each little brow;
God pity and help them! They're motherless now.

—*Congregationalist.*

Study Table Talks.

"I wonder if she would?" said Toy.

"I'll ask her," said Nellie, holding up a yellowish brown ball, and looking with one eye through its centre at Toy.

"What have you taken from my box?" asked Mrs. Asbury, looking up from her sewing; "and what is it you were wondering if I would do?" she added, pleasantly.

"Tell us about all the trees on *your* table," said little Nellie; "father told us the other day about all *his* trees."

Toy laughed, and her mother, taking the brown ball from her hand said,

"Do not lose this. I suppose it is one of my trees."

"We want you to tell us about every thing on your table that has been part of a tree—that is what she means," said Toy. "Is this a Sycamore ball?"

"Yes, from the old tree at home. Hugh cut a hole through it for a slide to my guard. They would make a pretty bracelet if you had enough of them."

"I wish we had a Sycamore tree here," said Toy.

"It has always been a favorite tree with me," replied her mother. "It grew before my father's door—the old tree from which this ball came—all my life. Many a mimic tea-party have I enjoyed on the broad stone under its shade, when as little as Nellie is now. But much as I thought of the old Sycamore, I never hung its boughs with necklaces and bracelets of gold."

"No one ever did so foolish a thing as that, I suppose," said Toy.

"I have read of a king who did just that. The Sycamore, or Plane tree, (as it is more properly called) to which this king took a special fancy, did not grow before his dwelling, so he is said to have brought his home to the tree. He pitched his tent beside it; and, when obliged to leave it, he left a special guard to watch over and cherish the tree, besides ornamenting it with bracelets, and circling the trunk with a band of solid gold."

"What was the king's name," asked Toy.

"Xerxes. He was a Persian king who lived a little more than two thousand years ago. He is said to have done another thing which I suppose you will think much more foolish than this."

"What was that?

"Gave a river a sound whipping of three hundred strokes, or *had* it done by one of his servants, which is the same thing."

"What good would it do to whip a river?" asked Toy.

"Not much more than to decorate a tree with ornaments. He had thrown a bridge of boats across this stream, and was angry with the water because a storm came up and destroyed his bridge. He treated it as if it were a person, who had injured him, and threw fetters into the water, also, as if he could chain up the stream, which had been free to run all its life, and *would* be, in spite of angry kings. And yet he was a great man, and led one of the largest armies in the world—but not to victory."

"What made him think so much of the Sycamore?"

"The people of Persia regarded this tree very highly. So did the Greeks, who planted large avenues of them, and sometimes worshipped them."

"What sort of blossom has the Sycamore?"

"This little ball is a whole nest of blossoms. The separate flowers are so small that you cannot see them without a magnifying glass. They grow in the form of a ball. The seeds ripen in the fall, but do not drop out of the ball until the next spring, when the balls open and they fly away on their little downy wings."

"Some of them never fly away," said Toy.

"This one is hard as a nut. How curious for such a large tree to come from a seed too little to be seen.

"Yes; but that is the way with a great many things. Some of these trees have been known of *very great* size and age. Pliny, who wrote about trees, tells of one that was 2,000 years old; and of another whose trunk, after it became old and hollow, made a large apartment in which banks of moss formed pleasant seats; and where once a party of eighteen persons were entertained by the governor of the province where it grew. A Roman Emperor once entertained fifteen of his friends under one of these trees. It is said that the first Plane tree that was taken into France, was so much valued, that persons were fined if they sought to repose in its shade."

"You make long stories," said Nellie. "Is *this* part of a tree?" and she held up a little ivory thimble-case in the shape of an acorn. "I can unscrew it," she said, turning the 'saucer' round and round, and taking out an ivory thimble.

"*That* isn't part of a tree," said Toy, quickly. "That's part of an elephant."

"No," said Mrs. Asbury," "Nellie's right—real ivory is from the elephant, but this thimble-box, as well as my tape measure, is made from the nut of a tree called Vegetable Ivory, which is a species of Palm. Here," she continued, opening a drawer in her work-table, and taking out a curious little affair, "is one of these nuts. On one side you see it looks nut-like enough—rough and brown, some like the cream-nut; but on this upper side you see it has been carved into little rings or layers, to show what can be done with it. I have seen many handsome ornaments made from this Ivory nut. At first, the inside of the nut or seed is liquid, something like milk, which grows thicker and hardens, until, like this, so hard you would not know it from ivory."

"Did you say it was from a Palm?"

"Yes, though it is generally called the Tagua plant or tree. There is a great variety of Palms, and you will be glad when older to read about them. The Sago, you are so fond of in puddings, comes from a Palm. It is the dried pith of its stems. Food, drink, oils, fans, houses, and many other curious and useful things are obtained from different kinds of Palms."

"You've got so many things on your table, and in it," said Nellie, "that *your* trees would keep us all the afternoon."

"Only *I* want to know," said Toy, "about *this* wood, of your writing-desk."

"That is mahogany; and if Nellie can wait for one more tree, perhaps you would like to guess what the first thing ever made, so far as we know, out of this kind of wood."

"Yes," said Toy; but who knows when so many things are made from mahogany, what was the first? Was it a work-box?"

"No."

"A sofa," asked Nellie, softly.

"No. I do not think you would guess; a candle-box. I have read an account of the way in which this wood came into use which is probably the true one. A celebrated physician was building him a home, in London, nearly two hundred years ago. His brother was a West India sea captain, and had brought to England some of this wood, for ballast, and suggested to his brother that he might find it of use in his building. But the carpenters complained of the wood as too hard, and it was laid aside. But one day the Doctor's wife wanted a candle-box, and her husband ordered his cabinet maker to make one from this mahogany wood. The cabinet maker, also, complained of the hardness of the wood, and was told to get stronger tools. The box was accordingly made, and they were so pleased with its singular beauty, that the Doctor next ordered a bureau to be made, and invited his friends to see the polish and fine color of this new wood. The Duchess of Buckingham then ordered a bureau from the same wood, and from that time the fame of Mahogany began. The tree grows to a great size. The wood is very hard, of a reddish color, and bears a fine polish as I have said. Now can Nellie tell what trees I have told you about to-day?"

"The Sycamore, that had on a gold ring and bracelets—and the Ivory tree—and the tree that was too hard for a candle-box till they got better tools," said Nellie.

"The Plane, the Palm, and the Mahogany," said Toy, "and some time please tell us some more."—*Advance.*

Sin Found Out.

Halloa! Bill Hartwell is a famous batter. He had just given the ball a tremendous blow, and was running full speed, when he stubbed his toe and fell. The boys gathered round him; and I wish you could have seen their looks of surprise and indignation. He got no pity from any quarter—only just such words as must have filled him with shame and confusion.

Why? There is no harm in stubbing one's toe, is there? No, no. But when Bill fell, out fell a watch from his bosom or pocket, or wherever he hid it. And was it not *his* watch? No. George Arnold, one of the older scholars, had a little while before lost his watch; and it had not gone without an extra pair of hands. Who took it? was the question. Bill Hartwell made more fuss about finding the thief than any body else, and at last fastened suspicion so strongly on one of the little boys, Freddie Howe, that everybody called him the thief. Poor Freddie Howe had a tough time of it. It was in vain he declared his innocence. The story, somehow or other, got going, and could not be stopped, for a lie at first runs faster than truth, and the consequence was, Freddie had a great many bad things said to him, which hurt his feelings so he did not dare to show his face on the play-ground; and yet Bill Hartwell, who set the story going, was a proud, boastful, selfish, cruel boy, whom nobody liked or believed in.

The old saying is—"Murder will out;" which means, that if a person is guilty, the smallest thing may bring his guilt to light. There are swift witnesses all along his path, ready, when least expected, to testify against him, which was now the case. Bill just stubbed his toe and fell, as boys do. Out jumped George Arnold's watch, and there it lay, right side up, on the ground, pointing him to every boy who saw it as the real thief, and the meanest thief that could be; for he not only robbed George Arnold of his watch, but he tried to rob poor Freddie Howe of what is worth infinitely more than any watch that was ever made—his *good name.*

Freddie was vindicated before the whole school, and Bill Hartwell disgraced, as he deserved to be.

It is very hard to hide our sins. Deceiving is a dangerous and dark road to travel. Satan will be sure to try to lead you into it. But if you go, there is certain disgrace at the end of it.

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
34 Montgomery Street, opposite Lick House.

News Summary.

PACIFIC COAST ITEMS.

A line of stages is to be started from Sacramento, to connect with the Vallejo and Sacramento Railroad at Davisville. By this route, passengers can leave Sacramento at 4 A.M., arriving in this city at 10 A.M. Leaving this city at 4 P.M., they will reach Sacramento at 10 the same evening. This will prove a great advantage to the public until the completion of the railroad shall make communication between our two chief cities still more expeditious.

Serious complaints are made concerning the management of the small-pox hospital in this city. People generally believe that the complaints are well founded. There is little doubt that patients have been literally murdered in the hospital by neglect. A fearful responsibility rests somewhere, and the authorities who have charge of the hospital must bear this responsibility until they prove their innocence.

The people of Napa voted at the recent election to raise money to build a new Public School building. The vote was quite close, not from any unwillingness on the part of the citizens to make liberal provisions for education, but on account of the prevailing opinion that the College building would be bought by the Trustees, while most of the people desire a new building.

The Alameda *Gazette* tells of a man who was drawn into the bay the other day, by a hawser attached to one of the ferry boats, in which he had got his leg entangled. To save the man's life, the hawser was paid out and let go. The man was saved, and was obliged to pay the Company for the lost hawser. The *Gazette* thinks this was "playing economy pretty low down."

The inhabitants of the new town of Reno, on the Central Pacific Railroad, are showing their enterprise and their appreciation of the true interests of the town by taking measures for the education of the young. Two school houses will be built immediately, one on each side of the river, as we learn from the *Crescent*, and the first Public School will commence next week.

Railroad Contract.—A contract has been made for grading ten miles of the San Francisco and Humboldt Bay Railroad, northward from Petaluma, before the first of December next, but the Superintendent expresses a belief that the entire distance to Santa Rosa, sixteen miles, will be completed before that date. Arrangements are being made to purchase forty miles of iron.—*Petaluma Journal.*

The County Superintendent of Alameda county, has prepared a register for public inspection at his office, on which he proposes to keep a list of scholars in the county who are perfect in their attendance, deportment, scholarship, etc. He expects thus to encourage the scholars to better performance of their duties.

The amount of real estate sales in this city for the month of July was $2,265,567. Amount of revenue stamps sold during the year ending June 30, $60,182. Amount of city expenses for same time, $2,117,786.

Mr. Heald, who resides near Petaluma, informs the *Argus*, that he has on his ranch a cork tree, nine or ten years old, and that it is a fine and thrifty tree. It was raised from seed sent out by the Patent Office.

Harvesting seems to be progressing slowly in all parts of the State. The grain is generally full and heavy and the crops will be satisfactory. The season is said to be about a month later than last year.

The people of the town of Chico are getting ambitious. The Agricultural Society are to have a brick pavillion in which to hold their exhibition. The Secretary advertises for proposals to build it.

A New York dispatch to the Salt Lake *Telegraph*, states that the entire number of the Mormon immigration now *en route* to Salt Lake, from Europe, is 2,430

A large supply of rock, which is said to possess remarkable polishing qualities, has been discovered near the ocean beach, beyond the Ocean House.

The new Light-house at Cape Mendocino, is to be put in working order at an early day. The tower, material, etc., have been sent to the spot.

Over 3,000 sacks of wheat had been received at Edmonson's Warehouse in Haywood, up to August 1st.

The Telegraph office, at Saucelito, not proving a paying institution, has been discontinued.

The Steam plow will be on exhibition at the Mechanics' Fair.

The Occident is printed this week with ink manufactured in California.

TELEGRAPHIC.

Eastern.—Chas. G. Halpine (Miles O'Reilly) died in New York on the 2d inst....The Chinese Embassy will go to Europe in September....The Department of Agriculture report that the grain crop throughout the United States will be immense, and of fine quality....There is said to be a deficit in the P. O. Department of $8,000,000....Reverdy Johnson sailed for Southampton on the 1st....An International Commercial Convention is in session in Portland, Me. Delegates from all parts of this country and Canada are present.

Southern.—Gen. Meade has issued an order withdrawing the military forces in Georgia, Alabama, and, Florida, from all interference with the civil authorities....The Ku Klux Klan have commenced their cowardly outrages in Virginia ....Gen. Howard is travelling in the South, making preparations to discontinue the Freedmens' Bureau.

Political.—Fernando Wood has deserted the Mozart Hall wing of the Democracy....G. W. Glicks is Democratic candidate for Governor of Kansas....The Democrats have carried Kentucky by a large majority....The Secretary of the Treasury refuses to receive the applications of office-seekers....The Florida Legislature takes from the people the power of electing Presidential electors and gives it to the Legislature.

Foreign—The French Government admits grain from all foreign ports, duty free, from October to January....There is a prospect of a compromise between the contending forces in Japan....The Queen prorogued the British Parliament on July 30th....Russia withdraws her army from Bokhara....The Empress Carlotta has gone completely mad....Salnave has been defeated by the revolutionists.

WEEKLY MARKET REPORT.

Wednesday, August 5, 1868.

Flour—Sales of 4,000 bbls Extra Superfine, interior brand, for export, private. We to-day mark down prices 25c ₱ bbl. Following are the rates for city mills, shipping qualities selling at a slight discount: Superfine, in sks, ₱ 196 lbs, $5 25@5 50; Extra, in sks, $6 25@6 50.

Wheat—The daily receipts are now averaging from 20,000 to 25,000 sks, mostly purchased in the interior to arrive. The market is quiet at $1 60@1 80 for fair to extra choice milling; very little of the latter offering; good shipping $1 70. The sales reported to-day aggregate 4,000 sks in lots, at $1 70 ₱ 100 lbs.

Barley—7,000 sks new, purchased in the interior, to be stored for the present, private. The market is quiet at $2 10@$2 12½ ₱ 100 lbs.

Oats—548 sks Oregon, ex steamer, private. The stock of old of all kinds is reported to be less than 2,000 sks, while of choice quality there is thought to be less than 500 sks. Consignments from the new crop are coming forward slowly, and ranging from $2 25 to $2 50 ₱ 100 lbs.

Potatoes—Sales of 800sks Mission, in lots, at $1@1 12½ ₱ 100 lbs.

Onions—Good to choice Yellow command $1 75@2 ₱ 100 lbs.

Corn—There is none in first hands. Jobbing at $2 30@$2 50 ₱ 100 lbs.

Rye—Last sale was at $2 ₱ 100 lbs.

Buckwheat—Light sales at $1 62½@$1 75 ₱ 100 lbs.

Beans—We quote jobbing rates for first quality as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; Small White, 8½c; Pink, 6c; and Red, 3c ₱ lb.

Bran—Is jobbing from the mills at $25 ₱ ton.

Middlings—Fine, $40; feed descriptions $32 50@35 ₱ ton.

Hay—80 tons sold within the range of $10@14 ₱ ton.

Oil Cake Meal—The jobbing price is $30 ₱ ton.

Dairy Products—Fresh roll Butter has further advanced to 42½@45c, the latter an extreme figure for favorite dairies; California firkin, 32½@35c; Eastern firkin, 30@35c, latter figure the asking price for New York State; Cheese, firm at 14@16c for California dairies, and 16@18c ₱ lb for Eastern dairies; Eggs, 38c for Hen, and 32½ ₱ dozen for Duck.

Poultry—Live Turkeys are variously quoted at 18 to 23c as extremes; a fair range would be 19 @21c, and dressed, 21@23c ₱ lb; Hens, $8@9; Roosters, $7@7 50; Spring Chickens, $5@6; Ducks, $4@5 ₱ doz; Geese, $1 75@2 ₱ pair; Venison, 10@12c ₱ lb.

Provisions—The jobbing rates as follows: California smoked Bacon, 15@16c; Oregon do, 12½@13½c; California Hams (latter scarce), 17@18c; California Lard, 13@14½c; Eastern do, 12½@13c½ ₱ lb.

Wool—Sales since last Wednesday aggregate 315,000 lbs, at 15@17½c. The spring clip has now been pretty well cleaned out. In consequence of the advance in gold in connection with the sluggish state of the New York Wool market, shippers generally anticipate a loss on late consignments, and of course are not at all anxious to make further purchases—even were there any desirable lots offering—at the recent ruling rates. We give the nominal quotations of the market to-day as follows, Clean shipping grades, good to choice, 16@18c; medium, 14@16c; bury, 12½@14c. Except a few small lots of Lamb, no fall clip has been received; and under existing circumstances it would be difficult to place any at what is considered a fair price.

Hides—Sales since last Wednesday aggregate2,000 dry, at 14½@15½c for usual selection. Salt Hides are dull at 6½@8.

Tallow—Sales for the week aggregate 25,000 lbs good Beef, for local use, 7½c ₱ lb.

San Francisco Cattle Market.

Beyond an increased firmness for some descriptions, there is nothing to report.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@6c ₱ lb.
Veal—The general range is 7@10c ₱ lb.
Mutton—Steady at 5½@6c ₱ lb.
Lamb—Good to choice, 7@8c ₱ lb.
Pork—Undressed, 4½@6½c; dressed, 7@9c ₱ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

Simple announcements of Marriages or Deaths inserted free of charge. Additional matter, such as Obituary Notices, or Poetry, inserted at the rate of ten cents per line.

MARRIED.

On July 14th, at the residence of the bride's father, by Rev. Samuel Jaquette, Rev. L. P. Webber, of Santa Clara, Cal., to Maria, daughter of Lot Jaquette, of Salem, New Jersey.

DIED.

In San Francisco, July 12, 1868, after long and patient suffering, Jessie, wife of Andrew Aitken, of Sacramento, and youngest daughter of Robert Gunn, of Cathness, Scotland.

She was a loving wife, a fond mother, and an earnest Christian.

That once loved form, now cold and dead,
Each mournful thought employs;
We weep our earthly comfort fled,
And withered all our joys.

OBITUARY.

Died, July 23d, 1868, in this city, N. A. McKinnie, wife of Elder P. C. McKinnie, aged 45 years and 25 days.

She leaves a devoted husband and three children to mourn her death. Sister McKinnie had been a member of Christ's body, the Church, in early life, by the solemn rite of holy baptism. This sacramental covenant she often renewed by a personal profession of faith in the Redeemer of the world. At the time of her death she was connected with the Emmanuel Presbyterian Church of San Francisco, and now that she has gone to her eternal home, her pastor esteems it a great privilege here to record, to the glory of Sovereign Grace, that a more exemplary Christian lady, in sorrow and in joy, in adversity and prosperity, in love to Jesus and His Kingdom, in devotion to the cause of Truth at all times, he has rarely met with in his ministry.

She died, as she lived, in longing desire for Heaven, and full assurance of eternal life. From the day previous to her death all pains had left her. An hour before she breathed her last, she called her devoted family to her side, and giving each a parting blessing, said: "Meet me in Heaven." Here she became speechless, her eye still bright and her face radiant with the glory of Heaven, and fully conscious to the departing moment.

At the time appointed for the burial, many friends assembled at the late residence of the deceased, 114½ Dora Street, from which the procession proceeded to the corner of Folsom and Sherman streets, the present place of worship of the Emmanuel Presbyterian Church. The corpse was placed in front of the pulpit, whereupon the pastor preached a short discourse upon the words: "Blessed are the dead which die in the Lord," etc.: Rev. 14: 53. The Rev. Mr. Pierpont was present by special invitation, and assisted through all the exercises.

Thus lived and died one, the chief end of whose life was the glory of God. Peace to her ashes and blessedness to her soul.

F. Fox, Pastor.

CURRENT TOPICS.

The First Annual Catalogue and Circular of the Biddle Memorial Institute, has been issued, and furnishes occasion for congratulation among those who have been aware of its history. At the close of the war, the Freedmen were found very anxious to be organized into churches of their own, but two difficulties were experienced. Suitable ministers could not be secured, and money could not be furnished for the support of such churches. After conference with Presbyteries in the region, the Committee on Freedmen of the General Assembly, O. S., resolved that an institution to prepare ministers and teachers of the colored race was indispensible to the successful prosecution of their work. They therefore established the Biddle Institute, in Charlotte, N. C., the Trustees of which, offer gratuitous instruction, and rooms free of rent, to all young men of color who bring testimonials of moral character and talent. Candidates for the ministry receive such aid as their necessities, and the resources of the Institution will allow. Since last September, when the session opened, forty-three students have been admitted, twenty of them designing to preach the Gospel, and twenty-three to teach. There are three Professors in the Faculty, who seem to be well fitted for the position, and there is an open field of usefulness and success before the College, if it shall be aided by the funds of the Church, and those interested in such a work of philanthropy and religion.

There seems to be an insane desire on the part of early settlers, in every portion of the country, to destroy all trees which nature has furnished, that they may live for years without shade, while those they may plant slowly grow to maturity. Instead of leaving some of the grand old natives of the forest, where pioneers are clearing for themselves a home, they sweep all away, and then set out a few around their houses, that may be large enough to give their children some comfort in their adult years. Instead of saving every one that can be permitted to adorn the bare land of a region where a tree is a public blessing, ruthless hands hew them down, that the open space of a highway may not be obstructed, or that the right angles of street blocks may be exactly defined, and then rows, of little, struggling substitutes placed according to method, with the shrubs that may grow in the yards, are expected to satisfy those who mourn for the noble oaks that are gone. It is difficult to restrain one's emotions of mingled sadness and wrath, in view of such sacrifices to what many persons seem to regard the taste of improvement. Can any sane man give a reason why the authorities of the City of Oakland, for example, give orders that the magnificent trees which have been growing for centuries, shall be banished from their streets, while the authorities of New Haven most sedulously preserve and protect those which human hands have gathered into their streets? Can one be blamed for the feelings of indignation with which he looks upon the fields of girdled trees, splendid even in their dismantled and decaying state, in the upper portion of that region of beauty, the Napa Valley, that a few more bushels of wheat may be gained from an acre when he has watched the slow growth of those in other lands that may add some beauty to a landscape, or some charm to a home? There may be no way of checking, or preventing this destruction of what ought to be cherished by every one who loves either nature or man, but the result is a serious and public loss.

We see that there is some disapprobation expressed that the majority of the General Assembly, O. S., did not adopt some of the amendments to the Basis offered, pending the discussion of the matter of union. The Basis was the work of a Joint Committee of the two Assemblies, and could not be altered or amended, unless referred to the Committee for this purpose. Improvements could be suggested, but neither body could insert them in the report. This consideration, we think, will shield the majority from any charge of want of respect for the great and good men who offered these amendments, or of disapprobation of the amendments themselves. The same impossibility of change seems also to be forgotten by those who are pressing certain points as important, that the Presbyteries may substitute them for what they do not like in the Basis adopted by the Assemblies. The Presbyteries have no power in the premises, except to approve or reject what is submitted to their decision. They may recommend something different, but the paper under discussion cannot be changed.

We observe that Princeton College conferred this year upon several gentlemen the title of Doctor of Philosophy (Ph. D.). Two of these names we recognize as those of teachers of private schools in the vicinity of the College. The idea seems a happy one. The friends of a gentleman often desire to address him as "Doctor," and besiege some institute to give them the privilege. The College is amiable, but cannot give the title LL. D., because it is too grand, or D.D., because it belongs properly to special proficiency in theology. The title Doctor of Philosophy offers the means of gratifying all parties, while violating no proprieties. The old war, however, against all such titles as unrepublican and savoring of rabbi-rabbi, will follow this also. Mr. Barnes is called D.D.D., or Doctor of Divinity Declined; and so, doubtless, we shall have in time some scrupulous teacher called Ph. D.D., or Doctor of Philosophy Declined. The title is worth the adoption of our Pacific colleges.

The brilliant success and prospects of the Cornell University, located at Ithica, New York, furnish various lessons which may be studied with profit by those who take interest in general education, but there is one lesson for men who have wealth, which it presents in such a manner, that it ought to be heeded. This relates to the wisdom of one who becomes the executor of his own will, and erects while he is living, a monument to his honor. Had Ezra Cornell resolved to make provisions for the creation and support of such an University in his will, there are a number of contingencies that might have prevented its execution; at least, it would hardly have been made just what he would like it to be. Moreover, he would have had no opportunity to witness and rejoice in the splendid result of his beneficence and to make any changes which experience might suggest, for the perfection of the work. Now, a man in middle life, in full possession of his powers, knowing what he desires to accomplish, and able by consultation with others to realize his wishes, enjoys the rare delight of looking on the complete establishment of an institution which has already made him eminent in Europe and America, and which will bear his name for generations, as that of a wise and benevolent and noble man. It is strange that a large number of those whose money is really a burden to them, so great is the care of it, do not imitate such an example, even though they are moved by selfish considerations. Their names might be perpetuated and spoken with admiration, would they associate them by the use only of their surplus wealth with some such abiding public blessing, instead of being forgotten in a decade of years, or remembered only in connection with merely selfish objects to which they are devoted. Experience and observation make it more and more evident that a man is wise who administers his own estate, and a little thought prompted by the right spirit, will furnish each one who has ability thus to honor himself, with some worthy, permanent monument, on which he may write his name, that shall be a lasting proof that he did not live in vain, and that shall speak, when he is dead. In a new country like ours, where so much is yet to be done in the interest of education and charity, and religion, and where large fortunes are rapidly amassed, there are many inviting opportunities for such men to render their influence and their names immortal.

Were anything needed in the way of consolation while we are passing through the unusually chilly and uncomfortable weather, with which this region has been visited for a month past, it could be found in the accounts now reaching us of the fierce heat that has fallen upon the dwellers on the Atlantic coast. We had the simple announcement by tele-

graph, with a feeling that the facts in detail would be distressing, but the statements of the papers are more dreadful than we anticipated. The advantage in even the warmest portions of this coast, is that the nights are always comfortable, and this probably accounts in a large degree for the absence of sunstroke, however intense may be the heat during the day. But when, after burning rays of the sun have well-nigh melted one in the day, the suffocating heat of the night forbids either rest or relief, and this is continued for days, and sometimes for weeks together, it is no marvel that persons die from the effects. The mortality in the large cities of the East during the last month from this cause, has been fearful, and the agency of such weather in promoting disease of various forms, must be alarming. We may well be content with fogs and winds, and over-coats, and occasional fires in the evening, notwithstanding the Almanac tells us it is August, so long as we are free from the much greater evils that continued hot weather would bring upon us. Indeed, gratitude may often be inspired by the reflection, that our condition, whatever it may be, might have been much worse.

Religious Intelligence.

PACIFIC COAST.

United Presbyterian Church.—Rev. M. M. Gibson, pastor of the United Presbyterian Church gives us the following information concerning the progress of that society: "At the last communion season the church received 14 members, 13 by certificate and one by profession. The increase during the past year was 39—20 on examination and 19 by certificate. The congregation, early in the spring, purchased a building-lot on Mason Street, between Ellis and Eddy, and hope in a short time to erect a suitable house of worship thereon. To show that our people are in earnest, let me state that they have contributed during the year (Synodical year ending with June) on an average per member, for all purposes, $49 96."

Hayes Valley Presbyterian Church.—The dedication of the new church built for the use of this society on Fell Street, between Laguna and Octavia streets, Hayes Valley, will take place on Sunday next at 2 P.M. Rev. Dr. Scudder will preach on that occasion and other clergymen will take part in the exercises. We are glad to learn that this church, under the charge of Rev. I. N. Hurd, is in a flourishing condition, and that the new building has been finished without involving the society to any great extent in debt.

San Francisco Benevolent Association.—During the month of July this Association rendered charitable aid to 577 persons, at a cost of $2,258. A large portion of the persons assisted were women and children, without relatives and without friends. The average cost of each person assisted was less than $4 per month. The Society is struggling along with quite a limited income, and the demands for assistance increasing. If the citizens wish to assist this society in its good work they should promptly respond to the urgent appeal for additional subscribers.—*S. F. Times.*

Calvary Church.—The Trustees of this church have petitioned the Fourth District Court for permission to sell their building and lot on Bush Street. Work is progressing rapidly on the new church, corner of Geary and Powell streets, which promises to be one of the most imposing structures in the city.

Anniversary.—The Sabbath School connected with the Powell Street M. E. Church held its 18th anniversary meeting last Sabbath. From the Superintendent's report we learn that the school has at this time 36 teachers and 346 scholars. The collections for the year have been $270 50. The meeting was addressed by Judge Sawyer and J. W. Stow, and the interesting exercises closed with an address by the pastor, Rev. Dr. Briggs.

Church at Tule River.—Considerable interest is manifested in this church, which is under the care of Rev. John Edwards. At the last communion four persons united with the church.

Carson City.—A Bible Society was organized in Carson City this week, all denominations uniting in the work. The object is the distribution of the Bible without note or comment.

Conference.—The Annual Conference of the Methodist Church South will meet in Sacramento on the first of October. Bishop Marvin will be present.

Mission Sabbath School.—The First Congregational Church of Oakland will establish a Mission Sabbath School in that city to-morrow.

Marysville.—The Benevolent Association in this city, during the past year, has relieved 92 persons, and expended $383.

EASTERN.

Efforts to Induce Newman Hall to Settle in Chicago.—The First Presbyterian Church of this city are trying to induce Newman Hall, of London to fill the pastorate lately vacated by the Rev. Z. M. Humphrey, D.D. They laid upon the cable the burden of telling him that if he would come, he would find a nice house, rent free, and a salary of $10,000 per year, payable in gold. To these attractions may be added that of a hearty welcome by the many who had already learned to think so much of Newman Hall as to make it impossible to fully express their appreciation in the short time he was here."—*The Advance.*

Good Change for Investment. The Presbyterian Board of Church Extension has on file applications from over 100 churches for $70,000 more than its means. These applications are, in most cases, for aid in erecting humble sanctuaries, costing from $2,000 to $3,000. They come from feeble churches that, in poverty and great self-denial, are building a house for the Lord; and it would be hard to find a better place in which to put money for the permanent good of the Church.—*N. Y. Observer.*

Some Facts about Yale Students. The *Yale College Courant* contains a statement which startles the sober friends of the college. The graduating class numbers 106 members. Of these, according to the *Courant*, 70 smoke, and 15 chew tobacco, nearly 70 play billiards, and 96 (all but 10 of the class) play cards. Perhaps the strangest thing about it is, that 18 of the class are to study theology, which must include at least 8 of the card players.

Ritualism.—A London choir has "struck," on account of the vicar's request that the members should turn Eastward at the Glorias. We trust the day is not distant when our New York choirs will exhibit a similar independence of spirit, and a similar disapprobaton of the introduction of popish practices into Protestant places of worship. It only needs that one choir should lead off, in order that all the others follow.—*Episcopalian.*

German Religious Paper.—The German Congregational Association of Iowa, at its late meeting in Muscatine, discussed a project for establishing a Congregational German religious paper, and it was resolved to commence such an enterprise as soon as practicable.—*Chicago Presbyterian.*

The Annual Report of the Young Men's Christian Association of New York has just been published. Among the new means of interest employed by the Association are mentioned a Choral Society formed, with Prof. Howard Kingsbury as leader, under the charge of the Musical Committee; a French class, free to all the members, taught by Prof. Alexy, who generously gives his services; and a course of six instructive lectures on the laws of health, especially directed to young men, by Dr. Willard Parker. The numbers at the first of these lectures were so large that, by the courtesy of the College of Physicians and Surgeons, their large hall was gratuitously granted to the Association, and was crowded during the entire course.—*Observer.*

Philadelphia.—The Central Church, Philadelphia (Rev. Dr. Alexander Reed's), is one of the most prosperous in the city. At the late communion, 38 persons were received into the church, thirty on profession of faith, and of this number twelve were baptized. Much interest on the subject of religion has prevailed in the church during the past few months, and the ingathering is the fruit, in part, of this gracious work.—*American Presbyterian.*

Flourishing.—The Conference of Central Ohio was organized seven years ago with five churches. It now has sixteen. Then there were 540 church members, now 1,242. Then there were five ministers, now twelve; then 645 Sabbath School scholars, now 1,754; then parish expenses $3,344, now $30,-177; then benevolent contributions $438, now $1,-944; additions the first year 84, the last year 250. —*N. W. Presbyterian.*

Sharp Practice.—*The Liberal Christian*, reports that Spurgeon's sermons are "doctored" by the close-communion papers before they publish them here, and gives this as one of the expurgated passages: "There is not a Christian beneath the scope of God's heaven from whom I am separated. At the Lord's table I invite all Christians to come and sit down with us."

Fruits of One Man's Labor.—Since Rev. Mr. Oncken, of the Baptist Mission in Germany, began his labors there at the age of 22, millions have heard the name of Jesus, fully 50,000 have been converted, a quarter of whom have been Roman Catholics, and 93 churches and over 1,000 preaching stations have been established.—*Religious Herald.*

Rev. Dr. Bushnell, who, it is understood, has declared in his published works his denial of the atoning character of Christ, used the following expression recently in a prayer in a theological seminary in Chicago, Ills., in the presence of the professors and students: "O Lord deliver the membership of this school of the prophets from all the *nonsense* of sin."

Prof. C. E. Stowe, who was successively connected with the Theological Seminary at Andover, Mass., and at Walnut Hills, Cincinnati, O., has sailed for Cadiz, Spain, for the benefit of the health of his son, Captain F. W. Stowe, who has never entirely recovered from his wound received at Gettysburg. —*Christian Instructor.*

Rev. E. P. Marvin, formerly editor of the Boston *Recorder*, and associate editor for the last year of the combined *Congregationalist and Recorder*, has left that paper in order that he may give more editorial work to the *Congregational Review.*—*Religious Herald.*

Presbyterianism in England.—The *Boston Congregational Review*, thinks that Presbyterianism in England is yielding to Congregationalism, and the *English Independent* thinks a reconciliation of the two doctrines not wholly beyond possibility and hope.'

Southern.—Eight young men in the theological seminaries of the Southern Presbyterian Church have applied to the Foreign Missionary Committee of that Church to be sent to the missionary field.—*Christian Herald.*

Rev. Dr. M. D. Hoge, of Richmond, Va., has been called to the pastoral charge of the Central Presbyterian Church of St Louis, Mo., in place of Rev. Dr. S. J. P. Anderson, lately resigned on account of ill health.

Union.—All the English speaking evangelical churches at Hartford united in the celebration of the Lord's supper with the Congregational Church, at their last regular communion services.

The Pope and the Austrian Reformers.

The Pope has at last opened his spiritual batteries on the Austrian reformers, as it has been expected for some time he would, by the delivery of an allocution which is, it must be confessed, in spite of the world, with his opinions and his style, very amusing reading. He says the Austrian Government has passed "an odious law, establishing free liberty for all opinions, liberty of the press, of all faith, and no matter what confession or doctrine; it grants to the members of every confession the right of establishing public schools and colleges, and members of every confession are allowed to be admitted on the same footing with the sanction of the State."

Another "abominable law," he says, forces Catholics to allow heretics to be buried in their cemeteries, if the heretics have none of their own. Another still, which he stigmatizes the same way, "suppresses all the influences of the Church over education, decreeing that the whole superior supervision of education, literature, and science, and also the inspection of the schools, appertain to the State, which finally decrees that religious teaching in the public schools must be placed *in the hands of the members of each separate confession;* that any religious society may open private or special schools for the use of its own youth," and so on. In fact, his Holiness denounces as atrocious wickedness the establishment of the same relations between Church and State regarding marriage and education which we have here, and threatens everybody concerned in bringing them about with the heaviest ecclesiastical censures.

Apropos of the ideas entertained by the Catholic clergy regarding their duty in the matter of education, whenever they can secure the power of exercising it, a late utterance of the Bishop of Dordogne, in France, is interesting and instructive. He affirms that "to the Church, and the Church only, Christ gave the right and imposed the duty of teaching mankind."

"It is *not that the laity are prohibited from receiving education,* especially when science and literature are its object. We put forth no such claim. The Church accepts, encourages, and blesses devotion of every kind; but that which is true, and what we must loudly proclaim, is, *that every person engaged in teaching is bound in conscience to accept the superintendence and control of the Church.* This right of the Church is imperative."

In fact, we need have no hesitation in affirming that the only limits which the Catholic clergy even here impose on themselves, touching education, is what is imposed by State authority, and that if circumstances should enable them to secure legislation placing the entire control of the schools or school funds of this State in their hands, they would think it a duty to seize the power thus offered them, and to treat the claims or protestations of those opposed to such legislation as of absolutely no consequence. Moreover, they avoid attracting public attention to their pretensions in this matter by absolutely refusing to discuss them publicly, and push their claims simply by quietly influencing Catholic voters and political managers, and, through them, getting all they can, while waiting for all they think they are entitled to.—*The Nation.*

Spiritualism.—The Massachusetts Spiritualist Association, at its session in this city during Anniversary week, passed the following: "Whereas, man's natural demands are God's only commands, therefore *Resolved*, that, as Spiritualists, we reject all external authority as a rule of life in our various relations with our fellow-beings, and acknowledge allegiance to our internal emotions, or to the God that speaks in the individual soul, as our only infallible rule of faith and practice." This has the merit of being explicit.

And it might require study to crowd more blasphemy, infidelity and general profligacy into the same number of lines. If these persons knew what they were saying, it might be a public gain for them to furnish their fellow creatures with a list of their precious names, in order that the community may be on its guard against them. If it should happen to be revealed to one of them, by "the God that speaks to the individual soul"—and, from the above specimen of that kind of revelation, promptings of such a sort, on occasion, might not be improbable—that it is his duty and privilege to pick his neighbor's pocket, or cut his neighbor's throat, that would become at once, to him, an "infallible rule of faith and practice," obedience to which would be lifted both into an obligation and a virtue; while no "external authority" could have any right to interfere with the thief's or murderer's "allegiance to his internal emotions."

Let these fellows act out their brave talk, and see how long it would be before a Vigilance Committee would be making a short shift with them, as was made with some of their less philosophic, but possibly more practical brother scoundrels in San Francisco, and at Denver City, under the reign of Judge Lynch. Meanwhile, how exactly has Paul described them: "Professing themselves to be wise they became fools, and changed the glory of the incorruptible God into an image made like to corruptible man . . and worshiped and served the creature more than the Creator who is blessed forever."—*Congregationalist.*

FOREIGN.

A Religious Paper in Scotland.—Singular as it may appear, there never has been a newspaper in Scotland which corresponds to the general religious papers in this country. Secular papers have been the only vehicles of religious intelligence. Now, however, a great change has taken place. An association of ministers has just started a religious paper in Edinburgh, very much on the plan of those in the United States. It is styled "The Presbyterian," and the Rev. Dr. Rainey, a Professor in the new (Free Church) College, Edinburgh, is editor. It is a Free Church paper, and from Dr. Rainey's abilities, will undoubtedly be an able and desirable newspaper.—*Chris. Instructor.*

A French Statesman.—At the anniversary of the Protestant Bible Society in Paris, a few weeks since, M. Guizot, the distinguished statesman and writer, presided, and after expressing his firm belief in the Divine inspiration of the Scriptures, in the supernatural facts they contained, and in the doctrines they taught, he said:

"Brethren, let us go forth in the Bible work, and pursue our task perseveringly and hopefully, and we shall see good results. Success is due to Divine grace rather than to human work, and it will not fail us."—*Chris. Instructor.*

A Turk Selling Bibles.—A Turk recently applied to the missionaries for work. They said to him; "If you wish to sell books, we can give you an opportunity to do so, but apart from that we have no work to give." To their surprise, he accepted the offer, and sold a great many Bibles and Testaments in Sivas and the villages about. Of course, he sold the books as he would anything else, to make money. It is, however, a fact of no small significance, that a Mahommedan was willing to be used to promote the circulation of the Scriptures.—*Cin. Herald.*

French Methodists.—The French Methodist Conference, consisting of fifteen ordained ministers, commenced its seventeenth annual session, June 11th. Three candidates were received into full membership and were ordained. There had been an increase in the church during the year. The net total is 1,979 members (increase, 89), and 146 on trial. We have 110 local preachers (increase, 14); 57 Sunday Schools (increase, 8), and 2,588 scholars (increase, 203).—*Observer.*

The net increase for the year in the membership of the Methodist Episcopal Church in Canada, is seven hundred.

Roman Catholic.—A General Council of the Catholic church throughout the world, is authoritatively announced to take place at Rome during the next, or the ensuing winter. This council, it is stated, will be deliberative in its character, and will be the first General Council of the Catholic Church that has been held since the famous Council of Trent. The objects of this Grand Council are said to be political rather than religious.—*Western Presbyterian.*

Rev. Dr. R. R. Gurley, who has been so long strongly identified with the great work of the American Colonization Society, has lately returned from a visit to Liberia, whose distinct independence and nationality have been recognized now by thirteen of the principal governments of the world. Dr. Gurley reports most favorably of the state of things in this promising home of the colored man.—*Chris. Instructor.*

Opium Used in China.—Four tenths of the adult males of Foochow are opium smokers, and they spend $432,000 annually for the drug. This is a fair representation of its use throughout the empire. The value of the opium imported into China for the year 1866 was $45,000,000, and we are sorry to say, it was imported from Christian countries,— a fact extremely humiliating.—*Zion's Herald.*

Pope Pius IX, is in his seventieth year. His father died at 84; his mother at 82 his paternal grandfather at 96. He had three brothers, and all are dead. The oldest died at 87, and the second at 83. He has one sister living who is 67. A long-lived family.

Rev. J. Y. Leonard, and his wife, missionaries of the American Board in Eastern Turkey, have recently reached this country in view of recovering their health and strength.—*Chris. Instructor.*

Rev. Mr. Punshon, the eloquent English preacher has taken up his residence in Toronto, where he will remain for some years. He does not propose to assume the pastorate of any church.

The Sultan has received, by deputation, the thanks, of both Christians and Jews for his promise on opening the Council of state, of religious equality and impartial justice.

Rev. Mr. Spurgeon, though a Baptist, is not a close communion Baptist.

Correspondence.

To California by the Overland Route.—No. 1.

For several years I have cherished the desire of crossing the continent, but it is only now that I have had my wish gratified. Having concluded a very pleasant visit in the eastern part of our country, the time having arrived for my return, I being one of those who, on account of prevailing sea-sickness, do not enjoy going "down to the sea in ships," determined to attempt the overland journey. Leaving Albany on an express train, I availed myself of the invitation given by the conductor of the drawing-room car, and took a seat in his rolling palace, in which, for a very moderate consideration, I was able to ride in royal style, and, what was more important, with great comfort, to the city of Rochester, where I made a change, and taking a berth in a sleeping-car, quickly dropped into a profound slumber, only broken at the dawn of day, as we came into Cleveland. Here the sleeping-car was left and another of Pullman's palace-cars substituted in its room, in which I rode—alone in my sumptuous apartments—all the way from Cleveland to Chicago, having both conductor and car to myself!

The introduction upon our great thoroughfares of travel of these palace, drawing-room, and sleeping cars has done very much to ameliorate the condition of the traveling public. The cars have the appearance, both externally and internally, of having been fitted up at great expense. They are of different styles. Some have a hall running along one side of the car, and from this hall are entrances to the several rooms. These rooms are capable of accommodating eight or ten persons, are beautifully furnished with sofas, mirrors, tables, and footstools, and tastefully decorated with woods of various kinds in their natural colors, and with paintings. In the center of the car there is a larger room, having the entire width of the car, and in this, with its ample furniture of marble-top tables, arm chairs, lounges, mirrors, and lamps, a party of a dozen persons might spend a day almost as comfortably as in their parlor at home. On entering a car of this description, the attention is most likely to be arrested by a pair of parallel silver bars, extending from end to end of the vehicle, at a height of about eight feet from the floor. These bars, as will be afterwards discovered, are for the purpose of suspending curtains at night. It might be noticed, also, that there are, on both sides of these cars, large panels sloping from the upper edge of the windows toward the roof of the car, at an angle of about sixty degrees, and also that every second seat is faced toward the rear of the vehicle; the cushions of these seats, moreover, are very large. When the time for retiring draws near, it is but the work of an hour to transform this car into a complete sleeping car.

The steward commences by sliding the four cushions on the backs and bottoms of two seats into a horizontal position. Over these, thus placed, mattresses and bedding are spread, pillows and sheets being stored during the day in a closet made for that purpose. When the seats have all been treated in this way, he directs his attention to the second tier of beds. Reaching up to the higher side of the panels already spoken of, he presses a catch which allows the panel to descend to a horizontal position, the inner end being fastened to the side of the car with hinges, and the outer supported by a metallic strap from the ceiling. Boards, framed for the purpose, are inserted in a moment at the head and the foot, the necessary covering spread over the mattress, which is never displaced; the curtains are now suspended from the silver bars, and you may retire whenever it is convenient.

Double glass in the windows answers the double purpose of excluding both dust and noise. Ventilation seems as perfect as modern improvements can make it. At each end of the car is an apartment provided with combs, brushes, mirrors, and water in abundance. Thus accommodated during the daytime and at night, the traveler must feel that the railroad is relieved of many of its discomforts.

Journeying westward from Toledo (which point was reached in about 24 hours from Albany), the appearance of the country improves, until within 10 or 15 miles of Chicago when the land bordering on the railroad becomes marshy. As I drew near to the great metropolis of the northwest I began to see for the first time, in all its unlimited grandeur, the prairie stretching away to the south. On the north was the equally placid and beautiful surface of Lake Michigan. After passing for nearly half an hour through the suburbs of the city, we entered the spacious depot of the Lake Shore and Southern Michigan Railroad. While in Chicago I had excellent accommodations and at moderate rates. I improved my leisure by riding up Wabash Avenue and down Michigan, two of the most beautiful streets in any city of the West; also, visited the water works, which are now, and will be still more when completed, the pride of the city. Probably one of the greatest triumphs of engineering skill of our day is the successful completion of the lake tunnel, extending for two miles beneath the lake to the "crib," whence the water is drawn. Three engines, two of them of 900 and one of 1,000 horse power, with balance-wheels 25 and 30 feet in diameter, are employed to pump the water into the reservoirs whereby it is distributed in different parts of the city.

This vigorous young city is full of interest to the traveler. Its future greatness may be almost as unlimited as are the prairies which furnish its site and place no barrier to its growth. Its streets, depots, bridges, tunnels, public buildings, private residences; its schools and churches; the enterprise of its citizens; its present and prospective power as a centre of commerce, and of moral influences, all deserve notice. I would gladly have remained longer, observed more extensively, and gained something better than the general impression of a transient visitor.

W. R.

Contributions.

Old School and New School.

I am an old man, and an Old School Presbyterian. When a boy, it was a matter of wonder to me, that old people thought the times were worse than when they were young, for my Old School theology taught me that *unconverted* human nature was immutable from age to age. But the mystery is now solved—I have found that it requires a whole life-time to understand human nature. Thus, an old person understands why parents, whose children are forming matrimonial alliances which they deem unsuitable, always commence their opposition, by endeavoring to persuade the young parties to postpone—wait—don't be in haste. The parents have seen too much of life to attempt rudely to destroy the young bud of love, but hope by delay, that some favoring frost may prevent a full development, and thus prevent the espousals. Now, it seems to me, that the fathers in the Old School Church, seeing the young love that for some time has been budding more and more into beautiful bloom, and not fancying the alliance between the Old and the New School, are still urging postponement, delay, don't be in a haste. Be cautious. This brotherly love is dangerous. Let us have more "terms and explanations, and conditions and emendations."

But inasmuch as it is my fearful and solemn conviction, that if the union is not consummated now, it never will be, I ardently hope and pray, that those who are opposing the union, will find it as impossible to prevent it, as to stop the course of two young loves, flowing on with accelerated power, nearer and nearer to each other, toward the great sea of matrimonial alliance. Years of wasting toil, and an almost incredible amount of labor have been expended in effecting the approach to union now apparent; and if there is failure, a new committee to devise a new plan could not be appointed till 1869, and they could not report till 1870. There new "terms and explanations, and conditions and emendations," would be required, and many long years roll by before the same point could be reached again. The Holy Spirit has wrought the love and harmony which now exists, and if He is grieved away by selfish delays, we have no evidence that He would ever return. If His power could be felt in the Church, in its separated condition as when collected; as in the Philadelphia Convention, and the late Assemblies, there would be nothing to fear. But selfishness and strife, and procrastination, may grieve Him away, never to return in sanctifying power upon our Zion. My heart trembles at the thought of postponing the union any longer. Far distant will be the day when the Old and New School are one body, if not made so now. I must believe those to be guilty of an attempt to withstand the purposes of God who labor to prevent a consummation which promises so much glory to the cause of Christ.

The position of those in the Old School who oppose the union, seems very like that of an old bachelor, the native love of whose heart has been frozen out by the frosts of years. He has won a young maiden and proposes marriage on certain conditions. The young maiden hesitates, but finally consents. After a time he comes back again, and requires certain understandings of terms and condition, agreed upon. So the Old School proposes to the New, a reunion—the basis of the Confession of Faith. The New School hesitates, but finally consents. After a time the Old School comes back and requires new conditions, viz: the New School must not accept the Confession of Faith as simply the substance of doctrine. The New School consent. They will take the Confession of Faith in its historic—that is in its Reformed or Calvinistic sense, Dr. Hodge, the acknowledged leader, having stated in the Philadelphia Convention, the doctrines necessary to be embraced in order to union. But those who oppose ask for new conditions still. The position is just this. If the Old School now refuse to unite, they must declare before the whole religious world: "We do not believe the New School are honest; we cannot trust them." This is what those who oppose union are practically saying. Thus in your issue of August 1st, F. on "The last Resolution," expresses the fear, notwithstanding all the New School have said, and declared, and positively avered, that still they will introduce into the ministry, those who hold deadly heresies. Now such an apprehension is without the slightest foundation. For even the one-fifth in the General Assembly who protested against the union, freely admitted that the great mass of that Branch,

repudiated these heresies; that comparatively, only a few hold any doctrines at all at variance with the strictest construction of the Confession of Faith.

The fundamental principle in the Church after the union, will be the same as it is now in both branches, viz: that the majority shall rule. Suppose, then, there were twenty members in a Presbytery, ten Old School and ten New, and that a large portion of the New School, held doctrines perfectly in accordance with the Old, there would be sixteen or seventeen majority over three or four; and that these three or four have come into the union on the basis of the Confession of Faith in its Reformed or Calvinistic sense. Surely if F. has faith as a grain of mustard seed, this mountain of fear will remove.

I fear that the Old School church is floating towards a rock, and if it strike, I fear it will receive such a shock, that unless the arm of Omnipotence is extended for its rescue, ere many years, it may fill and sink beneath the cold waters of antinomianism. May God avert so dire a calamity. SENEX.

Fall of Man.

The saying ascribed to Vogt, an infidel naturalist of Germany, that he "would rather be the descendant of a perfect ape than of a degenerate man," is very characteristic of the haughty spirit of our time.

Scarcely any fact in scripture history is more offensive, and meets a more peremptory denial than that of the fall of man. So pleasing is the thought of a law of progress ruling our race, continuous, never ending, that many seem willing to find the starting point of their progression in an oyster or a tadpole, and are not at all ashamed to count monkeys and baboons among their not distant progenitors. The glory of the future, they say, will make amends for the lowliness of the past. To have had an ignoble origin is no matter of reproach, but our pride is touched when we think of Adam fallen, degraded, descending not ascending in the scale of being, punished for disobedience, driven out of paradise.

But our pride does not merely revolt at the thought of the fall of man: it arrays itself against the idea of God as our Creator and Ruler. It struggles to get wholly rid of the relation of Creator and creature, of Ruler and subject. In past ages men rejoiced in this relation, and made continual avowal of it in their worship. But to the so-called scientific spirit of our day it has become offensive, almost intolerable, for it implies inferiority, subjection. If there be a personal God, Maker and Lord of all, then man must take a position of dependence, must humble himself and be obedient. The contest with modern unbelief is not simply respecting the inspiration of the Scripture, the accuracy of its statements, or the validity of its creeds, but whether there is a God. Is there a being higher than man to whom he is responsible?

This is the question which our age raises. Men like Vogt cry no, for they know and will know nothing higher, more divine than man. He can never attain his true standing and dignity, and freedom, so long as he admits the existence of any being superior to himself, any will to which his own must submit. —*Hartford Churchman.*

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA, connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR AUGUST, 1868.

August 6th—SACRAMENTO, Captain Parker, connecting with ALASKA, Capt. Gray.
August 14th—MONTANA, Capt. Cavarly, connecting with OCEAN QUEEN, Capt. King.
August 22d—CONSTITUTION, Captain Comstock, connecting with RISING STAR, Capt. Conner.
August 30th—COLORADO, Captain Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George E. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Loidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63
3	40 00	120 00	30	206 39	3115 02
4	48 00	168 00	31	247 34	3362 36

The Occident.

San Francisco, Saturday, August 15, 1868.

SINCERITY NOT ENOUGH.

If you believe a ship will bear you safely across the sea, is it no cause for fear that there are really rotten planks in her hull? If you do not doubt that your friend tells the truth when he says that the rebellion was entirely quelled in China when he left on the last steamer, will the business transactions you predicate on his statement be unaffected when the next news declares that he was mistaken? What we require in relation to such matters is more than trust—it is *reality* of some form, that may be a basis for trust; is more than sincerity—it is sincere belief of what is absolutely *true*, and mistake, error, is as fatal as distrust or infidelity—often more fatal, because rendering us more secure.

The reason of our danger, when judging differently in respect to religious truth and duty, is, that we think God will treat us differently as subjects of His grace from what we experience in His Providence. We imagine that the law of consequences will not here have sway. We are not to eat of the fruit of our own ways; we are not to reap what we sow; but if we are ignorant when we might have known—and for this reason err—God will forgive us and overrule our error, so that we shall receive no harm. If we are careless when we might watch, and are sincere in our wandering wide of the paths in which we would find all the beauty and bliss we long to gain, He will allow us to wander on, but when we reach the end of our profitless journey, He will transfer us to the region we might have gained, but which is far from the natural terminus of the way we have chosen. We cannot be convinced too early of the folly of such a view of grace. If you worship an idol, no matter with what devotion and heart-homage, it will not be to you in the place of Jehovah, nor will your sincerity be a sufficient apology for breaking the second command, so long as you might have known the true God, and His command is within your reach. If you hold any radical heresy, no matter with what honest tenacity, and even conscientious conviction, it will not be accepted as of equal worth with the truth, so long as the truth is possible to your anxious and persistent search. If you believe that neglect of duty is just as acceptable to God as discharge of duty, under the plea that you are not perfectly clear on some of the details of its demands on you, you will fail to convince your Judge, notwithstanding your confidence, if the means of knowledge are accessible to you. For, in all these cases the question relates not merely to your sincerity, but also to your ability and opportunity to form a correct estimate of truth and duty; not to your admitted light, but to what you might admit did you open all the passages through which it would pour upon you.

A man tells me, he is convinced that Moses was not inspired, or that Christ was no more than a man, or that the Bible never came from God, or that the Christian system is a failure, and must give place to some new method of spiritual blessing for mankind. By conversation with him, I find that he is lamentably ignorant, touching *proof* on all these points; that he is really, though perhaps unconsciously to himself, moved by the desire that what he believes may be true, and that he is at ease, content, under the control of this ignorance and desire. Will he be approved, and may I excuse him, because he is *sincere* in the blasphemous sentiments which have such an origin, and such support? Nay, verily.

There must be the best *foundation* for trust. These must be the antecedent conditions of its *value*, viz: intelligence to the extent that this is possible, and a welcome of all influences, which may aid in forming a correct belief. It is not enough that a man truly believes he does not need Christ as his Savior. The point on which his destiny hangs is, whether he should not feel that need, as God has proclaimed it. He may expect to enter heaven without a changed nature, but his confidence will not cause the gates of pearl to turn on their hinges before an unhumbled, sin-loving spirit. Why has God given us revelation, and all other means of knowledge, if sincerity is all He requires? Yet deception by means of this fallacy, has never failed of success which should lead all to beware of its effects upon them.

The Discussion respecting Union.

The question now of absorbing interest in the Presbyterian Church, is that which relates to the union of its branches. Upon this question, in its different phases, there are various opinions held with equal sincerity and firmness by those who as yet are unable to think alike. It is natural and it is wise that these various opinions be expressed, with such arguments in their support as may be presented, for in this way the public mind of the Church may be fully enlightened, and, if the union shall be effected, all will be better acquainted with the basis on which it rests. As The Occident is a Presbyterian paper, and not the advocate of either Branch to the exclusion of others, its columns will be open for those who desire to discuss the points involved in the subject, within those limits which our space and the suggestions of Christian courtesy shall permit, while we shall not hold ourselves responsible for any views which are not published as editorial.

Baptist Interpretations.

My reader may be curious, perhaps, to know how these divers *baptismoi* are disposed of by Baptist writers. They do not, in fact, receive much attention. Some cut the knot directly. *Baptismos* always means dipping; hence it must surely mean dipping here, and the matter is settled by begging the question—that is, by dogmatically assuming that *baptismos* means dipping, which is the very point to be proved.

Prof. Ripley, in his commentary on this phrase, as we have seen, while admitting that these *baptismoi* comprehended the ablutions of the Hebrews, while he refers us to a portion of one of these ceremonies described in Lev. 14: 8, 9, to show—though the text fails to do it—an immersion, neglects entirely to call our attention to another and most important portion of the ceremony, which, beyond all controversy, shows us a *sprinkling*. If one portion of the ceremony by which the leper was cleansed may be quoted to show an immersion, it is impossible to say why, with equal propriety, another should not be quoted to show a sprinkling. Was it oversight on the part of Prof. Ripley to refer his readers to the 8th and 9th verses to prove that the *baptismoi* of the leper were by immersion, ignoring the 7th; or was he unwilling that they should know through the seventh that one of the ablutions of the Hebrews, called by the Apostle as *baptismos*, was performed by sprinkling, and hence, by the authority of inspiration, that one of the divers *baptismoi* referred to by the Apostle was performed by that mode; and while these baptisms were divers in respect to mode, yet the Holy Spirit has been pleased to adopt and employ *baptismos* to signify the use of water in a ritual sense, as an emblem of religious purification, without regard to the mode of its administration.

In conclusion, I would say, if any one is dissatisfied with this result to which I have arrived, he can easily set it aside; provided, he can show from the Scriptures that *sprinkling* and *washing* were not among the appointed modes of Hebrew ablutions, called by the Apostle *baptismoi*; or if, he cannot do that, perhaps he may be able to show that at least one of these personal ablutions was by *immersion*, and among these divers *baptismoi*, have the satisfaction of discovering that the Spirit of Truth was not so utterly regardless of the mode, which he considers essential, and oblivious of sectarian interests, as to have discarded it altogether in the administration of the ordinance.

Since writing the above, I have fallen in with an address of the Rev. Alexander Campbell before the Bible Union, in which there is a paragraph on *rhantizo* and *baptizo*. It is too long to quote entire, but I will give a few specimens: "Our Pedo Baptist friends are slow to learn that not in an instance in the Septuagint version are these terms exchanged. Their families were never on friendly terms of intercommunication, nor did *baptizo* ever employ *rhantizo*, nor *rhantizo baptizo*, down to the 43d generation, to do for one another any one service. Nor did any Jew, from Moses to Christ, *rantize* by baptizing, nor baptize by rantizing. In English, no Jew ever once tried to dip by sprinkling, nor to sprinkle by dipping. This incontrovertible fact, in a law which contained many typical observances of the greatest exactness, must stand through all coming time, as it has stood through all past time, *an irrefragible evidence of the folly or weakness of any one presuming that these two words can, by any grammatical, logical, or even rhetorical possibility, indicate one and the same thing.*"

So much for the great Dr. Alexander Campbell. Now let us put this confident, dogmatic asservation of his to the test. Let my readers cast their eye back on the sentence in italics, especially the denial that the two words *baptizo* and *rhantizo* "can, by any grammatical, logical, or rhetorical possibility, indicate one and the same thing." And then turn to the Word of God in Heb. 9: 10, and read in the original Greek how the ablutions of "a law which contained many typical observances of the greatest exactness," are signified by "*diaphorois baptismois*." If he will then have the kindness to turn to Lev. 14: 7, in the Septuagint, and he will find *perriranei*, to *sprinkle*, and the same in Numb. 19: 19, and with these texts before him he will learn, without possibility of denial, that two of these ablutions, two of these typical observances, called by the Apostle Paul, in his epistle to the Hebrews, *baptismois*, were performed with a *rhantismos*, and hence we have, in the very Scriptures themselves, in the recorded facts of these typical observances, abhorrent as it may be to the dogmatism of Dr. Campbell, "baptizing by *rhantizing*," or, in plain English, *baptism* by *sprinkling*.

Now, although Dr. Campbell and his sympathizers scout the idea of baptism by sprinkling as the climax of absurdity, the facts of Scripture cannot be gainsayed. Paul and Moses are very competent and reliable authorities, and when we call upon Paul to bear witness in this case, he testifies that the Hebrews had *diaphorois baptismois* (divers baptisms), and when we call Moses unto the stand, he testifies

that these divers baptisms were performed by *sprinkling, pouring,* and *washing.*

It may seem cruel with these plain facts to bring down such lofty self complacency of assertion with my humble bird-bolt, but if the learned Doctor had first consulted the Scriptures, and seen that the ablutions of the Hebrews, the most important of which were performed by sprinkling, were called *baptismoi* by the Apostle Paul, he would have been forced by Divine authority either to admit the solecism—abhorrent as it may seem to reason and common sense—of baptism by *rhantism*, a dipping by sprinkling, or, if that seem too great a strain on his credulity, to admit the other conclusion, abhorrent as it may be to his sectarian prejudice, to wit: that *baptizo*, as shown by the learning of all the world, has other meanings than literal *immersion*, such as *wash, cleanse, purify, baptize*, and that it hath pleased the Holy Ghost to adopt and employ *baptismos* as a generic term to signify the ablutions of the Hebrews (as stated very correctly by Prof. Ripley), which every careful reader of the Bible knows were performed by sprinkling, washing, and bathing—any mode rather than immersion.

F. B.

BACON & COMPANY'S Excelsior Press SAN FRANCISCO

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 4) San Francisco, Cal.

J. D. ARTHUR & SON,

Importers and Dealers in

Agricultural Implements,

S.E. CORNER COMMERCIAL AND DAVIS STS.

SAN FRANCISCO.

City Female Seminary,

CORNER OF MASON AND O'FARRELL STREETS.

REV. CHARLES RUSSELL CLARKE, A.M., PRINCIPAL.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series,

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have never been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.

SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 20 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
23 Broadway, New York. 154 Fremont St., Boston.

Current Literature.

THE SPIRIT DISEMBODIED.

The universal desire to know something that may be relied on respecting the soul and its future condition, and employments and home, welcomes any attempt to satisfy us on these points, and inclines many to accept even wild and foolish conjectures and declarations, as well as sober arguments and Scriptural proofs. Swedenborg, Chalmers, Dick, Davis, and the whole list of others, who have ventured upon either suggestive queries or positive revelations, as unlike in their spirit and purpose as these, are all read or heard with the deepest interest. Each new book on any theme bearing upon the other world, is eagerly sought. Every professed "medium" of communication between those in the body and the disembodied, has anxious patrons. Every *seance*, announcing itself as the favored circle into which spirits come for conference with men, is attended by wondering scores of those who hope to learn something of what is "within the veil." Yet it is manifest that the extent of knowledge which is so generally desired, would be of little real value to us, or God would have given it in His Word, and the surmises and pretended revelations which have no warrant from Scripture, are readily proved to be of no practical worth.

The book of which we have given the title above, written by Herbert Broughton, and published in Edinburgh by William P. Nimno, is one of the multitude lately issued, in response to the demand for what may satisfy our senses, rather than stimulate and strengthen our faith. There is, however, much more that is excellent in aim and expression than may be found in most books treating of like subjects. The author fully believes in a spiritual *form*, as well as existence, in the literal construction of those passages in the Bible which represent Heaven and angels and the souls of men, by such language and allusions as refer to material things, and bodily life, and all the possibilities, as well as realities, that attend such a view of the other world. He says that, "as a spirit is not adapted to this earthly existence without a material body, so is that spirit not adapted to Heaven, considered as a substantial place and locality, without a spiritual form; and that which constitutes the disembodied spirit a more glorious creature, is not only the removal of that which is mortal and perishable, but an *accession* of a higher form of being." His ideas respecting the happiness to be enjoyed in that world are modified by this belief. His sentiment in regard to the intercourse of the inhabitants, the recognition of friends, the mode of living in the mansions, is based on his theory concerning the spiritual form, both of the residents and their home. As is true in all such speculations, there is an indefiniteness in his language, a lack of precision in his use of terms, which leaves us in doubt as to his meaning oftentimes; still, any one would be stimulated, and many would be benefited by reading his work, if, at the same time, the Bible be studied with care, and the sometimes enthusiastic expressions of the author are not permitted to bear us beyond what has been given by authority of God. Sold by H. H. Bancroft & Company.

THE HANDWRITING OF GOD, IN EGYPT, SINAI, AND THE HOLY LAND.

A volume of several hundred pages, with this title, has been published by John E. Potter & Co., of Philadelphia, and has been sold for several years at the East, as a very valuable compend of information respecting the lands of which it speaks. It was written by Rev. David A. Randall, after continued travels in these countries, and is amply illustrated with maps, diagrams, and sketches, that add much to the worth of the book, especially when used by the young. The design of the author was to make the whole bear directly on religion, and in confirmation of the Bible, so that while he describes easily and truthfully, there is no occasion omitted when he may render what he sees, the pleasing text for instruction and cheerful religious impression. This characteristic of the work commends it to Sunday Schools and Bible Classes, and we will give it a place in the family, as a valuable auxilliary to teachers and parents. The Pacific Publishing Company have the agency for this book on this coast, and as it is sold only by subscription, it must be obtained from the representatives of this Company.

Books and Periodicals Received:

Transactions of the California State Agricultural Society during the years 1866 and 1867. Sacramento: I. N. Hoag, Secretary.

California Medical Gazette for August. San Francisco: A. Roman & Co.

The Presbyterian and Theological Review for the quarter beginning with July, in which are several excellent articles, by Dr. Adams, Dr. Skinner, Dr. McCosh, Dr. Gillett, and others. That on "Preaching Christ," by Dr. Skinner, should be read by every minister of the Gospel.

The Catholic World for August. New York: Catholic Publishing House.

The List of Premiums offered by the State Agricultural Society, for their Fifteenth Annual Fair, to be held in Sacramento in September. Over $10,000 have been appropriated for these premiums.

The London Times.

The London *Times* is now in an era of very great prosperity, and the endeavor in the establishment is to issue a newspaper which will at once be a model of correct typography, excellent printing, and the purest English. It is considered that the care bestowed in the *Times* office upon the diction of its leading articles has contributed more than anything else to preserve the purity of the English language. The staff of "leader" writers is large, and upon it are the best newspaper writers in England, where an editor's ambition is to be employed by the *Times*. Unlike the custom in America, the object at the *Times* office is to preserve the impersonality of the paper. What it contains is said by the paper itself, and not by any individual, and for that reason its opinions and statements go before the world with all the weight the newspaper can give them. Its editors never write. They forecast, day by day, the policy of the paper; suggest subjects to the leader writers; sit in judgment upon their articles when written; and decide what shall or shall not go into the paper. Its correspondents, in England and abroad, receive but one instruction, and that is to send accurate and impartial accounts of transpiring events, at the earliest moment, written in such a manner as to interest the readers.

To conduct this establishment a large force is, of course, required. It prints every day from 1,700 to 3,000 advertisements, and, on extraordinary occasions, even more. It also prints twenty to thirty columns of reading-matter. To perform the mechanical part of the work 400 persons are employed at Printing-House Square, whilst probably as many more are attached to the paper in literary positions. With reference to advertisements, as the paper is always receiving more than it can print, it promises early insertions to none but the poor people who want places, and a few other urgent classes. No one who comes after twelve o'clock on any day with his advertisement can hope for an insertion in the next day's paper, whilst generally the advertisers do not see their advertisements printed till two or three days, or sometimes as many weeks, after they are handed over the counter. They have to wait their turn, and such is the anxiety to get them into the *Times* that the English public submit patiently to delays that the American public would never tolerate. The lowest charge is for "wants," in which case each advertiser is allowed three lines for half a crown, about sixty cents, gold. For all others, the regular rate is a shilling a line, twenty-four cents, gold, but no advertisement is taken for less than four shillings, whilst long advertisements are charged more in proportion, the rate, after the first fifty lines, being two shillings a line. The cheapest rates are allowed to public charities and similar classes, but nothing extra is charged for favorite positions in the paper.

The office for the receipt of advertisements is conducted by eleven persons, and is devoted to that business exclusively, the publication office being a separate building.

The reading matter is furnished by the editorial, reportorial, and corresponding staffs, there being besides 22 law reporters, 19 Parliamentary reporters, 12 police reporters, and an indefinite number of miscellaneous writers, known as "penny-a-liners" in London, at least 100 correspondents in various parts of Great Britain, and some 40 foreign correspondents in other parts of the world. Of the Parliamentary reporters, 16 are phonographers, two make summaries of the debates in the Houses, and one directs the force.

To set up the types there are 130 compositors employed, 60 laboring by day, and 70 at night, whilst 11 foremen and assistants direct their movements. Twenty-four persons are required to read proofs, and three are employed merely to "pull" the proofs. The advertisements are set up during the day, and the reading matter at night, the advertising pages being made up at from five to seven o'clock in the evening. Reading matter is received until daylight and afterwards, and the reading pages are rarely put to press before 4 A.M., whilst leading articles are frequently written on Parliamentary debates and other events happening after midnight, and appear in print the following morning. In all this work the greatest care is taken to guard against mistakes, and every line printed is read over by proof-readers four or five different times.

The stereotypers prepare the plates for the printing machines. Sixteen firemen and engineers attend the engines and boilers, six men prepare the paper, before printing, ninety are employed on the presses, and seven deliver the paper to the news-agents after it is printed. No carriers are employed, as in the United States, but the whole edition is sold out to news agents, the number of copies printed being no more than the sum total of their orders, which have to be handed in by two P.M. on the previous day.

The wholesale price of the *Times* is 2½d. per copy (about 4½ cents gold); the retail price, 3d. (6 cents, gold).

To print the *Times*, seventy tons weight of paper, and two tons of printing ink are used every week, whilst the average weight of the daily issue of the paper is from eleven to twelve tons. The machines upon which this large edition is printed are the best of their kind. There are two ten-cylinder Hoe presses, and two eight-cylinder Applegath machines; the aggregate actual work done by them being 52,000 impressions an hour, 16,000 from each of the former, and 10,000 from each of the latter. Besides these there is now in use the "Walter Printing Press," which is a self-feeder, and managed by a man and two boys, prints a large share of the advertising pages of the *Times*. Its capacity is from 22,000 to 24,000 impressions an hour, and it produces in that time from 11,000 to 12,000 perfect sheets, printed on both sides, and ready for the reader.

The present circulation of the *Times* is from 65,000 to 68,000 daily, the ordinary issue being a sixteen-page newspaper, whilst sometimes it is increased to a twenty-page newspaper.—*Correspondence of Philadelphia Ledger.*

A man is a man, though he wear a crownless hat

Educational.

Bad English in Text Books.

Bad English should be banished from school text books with special care. This, we presume, is felt by most authors of such books, and yet the best of them find it difficult to avoid faults. The following is a definition from one of the best of the Arithmetics: "A degree may be considered simply as the 360th part of the circumference of the circle considered." Here the merest tyro in composition could criticise the repetition of the word "considered." The following sentences are from an otherwise excellent Reader: "Nobody moved; not a green flag stirred; but, directly they entered, out burst a burly young hippopotamus calf." "It is not improbable but our friend would soon have become used to seawater." The use of "directly" in the sense of *as soon as*, and the expression, "improbable but," are, of course, inadmissible, even in a newspaper, or in conversation. The following unskillful creation is from a favorite Phisiology: "When we look at this 'harp of a thousand strings,' and notice the varied, rapid, complicated, yet accurate movements it performs in a single day, our thoughts are lost in wonder in contemplating this superb and intricate machine, framed and finished by the Divine Architect." Here we have the subject of the sentence twice mentioned and characterized in full; making it, in fact, two-faced—like the head of Janus. Pycroft's Course of English Reading is probably the best work of its kind, and yet it is a museum of monstrosities in composition. The following is a specimen: "Let it be granted, then, that since the voluminous histories in common use, such as Hume's, Smollet's, and others, which do not contain a simple account of the days in which their authors severally lived, pass over matters with so light a touch, readers who confine themselves to their compositions, evidently pursue rather the shadow than the substance of real knowledge." C. R. C.

The Power of Prayer.

A boy in one of our public schools had a very fine pair of gloves stolen from the pocket of his overcoat. He stated the fact to his teacher, and she brought it before the children of the room under her charge. In simple but earnest language she told them that however much they might deceive one another, they could not deceive God, who would surely bring them to account for all their actions; she therefore entreated the boy who had taken the gloves to restore them. She did not wish to cast suspicion on any of them by instituting a search, but would leave the wrong-doer to the guidance of his own conscience. There was no response to her entreaty that day, but she took the subject to God in agonizing prayer when she went home, and the next day she appealed to her scholars again, and told them that she would continue praying until the gloves were restored. So deeply interested did she feel in the welfare of the children entrusted to her care, that she could not repress her tears when she addressed them and they all sympathized with her, because they all loved her, and knew by experience that she loved them also. Silently raising her eyes to Heaven, she seemed to implore the Divine aid.

The scholars were quiet; not the slightest movement of the hand or foot disturbed the silence, and even their breathing seemed suppressed; when one of the boys, half concealing his face with his hands, while the tears streamed down his cheeks, confessed that he had taken the gloves, and restored them. The teacher not only freely forgave him, but kissed him for his courage in confessing his fault publicly, when he might have restored them privately. She availed herself of the opportunity to impress upon the minds of her pupils the duty of forgiveness.

We do not know the young lady's creed, but we have been informed that she prays for the welfare of her pupils, and for grace to guide them aright, three times every day.—*Teacher.*

Too Much Reading.

I never knew but one or two fast readers, and readers of many books, whose knowledge was good for anything. Miss Martineau says of herself, that she is the slowest of readers, sometimes a page in an hour, but then, what she reads she makes her own. Sir Erskine Perry said that in conversation with Comte, who was one of the most profound thinkers in Europe, Comte told him that he read an incredibly small number of books these last twenty years—I forget how many—and scarcely ever a review. But then, what Comte reads, lies there fructifying, and comes out a living tree with leaves and fruit. Multifarious reading weakens the mind more than doing nothing, for it becomes a necessity at last, like smoking, and is an excuse to lie dormant, while thought is poured in, and runs through a clear stream, over unproductive gravel, on which not even mosses grow. I do not give myself as a specimen, for my nervous energies are shattered by stump oratory, its excitements and reactions. But I know what reading is, for I could read once, and I did. I read hard, or not at all—never turning aside to more inviting books; and Plato, Aristotle, Butler, Thucydides, Sterne, and Jonathan Edwards have passed like iron atoms of blood into my mental constitution.—*F. W. Robertson.*

If souls walked visibly among men like bodies, how many should we see walking upright without wounds or scars, in undamaged smoothness and symmetry?—*Dr. Stone, June* 28

Personal.

Capt. Scott, agent for the Stockton line of steamers, was severely injured in this city, on Saturday last, by the fall of some machinery from a truck. He is now recovering.

Lieut. G. M. Wheeler, of the Corps of Engineers, has been detailed for duty on the staff of the General commanding the Department of California.

C. A. Wetmore, of Oakland, has gone to San Diego to make arrangements for starting a newspaper in that place, to be called *The Pacific Coast.*

Dr. Shipley is trying to organize a company in this city to work extensive and valuable coal mines which he claims to have discovered in Patagonia.

Capt. Henry Mathews, one of the oldest and most esteemed citizens of Calveras County, was burned to death at Angels on the 5th.

Dr. Overton, of Napa, has been appointed Medical visitor of the Asylum at Stockton, in place of Dr. Hubbard.

F. A. Brierly, Chief Engineer of the steamer *Montana*, died on board the steamer on her last trip.

Rev. John Carrington, preached in Rev. Mr. McDonald's pulpit last Sunday at Sacramento.

Hon. Frank Pixley, is the Republican Candidate for Congress from the First District.

J. Gatewood, editor of the San Andreas *Register*, will move that paper to San Diego.

Rev. Mr. Knapp is holding revival meetings in Napa in a tabernacle built for his use.

Rev. Eli Corwin has received a call from the Congregational church in Oakland.

Senator Stewart, of Nevada, is coming west by the overland route.

Ren. J. A. Skinner, is travelling in the Southern part of the State.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - $5

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

Practical and Scientific.

AGRICULTURAL.

The Sugar Lands of Louisiana—nearly 1,000 Plantations Lying Idle.—These lands, the richest, the most productive in the world, and priceless in true value, are now worthless to the owners, in consequence of the ruin and desolation brought upon them by the war, and the merciless taxation and disorganization of labor since imposed upon them. Immense tracts, with princely dwellings, extensive and comfortable negro quarters, massive sugar houses, mills, barns, stables, warehouses, costly machinery, and all the arrangements for the culture and manufacture of sugar on the most extensive scale, are being sold for less than the original cost of the ditches that drain them, because the owners, often those who rescued them from the river, the swamp, and the forest, are positively unable to pay the taxes and other civil burdens levied upon them. Nearly one thousand sugar plantations throughout the State are lying idle, the fences down, the fields and canals growing up into dense "brakes," the unfortunate inhabitants too often, alas! limited to the gray-haired old sire, the pale and delicate widow, and the emaciated, helpless orphans, struggling for a bare subsistence, cultivating small patches of corn, rice, sweet potatoes and peas, just enough to stave off the cravings of hunger and keep gaunt famine away.—*New Orleans Star.*

Chewing the Cud.

Ruminating animals gather their food rapidly, give it a few cuts with their teeth, and swallow it. It goes to an interior receptacle, where it is moistened; this is very essential if it be dry hay. When the animal has filled himself, he masticates the food thus stored away in his stomach, raising it cud by cud. When a portion is completely masticated it passes to another receptacle, and the process of digestion goes on. Thus an ox, if left to himself, will raise and masticate all his food thus stored away in his stomach. If he be pushed and worked hard, and do not have time to masticate, he falls off in flesh, his health is poor, his digestion is incomplete. The horse, on the contrary, however much in a hurry he may be, must masticate every mouthful before he swallows it. A hungry ox let into a meadow will fill himself in twenty minutes, while a horse would want at least an hour and twenty minutes to take the same amount of grass. The ox, the deer, sheep, goat, chamois and rabbit, being the natural prey of ferocious beasts, are endowed with the extra stomach in which hastily to store away the food without mastication; this may perhaps be regarded as a wise provision of nature, enabling them to sally forth where the food is plenty, and in a short time fill themselves, and retire to a place of safety to ruminate their food at their pleasure.—*Chris. Instructor.*

Bed Your Stables.—A horse, remarks the *Rural World*, will get tired of standing and treading on a hard floor; so will a cow, a sheep, a man. A soft bed feels easy—gives rest. And yet we neglect the bedding of our stables, to a great extent. Injured limbs and other ailments, especially of the hoof, are the results often of a neglect here, as has been clearly enough shown, and as any man can clearly enough see, if he gives the subject a moment's thought. Bed with straw, which is plenty, or sawdust, or tan-bark, or shavings. The dryer these materials are, the better. Every day remove moistened bedding, and replace with new. Such a floor, well bedded, adds greatly to the warmth of a stable, and thus becomes a fodder-saver. The small holes and crevices in a floor, with a good bedding upon them, will let little or no cold through, and will drain the stable. Rather have a ground floor, than a hard naked plank.—*American Farmer.*

A Labor-saving Invention—Hydraulic Milking Machine.—The *Scientific American* illustrates a machine by which any number of cows may be milked at once, by steam or other power. Only one man is required to tend the machine. The cows rather enjoy it. They walk up and put their heads between the stanchions, which are closed by pulling a cord. The four rubber teat-cups, which are attached to an arm moving on a pivot, are then turned into place, as one turns his gas-burner into a desired position. A small pump, worked by the machinery, is then set in motion. When the operation is completed, the attendant turns aside the arms and pulls the string. The cow passes directly on between the stanchions, goes on her way rejoicing, permitting the next in order to step forward into her place.

Second Crop Barley—A Suggestion.—We would suggest to all who have alluvial lands along the banks of the Sacramento or elsewhere, that have been overflowed and remain uncultivated till now, to immediately put in the plow, cultivate well and finely, and sow barley. There will be plenty of moisture, and there is plenty of time yet to get a crop of 60 or 80 bushels per acre, and this barley will be heavy and bring this year two to two and one-half cents, and perhaps three cents, therefore we hope this experiment will be tried.

It should be borne in mind, also, that even should the grain not fill heavily, or even by any unfavorable event, not mature, a good crop of barley hay will be secured.—*Cal. Farmer.*

Wool.—The history of the growth of wool is very curious. Fifty years ago, not a pound of fine wool was raised in the United States, in Great Britain, or any other country, except Spain. In 1794 a small flock was sent to the Elector of Saxony as a present from the King of Spain, whence the entire product of Saxony wool, now of such an immense value. In 1809, during the invasion of Spain by the French, some of the valuable crown flock were sold to raise money. The American Consul at Lisbon (Jarvis) purchased 1,400 head, and sent them to this country. A portion of this pure unmixed Merino flock is to be found in Vermont at this time. Such was the origin of the immense flock of fine wool sheep in the United States.—*Farmer.*

The Value of Grape Pruning—Plowing in the Branches.—In visiting the various graperies and vineyards, we have found most excellent results from the plan of cutting up the spring pruned branches fine and plowing them in; also in the system of summer pruning, whereby the vines are kept with rounded heads, and these branches also laid upon the ground, thus restoring to the earth again the substance taken from it that sustains the grape; besides, this system will induce the grape to form large round heads and almost completely shade the vineyard soil, while the sun gives all its power upon the branch and foliage, and thus feeds the bunches of the grape. Whenever this plan has been adopted, great and good results are seen.—*Cal. Farmer.*

Gardening for Ladies.—Make up your *beds* early in the morning; *sew* buttons on your husband's shirts; do not *rake* up any grievances; protect the young and tender *branches* of your family, *plant* a smile of good temper on your face, and carefully *root* out all angry feelings—and expect a good *crop* of happiness.

Manure.—Farmers are too apt to look upon the manure crop as the harvest of the winter. With reasonable forethought and diligence the manure heaps will grow quite as fast in summer. There is one great advantage—fermentation takes place more rapidly.

PRACTICAL.

Edge tools—their use and care.

It is said that Yankees are the most inveterate whittlers in existence, and we once heard one of our Yankee friends remark that the most valued and indispensible of his personal possessions were a pocket knife, pocket comb, and watch; with true national or natural instinct placing the knife at the head of the inventory. We say "national" instinct, because no American thinks of going without his pocket knife, which is to him a *vade mecum*, applicable to a hundred purposes, and continually in demand. Yet comparatively few who consider the pocket knife a necessary adjunct seem to understand its care. It is seldom one can borrow a sharp knife from an acquaintance. It is either left as it came from the manufacture, or has its edge rounded so its cross section is a conical wedge, or it is abraded to tenuity by the action of the coarse stone of the street grinder's machine, one of the most ruinous contrivances for sharpening knives or razors. But beside the neglect of the edge of a knife blade, the heel, which acts on the back spring, and the rivet in which the blade turns are seldom oiled, and it requires an effort not only to open a blade but also to close it.

TO SHARPEN POCKET KNIVES.

As the pocket knife comes from the manufactory, or store, its edge is unfit for use; it may cut butter or cheese, possibly soft wood, but it will not pare finger nails nor sharpen lead pencils. It needs the hone and strop to produce an effective edge. And in the proper use of the hone or oil stone many are quite ignorant. First, nothing but a good oil stone is fit for sharpening a knife blade. Ordinary "whet stones," mere sand stones to be used with water, or dry, are too coarse; they are but fixed grindstones and rapidly abrade the substance of the blade without giving it an edge. The Turkish oil stone is greatly affected by some, but it is quite hard, and fit only for giving the finishing touch to very delicate tools. The Wachita, or Ouachita stone, we prefer for pocket knives and for ordinary tools. The philosophy of whetting or honing, is a gradual and mutual abrasion of the particles of the stone with those of the steel. The oil, with its glutinous quality, holds these commingled particles so that by the movement of the blade they act on the steel and abrade it very gradually. If the stone is too hard it quickly glazes, and the blade slips over a perfectly smooth surface, producing no action on the hardened steel; if too soft, the stone allows the edge of the blade to disintegrate its surface, and heaps up a ridge of quartz-like or flinty particles, which produce a round or "stunt" edge, that in time must be removed by the action of the grindstone. One accustomed to sharpening knife blades can easily tell when the operation of honing is going on properly, and only experience can fully teach the process. There should be a certain feeling of resistence in the operation. The motion for whetting or honing should be circular; not as in stropping a razor, merely back and forth. The educated finger will readily feel when the blade bears properly on the surface of the stone, and will guard against the mere abrasion of the back and the cutting in of the edge. This art can only be acquired by practice.

HONING RAZORS.

Few can hone a razor. Some barbers have the happy faculty, but generally it is an art little understood. The stone should be a fine Turkish stone, perfectly clean, and the oil used should be purified porpoise, or nice sperm oil; pure olive oil is good. The blade of a razor is concave. The wedge-like edge extends in its level but a little way back. In honing a razor, the fingers should feel the back as well as the edge of the blade bearing; the back protects the edge. The motion should be the same as in honing a knife blade, circular. Few can hone a razor properly in the first trial.

STROPPING.

In stropping razors most people fail. They will use a too yielding medium which rises suddenly as the edge passes over it and undoes what has just been done. Many turn the razor or knife blade on its edge. Unless the blade is lifted clear from the strop, just before turning, the tendency is to strop off the edge already on. A blade should be drawn from heel to point, starting at the heel and drawing it diagonally to the point, and should be always turned on its back.

OILSTONES.

Oil stones, as seen in the shops, are frequently worn concave. It is unnecessary to say that stones in this form will not produce a true edge. If the workman has not acquired skill enough to wear the stone evenly, as much on the ends as in the middle,

he should occasionally grind the oil stone and reduce its surface to a level.

In the machine shop and the carpenters's shop—wherever edge tools are used—the oilstone is invaluable. It should, however, be used with discretion.

If the tool is soft, a short bevel should be given to the edge; if hard, it will stand a very thin edge, but the practice of producing a temporary edge by honing or whetting will not give even the best present result, and will necessitate a frequent resort to the grindstone, the office of which is only preparatory to the production of a good cutting edge.

The use of rapidly abrading substances, as fine quartz, emery etc., is ruinous to good tools; and the continual employment of the grindstone not less so; while a judicious use of a good oil stone will keep tools in order until they are worn out.—*Scientific American.*

MINING.

The Mother Lode of California.

In Ross Browne's last report on the mines is a lengthy description of what is commonly known as the "Mother Lode of California," situated in the southern mining counties, and in some respects the most remarkable metalliferous formation in the world. We quote that portion giving the extent and general characteristics of the lode:

Other veins have produced, and are producing more, but no other has been traced so far, has so many peculiar features, has exercised so much influence upon the topography of the country about it, or has been worked with profit in so many places. The great argentiferous lodes of Mexico and South America, the most productive of precious metal of all known in history, cannot be followed more than six or eight miles, while this California vein is distinctly traceable on the surface from Mariposa to the town of Amador, a distance of more than sixty miles! The general course of the vein is very nearly northwest and southeast, or, to be more precise, it is north forty degrees west. If a straight line was drawn on the map from Mariposa to Amador, the mother lode would be in several places two or three miles distant from the two, but usually within a half mile of it. The dip of the vein is always to the eastward, and usually at an angle of forty-five or fifty degrees to the horizon. The width is from one to thirty feet; that is, the main vein as worked; but it is accompanied by branches or companion veins, so that the width of the vein matter is sometimes nearly one hundred feet. In some places these side veins are known to be branches separated at the surface from the main vein by "horses;" in others they are different in material, and do not unite at the deepest workings. The most remarkable side veins are those of talicose slate, which in some places can be traced for miles. They are from two to twenty feet wide, and rich in gold. We do not find in our books mention of any similar auriferous deposit in other countries; but in California a number of these have been found, remote from the mother lode, as well as near it. The pay chimneys are usually large, regular, and are either vertical or have a slight dip to the north. In the companion talicose veins the pay chimneys are not distinctly marked, nor are the character and limit of the lode well defined. One peculiar characteristic of this remarkable vein is the effect it appears to have upon the topographical features of the country. The streams seem to have made their beds in places where the mother lode is split up with a number of branches, as at the Merced, Maxwell's Creek, Tuolumne, Stanislaus and Mokelumne rivers; while in those places where the lode is wide and solid there are high hills.

White Pine.

We hear more talk of this new mining district than of all other outside districts put together. Our mining and prospecting gentry, without exception, speak favorably of White Pine. As yet we have not heard a word condemnatory of the district. In comparing letters received from friends in the new mines, our people find no discrepancies—no contradictions. All tell about the same story, and that story is as roseate in hue as if imagined on purpose to satisfy the fervid and greedy mining mind. White Pine would appear to be the paradise of the poor prospecting miner. He can make his mine pay him his wages and put coin in his pocket from the first. None of that "hope deferred which maketh the heart sick" consequent upon the running of long tunnels in the expectation of one day finding paying ore. On the contrary, from the best information we have been able to obtain, it appears that all the leading veins of the district yield paying ore from the first, and many leads at the depth of but a few feet contain ores of wonderful richness. Nor is this wealth merely suppositious. From several mines large lots of ore have been extracted, hauled to mills, and reduced, and the result in solid silver bars obtained. At the first glance these mines seem a long way off—out of the world as it were. This, however, is far from being the case. The White Pine, Reese River, Belmont and Humboldt mines, compared with the Comstock mines at the time of their discovery, are at the very doors of civilization—are but a step from the great highway of traffic for all the nations of the earth—the great railway connecting the two great oceans. Think of the obstacles to transportation presented by the Sierra Nevada Mountains, even at the most favorable seasons, at the time of the discovery of the Comstock lead, and having thought of them and the great distance that teams and pack animals were obliged to travel, compare the difficulties then encountered by the pioneers of this region with the facilities now afforded the younger mining settlements to the eastward of us, lying along the line of the Central Pacific Railroad. At a single bound they are placed, as we may say, upon an equal footing with us. We are just beginning to get our eyes open to the immense wealth of Eastern Nevada and to the facilities for the working of mines in that heretofore somewhat out of the way portion of our domain. Success, say we, to our mines everywhere!—*Virginia Enterprise.*

Mining and Agriculture.

Mining and agriculture are the two productive industries upon which the wealth of the world is based. Strictly speaking agriculture is the most important, since without it men could not exist; yet mining is almost as essential, since without it there could be no civilization, and men would exist as savages. There is this difference between the two; that the products of mining are, in general, far more imperishable, and, in proportion to their first cost, of greater, because of more prolonged, use to mankind. After centuries of tilling the soil, men have no more to eat than at first, and bad crops bring famine and distress. The benefits of mining, on the other hand, are cumulative and perpetual. Who can estimate the blessings diffused by a ton of iron, mined, smelted, cast or wrought into forms of beauty and usefulness, serving for generations the needs of men, and repeatedly reforged, and reappearing, as by a material metempsychosis to enter upon new periods of beneficence? More difficult still is it to measure the importance of gold and silver, the production of which, aside from their intrinsic value and their application in the arts, is so subtly connected with the profoundest problems of commerce and political economy. Philosophers tell us that if we produce and manufacture largely, it is no matter whether we have plenty of money or not; money is nothing but a medium of exchange, and when it is scarce, prices will be nominally low, while an increase of money nominally raises them, without altering the real relations of labor and wealth. But history and daily experience tell a different story. They show us that the world's accepted medium of exchange must bear a certain relation to the world's amount of business; and that, in spite of all contrivances of credit, barter, and paper money, the supply of the precious metals is of vital importance to all commercial nations. This conviction is the source of the universal principle of law that the mineral resources of a country, especially its gold and silver, are the property of the whole country—represented in some states by the crown, and in others by the general government. *R. W. Raymond.*

The Safety Lamp—Who Invented it.

An opinion prevails among the "Newcastle folks" that Geordie Stephenson invented the safety lamp before Davy produced his, because the former was seen on one occasion observing "that the flame of the candle did not pass through the small apertures of the latticed fender, and gathering from this fact the rude idea of a safety lamp;" and further, that he actually constructed and tried his lamp at Killingworth Colliery, before any other person had tested one under similar circumstances. In 1818 this opinion of the services of George Stephenson took a tangible and demonstrative form, in the shape of a silver tankard containing one thousand guineas, which were presented to him in the Assembly Rooms at Newcastle, as the "discoverer of the safety lamp." In May, 1818, Sir H. Davy collected and published, in a connected form, all the papers that he had written on this subject; and it must be evident, from the originality of his experiments, that he required no borrowed genius; that the ideas he worked out were his own, and that Stephenson and Davy must have been independent laborers in the same field, probably arriving at similar results by different means, just as Daguerre and Talbot, in the art of photography, reached the same goal by entirely distinct paths.—*Playbook of Metals.*

REV. J. LLOYD BRECK, D.D.
Dean of the College.

General Selections.

The Vision of Paul.

What is this that stops my way
Like a wall unseen by day?
Who doth bid my errand stay
Ere I come?
What o'erclouds me like a dream,
Blotting each remembered scheme
With an unaccustomed theme?
"Jésu sum."

What strange dissolution rends
From the comforts of my friends,
From my life's determined ends?
Dark and dumb,
What doth bind my fluent tongue
Like an instrument unstrung,
With its lesson never sung?
"Jésu sum."

See! this sudden shock of light
Falls like palsy on my sight,
'Till I view no path aright
In my gloom;
All my faculties are dead,
Every sinew bound with lead:
What this shivering trance of dread?
"Jésu sum."

"Listen, since for human weal,
That thy misdirected zeal,
Mightier than it murdered, heal,
Am I come:
Thou with stones my saints have slain,
Torture bound with scourge and chain;
Know thyself the martyr pain?
Jésu sum.

Thou wert mine without thy knowing;
From this moment's wonder-showing,
Pay the debt thy life is owing
Burthensome:
On the blindness of thy thought
Dawns the inner life unsought,
Teach, as thou thyself art taught;
Jésu sum." —*Julia Ward Howe.*

Australia.

The arrival of the Panama mail yesterday puts us in possession of late intelligence from Australia—much later than anything which has reached us by the way of England, whence, until recently we received all our news from the Western and Southern Pacific. Every day, in fact, multiplies the evidences that New York is destined to be the great entrepot of intelligence and commerce for the whole world; and as our facilities for communication with the opposite shores of this continent are increased, the importance of our position as an international center will be rapidly augmented. It is evident, too, that with this growth our relations with Australia, the Young America of the South Pacific, with its yet undeveloped wealth, its active population, and its thousand island dependencies, must become daily more intimate and more interesting. It has prospered with a rapidity to which no country but the United States affords a parallel. It has an area nearly half as large as our own, a population (including New-Zealand) of nearly a million and a half, and a climate corresponding to that of our Southern States and the West India Islands. For the most part the settlements lie along the southern, eastern, south-eastern, and western coasts, and they are not dissimilar to such as existed in America at the commencement of the Revolution. Sidney has about 20,000 inhabitants, Adelaide 45,000, while Melbourne, having not far from 130,000, has had a growth, since 1840, only equaled by Chicago. Some of the newspapers printed in these cities resemble in size and appearance the best New York dailies.

Sheep-growing has been a leading pursuit of the colonists since the first settlement by whites. The Government has had the credit of being liberal in disposing of lands, but large quantities have fallen into the hands of speculators, many of them belonging to noble English families, while other large bodies are controlled, and perhaps owned, by gentlemen farmers, who use them as sheep-walks or "runs," where immense flocks have been kept, to the exclusion of other branches of industry. This has prevented the establishment of such settlements as have developed our own Western States. It is difficult to decide upon the value of a country for agriculture, and for sustaining a large population, when special pursuits become monopolies. Nothing but the small farm system, and in a free country, will develope all the latent qualities in the soil. It is alleged that Australia is subject to terrible drouths, and it is stated that the river bottoms are sometimes covered with water from an unknown source, and without previous warning, from 50 to 100 feet deep. Still, it is a country abounding in every kind of stock; fruit and vines flourish, and wheat has been produced in enormous quantities. This has reference only to the more southern regions, which correspond to our northern ones, and it is not improbable that Northern Australia may be as unfavorable for sustaining a civilized people as the warm countries are on this side of the Equator.

There are many establishments in Australia for working up coarse materials, such as wood, stone, and iron; but manufactures are few, and most of the clothing of the people comes from England, even if made of their own wool. It has always been the fixed policy of England to discourage, in every possible way, the manufacture of goods in her colonies. Her object has been to receive from them a great variety of coarse articles, to have her laboring people add from 10 to 50 times to their value, by the help of machinery—which, with various other goods, are sent to the colonies, where they are to be paid for in more raw materials, and particularly in breadstuffs.

Mining is carried on by only a small part of the people, and upon sheep and grain their prosperity has depended. An occupation requiring so little skill and intellect as the care of sheep in a pastoral country, and where it is unsupported by a variety of other pursuits, never can establish prosperity; for when straitened times come the only remedy is to increase the flocks. But though this may bring relief to a few who out of the vastness of their possessions save something, to the many only disaster will follow. The sheep business in Australia has reached this point—reached it because there is no home market for wool to furnish employment when wide-spread casualties in other interests ensue, and to furnish a balance for all the various industries; and now, being overdone, the sheep are slaughtered for their pelts and tallow. This is done upon such a large scale that single establishments have each boiled down as many as 30,000 head. The profit in this boiling-down business is estimated by some at six cents a head, but others think this too low, for the value of the pelt must be added, which is 10 cents more. Some complain because the hind-quarters are not saved and cured by smoking and drying—either to be used for home consumption or to be shipped abroad. This might be done, because the hind-quarters of Southdown mutton are imported from England and sold in Australia—an astonishing circumstance. This is an astonishing statement; but nothing should be astonishing in a country which is the subject of another in trade, and which learns to be dependent. We ourselves have seen grevious days for the same reason, and even now are only beginning to be emancipated; but, in proportion to the population, Australia exports eight, and imports ten times, more than the United States.—*N. Y. Tribune.*

The Future of America.

The future of our country is something no thoughtful person, accustomed to note the operation of historical causes and the laws that govern them, can look forward to without being struck with the greatness of the problem that is here to be solved in the coming ages. Entering at a comparatively recent period upon the first mission of our nation—that of subduing the rough, rude nature of the New World—we have gone on clearing away primeval forests, planting wild lands, building np cities and towns, and filling the vast expanse of our land with people, at a rate as marvellous in itself as it is unexampled in the history of the world. From three millions—in 1776—we have grown to be more than thirty millions. The discoveries of modern science—giving us control over the most awful forces of nature, steam and lightning—have come to aid our progress, and enabled us to unfold the vast and various resources of our immense territory in a way and with a rapidity otherwise impossible. So with our growth in numbers we have grown in wealth at a still greater rate of increase. And no reason can be seen why we should not continue to grow in numbers and in wealth with a constantly increasing rapidity for a long, indefinite time to come; rather we can see many causes almost certain to guarantee such growth.

The acquisition of California, which, a hundred years ago, or even fifty years ago, the philosophical statesman would have regarded as an event of little or no consequence, at least for ages and ages to come—taking place at the time it did, when the applications of science were beginning to bring all places into communication and connection—we can now see to be an acquisition of the greatest conceivable importance. In fact it stands among the most significant and fruitful events that have ever taken place in human history—significant and fruitful, not only for our country but for the whole world—destined to change the face of the world and the world's history, commercial, political, social and moral. It will effect a new centralization of the nations, making our country the centre of the earth and the mediator between the nations that lie across the two oceans that bound us on the east and on the west.

The beginning of the end has already begun. Already the shores of the two oceans are united by the lightning wires, and with the swiftness of lightning men's thoughts are flashed across the vast continent that intervenes. For communication of mind with mind, New York and San Francisco are but an hour apart, and New York can send the thoughts of San Francisco across the Atlantic in another hour, thence to be flashed over the old Eastern Hemisphere with the same lightning speed. A half century ago who could have foreseen this now familiar fact and its world-wide consequences? And in a few months more, over the continent, from the Atlantic to the Pacific shore, bridging the rivers, piercing the mountains, and skimming along the plains, the railway trains will be flying, if not with the speed of lightning yet almost with the speed of the wind; and for the passing and re-passing of men's persons and men's goods, New York and San Francisco will be less than ten days apart. Who, fifty years ago, could have foretold this?

Now suppose the waters of the Atlantic and the Pacific to be connected by a ship-channel at the Isthmus of Darien—which we believe will be the case at no distant day—and where will the great bulk of the trade of China and the East come? It will come by rail and steam to New York, and hither the trade of Europe must come to meet it. New York must thus become the *entrépot* of the world, and the place where the balances of the world will be settled. New York may not always continue to be the central trade city of our continent, but possibly and indeed probably may become the Atlantic seaport to some great commercial city in the vast valley of the West, having San Francisco for its Pacific port.

What does this great change in the commercial relations of the world portend? It must draw with it consequences of the greatest import, political, social, and moral, for the nations of the earth, as well as for ourselves. Always the stream of the world's history follows the great lines of the world's commerce. On the consequences to other nations, particularly to the vast empire of China thus brought into contact with us and within the sphere of our influence, we will not now dwell. For our own country there is opened the prospect of a boundless career of physical development, a boundless growth in population and in wealth.

We have said that from *three* millions—in 1776—we have grown to be more than *thirty* millions. At the same rate of increase, our grandchildren will read the census that shall count our numbers at more than *three hundred* millions. Who but believes the rate of increase will be greater in the future than in the past? Be this as it may, our country seems destined in a short period—as history computes periods—to become full of people throughout its vast extent, and full of riches, and of the means and refinements of enjoyment which riches demand, create, and pay for.

Now what is it that, in the coming ages, can keep

us together as one great, powerful, prosperous nation? What is it that can make our boundless material riches safe and salutary? What is it that can alone preserve us from luxury, corruption, national decay, and dissolution? What is it that will make us a perpetual spectacle of a truly great and magnanimous people, with a national life truly healthy and vigorous because truly rational? Nothing can do it, unless the national life be permeated and actuated by a pure moral spirit, such as Christianity inculcates. Is there anything that can inspire and maintain such a moral spirit except Christianity itself—Christianity considered not merely as a creed, a code, and a body of institutes of worship and discipline—but Christianity considered as a *Divine Constitution of Supernatural Powers*, embodied in deed, in creed, and code, and institutes, and in, with, and through them, so working in our corrupted human nature as to inspire and maintain the moral spirit it inculcates. Apart from its divine supernatural powers, the creed, the code, the institutes of Christianity, would be as ineffectual to cure the corruption of man as the Vedas and Shastras, the Laws of Plato, or the Institutes of Menu. The peculiar claim of Christianity—that which distinguishes it from all other religions—lies in this: it is a Divine Constitution of supernatural efficacies, with a Church as the great channel of them. Christianity in this sense is the only power that can beget in the heart and life of the nation that moral spirit which is as indispensable to our national salvation as it is to the true salvation of the individuals that from generation to generation compose the nation.—*Hartford Churchman.*

Little Things.—Great virtues are rare; the occasions for them are very rare, and when they do occur we are prepared for them; we are excited by the grandeur of the sacrifice; we are supported either by the splendor of the deed in the eyes of the world, or by the self-complacency that we experience from the performance of an uncommon action. Little things are unforseen; they return every moment; they come in contact with our pride, our indolence, our haughtiness, our readiness to take offense; they contradict our inclinations perpetually. It is, however, only by fidelity in little things, that a true and constant love to God can be distinguished from a passing fevor of spirit.—*Fenelon.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Saitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, Principal.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

FAMILY READING.

The Little House on the Hill.

O Memory, be kind to me—
Take, take all else at will,
So thou but leave me safe and sound,
Without a token my heart to wound,
The little house on the hill!

Take all of her best from east to west,
So thou but leave me still,
The chamber where in the starry light,
I used to lie awake at night,
And list to the whippowil.

Take violet-bed, and rose-tree red,
And the purple flags by the mill,
The meadow gay and the garden-ground,
But leave, oh, leave me, safe and sound,
The little house on the hill.

The daisy lane, and the dove's low plane,
And the cuckoo's tender bill,—
Take one and all, but leave the dreams
That turned the rafters to golden beams,
In the little house on the hill!

The gables brown, they have tumbled down,
And dry is the brook by the mill;
The sheets I used with care to keep,
Have wrapped my dead for the last long sleep,
In the valley low and still.

But memory, be kind to me,
And build the walls at will
Of the chamber where I used to mark,
So softly rippling over the dark,
The song of the whippowil!

Ah, Memory, be kind to me!
All other fountains chill,
But leave me that song so wierd and wild,
Dear as its life to the heart of a child,
In the little house on the hill. —*Alice Cary.*

Little Cares.

Reader! you have your little cares, what will you do with them?

Reader! go to God with your little cares; they are not trifling things to you, and that benificent Father looks upon things, not as they are in the limitless sphere of His experience, but as they touch the hearts of His people, as they affect your common daily life. There are many inward troubles, such as you reveal not to your dearest friend, which rest day by day heavily on the pulses of your heart, and which create discord amid harmony, and fleck with passing cloud even the heaven of God's smile within the soul. These may be called little cares, but they are great to you.

The cloud which arose from the far deep at the prophet's prayer, was but of the size of a man's hand; yet did it grow till the heavens were black with the drapery of the tempest, and the little shadowy cloudlet—scarce marring at first the blue of the Eastern heaven—became a storm vast as the earth's horizon and big with treasured rain. And little cares, like the cloud, grow momentarily greater, till their dark influence overspreads the inner world, and shadows the peace of the soul. Oh! then, take such to God; and, whenever they press upon your soul, confide them to One who careth for you. So shall you be better able to meet the heavy burden which, at death's whisper or the beck of sudden change, may fall upon your spirit. So shall peace unfathomable and transcending expression live in calm upon lip and brow; writing in letters of light—before a world unwilling to learn the lesson—that truth of truths, that Religion's ways are ways of pleasantness and all her paths are peace.—*Prot. Churchman.*

Home Politeness.

Should an acquaintance tread on your dress, your best, your very best, and by accident tear it, how profuse you are with your "I never minds—don't think of it—I don't care at all." If a husband does it, he gets a frown! if a child he is chastised.

Ah! these are little things, say you! They tell mightily on the heart, let us assure you, little as they are.

A gentleman stop at a friend's house, and finds it in confusion. "He don't see anything to apologize for—never thinks of such matters—everything is all right—cold supper—cold room—crying children—perfectly comfortable."

Goes home, his wife has been taking care of the sick ones, and worked her life almost out. "Don't see why things can't be kept in better order—there never were such cross children before." No apologies except away from home.

Why not be polite at home? Why not use freely the golden coin of courtesy? How sweet they sound, those little words, "I thank you," or, "You are very kind." Doubly, yes, thrice sweet from the lips we love, when heart-smiles make the eye sparkle with the clear light of affection.

Be polite to your children. Do you expect them to be mindful of our welfare? To grow glad at your approach? To bound away to do your pleasure before your request is half spoken? Then, with all your dignity and authority mingle politeness. Give it a niche in your household temple. Only then will you have the true secret of sending out into the world really finished gentlemen and ladies.

Again we say unto all—be polite.—*American Presbyterian.*

How to Sleep in Church.

Assuming that it is a duty, let us consider the manner of performing it. Like all other Christian practices, there ought to be uniformity in the manner.

1st—It is an improper manner of performing this duty to nod, and for the plain reason that the worshiper attracts too much attention. We are everywhere taught to avoid ostentatious display in our worship. The Pharisees were condemned for praying at corners of the street, that they might be seen of men. On the same principle, the nodding worshiper is condemned, for he is making too public a display of his devotions.

2nd—Nor is it proper to snore in the performance of this duty—partly for the foregoing reasons; but mainly because it is a direct infraction of the golden rule. Suppose, for instance, that your next door neighbor is asleep; by your snoring he will be disturbed, probably awakened. This is not doing unto others as you would they should do to you.

3rd—It is wrong to injure one's health while offering worship; and all physicians admit that to sleep with the head thrown back and the mouth wide open is liable to produce sore throat and hoarseness. Besides, flies sometimes get into the mouth on such occasions and by their injurious explorations tickle the delicate membranes and cause horrible sternutations and coughing, which is very injurious to health.

4th—To sleep with head resting on the arms of the worshiper, and the face buried up in the cuffs of the coat, is the most improper way of offering a sleep worship. First, because it is also injurious to health, and, mainly, because it is a direct violation of the Scriptures which command us to let our light so shine that men may profit by our example. In this case it is impossible to know whether the Christian worshiper is asleep or awake. It is a positive case of lukewarmness; neither the one thing nor the other.—*Advance.*

Sammy Hick and His Pipe.

It is said of that good man, Sammy Hick, the Mickelfield blacksmith, that "as he understood the words of the Lord Jesus, it was quite enough for him to see the path of duty steadfastly to travel in it."

An instance of this feature of his character was exhibited in his sudden abandonment of tobacco. One day he gave sixpence to a poor widow. She blessed him, and could hardly find words enough with which to express her thanks.

He said to himself: "Well, if sixpence makes the poor creature so happy, oh! how many sixpences have I spent in filling my mouth with tobacco!"

He made a vow instantly never to let a pipe enter his lips again.

Soon afterwards he was taken ill, and a doctor said to him: "Mr. Hick, you must resume your pipe."

"I will not," he replied.

"Then," said the doctor, "if you do not, you will not live."

"Bless the Lord then," said Sammy, "I shall go to heaven. I have made a vow to the Lord that the pipe shall never enter my mouth again, and it never shall." Sammy Hick kept his vow, and lived to be an old man!—*Rev. T. E. Thornsby.*

A Wife's Influence.

A Christian woman gave her hand to the man on whom she had already placed her tenderest affection. He possessed almost every grace, but was destitute of the grace of God. By spending the early part of his life in a foreign land, and associating with those who had the reputation of gentlemen, he had imbibed the fashionable habit in that place of using God's name in vain in common conversation. His new and much loved wife sought to reclaim him. She knew the only way to his heart. She took advantage of his love for her to win him to Christ, and she effectually succeeded.

One day as she was standing before him, in company with a few friends who were listening to his conversation, in order to give additional interest, as he supposed, to what he was relating, he added the name of Christ. He looked at his wife, and saw her in tears. He was confused. She raised her hand, and gently pressed his chin. "O!" said she, "if you knew how much I love that dear name, you would never again pain my heart by trifling with it."

His heart was touched. He was unable to proceed. He asked her forgiveness, and soon left the room. In this way he was saved from ruin, and is now an eminent example of piety.—*Christian Instructor.*

Christ's Love.

I can measure parental love—how long, and strong, and deep it is; it is a sea—a deep sea, which mothers only can fathom; but the love displayed on yonder hill and bloody cross, where God's own Son is perishing for us, nor man nor angel has a line to measure. The circumference of the earth, the altitude of the sun, the distance of the planets, these have been determined; but the height, depth, breath and length of the love of God passeth knowledge. Such is the Father against whom all of us have sinned a thousand times! Walk the shore where the ocean sleeps in the summer's calm, or, lashed into fury by the winter's tempest, is thundering in her sands; and when you have numbered the drops of her waves, the sands on her rounding beach, you have numbered God's mercies and your sins. Well, therefore, may we go to Him with the contrition of the prodigal in our hearts and his confession on our lips: "Father, I have sinned against heaven and in thy sight." The Spirit of God helping us to go to God, be assured that the father who, seeing his son afar off, ran to meet him, fell on his neck and kissed him, was but an image of Him who, not sparing His own Son, but giving Him up to death that we might live, invites and now awaits your coming.—*Dr. Guthrie.*

Mirrors in the House.

How many a parent has found in his child the glass for his own vices! Happy, indeed, if any one be so wise as to see the reflection before it is too late for both himself and child!

A laboring man who was extremely addicted to swearing, was one day at work with his yoke of oxen near his house. The oxen not working to suit him, he began to whip them severely, at the same time uttering volleys of blasphemous oaths. The oxen, breaking loose from their harness, ran away; while the man, in a passion, pursued them, and coming up with them at the house, began to whip them again, and to swear as horribly as before. His little boy, who was just old enough to talk, began to prattle his profane oaths after him. No sooner did the father hear this, than his feelings were powerfully wrought upon. He paused for a moment, dropped his whip, and sat down and wept bitterly. A flood of keen reflections at once rushed upon his conscience, which produced such an effect that he found peace where forgiveness only can be had—at the footstool of Mercy.

"I HOLD it to be a fact," says Pascal, "that if all persons knew what they said of each other, there would not be any friends in this world."

Young Folks.

The First Baby.

Laughing-eyed Anabel, wee fairy belle,
Making more trouble than any can tell;
Say what are you good for? Whatever do you
To make people love you so much as they do?

We have a pet kitten with stripes buff and grey,
No older than you, and he beats you for play;
He waits on himself, too; and rolled in a heap,
Without any rocking he drops into sleep.

You coo like a pigeon, and double your fist
As if you were meant for a young pugilist!
'Twould puzzle a lawyer to tell what you think
When you pull at your toes, say "Argoo," and wink.

You've such a queer way, too, of crossing your eyes,
As if your pug nose was the bridge of great size;
You scratch your bald pate as if digging for brains;
Pray can you just tell us how much it contains?

You tease us by day and disturb us by night,
And your little caprices give many a fright;
You drool and you cry, and you laugh and you crow,
And do not all babies? I'd just like to know.

Six months we have kept you, and never a queen
Received truer homage than you have, I ween;
You sport a fine coach, and your father—droll he!
Plays pony for you and is proud as can be.

Now what are you good for, blue-eyed Anabel,
But just to pick pockets of pin-money, tell?
You must be a witch! for you fill us with care,
Yet never we grumble or think it unfair.

There is no sense at all in aught you may do.
Yet never was baby we loved much as you;
To mother you're so much like father, and then
To father you're so much like mother again.

O laughing-eyed Anabel, wee fairy belle,
Your fate contained future what wizard can tell;
To keep our hearts human and loving you've come,
And that's what you're good for, dear Light of our Home!

—*Congregationalist.*

The Two Rules, and How They Worked.

"Here are two rules for you Fred, which grandfather gave me; they will do for us both." So said Giles Warner, looking up from the paper he was reading, and addressing a younger brother, who was sitting by the stove playing with a favorite dog.

"Well, what are they? Let's have them," said Fred, suspending his sport with the dog.

"The first is, "*Never get vexed with anything you can help;*" the second is, "*Never get vexed with anything you can't help.*"

"Are not these rules as suited to you as to me?" inquired Fred, slyly.

"No doubt of that," replied Giles, "but then it is so much easier to hand over a good advice to mother, than to keep it for one's own personal use. It is a kind of generosity that does not require any self-denial."

Fred laughed.

"But what say you," continued Giles, "to these rules? How would it work if we should adopt them?"

"I think they take a pretty wide and clean sweep," said Fred. "They don't leave a fellow any chance at all to get vexed."

"That might be an objection to them," said Giles, "if any one was wiser, better, or happier for getting vexed. I think they are sensible rules. It is foolish to vex ourselves about anything that can be helped, and it is *useless* to vex ourselves about what can't be helped. Let us assist each other to remember and obey these two simple rules. What say you?"

"I'll agree to it," said Fred, who was usually ready to agree to anything his brother proposed, if it was only proposed good humoredly.

"That's too bad!" exclaimed Fred, the next morning, while making preparations for school.

"What is the matter?" inquired Giles.

"I have broken my shoe-string, and it is vexatious; I'm in such a hurry."

"It is vexatious, no doubt," replied Giles; "but you must not get vexed, for this is one of the things that *can* be helped. You will find a string in the left corner of the top drawer."

"But we shall be late at school," said Fred.

"No, we shall not," said Giles. "We shall only have to walk a little faster. Besides, if you keep cool, you will find the string, and put it in much sooner than if you become vexed and worried."

"That's true," said Fred, as he started for the string, quite restored to good humor.

Several opportunities occurred during the day for putting in practice the newly adopted rules. The last was this:

In the evening Giles broke the blade of his knife, while carving a hard piece of wood.

"It can't be helped," said Fred," so you must not get vexed about it."

"It might have been helped," said Giles; "but I can do better than to fret about it. I can learn a lesson of care for the future, which may some day save a knife more valuable than this. The rules work well. Let's try them to-morrow?"

The next morning, Fred devoted an hour before school to writing a composition. After he had written half a dozen of lines his mother called him off to do something for her. During his absence his sister Lucy made use of his pen and ink to write her name in a school book. In doing this she carelessly let fall a drop of ink on the page he was writing. Fred returned while she was busily employed in doing what she could to repair the mischief.

"You have made a great blot on my composition," he cried, looking over her shoulder.

"I am very sorry. I did not mean to do it," said Lucy.

Fred was so vexed that he would have answered his sister very roughly if Giles had not interposed.

"Take care, Fred; you know the thing is done, and can't be helped."

Fred tried hard to suppress his vexation. "I know it was an accident," he said pleasanily, after a brief struggle with himself.

Lucy left the room, and Fred sat down again to his composition. After a moment he looked up. "No great harm has been done, after all," he said. "Two or three alterations are much needed, and if I write it over again I can make them."

"So much for a cool head and not getting vexed," said Giles, laughing. "Our rules work well."

At night, Fred tore his coat while climbing over a fence. "That's too bad," said he.

"It can be helped," said Giles; "it can be mended."

"The way to help it is what troubles me," said Fred. "I don't like to ask mother, she has got so much to do."

Giles proposed that Fred should get over his difficulty by asking Lucy to do the job for him, as her mother had taught her to mend very neatly. Fred was not at first disposed to adopt this measure. He knew that Lucy disliked mending very much, and was afraid she would be cross if asked to do it; but he at last decided to run the risk of that. They found Lucy busily employed with a piece of embroidery, and quite engaged in her work. Fred looked at Giles when he saw how his sister was occupied; but he concluded he had gone too far to retreat, and must make a bold push.

"I wish to ask a great favor of you, Lucy," said Fred; "but I fear I have come in the wrong time."

"What do you want?" said Lucy.

"I am almost afraid to tell you. It's too bad to ask you to do what I know you dislike."

"You are a great while at getting to what is wanted," said Lucy, laughing. "Come, tell me."

Fred, thus engaged, displayed the rent.

"Well, take off your coat, I will do my best," said Lucy, cheerfully.

"You are a dear, good sister," said Fred. "When I saw what you was about I thought you would not be willing to do it."

"My uncommon good temper quite puzzles you, does it?" said Lucy, laughing. "I shall have to let you into the secret. To tell the truth, I have been thinking all day what I could do for you in return for your not getting vexed with me for blotting your composition. So now you have it."

"So much for our rules," cried Giles. They work charmingly."

"What rules?" inquired Lucy.

"We must tell Lucy all about it," said Giles.

They did tell her all about it, and the result was that she agreed to join them in trying the new rules."

—*Observer.*

A Noble Deed.

The following incident was related to the Coadjutor Bishop of Newfoundland, by one of the survivors of the terrible storm on the coast of Labrador in October last:

"A poor boy, whose name no one knows, but we may hope that it is in the Book of Life, found three little children who, like himself, had been washed ashore from one of the many wrecks, wandering along that dreary coast in the driving sleet. They were crying bitterly, having been parted from their parents, and not knowing whether they were drowned or saved. The poor lad took them to a sheltered spot, plucked moss for them, and made them a rude but soft bed, and then taking off his own coat to cover them, sat by them all the night long, soothing their terror until they fell asleep. In the morning, leaving them still sleeping, he went in search of the parents, and to his great joy, met them looking for their children, whom they had given up for dead. He directed them where to find them, and then went on himself to try to find some place of shelter and refreshment. But when the parents were returning with their recovered little ones, they found their brave preserver lying quite dead upon the snow, not far from where they parted from him. The long exposure in his exhausted state was too much for his little strength, and having saved his little charge—a stranger to them, as they to him—he lay down to die."—*Congregationalist.*

She Saw the Doxology.

A little girl, ten years old, went up Mount Washington on horseback. She was ten then, if she lives till next summer, she will be twenty. The ladies and gentlemen of our party dismounted on the rugged summit, where the only vegetation that dared make an attempt to grow, was a little stunted, pale-green moss, and gazed as those lifted up from the world into unlimited space. Below, stretching outwards in all directions, lay a deep silver sea of clouds, amid which lightnings were seen to dart and writhe like gilded serpents, and from which the thunder came up to the ear, peal after peal. We knew that down there rain was descending in a torrent; while on us who were above the clouds, shone the sun in unobstructed and awful splendor. The eye wandered away like the dove from Noah's ark, that found no place to rest her foot.

"Well, Lucy," said her father, breaking the silence, "there is nothing to be seen, is there?"

The child caught her breath, lifted her clasped hands and responded reverently—

"O papa, I see the Doxology!"

Yes, everywhere Nature speaks to us and says:

"Praise God, from whom all blessings flew."

A Wise Answer.—A little black girl, eight years old, was setting the table, when a boy who was in the room said to her:—

"Mollie, do you pray?"

The suddenness of the question confused her a little, but she answered,—

"Yes, sir, every night."

"Do you think God hears you?" the boy asked. And she answered promptly,—

"Yes, I know He does."

"But do you think," said he, trying to puzzle her, "that He hears your prayer as he does those of white children?"

For full three minutes the child kept on with her work without speaking; then she slowly said,—

"Master George, I pray into God's ears, and not his eyes; my voice is just like any other little girl's; and if I say what I ought to say, God doesn't stop to think anything about my skin."

George did not question her any farther. The answer he felt to be a wiser one than he could have given.—*English Paper.*

News Summary.

PACIFIC COAST ITEMS.

A new style of anchor has been invented by Frederic Witt. ram, a member of Dr. Wadsworth's church. It carries no stock, and the flukes fold into the shank like the blades of a knife, or rather play through it like blades of a lancet. The flukes are hung, one at the end of the shank, and the other about the middle, they play also at right angles to one another. To our landsman's eye the affair seems perfect—avoiding the defects of the old anchor. It is more to the purpose, however, that it is said to have received the warm approbation of seamen—including Admiral Thatcher.

A man who was formerly a carrier of the *Monitor* in this city, having sued the city for damages which he claims to have suffered by the destruction of that paper in 1865, Judge Sawyer has decided against him, on the ground that there was no actual loss of property by the plaintiff, a newspaper route not being considered property.

The Piutes are said to have a good thing now in collecting toll from the Chinese railroaders, and the latter seem rather indulgent, through fear or what not. Piutes are feasting on rice, etc., and those used to working for a living, put on airs now or fail to appear.—*Winnemucca Argent.*

The Spring Valley Water Company of San Francisco have now 300 Chinamen and over 100 white men at work on the great reservoir in San Andreas Valley San Mateo county, which is to be two and one-half miles in length, and will hold four thousand million gallons of water.

The *Pajaronian* has been shown a curiosity in the shape of a common red rose, in full bloom, from the center of which grew another smaller rose. On the stem of the small rose was a well formed bud which was just about to open its leaves.

A large tannery is soon to be established near San Bernardino, where *The Guardian* says there is an abundance of oak bark and other facilities for carrying on this business in the most successful manner.

A Man in Mariposa declared, 12 years ago, that he would not wear a hat until Fremont was elected President. Fremont not yet having been elected, the man still goes bare headed.

The female printers who recently arrived in this city, not being allowed by the Printers' Union to work at full wages, will start a printing office of their own. We wish them success.

A Man in Sacramento has an apple-tree which bore six crops last year, and is now in blossom with its third crop for this year. He has also a tree which bears 16 varieties.

A Fire at Truckee, on the C. P. R. R., recently destroyed over 50 buildings. The other towns in that vicinity are organizing fire companies and stove-pipe inspectors.

The Union Pacific Express Company advertise in the Nevada papers that they will sell their franked envelopes at $3 per hundred.

The *Territorial Enterprise* gives an interesting account of the Piute Indians, who dwell in large numbers in huts and tents around Virginia City. They are described as entirely different in character and habits from the other Indian tribes whose degradation is known to all Californians. They are temperate, industrious and honest, a habit of gambling among themselves being apparently their only fault. They are naturally inclined to agriculture, and would soon be content to settle down and till the soil were they properly assisted and encouraged.

A Paper Mill, on a large scale is about to be established near the Bank Mills in Santa Clara.

The town of La Porte, in Plumas County was almost entirely destroyed by fire on the 10th inst.

TELEGRAPHIC.

Eastern.—The cattle disease has broken out again in Illinois....Gen. Grant is stopping at Galena, his old home ....A destructive fire at St. Paul, Minn., destroyed among other buildings, the Universalist church...Gen. Schofield has decided that the Eight Hour Law passed by Congress, does not mean 10 hours' pay for 8 hours' work....The railroad from St. Joseph, Mo., to Council Bluff, is finished....The cattle disease has spread to Pennsylvania and New York.

Southern.—The Alabama Senate passed a bill removing all political disabilities....The Governor of Louisiana asks for the assistance of U. S. troops to protect Union men and Blacks...,One-armed and one-legged men have been exempted from taxation by the Georgia Legislature....The Louisiana House passed a bill disbanding all military companies.

Political.—The Democrats of Missouri have nominated J. S. Phelps for Governor....Gen. Butler will be a candidate for reëlection to Congress.....The Alabama Legislature passed the bill, allowing the Legislature to select Presidential Electors, but the Speaker of the House protested, and the Governor will veto the bill....Gen. Butler has made a speech supporting Grant.

Foreign.—Jeff Davis has arrived in England....Queen Victoria has been making a visit to Paris....Matters still look badly in Spain. The Portugese Government agrees to shelter Spanish political refugees....The Cretans ask Queen Victoria for aid....Cholera prevails on the Barbary coast of the Mediterranean....Lord Stanly, and M. Moustier, had a long and satisfactory conference. Both declared that their respective Governments desired peace....A destructive fire has been raging in the woods of Canada for the past week, and has also done much damage in some of the towns.

WEEKLY MARKET REPORT.

Wednesday, August 12, 1868.

Flour—Sales of 500 bbls Orange Extra, $6 25@6 50. We quote city mills as follows: Superfine, in sks, ℔ 196 lbs, $5 25@5 50; Extra, in sks, $6 25@6 50.

Wheat—Sales aggregate 15,000 sks, mostly prior to arrival; quotable at $2 70@1 75 ℔ 100 lbs.

Barley—Sales (yesterday) of 10,000 sks, to arrive, private. To-day the market is quiet. Sales of 200 sks new, $2; 200 sks do, $2 05 ℔ 100 lbs.

Oats—Sale of 1,500 new, within the range of $2 25 to $2 50 ℔ 100 lbs.

Potatoes—Sales include 500 sks Mission, in lots, 90c@$1 ℔ 100 lbs.

Onions—Sales of 200 sks good to choice Yellow, $1 75 @$2 ℔ 100 lbs.

Corn—The supply is much reduced; quotable at about $2 50 ℔ 100 lbs.

Rye—The invoices of new are going into store; last sales were at $2 ℔ 100 lbs.

Buckwheat—Small sales are at $1 62½@$1 75 ℔ 100 lbs.

Beans—The market is steady at the following jobbing rates for first quality: Bayo, 5c; Butter, 6½c; Pea 12½c; Small White, 8½c; Pink, 6c; and Red, 3c ℔ lb.

Bran—Sales of 100 tons, in lots, part from the mills, $25 @$22 ℔ ton.

Middlings—Are quiet at $40 for fine and $32 50@35 ℔ ton for feed descriptions.

Hay—About 70 tons sold within the range of $10@14 ℔ ton.

Oil Cake Meal—Is in moderate request at $30 ℔ ton from the mill.

Dairy Products—Fresh roll Butter has further advanced to 45@47½c; in some instances 50c is asked for favorite dairies; California firkin is in light supply at 35c; Eastern firkin, 30@32½c, with small sales; Cheese, 14@16c for California dairies, and 17@18c ℔ lb for Eastern dairies; Eggs, 40@42½ for Hen, with 45c as an outside figure; Duck eggs, 42½@45c ℔ dozen.

Poultry—Live Turkeys are quoted at 19@21c; dressed do, 21@23c ℔ lb; Hens, $7 50@8 ℔ dozen; Roosters, $6@ $7 50; Spring Chickens, $4@5; Ducks, $4 50@5 50 ℔ doz; Geese, $1 75@2 25 ℔ pair; Venison, 10@12½c ℔ lb.

Provisions—Are generally firm. California smoked Bacon is jobbing at 14@15c; Oregon do, 13@13½c; California Hams, 17@17½c; Oregon do, scarce and nominal; California Lard, 13½@14½c; Eastern do, 12½@13c½ ℔ lb.

Wool—The market is remarkably quiet and quotations nominal. The fall clip has not yet arrived in any considerable quantities. No transactions of importance have occurred during the week.

Hides—Sales since last Wednesday aggregate about 1,500 dry. We quote usual selection of California dry at 14½@16; Mexican, 12½@15c; California salted, 6½@7½c ℔ lb.

Tallow—Sales for the week reach about 20,000 lbs Beef, principally at 7½c ℔ lb.

San Francisco Cattle Market.

Beef, Veal and Mutton are a trifle firmer than last week. The demand for Pork is light; and under an increase in the supply, quotations are a little off.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ℔ lb.
do 2d do 6@7c ℔ lb.
Veal—The range has advanced to 8@10c ℔ lb.
Mutton—Has advanced to 6@6½c ℔ lb.
Lamb—Remains steady at 8@9c ℔ lb.
Pork—Undressed, 4@5½c; dressed, 6½@8½c ℔ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

Simple announcements of Marriages or Deaths inserted free of charge. Additional matter, such as Obituary Notices, or Poetry, inserted at the rate of ten cents per line.

MARRIED.

In this city, August 8th, at the residence of Geo. T. Boynton, by the Rev. J. H. McMonagle, Joseph T. Williamson and Alice T. Osborne, all of this city.

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

The Occident.

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of Practical and Scientific.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance The Occident *is acknowledged to have no equal on the Pacific Coast.*

To Advertisers.

A first class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the very best medium for bringing their business before the public.

It is the aim of the Editors and Publishers to make The Occident, in every respect a first class paper, and one that will be

WELCOME IN EVERY FAMILY.

A year's subscription to The Occident *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

CURRENT TOPICS.

The attempt is made, from time to time, to support churches, all the pews of which shall be free. The feeling becomes general in a community that more persons will attend worship, if they may sit where they please, or not think they are encroaching on the rights of others by their presence in the house of God, and it is resolved to make the offer of an open church, and all are invited. Some have even said that the introduction of free churches is the solution of that great problem—"How shall the masses be brought in who do not attend upon the worship of God?" The First Presbyterian Church in Cincinnati has abandoned its old mode of support from renting pews, and declared all free, collections being taken in the place of the tax, and we have an extended account of the first meeting after the change. The test of success will be found in the state of the congregation and of the treasury a year hence—not in the facts presented by the first meeting. Wherever the experiment has been made, the hopes of those who have tried in this way to bring the masses under the influence of the Gospel, have been disappointed. Even in mission churches, it has been found that men take more interest in the service, and are more regular in their attendance, if they have some other connection with the enterprise than that effected by their contributions on the Sabbath. As a rule, all churches grow more rapidly, have larger congregations, and have more vigor, that impose a rent on the pews, though this should always be moderate, and extended over such a range that all classes may have a place. It is much better that the support of a church should be distributed in this way over the whole number who regularly attend, than that it should have constant arrearages to be paid by a few, or a debt that shall be an incubus on its prosperity. When the free-pew system is really successful in any one case, for a course of years, it may be safe to adopt it generally. Thus far, experience does not favor it.

An autograph letter has been sent by Juarez, the President of Mexico, to the Pope of Rome, the object of which is to apologize for his apparent hostility to the Church and her authority, and to deplore the differences which have arisen between him and the Holy See. As evidence of repentance, he now desires the Pope to send Bishops to Mexico, and promises to receive them with honor and support them in their office, and expects no more in return than the benediction of the Holy Father upon himself and his miserable government. The Pope has been moved to favor by this appeal, and probably six Bishops are already on their way to prop up a power, a prominent feature of whose establishment was the overthrow of a rule avowedly maintained by Romish sympathy and aid. It is difficult to comprehend the motives of the Mexican President in this petition for reconciliation, yet it is manifest that by it he forfeits the respect of most Americans who had felt some interest in his success. Whether he will really gain or lose by the alliance he so penitently seeks, will be determined by the history of a very few years, and our Government will no doubt be more inclined to watch the progress of affairs under the new policy than to render much aid to him who has thus announced it.

Hardly any one fact would so clearly make known the value to New York of such a breathing-place as the Central Park, as the statement that 23,000 people were auditors during one of the concerts furnished there by the city, on Saturday afternoons. The place and the concerts are worthy expressions of regard for the welfare of the people. By both the beauty of the Park and the music performed in it, the thousands assembled are educated, as well as pleased—elevated as well as recreated—and they will become more refined, and gentle, and disposed toward good, as the result. Some have supposed that it is useless expense to make public places of resort so beautiful, and have ridiculed the sentiment that the masses will be inspired by the taste and charms thus displayed. But an enlightened judgment does not so decide, and, so far as facts can be traced, they declare it to be economy, as well as a token of advancing civilization, to provide for the development among all classes of our population of those feelings by which we are ennobled. The fruits can really be gathered of the seed sown in what seems most unpromising soil, by free exhibitions of works of art, free concerts, and free public grounds, and we shall hail with joy any evidence that our own citizens appreciate the advantage of such means of general culture and refinement. It is to be hoped that San Francisco may not be obliged to wait so long as New York did before these advantages may be enjoyed.

The death of Thaddeus Stevens has excited an interest in this country that would be manifested respecting the loss of but very few of our public men. For nearly fifty years he has been prominent in the political affairs of the nation, and, though an old and feeble man, for years past he has been the acknowledged leader in the Republican party of the House of Representatives. His views have often been extreme, and his temperament was by no means attractive, so that he was bitterly opposed and denounced while living; but now that he is dead, he is honored by almost all as an honest man, and the unswerving friend of those whom many would entirely neglect. The heroism that he has manifested in maintaining his place in Congress while suffering from the ravages of the disease that finally took his life, makes known that element of his character to which he was more indebted for his elevation than to any remarkable ability, viz: a perfectly unconquerable will. This urged him through difficulties before which most men would have hesitated. This prompted him to attempt what most men would have regarded as impossible. This made him a leader among those many of whom were endowed with as great powers by nature as was he. Mr. Stevens was another instance of what has often been demonstrated in this country by men in every department of life—that one who has good capacity, and real integrity of purpose, and steady nerve, may achieve success, from whatever position he may begin his career. He has left his mark on our public affairs during an era of commotion almost unparalleled, and as we look upon the vacant place he has occupied so long it is difficult to determine who can fill it of the many who will be ambitious to make the attempt.

The Fair of the Mechanics' Institute is now in full and successful progress, and cannot fail to be both remunerative and useful. The exhibition of articles must surprise even those who think they have kept themselves posted respecting the advance made in the State in the departments of manufactures and trade, and to all others it is little less than wonderful. We could not refrain from the mental exclamation, when passing through the long lines of contributions that would do honor to any of the older States, that twenty years ago this coast was almost a wilderness, and this city was a collection of sand-hills! The display in some departments is, of course, much more extensive and varied than in others, yet scarcely any branch of industry or trade is without some creditable representation. Two features of the Fair particularly interested us, viz: the unusual number of new inventions, and the evidences of progress in what will be new sources of wealth for our people. The whole exhibition may be regarded as not only the proof of what has been done, but also as the prophecy of what is to be done; and the visitor, as he thinks of the past and the future, is impressed with the grandeur of the times in which he lives, and is fired with something of the enthusiasm displayed all around him.

Writers in *The Pacific* are discussing the advantages of a daily religious paper, and the tone of the articles seems to indicate the possibility that such a paper may be issued in this city, at no distant day. No one can doubt the advantages that must result from the permanent establishment of a daily that will be wisely devoted to religion, in the midst of a population like ours, but it may be doubted whether it could obtain such support at present, as would give any warrant of its per-

manence. It is not easy to place even a weekly paper on a basis of safety, as to pecuniary support, when it is commended chiefly to the Christian por- of the people, and much as we would like to welcome a really able daily advocate of whatever is good, from the press of *The Pacific*, or from any other press, we hope that it will be commenced with a well grounded promise of long life. There is a wide and inviting field here for the influence of the press. Newspapers are read much more generally than books, and they have mighty power in shaping the morals and the destiny of their readers.

Religious Intelligence.

PACIFIC COAST.

Death of Mr. William W. Caldwell.—The early residents of San Francisco will learn with sincere regret that this excellent and much respected man has ceased to live. Coming to California among the first, he became warmly attached to all who labored with him in the organization of affairs on this coast, and though he returned to the East several years ago, he never ceased to feel a kind of pride in the progress of a region with which he was so long identified. It is not likely that any more thoroughly good man has ever given to this city the benefit of his example and influence and prayers. He was one of the founders of the First Presbyterian Church, and its first Elder and Superintendent of the Sunday School. In the trying times through which that church passed during the early portion of its history, he devoted himself to its welfare, and after he removed he was wont to manifest in many ways his interest in its success. He was, at one time, a prosperous merchant, and his money was freely given in support of whatever might be of public benefit. In short, he was an enthusiastic Californian, and he has left not a few monuments here of his Christian zeal and devotion. His death, at his home in Philadelphia, was the fitting close to a life like his—calm, peaceful, and full of hope for the future. He had been faithful; he trusted in his Savior, and he had nothing to fear. Having finished his course, he had only to die.

Young Men's Christian Association.—The Fifteenth Anniversary of the Young Men's Christian Association of San Francisco was celebrated last Sunday evening at the First Congregational Church. The retiring President, Hon. George Barstow, made a full report of the progress of the Association in the past, its condition at present, the good which has already resulted from its efforts, and its claims upon the liberality of our citizens. The amount of money which it is proposed to raise immediately is $13,000. This will leave a debt of $45,000 at the completion of the new building, which debt is to be provided for in the future. It is expected that the new building will be ready for occupation about September 15th. The reports of the several committees and delegates furnished no information which has not already been made known to the public. The meeting was addressed at length by Rev. W. I. Nichols, and closing remarks were made by Rev. Dr. Stone. The collection taken at the close of the exercises was not so large as it would have been had not a large part of the audience, wearied by the great length of the exercises, felt obliged to leave before their close.

Oakland.—The *News* states that there are nine religious organizations in that city, eight of which have their own houses in which to worship.

Alexander Academy.—Pursuant to call of the Moderator, Rev. James Woods, a *pro re nata* meeting of the Presbytery of Benicia was held at Healdsburg, Aug. 13, for the purpose of transacting business relating to the Alexander Academy, lately donated to the Presbytery of Benicia by Mr. Cyrus Alexander.

A resolution, accepting the gift, and appointing Rev. Thomas Frazer and Elder Morgan a committee to tender the thanks of the Presbytery to Mr. Alexander, was adopted.

The Rev. Ben. F. S. Ely, pastor of the Healdsburg church, and H. M. Willson, Esq., Deacon of said church, were added to the Board of Trustees.

The Rev. Thos. Frazer and Elders Morgan and Brown were appointed a committee to wait on Mr. Alexander, to obtain a more perfect conveyance of the property.

After the adjournment of Presbytery, a meeting of the Board of Trustees was held. The Rev. Thos. Frazer was chosen Chairman, and the Rev. Ben. F. S. Ely Secretary of the Board. The Rev. Ben. F. S. Ely, Elder Josiah Brown, and Deacon Willson were appointed the Executive Committee.

The Trustees are desirous of obtaining a good teacher, in communion with the Presbyterian Church, qualified to take charge of the school.

Ben. E. S. Ely, Sec'y of Board.

Healdsburg, August 15th, 1868.

Calvary Church.—Mr. J. B. Roberts gives us the following information respecting this church: The old church and lot on Bush street have been sold for $80,000–nett, reserving organs, carpets, cushions, pulpit and all moveable furniture. Cash on delivery of the property. The congregation to occupy the church free of rent till the new church is completed. The new church is now ready for the gallery trusses, and the brick work, that is progressing rapidly, will be up ready for the roof timbers in about a month. The work on this new church is of the most solid and substantial character. The bricks are of the best quality, and well laid. The massive girders, supported on heavy cast iron columns, the substantial floor joists well anchored into the walls, and the iron straps built into the the wall, thoroughly binding it together; all combine to secure this structure from any damage by earthquakes, as far as it is possible to do so.

Dedication of the Westminster Church.—This neat and pleasant edifice, situated on Fell Street, in what is known as Hayes Valley, was dedicated to the worship of God last Sabbath afternoon. Rev. Dr. Scudder preached a very appropriate sermon, and other clergymen of the city took part in the services, all of which were both interesting and *short*. We commend the fact to all persons who may be called on to conduct similar exercises elsewhere, that they *can be interesting and short*. The house is sufficiently large for the present necessity of the church, but is designed for ultimate use as a chapel and Sunday School room, as the society have a large lot on which they hope, in time, to erect a church that shall accommodate many more people. This young church has done nobly, led on by their faithful pastor, Rev. Mr. Hurd, and, as they deserve, we doubt not they will achieve abundant success.

Suisun.—The Cumberland Presbyterians have purchased a lot in Suisun, on which is a building which will be transformed into a church and parsonage.

Organ of the Presbyterian Church.—The Santa Clara *News*, in crediting The Occident with what it terms "very sensible views," etc., speaks of our paper as the organ of the Old School Presbyterian Church. This is incorrect. The Occident is not the organ of any particular branch of the Presbyterian Church—but of *all* its branches.

Correction.—A few weeks since we stated in The Occident that Rev. A. K. Lindsey had arrived in this city. It should have been Rev. A. L. Lindsley, D.D., who has taken charge of the Presbyterian church at Portland, Oregon. This church is fortunate in securing the services of so able and experienced a preacher as Dr. Lindsley.

Napa.—Seven persons were baptised on Wednesday, 12th inst., by Rev. Mr. Ford, the Baptist minister. A discussion on spiritualism between Elders Knapp and Todd, has afforded much amusement to the citizens during the past week. Neither instruction nor benefit are to be expected from such discussions.

Presbyterial Notice.—The Presbytery of California will meet in the Larkin Street Church, San Francisco, on Wednesday, Sept. 9th, 1868, at 7½ o'clock, P.M., and will be opened with a sermon by the last Moderator, Rev. Charles R. Clarke.

John G. Fackler, Stated Clerk.

Theological Seminary.—Land has been purchased at Berkley on which are to be erected buildings for a Theological Seminary, to be established under the auspices of the Congregational Church. It is hoped that the buildings will be erected during the next year.

Denverton.—The people of this place have contributed over $1,000 toward building a church, and there is a probability that the church will be built at an early date. Religious meetings are now held every other Sunday in one of the halls.

The Presbytery of San Jose will meet in the Presbyterian church, Brooklyn, Tuesday, August 25th, at 7½ o'clock, P.M. Opening sermon by Rev. F. L. Nash, Moderator.

George Pierson, Stated Clerk.

EASTERN.

The Welch Congregational churches of Wisconsin have taken a deep interest in the work of the American Missionary Association among the Freedmen. They sustained last year two excellent teachers, one of whom, Miss Evans, prosecuted her work at Austin, Texas, with heroic fidelity, zeal and courage in the face of grave obstacles and no little personal peril. The churches seem well content with their investment, having unanimously resolved at their late annual meeting to renew their offerings for the year to come.

During the forty-three years that the American Tract Society has been in existence, it has issued 22,877,379 volumes; 200,000,000 tracts; 100,000 000 periodicals, in 141 different languages and dialects. Since the close of the war it has organized 1 900 Sabbath or secular schools, which are attende d by 110,000 scholars. Upward of 279,000 copies of the United States Primer have been disseminated throughout the country. On the work in the South alone $80,000 has been expended. The society earnestly appeals for help.—*United Presbyterian.*

Rev. Joseph Stockbridge, one of the oldest chaplains in the United States Navy, was honored with the degree of D. D., at the recent commencement of the Western University of Pennsylvania at Pittsburg.

The Protestant denomination in Wisconsin estimate 300,000 souls i e., one-third of the population, as under their pastoral care. Of these, nearly one-third are Lutherans, and one-fourth Methodists, of various names. Fifteen years ago, at least one-fifth of all the Protestant church members were Congregationalists; now only one-tenth are.—*Advance.*

FOSSILISM—A lady has given $25,000 to endow a Professor of Ecclesiastical Polity and Law in the General (?) Theological Seminary, N. Y., on condition that the Professor "shall be a *white man* in communion with the P. E. Church."

AT the late commencement of Columbia College the degree of LL. D. was conferred on Rev. John Hill, D. D., for forty years missionary of the Protestant Episcopal Church and teacher in Athens, Greece.

THE degree of A. M. (Mistress of Arts) was conferred on eleven young ladies at the recent commencement of the Wesleyan College in Maine.

THE whole number of Baptists in the United States is 1,109,926.

FOREIGN.

The Arabic Bible.

The Christian Church has always recognized the hand of God overruling the conquests of Alexander in the spread of the Greek language and literature over Asia and the northern portion of Africa. By this means a common tongue was secured, not only for the extensive preaching of the Gospel, but a language of extraordinary breadth, precision and beauty of expression, in which to publish and secure the wide distribution of the Word of God. Into this tongue, about three hundred years before the coming of our Lord, the Hebrew Scriptures were rendered in that memorable version called the Septuagint, and in the same language the books of the New Testament were written. A wonderful facility by the common use of this tongue among hundreds of different nationalities was thus secured for the dissemination of the Gospel.

The Roman domination succeeding and prevailing in the time of Christ and his immediate followers, a strong government held in subjection hundreds of petty provinces, and secured to the apostles protection that they could not otherwise have enjoyed, while the road-making instincts of this eminently practical and organizing nation opened facilities of travel throughout Europe and Asia.

The attention of the Church has not been so definitely drawn to the Divine Providence manifested in the wide spread of Mohammedanism throughout Asia and Africa, and the superstitious reverence with which the Koran is every where regarded among the followers of the false prophet. Dr. H. H. Jessup, of the American College at Beirut, presented this truth with great impressiveness at the late anniversary of the Bible Society. The Koran is never translated, for it has been solemnly prohibited, but is always read in the Arabic, which has thus been rendered to every Mussulman a sacred language. Whatever tongue they may speak as their national utterance, the Koran, which every Mohammedan boy commits and constantly studies, is read only in its sacred tongue. Inhabitants of China, India, Turkey, and Africa, speaking hundreds of different dialects, receive and read the Arabic Koran. More than one hundred and fifty millions of people ignorant of the truth of the Gospel are thus rendered accessible by their common property in one tongue. The English and American Bible Societies have united to prepare an edition of the Holy Scriptures with the vowel points, exactly like the Koran in this respect. The Mohammedan has no prejudice against the Scriptures. He believes in the God of the Old Testament, and that Jesus, as well as Mohammed, was his prophet. The sacred language of the Arabic versions renders the book especially attractive and impressive to him, and secures for the Holy Word a wide distribution and a welcome among millions of unchristian people.

Arabic Testaments have been already called for by Mohammedans in Liberia, and a supply has been sent to them from our American Bible Society. Moslems from Northwestern China have visited our missionaries, seeking to be taught the Arabic that they might read their own sacred book. Certainly, herein is the hand of God seen overruling both the wisdom and opposition of man for the accomplishment of his own benign purposes. A wide and effectual door is opened for the spread of the truth, which is "the power of God unto salvation to every one that believeth."—*Christian Advocate.*

BACON & COMPANY'S Excelsior Press SAN FRANCISCO

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 1 San Francisco, Cal.

Correspondence.

To California by the Overland Route.—No. 2.

It was about 3 P.M. when, mounted upon the top of a coach—for which elevated position I confess I have a preference—I made, in company with a large number of fellow passengers, my entrance into the town of Omaha. The ride on the Great Northwestern Railway from Chicago to the Missouri River was through a beautiful section of country, the rich and fertile plains of Iowa. My eyes were often delighted with the grand sweep of the prairies stretching away on every hand like an emerald sea, its surface dotted here and there with animated beings and our hurrying train, dashing as the ship on the ocean across its placid bosom.

The general appearance of the country traversed was highly inviting, and the broad meadows seemed to give ample assurance of their ability to support a teeming population. I could not think of sleeping the first night out from Chicago, until I had seen the Mississippi—great "father of waters"—whose broad expanse we crossed at Clinton.

When we were within a few hours' ride of the Missouri, the railroad diverged considerably to the south; following this course, we reached the terminus of the Northwestern Railway near Council Bluffs, at about 2 P.M.

With the rest of the passengers, I submitted at this point to a most cruel attack from a company of Omaha hotel runners, who beset the stages of the Transfer Company (in which we rode to the ferry, and from the ferry to Omaha), and kept up a most persistent assault on us for at least one hour. The only relief from their attacks was when it became necessary for them to quarrel among themselves for a little. Hither and thither they busied themselves, at one time on the back of the omnibus, now on top, now along the side, singly and in groups, talking incessantly—resembling a pack of curs yelping and barking after one common object of pursuit, and quitting it only to tear and worry each other for a moment, and then hasten on again after their prey. If it were possible to forget this scene, it certainly is beyond my power to erase from my mind the impression which was made by the dreadful profanity that offended my ears in this neighborhood.

Aside from the saddening and depressing effect that the exhibition of such immorality had upon the mind, there was an utter absurdity in the style of the language, which bordered upon the ridiculous. Never did I so feel the necessity for some ingenious "son of Belial" inventing *some new oaths*. The old are so dreadfully hackneyed, trite, worn out, vapid, that they are really worse than useless for purposes of profanity.

The town of Omaha is situated on a gently-rising slope to the west of the river, and has really a beautiful location. Its streets are wide, laid out with regularity, and there are evidences of a design to establish a uniform grade. Beautiful blocks of brick buildings adorn the main streets, and the dwelling houses, which are chiefly of wood, are generally neat and attractive, while in some cases they are elegant. The population of Omaha is at present about 15,000; one-half of this number having been added within the last two years. A conspicuous building, located in a commanding position at the head of the main street, was used, previously to the removal of the Capitol to Lincoln, for Legislative purposes. There is no lack of churches, all the prominent denominations having a representation. It is pleasant to observe religion thus keeping pace with the westward march of the nation. The opposition, however, is well organized and in strong force, judging from the number of beer-gardens, concert saloons, gambling dens and other devices, whereby vice is made attractive.

From the fact that Omaha is the eastern terminus of the Union Pacific Railroad, as well as from her position on the Missouri River, the general expectation is that at no remote day this city will be a place of considerable importance. Just now there is felt a temporary depression in commercial affairs, on account of business having been in some departments overdone.

I left the city with the impression that the social current which is flowing here is not unlike the natural; withal a vigorous stream indeed, yet somewhat turbid, and bearing on its surface a great deal of rubbish and worthless matter. It is probable that some time will elapse before it is much changed in this respect. If the world is in truth growing rapidly better, as we are so often informed, I may be allowed to say that I gained no additional confirmation of that fact from my observations of the condition of society on the Missouri River. W. R.

Chico, and the Religious Prospects there.

As it may be of interest to the readers of The Occident to learn something of the state of religion in this rapidly growing town, I will furnish a brief account of a recent visit to the place, a Sabbath day's labor in behalf of its people.

Leaving San Francisco on Wednesday, the 5th of August, and stopping for a day in Sacramento, I reached the elegant and hospitable mansion of General Bidwell on Friday afternoon. The cordial reception that greeted me on my arrival, was exceedingly gratifying, after a fatiguing ride by stage over a dry and dusty road. The first interview with the family over, I found myself *at home*.

On Saturday, after a few hours were spent in forming the acquaintance of gentlemen interested in the organization of a Presbyterian church. All that I saw and heard impressed me most favorably. Evidences of intelligence and enterprise appeared on every hand. I should think that the town already contains a resident population of not less than one thousand. It is situated in the midst of the finest agricultural region of the State and everything about it betokens a permanency and continued growth, that cannot be said of many interior California towns. The people are warm-hearted and full of the energy, characteristic of the population of this coast.

On Sabbath morning, notwithstanding the intense heat, and the fact that religious services were held in three other places, a very interesting congregation met me in Wood's Hall. One feature of the service was a large and decidedly efficient choir, considering the fact, that they were hardly yet organized, some of them strangers to each other. Whoever has the good fortune to be called as pastor to this congregation will find himself greatly supported by an unusual amount of musical talent. Every minister knows how important an auxiliary to his work, good singing may be made. At night, the attendance was considerably larger than in the forenoon, and a more interested audience I never addressed. It certainly seemed that the Spirit of God was present, accompanying the truth spoken. Oh! that the seed sown may spring up to a harvest of blessing!

Those who are moving in the interests of Presbyterianism in Chico, are in "blood earnest," as was once said of the great Dr. Chalmers. They are ready to organize with an actual membership of from twenty to twenty five, and will *start* their enterprise, supported by the sympathy and cooperation of a congregation numbering nearly one hundred. Indeed, the whole community look with favor upon the movement. They will take steps to secure an eligible lot, upon which they propose to erect a church edifice and a parsonage. And this they will be able to accomplish without any aid from abroad. I know of no new field within the bounds of our Synod that gives promise of better results to the labors of an earnest, faithful minister. Such a man they will endeavor to obtain without delay. Until they can build a house of worship, they have been offered the free use of a large and every way convenient hall. It is proposed to effect an organization on the ensuing Sabbath, during a visit from brother Wells, of Oakland. With such materials as this church will be composed of, there is abundant reason to believe, that, under the blessing of God, it will grow up to a mighty power for good. May the Lord send them a "man after His own heart." J. G. F.

Discovery of Pompeii.

During a period of sixteen hundred and sixty-nine years Pompeii remained buried and forgotten. In the year 1592 an architect, named Dominico Fontana, cut a subterranean canal under the site of the city for the purpose of conveying water from the river Sarno to the town of Torre dell' Annunziatta. In constructing this canal the workmen came often upon the basements of buildings; but no curiosity appears to have been excited, and no steps taken to prosecute further researches. Nearly a hundred years later fresh ruins were discovered, and an inscription with the word Pompeii. But even this failed to awaken any practical interest. At length, when the accidental discovery of Herculaneum had drawn the attention of learned and scientific men to the subject, Alcubierre, a Spanish colonel of engineers, who had been employed to examine the subterranean canal, was led, by the discovery of a house, with statues and other objects, "to conjecture that some ancient city lay buried there, overwhelmed by the great eruption of Vesuvius in 79." Having obtained permission of Charles III., the King of Naples, he commenced early in the year 1748 the excavation of the street afterwards called the Strada della Fortuna. His labors were soon rewarded, for in a few days he discovered "a picture eleven palms long by four and a half palms high, containing festoons of eggs, fruits, and flowers, the head of a man, large, and in good style, a helmet, an owl, various small birds, and other objects." The next discovery of importance was the skeleton of a man, covered with the lava mud. By his side were found eighteen brass coins, and one of silver. Before the end of the first year of the excavations, the amphitheatre, which is capable of holding ten thousand persons, was laid bare. The operations however, were carried on with deplorable dilatoriness, and the royal exchequer was by no means liberal. The excavators, who worked in chains, were chiefly condemned felons, or Mohommedan slaves. No stranger was permitted in the ruins. Accurate records of the discoveries were kept; the most important pictures were detatched from the walls, after copies of them had been taken; and the buildings in which they were found were again covered with rubbish. When some progress had been made in the excavations strangers were admitted on the payment of an exorbitant fee; but all attempts to take copies of mosaics or frescoes were rigorously discouraged.

The short period during which the French occupied Naples was distinguished by a more liberal and enlightened policy. Under the patronage of Caroline, the wife of Murat, the works were carried on with great vigor, and many remarkable discoveries were made. The amphitheatre, which had been filled up again, was recleared; the forum was laid open; and the greater portion of the Street of Tombs was uncovered. The return of the Bourbons to favor was not conducive to the progress of

the excavations. The revolution which drove them finally from Naples gave Pompeii another chance. Garibaldi was appointed dictator. But however brave and patriotic as a general, he was scarcely fitted for the functions of administration. He gave the dictatorship of museums and excavations to Alexandre Dumas, the French novelist! The new director was quite alive to the dignity of his position, and kept it up with princely magnificence. But he had no notion of its responsibilities. It is said that he paid one visit to the ruins. His rule was happily short-lived; for, on the accession of Victor Emanuel to the throne of Italy, Giuseppe Fiorelli, a distinguished antiquarian scholar, was appointed director-general of the works. The appointment has proved most judicious. Pursuing a regular system, noting "every appearance or fragment which might afford or suggest a restoration of any part of the buried edific, replacing with fresh timber every charred beam, propping every tottering wall or portion of brick work," the new *commendatore* has succeeded in exhibiting not a confused and undefined mass of crumbling ruins, but a town, in the integrity of its outlines and the order of its arrangements. Street after street has been uncovered. Temples, baths, markets, tombs, stand out just as they stood eighteen hundred years ago. The villa of the poet, the forum, the counting-house, the baker's shop, the school-room, the kitchen, carry us into the very heart of Roman life in the brightest days of the empire. The jewelry of beauty, the spade of the laborer, the fetter of the prisoner, and the weapon of the soldier, are all there, reproducing and realizing the past with a vividness that can scarcely be conceived.

Pompeii, overwhelmed, and, as it were, hermetically sealed in the very hight of its prosperity, preserved from the ravages with which Goths and Vandals visited the ancient glories of Italy, and from the sacrilegious and almost as destructive pillagings of modern hands, brings the very past to our doors. Within its silent streets are "buildings as they were originally designed, not altered nor patched to meet the exigencies of newer fashions; the paintings undimmed by the leaden touch of time; household furniture left in the confusion of use; articles, even of intrinsic value, abandoned in the hurry of escape, yet safe from the robber, or scattered about as they fell from the trembling hand, which could not pause or stoop for its most valuable possessions; and, in some instances, the bones of the inhabitants, bearing sad testimony to the suddenness and completeness of the calamity which overwhelmed them." There are the very ruts which were made by the wheels of chariots flying, perhaps, from the impending ruin; there are the water-pipes, in the cavities of which, sealed by the hand of time, the splashing fluid can still be heard; there are rude and grotesque inscriptions, scratched by some loiterer on the stucco, and as fresh as when they excited the mirth of the passer-by; there are eggs-shells, bones of fish and chickens, and other fragments of a repast of which the people whose skeletons lie near them were partaking when the catastrophe overwhelmed them; there is fuel ready to be supplied to furnaces for heating the baths; there are the stains left upon the counters of drinking-shops by wet glasses; there are the vials of the apothecary, still containing the fluids he was wont to dispense; there are ovens, in which loaves of bread, carbonized, but otherwise perfect, may yet be seen; there are vases with olives still swimming in oil, the fruit retaining its flavor, and the oil burning readily when submitted to the flame; there are shelves, on which are piled stores of figs, raisins, and chesnuts; and there are *amphoræ* containing the rare wines for which Campania was famous.

About one third of the city has been disinterred. In this portion some six or seven hundred skeletons have been found. It is reasonable to assume that if the whole city were uncovered the number of skeletons would be about two thousand. But Pompeii contained at least twenty thousand inhabitants.—*London Quarterly Review.*

THE Shepherd of Heaven may allow the dogs of hell to bark at and worry His sheep, but He will never suffer His sheep to be destroyed.—*Fackler.*

WHO ARE THE MEEK?—A missionary in Jamaica once questioned a little black boy on Matthew, fifth, and asked, "Who are the meek?" The boy answered, "Those who give soft answers to rough questions."

APPLETON'S EDITION

OF THE

Waverley Novels,

NOW PUBLISHING,

From New Stereotype Plates, uniform with the new edition of Dickens, containing all the Notes of the Author, and printed from the latest edition of the Authorized Text.

TO BE COMPLETED IN TWENTY-FIVE VOLUMES.

PRICE 25 CENTS EACH.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR AUGUST, 1868.

August 6th—SACRAMENTO, Captain Parker, connecting with ALASKA, Capt. Gray.

August 14th—MONTANA, Capt. Cavarly, connecting with OCEAN QUEEN, Capt. King.

August 22d—CONSTITUTION, Captain Comstock, connecting with RISING STAR, Capt. Conner.

August 30th—COLORADO, Captain Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship CHINA, Captain E. W. Smith, will be dispatched on Tuesday, September 1st, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

THE OCCIDENT.

SAN FRANCISCO, SATURDAY, AUGUST 22, 1868.

REAL GRATITUDE NEVER SELFISH.

We read of a Roman who, being captured in war was ordered to be sold into perpetual slavery in a foreign land, when his utter wretchedness excited the compassion of his captor, and he struck off his manacles and bade him return to his home. A few days elapsed when the man appeared before the palace of his benefactor with his wife and little children and a bag of gold, and asked admittance. The porter told his lord of the strange company, and he came forth to see them, when the Roman caused all to bow before him, and he said: "We are all yours. Life would have been gloom to me had I been driven from my wife and babes; life would have been cheerless to them had they thought of me, in exile and chains. You have made life bright to us all, by my release from such a doom, and we only ask that we may show our joy in serving your will, with our persons and our all."

Could one in whom gratitude burned with intensity like this ever be self-seeking and base, when his deliverer might be honored? Would he be ready to hesitate, and parley, when opportunity was offered for some service that might exhibit his thanks? The memory of those chains, of his despair, of his horror, when he saw no escape, was with him every moment, and he heard the faintest order from the voice that commanded his rescue; he asked not where, or how—if he might perform some duty assigned by him who gave him back the good of life.

So, when the Christian remembers the pitiless desert in which he was lost, where he had no good, and the wrath of God threatened remediless ruin; where above, beneath, on every side, all was gloom and misery, and he walked, he knew not where, summing up his wretchedness in that most comprehensive epitome of woe, "no hope, and without God in the world!" when he remembers all this, then thinks of the Savior who found him, and drove away his gloom, and led him forth into a region of blessings, and opened before him the prospect of Heaven, and made him a child of God, will he ever be selfish and half-hearted in his attempts to honor the glorious Lord? No! It is when we forget that we become selfish, and live unworthy Christian lives. Let your thoughts dwell on what you were, on what you felt and feared; then on what you afterwards felt and hoped, on the uninterrupted course of mercy you have known since that wonderful change, and your daily, hourly—nay, the *constant* desire and habit of your soul, will be to bring your powers, your acquisitions, your influence—all you have, and offer them with joy, in hope that in some way they may honor God.

There is too much Christian service that is constrained by something else than the love of Christ. There are too many laborers in the vineyard who scarcely leave men in doubt that they wish they need not work there. The sight is painful, as it is pitiful, when those who have arrayed themselves in the livery of Heaven, go about among their fellows, by act and manner, if not by words, complaining of demands that are made of them, and declaring that a life of devotion is to be shunned as long as possible. These persons forget that others see through their livery, and feel that they are false to its intimation respecting their Lord. Such piety has no charms. It does not plant flowers by the side of the path of duty. It does not sing as it moves on in that path. The heart is not enlisted, and we only look upon those who are slaves to their religion, toiling for its reward. Genuine, gushing gratitude would transform them into different beings, and their life would become beautiful under its delightful influence. There would be no sighs for some more satisfactory pleasures, no protests while the Master is obeyed, no tears shed along a barren path over which conscience drives the unwilling victim. Everything would be expressive of content and happiness, and abundant rewards would be found in every field made radiant with our Redeemer's smile. Gratitude should more fully possess our hearts when we are out in the world, as well as when we are recounting our mercies in the closet. It should beam in our faces when we mingle with men, as well as burden our petitions when we commune with the Lord. Gratitude should adorn our conduct, and make our character attractive, testifying everywhere that selfishness no longer rules us, and our highest joy is that God is enthroned within us.

LAY PREACHING.

A few years ago the prediction that in the Presbyterian Church provision would be made for the licensing of laymen to preach the Gospel, would have received but little favor. Yet the educating power of events and necessity has effected so great a change that after some rather indefinite discussion of the matter among the more progressive, after several overtures to the Assembly, and a discussion there quite general enough to be safe, and such recommendation as really assumed no responsibility in the matter, several Presbyteries have actually resolved that such preachers may have the Gospel in charge. The Old School Presbytery of Baltimore, at its last meeting, appointed a committee, consisting of Rev. Doctors Backus and Cross, to give temporary license to members who may furnish promise of usefulness in the ministry. Similar action will be taken in other Presbyteries, especially in the large cities, and in the destitute regions of our new territory, and there is reason to believe that no evil, but great good, will be the result. This willingness to approve of lay preaching is not to be interpreted as a reflection in the least, upon the regularly ordained clergymen of the Church, or as an indication that the Church is likely to drift away from her belief that both order and success require the careful and constant support of such institutions as may supply large numbers of thoroughly trained ministers of the Word. It is only the expression of belief that many others, less formally introduced into the sacred office, and less thoroughly prepared for it, may work with these in evangelizing the world. It is saying that preaching to every creature is too large a work for regularly educated ministers alone, and too important to be left undone. It is accepting with a more practical and earnest sense of its meaning, the commission of our Lord, and beginning with fidelity to execute it by such additional means as the demands of the times seem to require. The Presbyteries on the Pacific Coast may imitate the example of those in the East, with much hope of increased influence and usefulness, and we trust they will do so. We must have theological seminaries here, and see that they are well furnished with professors and students. We must always depend on those to lead who are completely equipped for their work by a long course of study. But we can supplement these, and encourage them, and cooperate with them, by the judicious selection of such a number of able laymen as may be needed to take part in their ministry. There are many inviting fields now, in city and country, where these lay preachers might gather rich harvests, and there should be no delay in assigning them their work.

Naaman's Immersion.

As I am now about to leave the Old Testament, it may be asked, is there no case of veritable immersion to be found in that portion of the Scriptures. I must admit that there is. We have it in the history of Naaman, the Syrian. This narrative is fresh in the minds of most Scripture readers. The command of the prophet to the Syrian leper was, to go and "*wash* in Jordan seven times." But Naaman was wroth at the simplicity of the appointed cure; he thought some great thing was to be done; but still, yielding to the persuasion of his servants, he went down and dipped himself in Jordan seven times, "and he was clean." Here there can be no mistake about the terms—the Hebrew is *tabal*, the Greek is *baptizo*, and the English is *dip*. And here we have, beyond all contradiction, a case of actual *immersion*, but it is a case standing by itself. It has neither precedent or subsequent; it is not a Hebrew ceremonial baptism, or a Christian Sacramental baptism, It stands isolated and alone—a wonderful exhibition, it is true, of God's favor to the Syrian noble, but is neither the type nor the symbol, or the inauguration of any system of ordinances following. It did not introduce an order of lustrations for the cleansing of the leper. Naaman alone was cleansed by the dipping, and there the matter ended. Gehagi succeeded to the leprosy of Naaman, but Naaman's dipping did not cure him or his descendants.

This narrative, however, is good to show: 1st. That dipping is a proper meaning of *baptizo*, when not used in a ritual sense. So much for our Baptist friends.

2d. That the command being to wash, though the performance was by dipping, yet the command carried into the dipping the idea of cleansing, for in that alone was the obedience shown. Good for us in showing that the Scripture meaning of *baptizo* is to cleanse.

2d. Naaman being an unenlightened heathen, and ignorant of the simplicity of God's commands, and filled with the idea that some great thing was to be done, superimposed upon himself the immersion, when the command was only to wash.

4th. Naaman in this respect has his followers in the immersionists of the present day, who to the simple command of the Savior, *baptize*, superimpose the additional immersion of their own interpretation.

BAPTISM AMONG THE JEWS.

I come now to the consideration of a topic in this discussion of paramount importance. I propose to inquire of the Jews themselves who lived in the time of our Savior, and who used and understood the Hellenistic Greek, and learn what power they gave to *baptizo* and its cognates—what they did when they baptized, and what meaning they attached to the term.

All will agree as to the pertinence and propriety of this inquiry. The *usus loquendi* is the great law for the interpretation of the human language. What did the people understand who spoke the word at the time of the record, must and ought to determine its signification. If I report that last night a thief undertook to break into my house, and I discovered and prevented him, I shall be understood by my hearers to say that I stopped him, while the etymol-

ogy of the word and its early use will both conclusively prove that I only went into the house before him. Such changes take place in the power of words by the customs of language. Accordingly, when our Baptist friends say that our Savior made use of language that had a definite meaning which the people understood, the position is exceedingly well taken, and they will join with me in the propriety of enquiring what the Jews did understand by *baptizo* in the time of our Savior. I must, however, protest against the statement that *baptizo* was a word used in the everyday concerns of life among the Jews, and thence got its meaning. *Baptizo* is used in a ritual or figurative sense only in the Greek of the New Testament. *Bapto* does the work, and is employed in the ordinary affairs of life. He that dippeth with me in the dish is *bapto*, not *baptizo*. "Let Lazarus dip the tip of his finger" is *bapto*, also. But invariably, except when our Savior speaks of His passion, *baptizo* is used in a strictly ritual or ecclesiastical sense.

Let us now turn to Matthew 15: 1, 2: "Then came to Jesus Scribes and Pharisees, which were of Jerusalem, saying; Why do thy disciples transgress the tradition of the elders, for they wash not their hands when they eat bread?" Mark 7: "And when they saw His disciples eat bread with defiled, that is to say, with unwashed hands, they found fault; for the Pharisees, and all the Jews, except they wash their hands oft, eat not—holding the tradition of the elders; and when they come from market, except they wash (Greek: *baptizo*), they eat not, and many other things there be which they have received to hold—as, the washing of cups, and pots, and brazen vessels, and tables. Then the Scribes and Pharisees asked Him: Why walk not thy disciples according to the tradition of the elders, but eat bread with unwashed hands?" Luke 11: 37: "And as He spake a certain Pharisee besought Him to dine with him, and He went in and sat down to meat. When the Pharisee saw it, he marvelled that He had not first washed (Greek: *baptized*) himself before dinner.

I have grouped these three parallel cases together for convenience of reference. This tradition probably had its origin from the ordinance, Lev. 15: 11: "And whomsoever he toucheth that hath the issue and hath not rinsed (Hebrew: poured) his hands with water, he shall wash his clothes and bathe himself in water, and be unclean until evening." I am informed, by Dr. Cohen, of this city, that this ablution doubtless came from a desire among the Jews generally to imitate the cleansing enjoined upon the priests, and that the cleansing before meals was invariably by pouring the water on the hands.

Whether the tradition requiring this scrupulous hand-washing had its origin in the ordinance, Lev. 15: 11: "And whosoever he toucheth that hath the issue, *and hath not washed his hands in water*," or to the disposition among the more strict of the Jews to copy and practice the rites imposed only on the priests, certain it is, that this ordinance was insisted upon with the most pertinacious exactness. The Rabbis taught that in no case was it to be omitted. Rabbi Aquiba, in prison, would not omit to wash his hands, saying, "It were better to die with thirst than transgress the tradition of the elders." "Whosoever despiseth the washing of hands is worthy to be excommunicated." "He that eateth bread with unwashed hands does as bad as if he committed whoredom." With such statements, it is impossible to resist the conviction that this hand-washing was the sole prescribed ablution before meals.

Now, while such scrupulous regard was paid to this particular ablution, there is, on the other hand, no evidence that any other was required. In fact, the circumstances of the case debar us from the idea that there was any other. They ate with defiled, that is to say, with unwashed hands. Defiled and unwashed hands were identical. Purified and washed hands were identical, also, and by the traditions of the elders, they might not eat until they had purified themselves by the customary ablution, which was by washing the hands. This customary ablution of the Jews our Savior had failed to perform; therefore the Pharisee marvelled that he had not first washed (Greek: baptized) himself.

The positions which I assume in relation to these ablutions are:

1st. That this hand-washing was the purification which Jewish tradition prescribed and required before meals.

2d. That the Pharisees held to this custom with the most rigorous pertinacity, and ascribed to its performance the most extraordinary virtues, and to its neglect the greatest turpitude. See quotations from Rabbinical authorities.

3d. That this was the ablution referred to in Mark 7: 4: "And when they came from market, except they wash (Greek: baptize) they eat not;" and Luke 11; 37, 38: "And He went in and sat down to meat, and when the Pharisee saw it, he marveled that he had not first washed before dinner (Greek: baptized).

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have never been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

CURRENT LITERATURE.

Glimpses of Jesus.

The real Christian rejoices at nothing more than at any successful attempt to exalt Christ. Whether the object be to awaken more intense desires to be like Him in the hearts of His people, or to add to the motives that may stimulate them to devotion, or to impart new consolation to those who are in affliction, and attract and encourage the awakened to come to Him, and to confound the opposer and the careless, the exaltation of our Lord is an occasion for thanks. In the volume, of which we have given the title above, published by Cassell, Petter and Galpin, of London, we have twenty-three short discourses, or lectures, by W. P. Balfern, in which he succeeds to a degree that has delighted us, in bringing Christ before us—as the Lord, as well as the Redeemer. We are not familiar with the name of the author, but need no more than this single book to satisfy us both respecting his ability and spirit; for though the style is at times a little quaint, and the exhortations are more fervent than are those frequently found in such books, there is proof throughout of a clear apprehension, and a rich experience of the glory and the grace of Jesus Christ.

We make a few extracts. Speaking of the manner in which we may gain any just glimpses of Jesus, he says:

Jesus is seen in the light which He brings, the glory He emits. Men cannot lift the sun into the heavens, neither can they lift Christ into the soul, or carry a vivid glimpse of Him to the heart; but as light from the sun brings the image of the sun, and imprints its glory upon the face of Nature, so light from Jesus gives a glimpse of Jesus, brings the image of Jesus, the glory of Jesus, into the soul; this we cannot command, but for it we can pray: "Ask, and ye shall receive."

But how may I know when I am so favored? By the effects which follow. How do you know a rose is near, but by the fragrance it emits? that honey is upon the palate, but by the sweetness you taste? When the sun rises upon Nature after a storm, and when Nature looks upon the sun, the tender blade shoots forth, the drooping flowers again lift up their heads, their sweet and volatile oils leap forth, and fragrance floats upon the breeze: and so, when the soul catches a glimpse of Jesus, the sensibly barren mind—the mind which seemed like a sterile heath—is made to rejoice and blossom as the rose; the sweet graces of the Spirit spring forth, their activity steeped in sweet influence; the hard heart is made soft, tears of joy fill the eyes; while the love of Jesus, like some strange, unearthly sweetness, fill the soul.

JESUS ON THE MOUNT.

Mark the *tenderness* of this prince of teachers. While busily engaged in portraying, in a series of striking features, the most perfect and glorious character ever contemplated by the children of men; while laboring to fill in all the spiritual lineaments of those who were to be regarded as the children of the Most High, in whatever age they might live, wherever placed, or by whatever name known among men; while occupied with this *vital painting*, in which one false stroke would have shown Him to be an impostor, an opponent of the Law, and not its exponent, and would have led myriads astray in matters of vital importance between God and the soul—He turns aside to pronounce His blessing upon *each* feature as He traces it out, lest any of His people, not being possessed of the *whole*, should think themselves excluded from His description and its attendant happiness.

There was no refined speculation; no metaphysical crudity; no darkening of counsel by pompous verbosity; no taking off the sharp edge of truth by rhetorical blandishments; no playing with the imagination; no exciting the passions; no elaborate comment upon liberty and necessity; no cold disquisition upon the origin of moral evil; no studious effort to show His hearers they were responsible *so far and no farther*; no subtle distinction to tear His net and let the sinner escape: these things, the staple commodities in which many deal, while men sleep and perish before their eyes, found no place in the memorable sermon of Christ upon the mount. Oh, study it, ye laborers for the Lord, if ye would be wise and useful to your fellow-men! Observe how the best Teacher aims directly at the sinner's conscience, and at matters of the greatest moment between the soul and God.

JESUS EATETH WITH SINNERS.

"*This Man receiveth sinners.*" *This Man!* they had heard and seen enough to know He was *more*; but prejudice will close its eyes to the light, and pride will not see the character of Him whom it fears will not answer its expectations. He had done those works which none but God could accomplish; they had seen him open the eyes of the blind, and unstop the ears of the deaf; yet "this *Man*," say they, "receiveth sinners." Who can satisfy enmity or open the eyes of those who will not see? "We do not want Him to be more than we proclaim Him to be, and if we can accomplish it, others shall not believe that He is." Oh, vain attempt to hide the glory of Him who could not be hid, to spot the brightness of that sun which shall ever shine, and continue to rise and rise until the whole earth is filled with its glory! Poor Pharisee! when thou canst hide the sun with thy fingers, when thou canst pull the stars from their orbits, and lift the ocean from its bed, then thy enmity may prove Him to be a mere man, who said to the leper, "Be clean," and to the dead, "Come forth;" who, while he gathers together the outcasts of Israel, counts the number of the stars; whose feet, while they trod the ground-floor of time, were upon the neck of hell; whose fingers, while they lifted up the weak and the down-trodden, grasped the sceptre of universal government, and worked all things after the counsel of His own will; and who, while now He wears "a vesture dipped in blood," binds all the constellations of heaven around Him, as the silver-spangled curtains of His holy habitation.

JESUS AT THE WELL.

"*Never thirst!*" why? "These waters which I shall give will quench the dreadful fire from whence it springs!" Oh, marvellous waters! long had men toiled to put out the destructive fire which sin had kindled in the soul, but all in vain. Philosophy had tried her skill, but only made it burn more fiercely. Morality had poured forth its stream of aphoristic lore, but, like oil, it only seemed to nurse the flame. The philosophic oil had failed, the moral elixir had proved abortive, humanity still groaned, the fire still burned.

Poetry, too, all graciously arrayed, with measured feet, had sought to help, but all in vain. In vain the Castilian fountain had poured its crystal tide, for 'mid its sparkling eddies the flame appeared more bright. Oh, who can quench this dreadful fire? "*Drink*," says the Savior, "and the thirst shall die. *Drink*, and thy soul shall live a life philosophy has never known, and this world's ethics never has embraced; a life akin to angels,—to Mine—to God's; a life that shall never fail, for the water I will give shall be *in* the soul." Here Jesus speaks like the teacher sent of God. He goes right to the centre of man's woes; He puts His finger on the fountain head of all his miseries: "'Tis *here*," He says, "*in* him; and the water I will give shall flow as far."

Many of the learned in every age had tried to make man clean. Some washed his hands, and some his feet, but still the spots appeared. Some said, "Look to his *head*," and so they toiled, compounded creeds, sententious rules and moral axioms, but still the feet went wrong; spots would appear upon the teacher and the taught. This external labor reached no man's case. "Here I begin," says Christ; "here I *can* begin: 'The water I shall give shall be *in* him;' right to the very centre of his being it shall force its way, and cleanse the very fountain of his woes. Through every avenue of his soul I'll pour a stream of life and purity, to fertilise and bless. Yea, in his heart My grace shall dwell, an ever-springing well of joy and peace."

These passages make known the character of the work. It is full of good for the christian, and it must lead one who is not a christian to serious reflections. Sold by H. H. Bancroft & Co.

LITERARY ITEMS.

DICKS' SHAKSPEARE.—In response to inquiries concerning the history of this most wonderful edition of Shakspeare, Mr. Dicks writes as follows to the London *Bookseller*: "The 300th birthday of Shakspeare first gave me the idea of issuing two plays for one penny, of which I sold about 150,000. On completion of the work, I published it in a complete volume, bound in cloth, price 2s, of which I sold 50,000 copies. Having achieved great success, I decided upon issuing a 'Shilling Shakspeare,' or rather a 'shilling edition,' in a wrapper printed on thin paper; but, while making arrangements, Mr. Holton's announcement appeared. I immediately issued my 2s edition for 1s, sewed in a wrapper, of which I have sold about 700,000 copies in all up to this time. Therefore, taking my issue of Shakspeare from the first, I must have published and sold nearly 1,000,000 copies. It is my intention to issue an edition of my Shakspeare at either 8d., or, if possible, at 6d."

IT is the opinion of our wisest bookmen that a new era of cheap literature has begun in this country, and that low-priced books will henceforth make up the bulk of American publications. Such a state of things must come sooner or later as the inevitable result of our system of universal education, and there is good reason for believing that it is already near at hand. The remarkable success of the Appleton's enterprise in affording the works of Scott, Dickens, and other popular writers at a merely nominal price, has demonstrated the possibility of publishing good cheap books at a profit, and this example is likely to receive very extensive imitations.—*American Bookseller.*

ON the occasion of a recent visit paid by Alexander Dumas to the office of the *Figaro*, that illustrious writer was seized by the staff of the paper, and locked up, with pens, ink, and paper, in order that an article might be extracted from him, as the condition of his release. At the expiration of an hour Dumas handed to the editor, five articles, and was immediately set at liberty. The first of these articles has appeared in the *Figaro*, and we can easily conceive that it was written in twelve minutes. The subject is hydrophobia, for the cure of which Dumas advises everybody to carry on their persons a small bottle of "phenic acid" wherewith to cauterize the wound. —*Every Saturday.*

THE *Nation* does not think much of the new book, "Where is the City," and thinks "Israel Knight, just under his majority and fresh from college," must have been fresh from a business college, "from the degree of subtle appreciation of the niceties of his native tongue which his style betrays, and the fine commercial air which pervades his correspondence and his 'notes' on theological topics."

THE sums paid for cable messages by the English Press for a year, amount to a total of $7,000, against $70,000 paid by the American Press. The London papers only give the briefest telegraphic items, and never publish the long cable dispatches on public affairs that are common with the leading journals of New York.

ALLUDING to the efforts of the New York dailies to popularize the sports of the race course *The Methodist* sententiously remarks: "We wish there was one daily in New York that a Christian father could put into the hands of his children."

A NEW YORK paper has a new motto for a stage driver which is classically apt: *Jam forte in omnibus.*

Educational.

Education in Proverbs.

Among the most valuable instruments of education are proverbs. They teach prudence and knowledge of the world. In this they are without rivalry. "*In a field of melons, tie not thy shoe*," warns against the appearance of evil. "*Who paints me before, blackens me behind*," shows the true value of flattery. Again, to comprehend a proverb often requires a mental effort of generalization. "*If I have lost the ring, yet the fingers are still here*," is a mere truism, when left to itself. It teaches indifference to the loss of the tokens of prosperity, so long as the means of prosperity remain, only when made general by an action of the mind. Again, proverbs constantly furnish discipline and food to the faculty of imagination. Take the proverbs, "*God tempers the wind to the shorn lamb*," and "*Whom a serpent has bitten, a lizard alarms*." To comprehend these fully requires an exertion of the comparative power of the intellect—that power by virtue of which when one thing is presented an analagous thing is reproduced. But this is imagination. Finally, proverbs cultivate expression. They are generally terse, and often highly idiomatic. "*Forewarned, forearmed*," is an example of the laconic; and "*Murder will out*" of the idiomatic. Teachers and parents, therefore, may be assured that they are forwarding the education of the young not slightly when they encourage them in learning these specimens of the "wisdom of many and the wit of one."

C. R. C.

Scraps for an Astronomy Class.

VENUS VISIBLE AT NOONDAY TWO HUNDRED YEARS AGO.—A correspondent of the London *Times*, writing from Greenwich, lately explained that a noonday star or comet signalized by a previous correspondent of the same journal is the planet Venus, not uncommonly visible at noon at this time in her greatest brilliancy. The sight of the same planet on the 29th of May 1630, the day of the birth of Charles II. (says the *Pall Mall Gazette*), created a great sensation; it was seen as his father was proceeding to St. Paul's to give thanks for the Prince's birth; it was thought to be a new star, and an omen of bright promise for the new born Prince. Cowley Walley and Dryden have all celebrated this supposed auspicious star after Charles II.'s restoration.

No star amongst ye all did, I believe,
Such vigorous assistance give,
As that which, thirty years ago,
At Charles' birth, did, in despite
Of the proud sun's meridian light,
His future glories and this year foreshow.
—*Cowley's Ode on the Restoration.*

His thoughts rise higher when he does reflect
On what the world may from that star expect,
Which at his birth appeared to let us see
Day for his sake could with the night agree.
—*Waller's Poem on St. James Park.*

Or one that bright companion of the sun,
Whose glorious aspect sealed our new born king,
And now, a round of greater years begun,
New influence from his walks of light did bring.
—*Dryden's Annus Mirabilis.*

Lilly, the astrologer, identified the phenomenon as the planet Venus.

THE crew of a man-of-war once saw a comet, and were somewhat surprised and alarmed at the appearance. The hands met and appointed a committee to wait on the commander to ask his opinion of it. They approached him, and said: "We want to ask your opinion your honor." "Well my boys, what is it about?" "We want to enquire about that thing up there." "Now before I answer you, first let me know what it is." "Well, your honor, we have talked it over, and we think it is a star sprung a leak."

Orion.

Three worlds he wears as bosses on his belt,
Never ungirded; mortals theirs lay down;
Great Aaron his; Moses in Moab felt
The Sovereign Hand his high estate discrown;
Kings and great men, or clad in mail or gown,
Disrobe and die; but lo! from year to year,
Those banded worlds to mutual distance own
Which Adam saw when Night came up the sphere.
Gods's golden compasses their measure still.
Night unto night by this great symbol shows
Far forth this counsel: Ever be the same,
Planted by God, and fear no shame, no ill.
"Canst loose Orion's bands?"—this to thy foes,
O faithful soul! nightly the heavens proclaim.
—*Atlantic Monthly.*

UTICA, N. Y., July 15.—This morning, at 2 o'clock, Prof. Peters, of the Lichburg Observatory, Hamilton College, Clinton, discovered another asteroid, which makes 100 discovered. It had the appearance of a star of the 11th magnitude, and its position was 2 hours 9 minutes 10 seconds in right ascension, 15 deg. 4 min. south declination, with a retrograde southern daily motion of about 36 secs. of time and 6 minutes in arc respectively.

DETROIT, July 13.—A planet hitherto unknown was discovered by Professor James C. Watson, of the Detroit Observatory at Ann Arbor, Michigan, on the night of the 11th inst., in the constellation of Capricon. It shines like a star of the eleventh magnitude, and is situated in the right ascension three hundred and seventeen degrees and forty three minutes, and in declination fifteen degrees and forty-eight minutes south.

Personal.

REV. W. A. P. MARTIN, D. D. Professor of Political Economy and International Law in the Imperial College at Pekin, arrived in this city on the last steamer from China. He sailed on Friday for New York, whence he will soon sail for Europe, and will make the trip across Europe and Asia to Pekin by the Overland route.

MR. C. C. COFFIN, better known as "Carleton," the correspondent of the *Boston Journal* arrived on the last steamer from China and proposes to spend some time in California. He is on his way around the world.

REV. GEO. MOOAR, of Oakland received from Williams College, the Degree of D. D. at the late Commencement. The same College conferred the title of A. M. upon Hon. W. A. Dana, of this city.

REV. O. GIBSON, formerly Missionary to China, who is to take charge of the Methodist Mission among the Chinese in this city, arrived last week from New York.

REV. E. E. RUSS AND REV. T. DERRICK, Wesleyan preachers from Canada, preached in this city last Sunday. They are on their way to British Columbia.

REV. ELI CORWIN is now in Honolulu, making preparations for taking a final leave of the islands where he has labored so long and successfully.

REV. B. S. MCLAFFERTY has been entertaining the people of Petaluma by a lecture on China, from which country he has just returned.

SENATOR STEWART and HONS. CHAS. DE LONG, GEO. C. GORHAM, and D. R. ASHLEY, have arrived in Nevada from the East.

MR. NOAH BROOKS, managing editor of the *Alta*, is the President of the Young Men's Christian Association, for the next year.

REV. S. P. WHITING has accepted a call from the First Presbyterian Church, Mendocino, Cal., to become their pastor.

M. CROSETTE, French Consul at this port has been appointed Consul General of France for the Pacific Coast.

REV. H. H. DOBBINS has returned to his home at Sutter Creek, after a visit of a few weeks in Sonoma County.

REV. DR. MCKAIG, of Marysville, is having a summer vacation of a few weeks, and his church is closed.

MR. GEO. M. HANSON, of Yuba City, will soon commence the publication of a Republican paper in Gilroy.

DR. NEWCOMB, of Oakland, has gone to Honolulu, where he will make a short visit before going East.

JUDGE CROCKETT will deliver the Annual Address before the State Agricultural Fair in September.

REV. A. SIMPSON, of Corvallis, Oregon, has been on a trip in the mountains, in search of health.

MR. HIRAM PIERSON, one of the old settlers of California, died at Alameda on the 12th inst.

HON. A. J. MOULDER has been elected Secretary of the Board of Regents of the University.

HON. EUGENE CASSERLY addressed the Democracy at Platt's Hall on Wednesday evening.

HON. J. W. COFFROTH was nominated for Congress at Sacramento, by the Democrats.

PROF. R. W. RAYMOND, of the American Journal of Mining, lectured last week in Austin.

REV. A. PARKER, formerly of Los Angeles, preached at Nevada City last Sunday.

MAJOR JACK STRATMAN has returned to this city from the East.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

Gov. H. H. Haight,	Hon. H. P. Coon, M.D.,
Rev. C. Wadsworth, D.D.,	H. H. Bancroft, Esq.,
Rev. Jas. Eells, D.D.,	J. D. Thornton, Esq.,
Rev. H. M. Scudder, D.D.,	F. Henderson, Esq.,
Rev. Thomas Frazer, A.M.,	R. B. Woodward, Esq.,
Rev. F. Buell, A.M.,	H. M. Newhall, Esq.,
Jas. B. Roberts, Esq.,	N. G. Kittle, Esq.,
A. Campbell, Esq.,	Erwin Davis, Esq.,
A. J. Ralston, Esq.	

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Practical and Scientific.

Agricultural.

Profits of Farming.—No small experience and some observation, convinces me that circumstances being equal, farming will furnish as ample a compensation for labor, as ample a dividend upon capital invested, as the common trades which men engage in, and even the ordinary pursuits of mercantile and commercial life. Of course I except all extraordinary cases of good fortune, and all matter of gambling and speculation.

The returns of most crops strike one sometimes with astonishment, and would, if taken as a test, lead to the most delusive speculations. A grain of seed sometimes returns one hundred fold! and this being sown a second year, would perhaps give ten thousand fold, and so on in geometrical ratio. Seventy bushels of potatoes planted, will yield four hundred, or twenty for one; a bushel of wheat sown will yield thirty bushels, or thirty for one; a peck of corn planted will yield sixty bushels, or two hundred and forty for one; a pound of carrot, beet, or ruta baga seed, will produce six to nine hundred bushels, worth one hundred dollars.

The proceeds in these cases seem to be enormous, yet they are constantly realized, and that too in many cases of comparatively small expense. But no confident conclusions of the exact profits of farming are to be drawn from such results as these; so many untold circumstances of abatement enter into the cost, that if these were the only elements given in the case, the solution of the problem would give the most erroneous and deceptive results.

We are not to look to agriculture for any extraordinary or sudden gains, as, for example, the drawing of a prize in a lottery, or a shrewd speculation in stock.

If we will take ten merchants with a fixed amount of capital, and ten farmers with the same amount, we will find that at the end of twenty years the farmers have the greatest increase of capital, and that the increase is more evenly divided among them than among the merchants. Farming is also far safer and more certain to secure a competency than mercantile pursuits. I venture to say, that twenty merchants fail in business to one farmer, and this ought to open the eyes of young men with small capital going into business—*Germantown Telegraph.*

Iron—Its Beneficial Effects on Fruit Trees.—A correspondent of the Massachusetts *Ploughman*, says that in the year 1849, he planted an Early Madeline pear tree. "It grew finely, and commenced blossoming when two years old, but did not yield a bushel of fruit in five years. The fruit would set well and then fall off. He tried various experiments, such as tying down the branches to the ground to check the flow of sap, but all without effect; and, as he had about one hundred and fifty trees, he thought he had made a very poor investment. He read the report of a viewing committee at some fair, which gave him some encouragement. It was this: 'There were exhibited some very fine specimens of pears, and it was ascertained that the tree stood where it received the sweepings of a blacksmith shop, which led to the conclusion that iron was beneficial to the pear.' Acting on this hint, he procured a quantity of turnings and filings from a machine shop, and, as he plowed his garden, scattered the iron in the furrows, depositing about a bushel of it around the Madeline pear tree. The next spring the tree blossomed as usual, and about a peck of the fruit came to perfection. The second year the tree was loaded with as nice Madelines as ever were grown. The tree has produced full crops ever since. One year it bore sixteen dollars worth of pears. He tried the iron on several other trees with very good effect."

Early Rising—Its Advantages to the Farmer.—A young farmer found that he was getting reduced in circumstances. He went to a friend to ask his advice. This friend, with a very grave face, said:

"I know of a charm that will cure that. Take this little cup; drink from it every morning of the water you must get at such a spring. But remember, you must draw it yourself, or the charm will be broken."

Next morning the farmer walked across his fields, for the spring was at the further end of the estate, and spying a neighbor's cows which had broken through the fence, and were feeding on his pasture, he turned them out and mended the fence. The laborers were not yet at hand. When they came, loitering after their proper time, they were startled at seeing "master" so early.

"O!" said he, "I see how this is; it comes of my not getting up in time."

This early rising soon became a pleasant habit. His walk and cup of water gave him an appetite for breakfast, and the people were, like himself, early at work. He soon acknowledged that the advice his friend had given was as good as it was simple.—*N. Y. Observer.*

A Cruel and Useless Practice—Bleeding Calves to Make their Flesh White.—The cruel and unnecessary bleeding of calves before they are killed to make their flesh white, which has long been prohibited in many parts of Europe, is, as well as other cruel treatment of animals, now prohibited by the laws of this State, under a penalty in each case of imprisonment not over one year, or fine not over $250, or both fine and imprisonment. We must prosecute, if necessary, but would gladly avoid such a necessity.

Why should these poor animals be bled from one to three days before they are killed? If they do not require bleeding in France and England, why here? I have personally, and through friends, consulted many of our best physicians, and found but one opinion, namely: that this bleeding process is worse than useless, because: 1st, it tortures the animal; and 2d, it takes away the nutritious qualities of the meat, making it indigestible and unwholesome. Let every man, then, decline to buy veal which has been made white by torture, and this torture will cease at once, without a single prosecution.—*Our Dumb Animals.*

Railroads—What they do for Farmers.—To haul 40 bushels of corn 50 miles on a wagon would cost at least $12 for a team, driver, and expenses. A railroad would transport it for $4 at most. Allowing an average of $40 bushels per acre, the crop would be worth $8 more per acre, or 8 per cent. on $100. As the relative advantage is about the same for other crops, it is clear that a railroad passing through a town would add $100 an acre to the value of the farms. A town ten miles square contains 64,000 acres. An increase of $100 an acre is equal to $6,400,000, or enough to build 200 miles of railroad, even if it cost $32,000 per mile. But 200 miles of railroad would extend through 20 towns ten miles square, and cost but $5 per acre, if taxed upon the land. These figures are given merely as an illustration. If the farmers had taxed themselves to build all the railroads in the country, and given them away to any companies that would stock and run them, the present increased value of their lands would well repay the outlay.—*Exchange.*

Saw-dust as Manure.—The common practice of throwing this article into the streams on which saw-mills and shingle-mills are situated is reprehensible. It would not pay to spread it upon a muck swamp, but upon any sandy land, or light, gravelly loam, deficient in vegetable matter, it would prove a good dressing, and in time would show good results. The best use we have ever seen it put to was bedding for animals in stables. It is an excellent absorbent, and will keep cows clean, even better than straw. It is also a very light, handy article in the hennery, and more cleanly to handle than muck in common, open, privy vaults. The article is merchantable in cities, and is quite extensively used upon floors in eating saloons, and for other purposes. At country mills it can generally be had for the carting, as mill owners are glad to be rid of it. It is a good substitute for straw, and this is now worth so much for manufacturing purposes, in many parts of the country, that no thrifty farmer can afford to use it for bedding.—*American Agriculturist.*

Fragments.—A farmer named Parkhurst, in Fayette County, Iowa, broke his arm in the spring, when about commencing his wheat sowing. His neighbors made a "bee" for his benefit, and put in 50 acres in a single day.

The salt marsh lands of New Jersey comprise 295,476 acres. Of this 20,000 acres have been reclaimed, at an average cost of about $12 per acre, and are now the most productive in the State.

To make ginger biscuit, mix one pound of flour, half a pound of fresh butter, half a pound of powdered loaf sugar, three-quarters of an ounce of ground ginger, two eggs; bake five minutes in a quick oven.

Cows make the richest butter when they first go to pasture in the spring; they produce the hardest but when they feed on on dry food. Butter made during the fall is best for keeping.

Worth Knowing—Wolf in the Tail.—Mr. John Thompson, of Spring Gulch, near Big Oak Flat, Tuolumne County, having lost several fine cows by a disease known as "wolf in the tail," succeeded in saving one by the following remedy, and wishing his neighbors to have the benefit of it also, gave it to us for publication. The worm, or wolf, had eaten the tail four inches from the end, and the cow appeared likely to follow her predecessors to the bone yard. Mr. Thompson split the tail to the bone, filled it with soot and salt, and the next morning the cow was well. The remedy is simple, and always on hand. Should any of our readers have a cow similarly affected, we recommend them to give it a trial.—*Union Democrat.*

Blind Staggers—How to Cure it.—In cases of blind staggers, *The Stock Journal* says, the first thing to be done, is to tap the jugular vein, and take as much blood as will restore the horse the use of his limbs. Then use the stomach pump, or give medicine for the bowels, as the case may need.

Mining.

Increase of Heat in our Mines.

The increase in the heat of our mines is now beginning to give many of our mining companies more trouble, and is proving a greater obstacle to mining operations in those levels lying below a depth of 1,000 feet than any veins or "pocket" deposits of water yet encountered. A number of the leading companies on the Comstock are now engaged in putting in engines to be used expressly for driving fans for furnishing air to the lower levels, forcing it through large tubes of galvanized iron. With this great increase of heat in our mines comes a great decrease of water; in fact, in our deepest mine—the Bullion, which has attained the depth of 1,200 feet, not a drop of water is to be seen; it is as dry as a lime-kiln and as hot as an oven.

In the lower workings of the Chollar-Potosi mine, which are a perpendicular depth of 1,100 feet below the surface, the thermometer now stands at 100 degrees—a frightful heat to be endured by a human being engaged in a kind of labor calling for severe muscular exertion. Here, also, we find the water to have decreased till there is at the present time a very insignificant amount, it being necessary to run the pump but four hours out of the twenty-four.

We might give other instances illustrative and corroborative of what we have stated, but deem the evidence afforded by two of our deepest mines, situated some considerable distance apart, sufficient. Does it not appear likely, judging from the present situation in the deepest levels of our mines, that the great Sutro Tunnel, if ever constructed, is more likely to be found useful as a means of entrance for fresh air than of exit for water? The "situation," if we may so call it, so changes in our mines that we hardly know one month ahead what would be of advantage to us. Some months since we supposed we were to be drowned out of the lower levels of our mines, or rather prevented from ever attaining any very great depth, by a tremendous influx of water. Now we find no water at all—or at best a trifling quantity—but in its place hot air. Doubtless this is a change for the better. It will be much

easier to force a column of light and elastic air a thousand feet downward than to lift a column of water the same distance.

Should it prove a fact as now seems probable, that the water in our mines is confined to a certain stratum or strata at no great depth from the surface, say between the depths of 4 and 900 feet, and should it be found practicable to ventilate the deep workings of our mines by forcing down air, some of our leading companies are likely to reach a depth much below the point where the Sutro Tunnel will tap the lead before it is completed, even though work upon it should be at once commenced. Should the Choller-Potosi Company continue downward with their shaft at the same rate of speed that has distinguished their progress for some months past, they would in less than two years attain a point below that of the intersection of the Sutro Tunnel with the Comstock lead. Whether another water stratum exists in the 800 to 1,000 feet of hot, unexplored region of rock lying between our present lower levels and that point on the lead which would be cut by the Sutro Tunnel no man can know.—*Territorial Enterprise.*

Chances Still Good—Improved Conditions.

Much time has been uselessly wasted in searching after gold in localities where with present experience none would think of looking for it; while, as we have seen, a great deal of both time and money was spent in vain endeavors to wash the auriferous earth by means and methods wholly impracticable. With incredible toil the early miner pushed his researches high up into the Sierra, far beyond what is now known to be the furthest limit of the gold-bearing belt, seeking after the illusory sources whence had issued the deposits strewn along the rivers below. Long and wearisome journeys were made away into the depths of the gloomy wilderness over the crests of the snowy mountains, and sometimes out on the hot and arid deserts beyond, in search of mythical mountains composed mainly of the precious metals, or lakes, along the shores of which the sands glittered with virgin gold.

Taught by the mistakes of his predecessors, the modern prospector, avoiding these errors, is enabled to insure for his expenditure of labor and means, if not always more remunerative, at least more certain returns; while, as regards comfort and health, the mining community of California enjoy these blessings in as full measure as almost any other, whether we seek for them in this country or elsewhere.

It cannot, indeed, be said that the opportunities for making "big strikes," as they are termed, or even large wages, are as good now in the placers of this State as they were at first. This is especially true to the man of small means, more particularly if he propose to spend but a short time—as, for example, a year or two only—in the country. But where the new comer is content to remain a series of years, if necessary, and, proceeding to purchase or otherwise procure an interest in a productive claim, labors diligently, observing sobriety and economy, the chances for his amassing a moderate fortune, in the course of a few years, are fully as good now as ever before. To persons animated with these purposes, the placers of California are scarcely less inviting now than they were fifteen or twenty years ago; while, it may be safely affirmed, that to this class they offer inducements unequalled by any other country or field of labor in the world. Whoever can feel that, in the present altered conditions, he is amply compensated for the somewhat diminished chances for the speedy accumulation of riches, and the excitements incident to an early sojourn in California, may repair to this country with the full assurance that things, considered as a whole, have scarcely changed for the worse; there being still vast tracts of almost virgin mines, in certain parts of the State, open to occupation, while in the earlier settled and more populous mineral districts it is still an easy matter for good workers, or men with small means, to acquire ownership of valuable claims, either by location or purchase.—*Cronise's Natural Wealth of California.*

Metals in Process of Formation.—It is morally certain that gold, silver, copper, and other metals, are now in process of formation or deposition. Abandoned silver mines in Peru have been found rich in aborescent deposits of the metals on the walls of galleries unused for many years. A gold bearing region, after having been cleaned of the precious metal, gives good results after the lapse of only a few years. So with copper. In the Siberian mines, not only the precious carbonate known as malachite, but the metal itself, in a state of almost absolute purity, is deposited on the walls, roofs, and floors of galleries run under the earth's surface. In some places it appears in masses, and in others as tree-like formation, with trunk and branches similar to a delicate moss.—*Pajaronian.*

NOVELTIES.

How Paper is Made in China.

Most of the paper used in China is made from the bark of various trees and plants, and from the bamboo. The manufacture of bamboo paper is carried on extensively in the southern part of the country. In selecting stock from the bamboo plantations on the mountains, preference is given to the stems which are about to put out branches and leaves. Early the month of June the canes are cut into pieces from five to seven feet long, and placed in a pit which is supplied with water. After soaking for several weeks, the canes are beaten with mallets, in order to remove the thick bark and green skin. The remaining filaments, resembling a fine sort of hemp, are treated with lime and water raised to a certain temperature. After remaining in this bath for about a week, the filaments are removed, washed with cold water, passed through a ley made of wood ashes, and then placed in a boiler. This process is repeated until the material begins to grow putrid, when it is transferred to a mortar, and pounded into pulp by means of water-power; after which the mass is treated to bleaching powder. The pulp thus prepared is made by hand into sheets of various thicknesses by mean of a silk tissue within a light frame, upon which the workman places the required quantity of pulp. When the water has run off from the corners of the frame, he turns the sheet over to a large table, where it is pressed. Each sheet is afterwards raised and dried separately in a kiln made for that purpose. Printing paper is made from the finest part of the bamboo material. Another kind is made by mixing rice-straw with the bamboo fibre. A very strong paper used for window-blinds and other articles, which in this country are generally constructed of woven substances, is made by mixing 60 per cent. of the bark of a tree called *tchou* with 40 per cent. of bamboo material. Another variety of strong paper is obtained from the bark of the mulberry tree, and is used in the breeding and culture of silkworms. The same material, made from thinner pulp, is employed in the manufacture of umbrellas, fans, and firescreens. Bark paper which is to be painted is first passed through a solution of alum-water, to destroy the fine filaments which are commonly found on the upper side of the sheet as it lies in the silk tissue frame—the lower side in contact with the tissue being much more smooth. For many uses, when only one color is required, the material is added to the pulp.

Electric Clocks—A French Invention.—A novelty in electric clocks has just been invented in France by M. L. De Combettes. It consists of a long pendulum, on the lower portion of which is fixed the clock face. The weight is a sort of box containing an electro-magnet and armature, which on being attracted, disturbs the equilibrium of the pendulum, and consequently gives it motion. The movement of the armature is made to transmit motion to the hands of the clock in a manner somewhat similar to the mechanism of the alphabet dial telegraphic instrument. In order to make and break the electric circuit, the movement of the pendulum is made use of, one pole of the battery being connected permanently through the axis of suspension to one end of the electro-magnet, while the other pole is connected to a metal plate, against which a point of the pendulum, in connection with the electro-magnet, makes contact at every beat, thus completing the circuit and causing the electro-magnet to attract the armature. It is stated that only a weak battery is required, and that two Daniell's cells will keep it working for several months.

Compressed Leather.—A substance under this name is now manufactured in considerable quantity in England, and is prepared by first cleaning shoemaker's paste and cuttings from dust and foreign matters, and reducing to fine filaments. The cuttings of ox or other hides are also reduced to a fiberous mass. These combined together, in certain proportions, are mixed with water, to which has been added one per cent. of sulphuric acid, until the whole becomes a plastic mass, which is then pressed into moulds of the desired size and shape. After drying by steam, they are passed through rolls glazed on one side and roughened on the other, to produce the grain and flesh sides of the leather. About one pound of glycerine to the hundred weight is added to render the leather more flexible. For many purposes, as for soles and heels of shoes, etc., it is equal to natural leather, and can be sold at one-half the cost.

A New California Production.—The cultivation of the hop vine in California, is now becoming general. The attention of growers is asked to the value of the stalk after the hops are gathered. The stalk of the hop plant gives an an excellent fibre for cloth and cordage. It is to be steeped in water till there is a sign of loosening: then dried and bent till the woody centre separates from the outer fiber which comes off easily in long threads. It costs little to save this product, and it would be a valuable addition to our home resources.—*S. F. Times.*

Steel fot Railroad Tracks.—It is pretty well settled that steel is destined at no distant day to entirely supersede iron on railroad tracks. Steel rails not only endure the wear from friction better than iron ones, but they offer more resistance to the crushing action of the locomotives now in fashion.

Oakland.

No. 14 Stevenson's Block, cor. Montgomery and California,

San Francisco.

Buy, Sell, and Lease City and Ranch Property; Negotiate Loans; Collect Rents; Draw Legal Instruments, etc.

We invite special attention to our Agency from persons in the country, who are desirous of securing homes or investing in the flourishing city of Oakland; also of those who are offering Ranch Property for sale, or in quest of the same.

Our facilities as Real Estate Agents will enable us to furnish reliable information to our customers, and they may depend upon receiving from us thorough and careful attention to their business.

GENERAL SELECTIONS.

Government.

When the crew of a wrecked ship escape in an open boat, and the boat is crowded, the provisions scanty, and the prospect of making land distant, laws are instantly established and enforced which no one thinks of disobeying. An entire equality of claim to the provisions is acknowledged without dispute; and an equal liability to necessary labor. No man who can row is allowed to refuse his oar; no man, however much money he may have saved in his pocket, is allowed so much as half a biscuit beyond his proper ration. Any riotous person who endangered the safety of the rest would be bound, and laid in the bottom of the boat, without the smallest compunction for such violation of the principles of individual liberty; and on the other hand, any child, or woman, or aged person, who was helpless, and exposed to greater danger and suffering by their weakness, would receive more than ordinary care and indulgence, not unaccompanied with unanimous self-sacrifice, on the part of the laboring crew.

There is never any question, under circumstances like these, of what is right and wrong, worthy and unworthy, wise or foolish. If there *be* any question, there is little hope for boat or crew. The right man is put at the helm; every available hand is set to the oars; the sick are tended, and the vicious restrained, at once, and decisively; or if not, the end is near.

Now, the circumstances of every associated group of human society, contending bravely for national honors, and felicity of life, differ only from those thus supposed, in the greater, instead of less, necessity for the establishment of restraining law. There is no point of difference in the difficulties to be met, nor in the rights reciprocally to be exercised. Vice and indolence are not less, but more, injurious in a nation than in a boat's company; the modes in which they affect the interests of worthy persons being far more complex, and more easily concealed. The right of restraint, vested in those who labor, over those who would impede their labor, is as absolute in the large as in the small society; the equal claim to share in whatever is necessary to the common life (or commonwealth) is as indefeasible; the claim of the sick and helpless to be cared for by the strong with earnest self-sacrifice, is as pitiful and as imperative; the necessity that the governing authority should be in the hands of a true and trained pilot is as clear, and as constant. In none of these conditions is there any difference between a nation and a boat's company. The only difference is in this, that the impossibility of discerning the effects of individual error and crime, or of counteracting them by individual effort, in the affairs of a great nation, renders it tenfold more necessary than in a small society that direction by law should be sternly established. Assume that your boat's crew is disorderly and licentious, and will, by agreement, submit to no order;—the most troublesome of them will yet be easily discerned; and the chance is that the best man among them knocks him down. Common instinct of self-preservation will make the rioters put a good sailor at the helm, and impulsive pity and occasional help will be, by heart and hand, here and there given to visible distress. Not so in the ship of the realm. The most troublesome persons in *it* are usually the least recognized for such, and the most active in its management; the best men mind their own business patiently, and are never thought of; the good helmsman never touches the tiller but in the last extremity; and the worst forms of misery are hidden, not only from every eye, but from every thought. On the deck, the aspects of Cleopatra's galley—under hatches, there is a slave-hospital; while, finally (and this is the most fatal difference of all), even the few persons who care to interfere energetically, with purpose of doing good, can, in a large society, discern so little of the real state of evil to be dealt with, and judge so little of the best means of dealing with it, that half of their efforts will be misdirected, and some may even do more harm than good. Whereas it is the sorrowful law of this universe, that evil, even unconscious and unintended, never fails of *its* effect; and in a state where the evil and the good, under conditions of individual "liberty," are allowed to contend together, not only every *stroke* on the Devil's side tells—but every *slip* (the mistake of wicked men being as mischievous as their successes); while on the side of right, there will be much direct and fatal defeat, and, even of its measures of victory, half will be fruitless.

It is true, of course, that, in the end of ends, nothing but the right conquers: the prevalent thorns of wrong, at last, crackle away indiscriminate flame: and of the good seed sown, one grain in a thousand, at last, verily comes up—and somebody lives by it; but most of our great teachers, not excepting Carlyle and Emerson themselves, are a little too encouraging in their proclamation of this comfort, not to my mind, very sufficient, when for the present our fields are full of nothing but nettles and thistles, instead of wheat; and none of them seem to me yet to have enough insisted on the inevitable power and infectiousness of all evil, and the easy and utter extinguishableness of good. Medicine often fails of its effect—but poison never: and while, in summing the observation of past life, not unwatchfully spent, I can truly say that I have a thousand times seen patience disappointed of her hope, and wisdom of her aim, I have never yet seen folly fruitless of mischief, nor vice conclude but in calamity.—*Ruskin's Time and Tide.*

The Most Dangerous Enemy.

Nothing can be more respectable than the reluctance of a large portion of the press, and of a large number of public men, to raise questions which seem likely to make religious differences the basis of political differences, and thus transfer to this country the horrid strife by which for four hundred years some of the fairest portions of Europe have been desolated. But then we must take care that this delicacy is not carried too far. The relations of the State to the various religious sects are well settled in the minds of all, or nearly all, native Americans; but we are receiving from Europe every year half a million people or thereabouts, and we have already three or four millions more, in whose minds they are not well settled; in whose eyes the position of the the Catholic Church in America is not what she is entitled to, but what the numerical weakness of her followers imposes upon her, and is therefore, they hope and believe, only temporary. She has never yet accepted a position of equality with other sects, except as a matter of necessity. It has been imposed upon her, of course, in Protestant countries, but never in Catholic ones, except by the alienation of the body of the people or of the governing classes. In no country in which the government is in the hands of sincere and fervent Catholics does the Church admit that other sects should be tolerated, or admitted to an equality with her, or do the clergy refrain from seizing on every species of power which the State is willing to place within their reach. The Austrian Concordat of 1855 handed over to the bishops complete jurisdiction over the schools and over marriage, by an arrangement between a despotic monarch and the Pope, in defiance of the feelings and traditions of the people, and its abrogation within the last few weeks has been accomplished in the teeth of the threats and denunciations of the clergy. In France, Belgium and Italy they have been ousted forcibly, owing to the long association of the Church with various forms of political tyranny, but largely owing to the growth of scepticism and materialism or other forms of heresy amongst the intelligent classes. In Spain, where the great body of the people remain attached to the Church, the pretentions of the clergy and their treatment of Protestants and other dissenters have undergone little or no change since the sixteenth century. They do not burn or torture heretics, it is true, but this is because manners have been softened by the advance of civilization, not because they no longer believe that purely carnal treatment is unsuited to spiritual disease.

We confess we know of no reason for expecting that in this country either they will ever be content with anything less in the way of privilege or immunity than what they can secure by working on the hopes or fears of the Church. A striking illustration of what we may expect on this point has been afforded by the repeated attempts—one of which was partially defeated a month ago—to extract money from the State treasury for the support of the Catholic churches and schools. They defend this by saying that Catholics are taxed for the support of schools of which they do not approve and which they cannot use, or in other words, that they must counteract one wrong by another. But this argument will cover every attempt either to escape from the jurisdiction of the State government or obtain the control of State machinery; for the Catholic Church, even when placed in a position of perfect equality, is, as we have said, held to be deprived of her just rights. Every school, no matter who pays for it or attends it, which might be directed and supervised by a priest, and is not, is in Catholic eyes a standing offense against religion and virtue.

We feel satisfied, therefore, that a firm, temperate and persistent opposition to all pretentions on the part of the Church or its members to exemption from any laws or regulations to which other portions of the community are subject, cannot be begun a minute too soon, because the sooner it is begun—the earlier the Catholic population are familiarized with the idea that religious quality is the law of the country, which cannot be evaded—the less trouble will there be hereafter. The evil which threatens us, one of those which gains prodigiously every year, which is not met in its small beginnings, may produce a convulsion. We are not in a position here, and we hope never shall be, to seize a contumacious archbishop in the night, as the late King of Prussia did, and send him out of the country; and we have not that control over the clergy, and we hope never shall have, which the French Government secures by the Napoleonic Concordat. Whatever we do to kept them in bounds must be done by the pressure of public opinion and the rigid enforcement of equal laws.—*The Nation.*

The Contest in South America.

On the one side fights the huge, unwholesome empire of Brazil, ruled more villainously than any other country on the face of the earth, by a wretched oligarchy of Portugese slaveholders. In alliance with it is the lesser power of Uruguay, which is found in such disreputable company because fear prevents the friends of Paraguay from obtaining that control which otherwise they would inevitably assume in the national councils. The success of this godless alliance means the extension of slavery and tyranny. On the other side contends the little realm of Paraguay, whose success means freedom. Measuring by the strict standard of European development, we should regard the Paraguayans as semi-civilized. Without quarreling about the uncomplimentary phrase, it remains certain that they possess such virtues and such abilities as would ennoble the foremost rank of civilization, and render their stage, wherever it may be in the march of human progress, by no means despicable. The present dictator of Paraguay is Lopez, called the younger. Before him the elder Lopez, and before him Francia, held the reins of government. All three have been men of great intellect and extraordinary force of character. The nation seems to have been led as, by a divine instinct, to a recognition of their masterly qualifications for the conduct of affairs, and to an implicit reliance in their leadership; and has yielded to them an obedience probably unparalleled in the history of the human race, and seeming almost fabulous. Thus lately, at the command of Lopez, literally the entire population of the capital abandoned their city, and left only a desolate array of buildings as the reward of a toilsome and very dangerous advance of the invaders. The long warfare of the Hollanders and Zealanders against Spain is the only analogy worthy of the Paraguayans which history furnishes. Already this dauntless and inflexible race, comparatively few in number and poor in purse, has stricken many a deep home-thrust into the carcass of her effete and corrupt antagonist, and has driven it to the very last straits for men and money; to a reckless depreciation of its currency and to the extending of the bribe of freedom to a portion of its bondmen. Yet Brazil seems no nearer to success than before.

The last dispatches show the modern Leonidas still invincible, still calmly ready for the conflict, so soon as his foe can muster the courage to begin the threatened assault. Nothing much short of annihilation will subdue the Paraguayans, and that, we cannot but hope and believe, Brazil is utterly incompetent to accomplish. Meanwhile it is strange, certainly, and incomprehensible to see how the whole civilized world ignores the principles, the history, nay, almost the existence of this terrible warfare.—*Boston Advertiser.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

FAMILY READING.

The Two Armies.

As Life's unending column pours,
Two marshall'd hosts are seen,—
Two armies on the trampled shores
That Death flows black between.

One marches to the drum-beat roll,
The wide-mouthed clarion's bray,
And bears upon a crimson scroll,
"Our glory is to slay."

One moves in silence by the stream,
With sad, yet watchful eyes,
Calm as the patient planet's gleam
That walks the clouded skies.

Along its front no sabers shine,
No blood-red pennons wave;
Its banner bears the single line,
"Our duty is to save."

For these no death-bed's lingering shade;
At honor's trumpet-call,
With knitted brow and lifted blade
In glory's arms they fall.

For these no clashing falchions bright,
No stirring battle-cry;
"The bloodless stabber calls by night,—
Each answers, "Here am I!"

For those the sculptor's laurell'd bust,
The builder's marble piles,
The anthems pealing o'er dust
Through long cathedral aisles.

For these the blossom-sprinkled turf,
That flood the lonely graves,
When Spring rolls in her sea-green surf
In flowery-foaming waves.

Two paths lead upward from below,
And angels wait above,
Who count each burning life-drop's flow,
Each falling tear of Love.

Though from the Hero's bleeding breast
Her pulses Freedom drew,
Though the white lilies in her crest
Sprang from that scarlet dew,—

While Valor's haughty champions wait
Till all their scars are shown,
Love walks unchallenged through the gate,
To sit beside the Throne! —*Dr. Holmes.*

Little Plaid Sun Bonnet.

Little plaid sun bonnet, what do you hide,
Down in the grass by the sunny wall side?
Any short ringlets half out of curl?
Any round forehead as pure as a pearl?
Any blue eyes with a laugh bubbling over?
Any red mouth closing on a red clover?
Is it the wind makes you dance up and down?
Or is it a fairy head under your crown?

O, Earth is bright, by the glad summer kissed,
Millions of roses might scarcely be missed;
Acres of buttercups, growing so gay,
Cause not a sigh when their gold drops away.
Yet to my heart how your charms were destroyed,
All your fresh meadows how wintry and void,
Earth, should you lose from your beauty and pride,
Just what a little plaid bonnet can hide.

—*Springfield Republican.*

Our Neighbor.

There was a family moving into the brown cottage across the way. Mrs. Munroe informed her husband of the fact while he was eating his dinner.

"What kind of folks?" he asked, feeding baby Jennie with a strawberry.

"Real pleasant, nice looking people, John," continued his wife, "and they have the sweetest child you ever saw."

"Sweeter than our Jennie, hey?" asked the proud father, with a lurking smile at the corners of his honest mouth.

"Oh, different. She must be six years old and has curls falling to her waist; and such a face! It looks like an angel's. There are two or three other children, but they don't look like her."

"Well, I would run over and let them know that they have a neighbor, and offer to do any little thing we can for them. We know how good it is to have kind neighbors."

"Yes, mother used to say we could do without friends better than without neighbors. I'll tell them they can get water from us until the pumps are in order there, for I know they are taken up."

But while Mrs. Munroe was washing up her dishes a sweet voice said at her elbow:

"Please, will you lend mother some matches?" and there stood the little girl from over the way.

She was, indeed, a beautiful child. Her brow wore that high, fine look, that makes one instinctively think of angels; but there was a flush on her face, and her breath came hot and hard. Mrs. Munroe noticed this and the drooping eyes, and asked if she were sick.

"Yes'm," answered the child; "and mother's down with it. She thinks may be it's fever. My head aches so badly, and brother Charlie cries all the time."

A dreadful fear came over Mrs. Munroe as she saw the child depart, and she rushed to the bed upon which she had laid her baby to take its afternoon nap. There was no fever there, but a sweet, placid sleep, and she involuntarily breathed an earnest "Thank God!"

Next to the brown cottage was a marble block, and in one of the marble dwellings it contained, lived the family of Mr. Greenough, a wealthy banker. They were rich and aristocratic, and the brown cottage, and its humble friend opposite, were spots on their domestic sunshine, for they were occupied by the families of working men, and with "such people" the Greenoughs had no tastes in common.

"Aping other people," said Mrs. Greenough, as the little girl from the brown cottage ran past their marble steps, playing hoop. "Look at those curls. The child would look much better with her hair cut off, and it would be much more suitable to her position."

"Define her position, Sophy," said her brother, maliciously.

Rut Sophy's only answer was a scornful toss of her head. She did not take enough interest in "such people" to talk about them.

The next morning a small sign of yellow pasteboard was visible on the brown cottage. Mr. Greenough came in with his face white with consternation.

"Pack your trunks as quick as possible. "The small pox is next door."

It was true. That loathsome disease had made its appearance there, and three members of the family were dangerously ill.

"Oh, John, it is dreadful," said Mr. Munroe to her husband. "If Jennie should take it."

"We won't think of ourselves at all. Jane is in God's hands; so are we. If we use all necessary precautions, there will be no danger. The Greenough's have left their house and gone into the country, but I think we are just as safe here."

For three days they heard no news. Then a very small coffin went into the house. The youngest one was dead.

Mrs. Munroe asked the doctor if there was anything she could do.

"Plenty," was the brusque reply. "They are dying for want of help, and cannot afford to pay for it."

The next day, after a discussion between John and his wife, a woman, deeply pitted, went into the brown cottage and began to nurse the inmates; but the little girl with curls, was beyond help, and that night she died and was carried away. Every morning a great pan filled with good food was placed on the gate-post just before day-break. Once an envelope containing a five dollar bill lay on top. No one knew positively whence it came, but it was noticed that John Munroe's wife baked a great deal.

Slowly the family drifted back to life, and the ticket was taken down and the house fumigated. Then the Greenoughs came back to their elegant home.

"Such inconvenience," murmured Mrs. Greenough, as she reinstated herself and silks in possession again. "It all comes of living next to such common people."

Such common people! Why, there is more heroism and real aristocracy among them than in all the generations of Greenoughs that ever existed. They could not prevent death, but they softened the pang. They could not bring back the dead, but they gave an honest, living sympathy to the living. Their cruse of oil will never fail. When John Munroe was brought home the other day with a broken leg, those people he had helped so well, spread him such a salve of sympathy and neighborly kindness, it extracted half the pain, and the bread he cast upon the waters has all come back again.

It is written of such as the Greenoughs, "It is easier for a camel to go through the eye of a needle than for a rich man to enter the Kingdom of Heaven."

The two Neighbors.

There were two men who were neighbors, and each of them had a wife and several little children who depended on them for support.

Now, one of the men was greatly troubled, saying, "If I die, or even if I fall sick, what will become of my wife and children?"

The same thought came also to the other father, but he let it go again, whispering to himself, "God, who knows all his creatures, and who watches over them, will watch over me also, and over my wife and children." And this man lived in peace, while the other knew neither rest nor joy.

One day when the latter, sad and cast down by reason of this fear, was working in the field, he saw some birds fly into a bush, come out, and then soon return thither. He approached it, and saw two nests, side by side, and in each were several little birds newly hatched, and still featherless. When he had returned to his work, he raised his eyes from time to time, and looked at the old birds going backward and forward, carrying food to their young ones. Presently, just as one of the mother birds was returning with something in her beak, a hawk seized her and carried her away, in spite of her struggles and piteous cries.

At this sight the man felt more troubled than before, for he thought, "The death of the mother is the death of the little ones. Mine have only me; what will become of them if I fail them."

All the day he was very sad, and when night came it brought him no relief.

The next day, on returning to the field, he said: "I will see how these poor little birds are; doubtless several of them have already perished."

So he went toward the bush, and looked into the nest. There he saw the birds, and not one of them seemed to have suffered from the loss of its mother.

He was exceedingly astonished, and hid himself to see what would happen.

After a little while he heard a faint cry, and perceived the bird of the other nest bringing with haste the food she had found, and this she divided between her own and the motherless little ones. There was enough for all, and the poor orphaned birds were not abandoned in their misery.

The man who had mistrusted God, told to his neighbor what he had seen, and the latter answered him:

"Why art thou troubled? God never forsakes his children. His love has secrets that we know not of. Let us believe, hope, and love, then we may go on our journey in peace. If I die before you, you will be a father to my children; if you die before me, I will be a father to yours. Or, if we both die while they are of tender age, their Father will be our Father, who is in Heaven."—*From the French of Lamartine.*

What Must You Do?

Reader, do you feel the slightest drawing towards God, the smallest concern about your mortal soul? Does your conscience tell you this day that you are not yet forgiven, and have not yet felt the Spirit's power, and do you want to know what to do? Listen, and I will tell you.

You must *go at once to the Lord Jesus Christ in prayer*, and beseech him to have mercy upon you, and send you the Spirit. You must go direct to that open fountain of living waters, the Lord Jesus Christ, and you shall receive the Holy Ghost. (John 7: 39.) Begin at once to pray to Jesus for the Holy Spirit. Think not that you are shut up and cut off from hope. The Holy Ghost is promised to them that ask him. Give the Lord no rest till he comes down and makes you a new heart. Cry mightily unto the Lord; say unto him, "Bless me, even me also; quicken me, and make me alive."

I dare not, for my part, send anxious souls *to any*

one but Christ. I cannot hold with those who tell men to pray for the Holy Spirit in the first place, in order that they may go to Christ in the second place, I see no warrant of Scripture for saying so. I only see that if men feel that they are needy, perishing sinners, they ought to apply first and foremost, straight and direct, to Jesus Christ. I see He himself says "If any man thirst, let him come unto me and drink. (John 8: 37.) I know it is his special office to baptize with the Holy Ghost, and that "in him all fulness dwells." I dare not pretend to be more systematic than the Bible. I believe that Christ is the meeting place between God and the soul, and my first advice must always be, *Go to Jesus, and tell your wants to Him.*

Reader, remember this, I have told you what to do. You are TO GO TO CHRIST, if you want to be saved.—*J. C. Ryle.*

Young Folks.

Nothing To Do.

"I have shot my arrows and spun my top,
And bandied my last new ball;
I trundled my hoop till I had to stop,
And I swung till I got a fall;
I tumbled my books all out of the shelves,
And hunted the pictures through;
I've flung them whence they may sort themselves,
And now—I have nothing to do.

"The tower of Babel I built of blocks,
Came down with a crash on the floor;
My train of cars ran over the rocks,
I'll warrant they'll run no more—
I have raced with Grip till I'm out of breath;
My slate is broken in two,
So I can't draw monkeys! I'm tired to death,
Because I have nothing to do.

"The boys have gone to the pond to fish,
They bothered me, too, to go;
But for fun like that I hadn't a wish,
For I think it's mighty 'slow'
To sit all day at the end of a rod,
For the sake of a minnow or two,
Or to land at the farthest an eel on the sod—
I'd rather have nothing to do!

"Maria has gone to the woods for flowers—
And Lucy and Nell are away
After berries—I'm sure they've been out for hours,
I wonder what makes them stay;
Ned wanted to saddle Brunette for me,
'I was thinking you'd relish a canter' said he,
'Because you had nothing to do.'

"I wish I was poor Jim Fosters's son,
For he seems so happy and gay,
When his wood is chopped and his work all done,
With his little half hour of play;
He neither has books nor top nor ball,
Yet he is singing the whole day through;
But then—he is never tired at all,
Because he has nothing to do."

—*Observer.*

A Traveler's Story.

"Now, uncle, you said you would tell us to-night some more about your travels in Eastern countries."

"So I did, Charles; and as you and your sister Mary seem quite ready to listen to me, I may as well begin at once. But as a story is of no great value unless it teaches a lesson worth learning, I will, while I seek to please you, try also to do you good.

"In our British lands we do not know much about lofty walls around our cities. We go to sleep at night without any fear of being aroused by an alarm that an enemy is at our door. Let us be thankful for our safe and quiet homes. In some Eastern cities it is quite otherwise. High and strong walls inclose the houses for defense, and those who work in the fields, or labor outside at trades, or are on a journey, have to pass in and out through the gates in the wall.

"It is usual to shut the gates at night, and to open them at daylight. A gun is mostly fired as a signal when the gates are closed and opened. Should there be any persons beyond the walls at the evening signals, they are shut out for the night, and must find a place of rest where they can.

"One day, when going through Egypt, I was in a small boat sailing down the far-famed river Nile. Sometimes I landed to look at the ruined temples on the side of the river, or to pluck the gay flowers that growed on the high banks. I was well aware that I had to reach the city that evening, for I was to sail to another country early in the morning. I am all in good time," said I to myself, as I plucked the flowers, or stood looking around me. Now one trifle and then another caused delay; and when the boat did move, it was allowed to drift slowly along.

"Soon the golden gleam of the sun was seen on the broad waters, warning me that it would soon set. Still I thought only of my pleasure, or that I could soon make up for the lost time. At last the sky began to darken, and I sprang up into the boat as if it had only just entered my mind that I might after all be too late. The hour for shutting the city gates I knew was not far off. The rowers pulled away at the oars, and as we got near the city, I jumped quickly ashore. I had to get my passports that night, that I might be ready to start by the ship in the morning. In some countries, Charles, no person is allowed to go away without a passport—that is, a permission to leave.

"I ran toward the gate; but, when within a short distance of it, I saw a flash, and then, in an instant after, the report of the gun was heard on the evening breeze. The hour had come; I was a few minutes too late. The gate was shut. I cast away the flowers I had gathered on my journey. They could not repay me for my delay and loss. The ship sailed early the next day without me, and I was left behind to blame myself for my folly.

"Such is a traveller's story. Will you listen to me while I tell you there is such a thing as being one minute too late in matters of higher concern. You may be too late for the railway or the steamboat, you may be too late for a party of pleasure, or to receive a bag of money; and you may suffer for your folly; yet another time may come when you may set yourself right again. But my dear children, do not forget that you may be too late for repentance—to obtain pardon—to enter heaven. You may not only be one moment too late but forever too late.

"Your life is like a journey. You may be so taken up with the pleasures that lie in your path, that you may loiter in your way. As I lost my time on the banks of the Nile, while gathering a few flowers, so it may be with you. You may be very busy in pleasing yourself, but what if you should not attend to the great concerns of your soul? It will be sad, indeed, if you let the days of your youth pass away, while you neglect to give your heart to Jesus. If you should not seek pardon through his precious blood, what will you do in the end? If you do not now 'strive to enter in at the strait gate,' and into the 'narrow way,' what will you do when you find that the 'door is shut?' You may think you have plenty of time; so many have thought. But when the shades of death have gathered over them, they have awakened to see their danger—when it was too late. The right and the best time is *now.* It may be the *only* time.

"There, Charles, I see you and your sister are ready to return home. You must not go till you have read to me the parable of the seven virgins, the twenty-fifth chapter of Matthew.

"And the door was shut!"

"Now, stop, those are solemn words, do not forget them."—*Chris. Instructor.*

Two Sides to a Story.

"What is the matter?" said Growler to the black cat, as she sat mumping on the step of the kitchen door.

"Matter enough," said the black cat, turning her head another way. "Our cook is very fond of talking of hanging me. I wise heartily some one would hang her."

"Why, what is the matter?" repeated Growler.

"Hasn't she beaten me, and called me a thief, and threatened to be the death of me?"

"Dear, dear!" said Growler; "pray what has brought it about?"

"O, the merest trifle—absolutely nothing; it is her temper. All the servants complain of it. I wonder they haven't hanged her long ago."

"Well, you see," said Growler, "cooks are awkward things to hang; you and I might be managed more easily."

"Not a drop of milk have I had this day," said the black cat; and such a pain in my side!"

"But what," said Growler—"what immediate cause?"

"Haven't I told you?" said the black cat, pettishly; "it's her temper—what I have had to suffer for it! Everything she breaks she lays on me—such injustice—it is unbearable!"

Growler was quite indignant; but, being of a reflective turn, after the first gust of wrath had passed, he asked, "But was there no particular cause this morning?"

"She chose to be very angry because I—I offended her," said the cat.

"How? may I ask?" gently inquired Growler.

"O, nothing worth telling—a mere mistake of mine."

Growler looked at her with such a questioning expression, that she was compelled to say, "I took the wrong thing for my breakfast."

"O!" said Growler much enlightened.

"Why, the fact was," said the black cat, "I was springing at a mouse, and I knocked down a dish; and not knowing exactly what it was, I smelt it, and just tasted it, and it was rather nice, and"—

"You finished it," suggested Growler.

"Well, I should, I believe, if that cook hadn't come in. As it was, I left the head."

"The head of what?" said Growler.

"How inquisitive you are!" said the black cat.

"Nay, but I should like to know, said Growler.

"Well, then, of the fish that was meant for dinner.

"Ah!" said Growler," now I've heard both sides of the story, I only wonder she *didn't* hang you."—*Original Fables.*

A True Story of Faith.

One bright afternoon last summer two little boys of my acquaintance started forth for a ramble in the green fields. They amused themselves for some time with a nice new chain which had been given to one of the boys, not long before, by his father. But, after a while, their attention was attracted in other ways; the ripe, red berries, the nimble squirrels, the gay butterflies, all, in turn, absorbed their little minds, and the new chain was left forgotten upon the ground.

At length both Freddy and Weston became tired of playing, and began to think about home, mother, and supper, and then they remembered the chain, and began to wonder where they could have dropped it. They looked about eagerly for a good while, but the chain was nowhere to be found. Finally, said little Weston,

"Let's pray, Freddy, and perhaps that will help us find the chain."

So these little boys kneeled down and repeated the Lord's Prayer, word for word, with the rather indistinct assurance that by so doing they should obtain help from above. They arose from their knees and renewed the search more diligently, but all to no purpose. They began to feel about discouraged, when little Freddie, who had kept up a perpetual thinking, said:

Look here, Weston, that wasn't the way to pray. We must pray for what we want; if we want God to help us find the chain, we must ask Him to."

So they both kneeled down once more, and their little trusting hearts went up to God in a simple, earnest prayer that He would help them find their missing treasure. And then they again commenced their search. They had gone but a short distance when the lost plaything was seen shining brightly in the green grass. They seized it eagerly, and ran home as fast as their little feet would carry them, to relate to their mother the story of the afternoon's adventure—the lost chain, the prayer, and its speedy answer.

May not children of a larger growth learn a lesson of simple faith from these little boys, and pray for what they want, remembering the promise, "Ask, and ye shall receive?"—*Children's Friend.*

D. Hewes,

RAILROAD CONTRACTOR.

News Summary.

PACIFIC COAST ITEMS.

The people in Pajaro Valley are making a renewed effort to build a railroad from Watsonville to a point on the Southern Pacific Road, 4 miles east of Gilroy, a distance of 14 miles. A company was formed last year, and $20,000 were subcribed, but the enterprise was dropped on account of the delay of the Southern Pacific, which company have now 20 miles of road ready for the rails. $80,000 additional capital is to be raised. The *Pajaronian* says:

"What is $70,000 or $100,000 to the people of Pajaro Valley—and we might include two-thirds of Santa Cruz and one-half of Monterey county—compared with the direct benefits they would derive from a road by which San Francisco could be reached in five hours?"

Between the outlet of the Truckee and Sugar Pine Point, near the shore, in Lake Bigler, is a remarkable natural curiosity. About three hundred yards from the shore the top of a pine tree shoots out of the water to the height of seven or eight feet, and of a diameter of about four inches. the tree is now dead, but appears to be firmly rooted in the bottom of the lake. The water around the tree is one hundred and fifty feet deep by actual measurement. No other trees or stumps can be seen near this one, nor even signs of such vegetation in the shallow water near the beach. The vicinity of this tree is a favorite resort for fishermen, who make fast to the trunk and cast their lines where the fish are plenty and cager for the hook.—*Virginia Trespass.*

The Mechanics' Institute Fair has now been in operation two weeks and is a decided success. In the size and convenience of the pavilion, the variety and arrangement of the articles exhibited, and in the number of visitors who are attracted by the display, this Fair far excels any thing of the kind ever held in this city. The receipts for the first week were over $20,000, and the building is still thronged with visitors day and evening.

We have good authority, the Democratic papers, for stating that a large part of the Union men of this State have gone over to the support of Seymour; it having been conclusively proved that Grant's true name is not Ulysses S. We learn also from the Union papers—also good authority—that most of the leading Democrats, being convinced of Seymour's insanity, will support Grant.

From the *California Teacher*, edited by Rev. O. P. Fitzgerald, we learn that the State Board of Examination may challenge comparison, for scholarship and character, with any similar body of men in the country. The following gentlemen constitute the Board: The Superintendent of Public Instruction, T. C. Leonard, W. J. Williams, A. L. Fitzgerald, H. N. Bolander.

The amount of business transacted at the Labor Exchange is by no means diminishing. Many orders for workmen cannot be supplied. It seems probable that the Labor Exchange will be a permanent institution as it certainly has already proved itself a useful one.

New gold mines have been discovered about 40 miles west of Laramie City, Dacotah. They are said to be the richest in that section.

Those of our people who so much dislike the Chinamen, find much fault with the treaty recently concluded with China.

Fifty houses are now being built at San Jose. The whole number erected during the season is estimated at several hundred.

The Odd Fellows at Haywood have commenced work on their new Hall. It will be the finest building in the place.

The Order of Red Men laid the corner-stone of their new Hall on Bush St. on Tuesday last with appropriate ceremonies.

Under the provisions of the School Law, Mendocino City has a school for Indian children, containing 15 or 20 pupils.

Two Cents per pound for hay, and five to six cents for Barley, are the present prices at Winnemucca Nev.

The National Italian Association has established a school in this city for the education of Italian children.

It is expected that the San Jose and Santa Clara railroad will be completed in less than three months.

$45 to $65 per month and board, is the wages paid to tracklayers on the Central Pacific.

Coal has been discovered on San Pablo Creek, Contra Costa County.

A Deep tunnel to drain all the mines at Grass Valley, is talked of.

WEEKLY MARKET REPORT.

Wednesday, August 19, 1868.

Flour—Sales of 5,000 bbls Superfine and Extra, in lots, mostly for export, current rates. We quote jobbing prices for city mills as follows: Superfine, in sks, ℔ 196 lbs, $5 25 @$5 50; Extra, in sks, $6 25@6 50.

Wheat—The market is apparently firm at $1 80@1 85 for good to choice. The sales are as follows; 1,300 sacks choice, in two lots, $1 85; 385 sks do, $1 85; 500 sks do, $1 85; 1,000 sks do, $1 82½; 2,000 sks do, $1 85; 1,500 sks do, $1 85; 1,000 sks do, $1 82½; 3,000 sks strictly choice, $1 87½; also, 8,000 sks from the same ranch, to arrive, $1 87½; 3,350 sks good shipping, prior to arrival, private. At the close, 1,000 sks fair, $1 77½; 1,000 sks good shipping, $1 82½; 2,000 sks do, $1 82½ ℔ 100 lbs.

Barley—Under a speculative inquiry, prices have advanced to $2 11@2 20 for new. The sales are 1,600 sks, part Chevalier, to arrive, $2 20; 380 sks (yesterday), $2 05; 250 sks ordinary, $2 10; 318 sks, choice, $2 17½ ℔ 100 lbs.

Oats—Receipts continue light. Sale of 200 sks, strictly choice, $2 60; otherwise the range of the market is $2 25@$2 50 ℔ 100 lbs.

Potatoes—Sales of 500 sks Mission, in lots, 87½@95c ℔ 100 lbs.

Onions—Sale of 100 sks good Yellow, $1 50 ℔ 100 lbs.

Corn—None in first hands. Jobbing at $2 50@2 60 ℔ 100 lbs.

Rye—Thus far the invoices of new have gone into store; quotable at about $1 75 ℔ 100 lbs.

Buckwheat—Entirely nominal; say $1 62½@$1 75 ℔ 100 lbs.

Beans—The market is steady at the following jobbing rates for first quality: Bayo, 5c; Butter, 6½c; Pea 12½c; Small White, 8½c; Pink, 6c; and Red, 3c ℔ lb.

Bran—Sales of 100 tons, in lots, part from the mills, $19 @$20 ℔ ton.

Middlings—Are quiet at $40 for fine and $32 50@35 ℔ ton for feed descriptions.

Oil Cake Meal—Meets with fair sale at $30 ℔ ton, as the jobbing rate.

Hay—30 tons ex *Traveler*, prior to arrival, private. The range of the market is $10@15 ℔ ton, with but little offering from first hands.

Dairy Products—Fresh roll Butter is steady at 45@47½c; California pickled, 37½@45c, and California firkin, 34@35c; Cheese, 14@16c for California dairies, and 17@18c ℔ lb for Eastern dairies; Eggs, 45@47½ for Hen, and 40@45c ℔ doz. for Duck.

Poultry—Live Turkeys are quoted at 20@21¢; dressed do, 22@24c ℔ lb; Hens, $8@8 50 ℔ dozen; Roosters, $6 50@$7 50 for large size; Spring Chickens, $5@9; Ducks, $4@5 50 ℔ doz; Geese, $2@2 25 ℔ pair; Venison, scarce, 10@12½c ℔ lb.

Provisions—Cured Meats of all kinds are firm at improved figures. California smoked Bacon is jobbing at 14½@16c; Oregon do, 14½@15c; California Hams, 16½@17½c; Oregon do, scarce, 48c; CaliforniaLard, 13½@14½c; Eastern do, nominal, 12½@13c ℔ lb.

Wool—Sales since the 15th of 3,000 lbs spring (mostly Southern), and 10,000 lbs fall. The above lot of spring, we believe, clears the market of that clip. The season has closed much earlier than last year. The fall clip is beginning to arrive in small lots, and is nominally held at 13@13½c; a very choice lot might bring 14c ℔ lb.

Hides—Sales since last Wednesday aggregate 850 California dry at 14@15c for 23-lb weights and upwards, add 14@15c for weight under 23 lbs. California salted are still dull at 12½@14c for heavy, and 12½@15c for light. The invoice of Mexican per *Herminia*, we believe, is still on the market.

Tallow—Good to choice Beef is quoted at 7½@7¾c, with sales for the week of 30,000 lbs at 7½c.

San Francisco Cattle Market.

The supply continues to keep pace with the demand, and hence the market rules steady.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ℔ lb.
do 2d do 6@7c ℔ lb.
Veal—Ranges from 8 to 10c ℔ lb.
Mutton—Is steady at 6@6½c ℔ lb.
Lamb—In fair demand at 8@9c ℔ lb.
Pork—Undressed, 4@5½c; dressed, 6½@8½c ℔ lb, outside figures for milk or grain fed.

MARRIED.

At Valley Ford, Sonoma County, on the 13th inst., by Rev. Thos. Fraser, Hugh Gaston and Miss Ellen Gavin, all of Sonoma County.

Webster's Unabridged Dictionary.

3,000 Engravings. 1840 Pages. Quarto.

TRADE PRICE, TWELVE DOLLARS.

The new Webster is glorious—it is perfect—it distances and defies competition—it leaves nothing to be desired.—*J. H. Raymond, L.L. D., President Vassar College.*

Webster's Unabridged—Illustrated.—In all the essential points of a good Dictionary, the work is one which none who read or write can henceforward afford to dispense with.—*Atlan. Monthly.*

Webster's Unabridged—Illustrated.—"Viewed as a whole, we are confident that no other living language has a dictionary which so fully and faithfully sets forth its present condition as this last edition of Webster does that of our written and spoken English tongue.—*Harper's Weekly.*

"Dry as a Dictionary."—That phrase must pass away. Look into the elegant quarto edition of Webster's Unabridged; see the three thousand illustrations, handsomely engraved, interesting and instructive pictures. But this is only one of a hundred or more improvements made in the recent edition, worth mentioning to our readers. No studious reader can afford to be without it, or will hesitate to buy it upon examination.—*Mining Press.*

This seemingly dry and certainly ponderous book has its peculiar charms. Here is collected and tersely set down a vast quantity of various and useful knowledge, such as is indispensable to educated men and women. Here an hundred and fourteen thousand words, defined with clearness, fullness, precision, and wealth of illustration, that denote the soundness of scholarship, and the most entire fidelity to laborious details. Altogether, the work is a marvelous specimen of learning, taste, and thorough labor. We praise it heartily, because we believe it deserves the heartiest praise.—*New York Mirror.*

Storehouse of Knowledge.—Webster's new, Illustrated Unabridged Dictionary.—This vast storehouse of knowledge has received the commendation of all classes, from the child who loves to look at "the big picture book" to the crowned head. Peasants and Presidents, the ruler and the ruler, have prized and praised it.—*Ad. Herald.*

Webster's Unabridged, Illustrated.—Wherever it goes, it invokes praise and wonder. And where has it not made itself known? In no land where literature exists and has its votaries. In the Paris exhibition, it stands out alone, in uncontested merit. Throughout Continental Europe, it is authority *par excellence* in English lexicography. It has an honored place in the Imperial Library in France, in the British Museum and Athenæum of London, and has found its way to Turkey, India, China, and Japan. It is the universal oracle and umpire of the English tongue.—*Am. Wesleyan.*

It is the Dictionary of Dictionaries. I have fallen in love with it. So has my wife, and so have my children.—*J. C. Packard, late Superintendent Public Instruction, Wisconsin.*

Best Book for Everybody.—The new illustrated edition of Webster's Dictionary, containing three thousand engravings, is the best book for everybody that the press has produced in the present century.—*Golden Era.*

The noblest contribution to science, to literature, and to education, as dependent on an adequate knowledge of the English language, that the combined labors of editors and publishers have yet produced.—*Prof. Wm. Russell, the Elocutionist.*

This work, well used in a family, will be of more advantage to the members thereof than hundreds of dollars laid up in money.—*Illinois Monitor.*

Young man, if you already have a Bible, buy Webster's Unabridged Dictionary next.—*Chr. Svn.*

CURRENT TOPICS.

THERE are many communities where the population is too sparse, and the means too limited, to build suitable places of worship for all the evangelical denominations; yet the united efforts of all churches would support with credit the expenses of a single church and pastorate. In such localities the interests of the Christian religion are undoubtedly best subserved by giving the single church a cordial and ample support by all sects, even if it be the acknowledged exponent of a particular sect. It is better to have one or two thriving and prosperous churches, providing bountifully for as many pastors, with talent and experience enough to be useful, than for each of the numerous sects into which evangelical Christians divide themselves, to undertake to maintain a feeble church, inefficiently ministered to by a pastor with so little talent that he is not able to earn a respectable salary in more populous communities. But a hearty support of the existing church society, whether Baptist, Methodist, or Congregationalist, is by no means incompatible with preserving the identity of the individual Presbyterian. Indeed, the Presbyterians in no community, however few, and however strong the claims of the existing church, should lose sight of their own denomination. Moreover they should look after their Presbyterian brethren, be watchful over them, and feel that they are to a certain extent segregated. It would even be well to have an informal organization, with a list of membership, which it would be their duty and pleasure to strive to increase, so that, without sectarian jealousy or partisan feeling, they could exert their legitimate influence over all measures affecting the common welfare, and thus, by preserving a certain *esprit du corps* in their incipient organization, lay the foundation for a permanent and prosperous church.

THE custom of closing our churches through the week, except perhaps the basement or the lecture room, which are however, only opened on special occasions, has no foundation in the Bible, in reason, or sense of propriety. The Press has from time to time remonstrated against it. Christians almost universally disapprove it. The Catholics keep their churches open for worshippers and visitors at all hours of the day. Indeed the fact that they do so, is about the only argument we ever heard against a similar custom on the part of Protestant denominations. But the fear of imitating popery, has already been the means of removing from our worship too many beauties and advantages, the loss of which has been deeply regretted by good men and earnest Christians. A custom acknowledged to be good, should be adopted. In the Eastern cities some of the churches are open. All should be, both there and here. Visitors to our city naturally desire to visit and examine our Temples of Worship. They should be allowed the privilege. Frequently have we heard Christians, business men, working men, express their desire to spend an occasional spare moment during the week in meditation or prayer amid the solemn stillness which pervades the interior of our churches. It is a fit place for meditation. It is an appropriate place for a man, wearied by contact with the busy world, to step in, and rest and think. The place naturally inspires feelings of solemnity and reverence, and we believe to a greater extent on a week-day than on the Sabbath. Let the matter be considered and the doors be thrown open.

IN one of the interior provinces of China, a colony of Jews, numbering about two hundred families has maintained its isolation for a long course of years. How they obtained their position, and how they have maintained it, may well excite the attention of historians, but that they are there with all the essential peculiarities of the Jewish faith and nationality is well established. We saw, a few days since a copy of the Pentateuch in Hebrew, written on a long roll of parchment, which was obtained from these people by Rev. Dr. Martin, one of our missionaries, and he speaks with much interest of their resemblance in dialect to the Jews of other lands. No fact in history is more marked, or, when the connection of this people with Scripture is considered, more wonderful, than the preservation of a visible bond of union, so that they can be recognized in every part of the world, and may at any time be summoned into national organization.

THE sentiment is expressed so frequently that it may be regarded as definitely settled in the judgment of those who express it, that a public journal that would have any influence in moulding the political character of the people, must avow its support of one or the other of the political parties in the country. It is gratifying to observe that some of the ablest and most widely circulated religious periodicals published in our land, have not yet accepted this sentiment, and that therefore they affect men of both parties, when they discuss subjects of national interest, as bearing on any of the religious and essential questions that so often become practical. No paper, whether religious or not, should be silent when advocacy of these subjects is important, but it is possible to paralyze what might be a far-reaching power for good, by the unnecessary exercise of it within strictly party lines. Our exchanges convince us that it is not likely there will be any dearth of those who will maintain the issues between political parties, as such, and we are willing to believe that there is a higher table-land of journalism, which those who desire to do so, may occupy with profit to all the interests they should seek to promote.

OBJECTION has sometimes been made to the efforts of missionaries to establish schools among the heathen, as preparatory to civilization and the general introduction of the gospel. The wisdom of this course could hardly be more clearly vindicated than by facts that are transpiring in India. In Madras a literary society has been formed by the native Christian young men, who have been educated in the schools of the missions, for the purpose of uniting all Hindoos, Mohammedans and Christians, in plans for domestic social and moral reforms, and to aid them in inquiries after truth respecting religion. They have a reading room, a library, and a course of lectures on literary and secular and religious subjects, which excite great attention. A course of lectures on the Evidences of Christianity, is spoken of as having attracted large audiences, the majority being intelligent Hindoos, who came to hear because the ability of those employed to deliver these lectures was such as to command their respect. Nothing of this kind was known, or would have been possible, before the establishment of mission schools of high grade, and their influence will increase with the lapse of time.

THE best co-pastor is a religious newspaper. Those of flesh and blood sometimes hurt more than thay help. They lead off parties. They mangle the body they were called in to heal. Or they supplant the pastor. They appropriate the vineyard they were called in to dress. Or at the best they gradually inherit the power of the leader. The pastor is obliged to feel, if not—like Dr. Spring—to preach, "He must increase, but I must decrease!" The religious journal does none of these things. It mutilates or appropriates no church, but offers to help all. Such thoughts as these we desire to bring before our clergymen. Only want of thought, it seems to us, upon the office of a religious journal, can explain the lukewarmness of many of them as regards the papers of their denomination. Similar thoughts may be addressed to our laymen. The religious newspaper is an excellent substitute for personal effort. You are tied to your counter. The shop requires your attention. You cannot go forth in person to our churchless communities. You cannot afford to employ a missionary. This journal and others offer to do this work to some extent for you. We would be glad to have you regard it in this light. We would be still more happy to have you act accordingly. Good words, we appreciate. A long mailing list and many doors for our carrier to stop at, are more substantial tokens of consideration.

THE real estate mania, as it was called, which prevailed in San Francisco a few months ago, and out of which so many homestead associations were born, has measurably subsided, and the old process of dividing

rocky hillsides, and tide swept morasses into eligible building lots has almost entirely ceased. But the excitement consequent on the sudden and unnatural appreciation of forbidding outside lands, is transferred to speculation in government lands in the interior valleys, and Mexican ranchos in the coast hills of the southern counties. That the feverish spirit of speculation in these lands may lead to injurious results to both speculator and locality is manifest, for two reasons, first, the parties buying these lands do not generally mean to improve them, but to sell at higher prices, thus preventing those who do wish to improve, from buying at a fair price. Second, if a drouth should occur there would be a sudden revolution in the price of lands and in the profitable cultivation of the soil, and those now investing beyond their legitimate means would meet reverses of fortune they could ill afford.

Religious Intelligence.

PACIFIC COAST.

Presbyterial Notice.—The Presbytery of California will meet in the Larkin Street Church, San Francisco, on Wednesday, Sept. 9th, 1868, at 7½ o'clock, P.M., and will be opened with a sermon by the last Moderator, Rev. Charles R. Clarke.

John G. Fackler, Stated Clerk.

The Presbytery of Benicia will hold its next semi-annual meeting in the Two Rocks Presbyterian Church, on the last Friday of September, the exercises to commence with a sermon from the retiring Moderator, Rev. James Woods, at 7½ o'clock, P.M.

A. Fairbairn, Stated Clerk.

First Congregational Church.—The exercises of the 19th anniversary of the Sabbath School connected with this church were held last Sabbath evening. The reports of the different officers show that the school is in a flourishing condition. Whole number of scholars, 402; average number, 352; amount of contributions during the year, $882 80 The exercises consisted of singing by the children, distribution of prizes, and addresses by Rev. Dr. Stone, I. M. Scott, Esq., and "Carleton," of the *Boston Journal*. The latter gentleman evidently understands how to talk to the young folks, and his remarks were listened to with close attention, as were also the remarks of the other speakers.

Howard Street Church.—We learn, from the *Advocate*, that the Howard Street Methodist Church is to be refitted, at a cost of $3,000, before the Conference, which will be held in that church.

The Presbyterian Church at Placerville.—At the last communion, four persons were admitted to the membership of this church on profession of their faith.

Vallejo.—We learn, from the Vallejo papers, that the amount realized from the Presbyterian Fair and Festival, after paying all expenses, was $740.

Virginia City.—The corner-stone of the new Catholic church was laid, with much ceremony, on last Sunday.

Petaluma.—The Adventists have been holding meetings in a tent in the southern part of the city.

EASTERN.

Resignation.—At a recent meeting of the Board of Directors of Centre College, the Rev. W. L. Breckinridge, President of the College, tendered his resignation. The Board refused to accept it, but Dr. Breckinridge renewed it, and made it imperative. He was finally prevailed upon to remain in office until the fall meeting of Synod, when his successor will be elected. Dr. Breckinridge has received and accepted a call to a church in Missouri, and he proposes to enter upon the duties there as soon as he is released from the care of the Presidency of Centre College.—*Kentucky Statesman.*

Not to be Surpassed.—Chicago is not to be surpassed in any form of enterprise,—material, social or religious. The Free Religious Association that had such a "happy family" meeting in Boston has had its counterpart, out of doors, in Chicago.—The Methodists have organized Sunday evening meetings in the Court House square, where they invite discussion and free expression on matters of religion. The result is sometimes amusing, if not profitable. Recently a Spiritualist advocated his raps.—Then a young Methodist vindicated the work of the Holy Spirit, who was followed by an advocate of Sense, who totaly rejected everything that had preceded. Another proclaimed his own reason as the arbiter of doctrine; and by the time the meeting adjourned, the Court House must have echoed to nearly all the unbelief that has vexed the ages.—*N. Y. Observer.*

Merciful.—Mr. Frothingham declares that he did not put Christianity below the other branches of the true church, Mussulman, Mormon, Buddhistic and Fetish. He thinks quite highly of Christianity, he does. It feels grateful to him for his generosity. It is at his mercy. How thankful ought it to be for such clemency. The parties of his day were not more completely in the power of

"John P.
Robinson he,—"

than is the church and her Master in that of Mr. Frothingham. We trust he will continue merciful.—*Zion's Herald.*

A Successful Free Church.—Last March the congregation of the First Presbyterian church of Mt. Pleasant, Iowa, at the request of the pastor, unanimously agreed to made their church free to all—to have no pew rents—no subscriptions—no taxing—but every one give as the Lord should prosper him. The seats are all free. The pastor is supported by free-will offerings collected every Sabbath morning. Boxes are placed at the doors to receive contributions to the Boards of the Church, and other benevolent purposes—one month being assigned to each object.

Cards making known the polity are placed in the pews, and the plan works well.—*Presbyter.*

A False Report Corrected.—Several of our exchanges contain a report that Rev. Newman Hall, of London, had been called to the First Presbyterian Church of Chicago, made vacant by the removal of Rev. Dr. Humphrey to Philadelphia.—Full particulars are given, as that he is to receive $10,000 in gold, etc. It is a pity to spoil so good a story, but we learn from Chicago that there is no foundation for it whatever. Much as we should rejoice to welcome Newman Hall to America, we should be sorry to see him leave London; where, like Spurgeon, he has a great work to do—a field of labor such as he could hardly find anywhere else in the world.—*Evangelist.*

Baptist Chaplain in the Navy.—The *Examiner* says: "The appointment of a Baptist, as a Chaplain in the Navy, has been so rare an occurrence in the history of that Department, that such an event is worthy of an especial notice. The late Anniversaries of the several leading denominations have made themselves heard. On the 6th of June, Rev. James J. King, of Brooklyn, a graduate of Lewisburg University, was commissioned a Chaplain in the Navy, to fill a vacancy.

The Rev. Dr. Bissell, the Vermont Missionary Bishop, has entered upon his work as successor of Bishop Hopkins.

Some of the Old Sort.—The Secretary of an Eastern Conference says that there is a want in his field of a few dull ministers—men who may not have the necessary qualifications for great parishes, with great salaries, in the cities, but would be content to be honest, faithful, devoted pastors of country parishes; men who would be content to live out of sight of the Boston State House, and fulfill in some humble way, as far as the times will allow, the old ideal of a country minister.

Japanese Students.—Five of the Japanese who came to this conntry, are now students at the Academy of Monson, Massachusetts. They find a good deal of difficulty in speaking English, but have learned to read it with some facility, and manifestly understand what they read. They are fond of studying the Bible and comparing Christianity with the philosophy of Confucius, in which they are thoroughly grounded.—*Pres. Witness.*

Successful Prayer Meetings.—We are glad to learn that a daily prayer meeting is to be opened in the Canal street Presbyterian church. The situation is very eligible, and we trust the meeting will be well sustained.

On Monday last the Fulton street prayer meeting was held in the *church*; the attendance was larger than could be accommodated in the lecture room. This, too, in the heat of summer.—*Observer.*

The *Congregational Quarterly* publishes a list of benefactions to American literary institutions during the past five years, compiled chiefly from the reports of the Society for Promoting Collegiate and Theological Education. The total makes the large sum of $15,212,500. These are individual gifts and in addition to State appropriations.

The National (M. E.) Camp-meeting at Manheim, Lancaster County, Pa., will be the largest religious gathering of the kind ever held in the United States. There are 500 or 600 tents erected, and persons are there from various sections of the country.—*Christian Intelligencer.*

Goldwin Smith, late Professor at Oxford University, one of the most distinguished scholars of the day, and a prominent advocate of American principles, has accepted the position of Professor of English and General Constitutional History at Cornell University, Ithaca, N. Y.

Painted Glass.—The Committee of the United States Senate on Finance have reported adversely to a petition of the "First Church Society" of Boston, praying for a remission of the duties on painted glass windows, such as they propose to use in their new church.

Preaching to Children.—A recent Sunday School Convention in Jackson, Tenn., decided "that the minister is the pastor as well of the Sabbath School as of the congregation, and that it is the duty of every pastor to preach frequently to the children of his flock."

The Rev. Dr. Scott, of the 42d Street Presbyterian Church, of this city, has returned from Europe, after an absence of four months, with recruited health, and has resumed his pulpit labors.—*N. Y. Observer.*

Obsolete Idea.—One of the speakers at the laying of the corner-stone of the new Jewish Temple on Broadway, Cincinnati, referred to the restoration of the Jews to Palestine as an obsolete idea.

Harvard University.—At the recent commencement of this institution the honorary degree of L.L. D. was conferred on Dr. McCosh, the new President of Princeton College.

Texas.—A correspondent writes to us: "There is not a single organized Presbyterian or Episcopal church in Texas, and but very few communicants of either church."—*N. Y. Observer.*

The Rev. Dr. William Allen, formerly President of Bowdoin College, and since 1839 a resident of Northampton, Mass., died recently, at the age of eighty-four.

FOREIGN.

Church and State.—The idea—which has been claimed as a purely American idea—of a complete separation between Church and State, or as the Italian liberals phrase it, of "a free church in a free State," seems to be making rapid progress in many of the civilized nations of Europe. In Austria the repeal of the Concordat, the establishment of religious liberty, the freedom of the Press, secular marriages, and the removal of the clergy from the exclusive superintendence of the higher education, together with the formal pledge of the government to maintain the new laws against Papal and clerical influence, are most significant signs of the times. In France, notwithstanding the immense influence of the clerical party, as shown by the course which the Emperor was, a few months since, compelled to take in Italian affairs against his known wishes, the speech of M. Baroche, in the Corps Legislatif in July last, was equally significant. The French Minister of Justice did not hesitate to declare that the separation of Church and State is "only a question of time." These things taken in connection with the sharp note of Baron von Beust, the Austrian Prime Minister, in reply to the recent Papal allocution on the state of religion in Austria, in which the Sovereign Pontiff is rebuked for intermeddling with the domestic legislation of the Empire, are cheering indications to the friends of civil and religious liberty throughout the world.—*Oakland News.*

Christianity in China.—Hon. Anson Burlingame does not hesitate to speak publicly of the advantages which China may expect to gain from Christian influences. He has proved himself the friend of missionaries there. Speaking in behalf of that country, at the banquet given last week to the Embassy, he said: "She tells you that she is willing to trade with you, to buy of you, to sell to you, to help you strike off the shackles from trade. She invites your merchants, she invites your missionaries. She tells them to plant the shining cross on every hill and in every valley. For she is hospitable to fair argument."—*United Presbyterian.*

The Confessional.—The American people will never tolerate a priestly chief in every household, a chief supplanting the father and the husband,—a chief coiling himself round every weakness, possessing himself of every secret, and establishing by every fireside a sacerdotal influence hostile to that which is established by the laws of God and the State. They abhor and detest the system as hostile to liberty; hostile to good morals; destructive to the purity of the family relation; and directly antagonistic to the gospel of Christ. And the Protestant communion that attempts to resuscitate the confessional, will soon dwindle into an obscure and contemptible sect.—*Montreal Witness.*

Sunday Printing.—The printers of Germany, in a public meeting, declared that there ought to be no more printing on Sundays. Hence, a number of daily papers have made known to their readers that they cannot henceforth publish more than six numbers a week. It is a great thing that many who are not under the influence of any religious motive whatever, begin to recognize the Sabbath as a blessing to mankind.—*Chris. Intelligencer.*

Holland.—For about five years past a large missionary camp-meeting has been held in Holland. It has always been attended very numerously, with increasing interest and growing success. The meeting this year was to be held on Wednesday, July 8th, at Ellekam, near Arnheim. It is, perhaps, the most lovely spot in the whole country.—*Chris. Intelligencer.*

The Rev. Charles Kingsley proposes to make a visit to the United States.

India.—The first Methodist newspaper has been started in India. It is edited by Rev. J. M. Messmore, and printed by Rev. J. M. Waugn, of the mission press. It is in the Hindostanee language, though with the Roman letter, and is designed for the use of the native Christians.

It is reported that a number of Neapolitan priests have lately abandoned their profession and married, and have established a paper called the *Catholic Emancipator.—Chris. Intelligencer.*

List of Presbyterian Clergymen,

ON THE PACIFIC COAST, ALPHABETICALLY ARRANGED.

Rev. Jas. M. Alexander, N. S. San Leandro, Cal.
Rev. H. R. Avery, O. S., Walnut Creek, Cal.
Rev. B. B. Bonham, O. S. Sebastopol, Cal.

Correspondence.

To California by the Overland Route.—No. 3.

When about to leave Omaha I provided myself with a small supply of medicines, a veil to protect myself from the mosquitoes and gnats, and a ticket for a passage on Wells, Fargo & Co's stage, from Laramie City to Sacramento, all of these, at that time indispensable to him who contemplated the journey overland. I was very glad to learn that, although my stage ticket secured my conveyance to the latter place, a considerable portion of the further end of the journey would be made in the cars. My ticket for the ride between the points named, cost $193.00 in currency; the expenses of Rail Road travel from Albany to Laramie city had been, exclusive of incidentals, about $85.00. On going to the Rail Road depot a short distance from Omaha, I found a great throng of laborers who were on their way West to assist in the work of pushing forward the Union Pacific Rail Road. Leaving the city about 4 P. M., I proceeded rapidly and pleasantly onward, having even here the like ample and luxurious accomodations by day and night that I had previously enjoyed. There was a feeling both new and agreeable that took possession of me as we left Omaha and with it the last traces of a mature civilization. It seemed now as if we were fairly started for the Pacific and on our way across the continent, and the thought was full of exhilaration. I had not felt so before. The payment of so large a sum as one dollar for a slight refreshment at Fremont, 47 miles to the west, added strength to that conviction in a certain manner, but was unpleasantly suggestive of exorbitant charges in the days to come; the sight of pistols, knives and rifles in the hands of my fellow-travellers likewise confirmed the feeling but marred perhaps a little its pleasure. The appearance, occasionally, of Indians, conveyed the impression that we might not be quite free from danger yet notwithstanding all, neither the anticipations of discomfort nor of peril had any power to diminish the enthusiasm of the passengers.

The country through which we passed before retiring that night, was rolling and prairie land, and, where under cultivation, rich in corn, wheat, and oats. At half past seven, P.M., we were at the North Bend of the Platte—the river with its bluffs to the south, and boundless plains to the north. Quite frequently, as we passed along, we could see the old immigrant trail, winding its way by the side of the railroad, and as I looked upon it, I could not but say to myself: "Let no one despise the toils of those who laid out and traversed that primitive course, now that a better is provided. Rather let us all give honor to those hardy pioneers, for had it not been for their courage and enterprise, this grand railroad would never have been projected across the continent."

When I awoke the next morning we were at the crossing of the north fork of Platte, 290 miles west of Omaha. At this point there are two large machine shops of the Union Pacific Railroad, situated on the west bank of the river. The structure by which we made the transit of the river recalled forcibly to my mind the conception I had formed, from my school days, reading of Cæsar's bridge over the Rhine; piles being used instead of abutments and piers. All who were anxious to see the Indians were favored with an excellent opportunity while we remained for about an hour at this place, as there was a camp of about 500 of them near by the station, on a wide-spreading plain to the north. Their rude wigwams were built of various materials, such as canvass and hides of animals, stretched on poles widely separated at the bottom and united at the top, where there was left an opening, from which the smoke was slowly issuing and sluggishly curling away. The primitive appearance of the savages themselves, wrapped in their red blankets or in the skins of the Buffalo, the general view of the whole camp, filled in as it was with wagons, ponies, herds of stock, barking dogs and naked children—everything about it suggestive of inactivity, sloth and degradation—contrasted strangely with the vigor, thrift and enterprise of the young city; barbarism in its old age and dotage—soon to pass away—standing side by side with civilization in the strength of its early manhood and in the midst of its triumphs. These Indians, we learned, were on their way to a yearly religious dance, in which they are accustomed to cut their bodies with knives; a circumstance which at once recalled the practice of the ancient followers of Baal in the time of Elijah, the prophet.

Leaving the North Fork of the Platte, we rode, at a rate of 25 miles an hour, all day long up the valley of the Platte through a great wilderness.—Very little variety was there in the scenery, the general view being that of a wide, barren, desolate valley, flanked by hills, with a river to our left running turbidly and rapidly, though with but a shallow current, through the midst. At many of the stations there was but a solitary building, occupied by the employees of the R. R., and about half a dozen United States' soldiers, who, as we came up, were put through a dress parade on a small scale, for their benefit and our amusement, as I supposed.

During the day I saw antelope and deer in abundance, as also many smaller animals, and a black wolf, whose appearance within range called out a volley of shot from our train that would have done honor to a floating battery. Also saw a buffalo, *the whale* of this desert sea. It *is* a very desolate land, an utterly barren waste, and yet God has planted and nourishes His beautiful flowers in it, and, as I often saw the pretty straw-colored cactus and other delicate and beautiful flowers, I looked on them there as the emblems of that divine tenderness and love that finds a place amid all the desolations of sin.

About 5 P.M., I reached Cheyenne and had my first, inspiring view of the Rocky mountains just before reaching the city, at a point of about two miles distant from it. Like all places of a very hasty growth, Cheyenne has a ragged and unprepossessing appearance. Its site is excellent but this is nearly all the good that I can say of the place. Its inhabitants are not *living*, they are merely *stopping* there. Its houses are mostly huts or rude shanties. Some buildings there are with walls of stone and roofs of iron, but there are more of canvass. Its population, so far as I could learn, is approaching 10,000. Its morals should not be expected to be very elevated: the impressions from what I saw and heard while there, were not favorable. Every one was around. Every one was more or less under the influence of intoxicating drink. Every one was profane. Such was the class of men who came on board our train as we were about to leave Cheyenne. A few minutes later, when arrangements for gambling had been perfected by spreading a folded blanket between four men sitting on seats facing each other, and money was changing hands amid considerable excitement, I could have wished myself absent from their society.

The grade through the Black hills, westward from Cheyenne—as the conductor informed me—is, in some places, 90 feet to the mile. After a little more than two hours' ride, we reached what was then the terminus of the R. R., at Laramie city; passing on the way by circuitous courses through the hills, by deep cuts in granite walls and over some fine trestle-work braced to the adjoining hills with ropes of wire. The sight of three freight cars overturned and smashed was not agreeably suggestive of possibilities, but that part of the journey which is made by rail was completed in safety at 7 P.M., and the past was, in a measure forgotten, while preparation was made for a new experience. W. R.

Letter from Santa Clara County.

Gilroy Warm Springs, August 23, 1868.

These springs are situated in the Contra Costa ridge of the Coast Range, fourteen miles in an easterly direction from the town of Gilroy. They occupy a beautiful and picturesque site on the northern slop of the Coyote Cañon, a long, deep ravine making into the mountains from Santa Clara valley, and which after bearing east some eight or ten miles sweeps round to the north heading in the centre of the range. The mountains on either side of this cañon rise to the hight of about 2,000 feet, being covered with scattered pine and oak, and affording in the spring and early summer a considerable amount of feed. At that season a good many cattle and sheep are grazed here, portions of which, as the fall comes on are removed to the valley or elsewhere for pasturage. These mountains are full of shrubbry, dells and deep ravines, which with a moderate amount of grass and timber on the hills, afford ample food and shelter for game, of which there is considerable; deer being plentiful and grizzlies occassionally met with. There are also some hare and quail, with a few small trout in the streams. So numerous were the grizzlies at one time in this region, that the name *Canada de los os* (Bear Cañon) was given to a gorge entering the range six miles east of Gilroy.

THE WARM AND OTHER SPRINGS.

The principal spring at this place, and the only one of any size containing warm or mineralized water, consists of a pool five feet in diameter and several feet deep, whence issues a small stream having a temperature of 110 deg. and carrying in solution iron, soda, sulphur, magnesia and a small per centage of arsenic. The guests here bathe in and drink it freely while warm, the taste soon becoming reconciled to its use in that state. A good deal of this water is bottled up and sent to San Francisco, its highly pungent flavor rendering it when cool an agreeable beverage. It is considered valuable for its medicinal properties, being beneficial in many kinds of disease and a soverign remedy for rheumatism. Near this warm pool are several fine springs of pure cold water, the whole sending off a considerable stream to join the Coyote creek, flowing through the cañon five or six hundred feet below.

BUILDINGS, GUESTS, SCENERY, ETC.

The buildings erected here for the accommodation of visitors, though plain and unpretentious are capacious and comfortable, consisting of a large hotel with a number of small cottages scattered about on the little knolls adjacent; the most of them occupying commanding sites and being shaded by pine and oak trees. By this arrangement guests, while they can visit the common room set apart for recreation and general use, can enjoy entire seclusion if they please. These springs, having an elevation of about 1,000 feet above the sea, and being surrounded with shady dells and wooded hills, form a pleasant and

healthful retreat in warm weather; when the number of guests varies from sixty to eighty, sometimes reaching a hundred or more. They are approached by a good wagon road constructed at heavy cost by the proprietors, and from different points of which in ascending the mountain fine views are obtained of the great valley of Santa Clara with its oak groves, towns and grain fields; and also of Soap Lake, a shallow body of water several miles long lying at its head. This lake, which derives its name from the fact that a small soap making establishment was formerly located on its border, is surrounded by a great extent of low poor land, producing a course species of grass, much of it being overflowed at high water.

POTATOE AND GRAIN GROWING REGIONS.

In coming to this place from San Francisco, after passing the Mission and other suburbs, the journey leads, for the first five or six miles, through an extensive potatoe growing region; nearly the whole country, as seen from the railroad, being covered with the dark, green vine of this esculent. The digging season is now in full activity, and thousands of sacks of these roots are being sent to the market, where they are known as the "Mission Potatoe."—The crop this year has been good, and many tracts of land, laid out into "homestead lots," have yielded the owners a fair income from this source. After passing the San Bruno range of mountains, we enter the great Santa Clara valley; riding thence to Gilroy, 75 miles, through one of the richest regions, and most desirable places of residence in California,—Nearly the whole of this distance is a continuous wheat field; the breadth of land planted being broader this year than ever before, while but little other grain than wheat has been sown. It will be observed, too, that the culture of this grain has been carried much further up the mountain sides this season than heretofore; the crops on these up-lands having, with the copious and timely rains, been equal to those produced in the valley; and with an assurance of equal rain supplies every year, their value would be scarcely less than that of the alluvial plains.—But as no such assurance can be had, the farmer, in planting so high upon the foothills, has to take many risks, with the certainty that his crops must often prove failures; therefore these higher lands can never be so much in request for farming as those of the valley.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR AUGUST, 1868.

August 6th—SACRAMENTO, Captain Parker, connecting with ALASKA, Capt. Gray.
August 14th—MONTANA, Capt. Cavarly, connecting with OCEAN QUEEN, Capt. King.
August 22d—CONSTITUTION, Captain Comstock, connecting with RISING STAR, Capt. Conner.
August 30th—COLORADO, Captain Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship CHINA, Captain E. W. Smith, will be dispatched on Tuesday, September 1st, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 22

THE OCCIDENT.

SAN FRANCISCO, SATURDAY, AUGUST 29, 1868.

THE CHRISTIAN'S PRIVILEGES.

There are some who fail to appreciate the privileges they might enjoy as Christians, because of their indifference to their worth. They place no value on the means by which they have been enabled to pursue a useful, devoted, and therefore happy life, for they have no purpose to live thus. Religion is not a life, in their view, but a mere protection against evil, or, at most, a matter of feeling, and all the offers of grace which relate to activity, to earnest, energetic service, are wholly disregarded by them. They never expect to render such service,—how can they honor the provisions God has placed within their enjoyment, by which they may be prepared for it.

There are others who fail to appreciate their privileges, because they are afraid, either by reason of their conscious imperfections, or their want of faith, to accept them as their own. These persons should think more on the relation they sustain to God, which He has constituted, not which they have assumed for themselves. This relation is that of children, and each one may enjoy what has been provided for the family. Have they any occasion to feel that these provisions are not designed for them? Have they any right to stand aside, and say that others may be worthy of the station and the gifts, but they cannot appropriate them? Would your children, in this way, honor the means of improvement, and comfort, and pleasure, you have provided for them? Suppose you find one timid, sensitive little daughter, who says to you, with tears that attest her sincerity, "You are a dear kind father, and you have supplied us with everything we can ask for, and I am glad the other children enjoy it all, and are happy and make you happy by their respect and love, while they honor your kindness by showing what it can enable your children to become, but I cannot feel that I have any right to be so blessed. I am too unworthy of such favor to enjoy it, and therefore I must decline to accept what the others take as theirs." Does she properly value the good you have placed within her reach? Does she justly regard the means of happiness and profit *your family* may possess? You tell her, that it is not because she deems herself fit to be in the family, but because she is your child, that all these facilities are hers. You tell her, that to be worthy of her place, her name, her relations, she should avail herself of them all, and thus try to feel that she is excluded from nothing.

And may we believe that God wishes any of those whom He has made to be brothers and sisters in His family to dishonor His Grace, by feeling that their relationship to Him does not give them a full title to what His family may enjoy? You are His *child;* think of the station to which you are exalted—not of your fitness for it; accept the advantage connected with it—not reject this because your very wants bear testimony how much you need it. With humble heart, yet with sincere trust and love, let every child feel that it is more than his privilege, it is his solemn duty, to appropriate whatever his Father has declared belongs to the household. Only thus will our life and character be worthy of such distinguishing grace.

Old School and New School.

In my last, my fears left our old ship of Zion floating toward a rock, beyond which rolled dark fogs and perilous icebergs, and freezing antinomian waters. That was my fear; my *faith* would see her gliding smoothly on over glassy seas, and beneath bright skies, gathering up multitudes of the redeemed, and bearing them on to the haven of eternal rest.

That the Old School exhibits the symmetry of a beautiful orthodoxy I am glad to admit and happy to admire. But orthodoxy without vitality, possesses but little power. There is beauty in art; A chaste marble statue is a thing of beauty. But you might place ten thousand of them upon a field in battle array, all furnished with sword, and shield, and spear, and a few little pigmies would grind them into powder, like the summer dust. So, ten thousand warriors on the battle field of Christianity, if without spiritual vitality, though all clothed in the symmetry of a beautiful orthodoxy, would be led captive by Satan at his will, and the conquest of a single soul to Christ would not be achieved. And it seems to me that these old fathers in the Old School Church, these professors in the theological seminaries, who oppose the union, lay too much stress on stern old orthodoxy, and too little on a living, moving, vital godliness. Man is not only finite, but exceedingly limited in the range of his vision. Shut up in his study, the professor does not see the great heaving, sorrowing mass of the world; he does not feel the beat of the great aching, throbbing, bleeding heart of humanity as the pastor does. The pastor hears the sigh of sorrow, and sees the tears of wretchedness, and knows the wants of suffering humanity. He witnesses the tumultuous upheavings and commotions of human depravity, and feels the need of a living, breathing, vital godliness.

When Dr. Hodge was in the Philadelphia Convention, in the fusion of hearts there, his spirit was moved, and with weeping eyes and throbbing heart, he cordially shakes hands over the proposed doctrines for a basis of union. But when he goes back to the seclusion of his study he begins to show a spirit of opposition—sometimes a spirit near akin to assumption and dictation. The theological seminaries are the servants of the Church, and not the masters. And when Dr. Hodge, just before the final vote was taken, stood up and warned the Assembly not to throw themselves into the hands of the New School, as if the New School would do us some great harm, as if they were not prompted by any melting movements of love for the cause of Christ that induced them to seek this union, I felt as though there was far more necessity that a warning note should ring upon the ears of the Assembly to beware how they threw themselves into the hands of the theological seminaries. For the whole history of the Church warns of the danger of consolidated power.

The proper basis of union has been beautifully expressed thus: "The indispensable precondition, and only reliable guarantee for a desirable union, are mutual conciliation, forbearance, and confidence, without which no written pledges, however minute and skillfully expressed will be of any avail." From the almost perfect unity of doctrines of the great masses of both Assemblies, all that is now necessary for perfect harmony, is the simple pretence of a true Christian spirit, simply "mutual conciliations and confidence."

Let the love of Christ fill the heart, and no papal note of warning is necessary, in order to perfect harmony. Look for a moment at the doctrinal views of the two great exponents of the two schools. Dr. Henry B. Smith on Imputation, says: "We also confess original sin, as derived from Adam, since we sinned in him and fell with him in his first transgression."

Dr. Charles Hoge says: "Such is the relation between Adam and his posterity that all mankind descending from him by ordinary generation, are born in a state of sin and condemnation." Now I have no doubt that if these two statemants were made to some old Scotch divine, who was unacquainted with either party, he would aver that Dr. Smith was the Old School and Dr. Hoge the New School.

Again, on Inability, Dr. Smith says: "Total depravity makes us averse to all good, and unable of ourselves to repent and believe; yet so the inability is moral, &c." Dr. Hoge says: "If the fact of inability be admitted, it is not essential whether it be called natural or moral, whether it be attributed to the perverseness of the will or the blindness of the understanding." Were you to set the old Scotchman to guessing again, I have no doubt he would repeat his first mistake. When quite a young preacher I was once conversing with an elderly minister of great ability and success. I descanted somewhat loftily upon the beauty and glory of metaphysics, and intimated my proclivity to weave them into my sermons. "Pshaw!" said he, "metaphysics wouldn't convert a mouse." So I think these little hair-splitting differences, as they now exist between the two schools, are of very small avail in converting and saving souls. I sincerely hope there will be no longer postponement of this Union. For if it is not consummated now by the ratification of the Presbyteries, a long dark period in the history of our Zion will roll by, before a re-union will take place. The very fact of our continued separation even now, greatly weakens our moral power. The world can see that it is not now a theological antagonism which keeps us apart, but a sort of stern standing on rights and dignities and want of concessions. Two school boys, in their imaginary importance, will stand firmly upon their independence and their rights; and *men* laugh at them. Now here we are, two powerful religious bodies, alike in the main, in all our doctrinal views and polity, and yet standing upon our rights and dignities and asking more concessions. Surely we might expect angels would weep over such a scene. For our moral power would be augmented fourfold by our union at this time, but terribly crippled if we recede from the high vantage ground which we occupy in the moral world. If we fail now, we may well suppose that as the emmissary sent from the bottomless pit to watch the progress of the plan of Union, shall go back and report the failure, a smile of malicious joy will light up the face of every fiend in that abode of death But if we succeed, there will doubtless be rejoicing among the angels of God in heaven. SENEX.

Jewish Baptism.

I am constrained to adopt these positions; 1st, by an authority which cannot be gainsaid or resisted; the customary ablution before meals, was performed by *washing the hands*. The Rabbins prescribe this in their traditions, and the scriptures are positive as to the custom. "The Jews except *they wash their hands*, eat not."

2d.—In the parallel passages in Matthew and Mark, when the Disciples were arraigned before Jesus for a similar breach of Pharisaical tradition, it was because they had not *washed their hands* before eating; not that they had not *purified* themselves in *some way*, but because they had failed to do it in the appointed mode, the prescribed *hand washing* before their meals.

3d—While the specific ablution required of the Jews by their traditions, was, beyond all doubt by *"washing the hands,"* there is on the other hand no tradition, either in the Scripture Records or in the Rabbinical authorities of anyotherform of purification. In this connection "why," say the Pharisees to our Savior; "why walk not the disciples according to the tradition of the elders, but eat bread *with unwashed hands?*" The offence was not that the disciples had failed to purify themselves in some general way before eating, but that they had failed in the mode *specified and appointed.* Why do they neglect the particular ablution appointed for this particular case? As it is explained above, "for the Pharisees and all the Jews, except they wash their hands, eat not—holding the tradition of the elders," or, as we have it in Matt. 15:1., "Why do the disciples transgress the tradition of the elders?" What trangression had they been guilty of? "They wash not their hands when they eat bread." The offence looked directly to this one specific mode of ablution, and shuts us off from the suspicion that any other was demanded by the requirements of the Jewish ceremonies.

4th—The circumstances of the case demand this form of ablution.

We have before shown that Baptism and Purification were synonymous terms in the Evangelists.—The promised Messiah was to come as a purifyer; "Why baptisest thou then," say the Jews to John, "if thou be not that Christ? (Heb., Messiah.) When the Jews marvelled that Jesus had not washed, (Greek, baptised), the discourse in reply was entirely on purification. When the dispute arose between John's disciples and the Jews about purification, they referred the matter to John, the Baptizer, saying, "Rabbi, he that was with thee beyond Jordan, to whom thou barest witness, behold the same baptizeth,"—while the discussion was about purification. The identity of Baptism and purification is thus established beyond denial. Again, the conveniences referred to in the New Testament, for the performance of these ablutions, look toward a partial ablution, and not an entire immersion. In John 2:6, we read:—"And there was set there six water-pots of stone, after the manner of the purifying of the Jews, containing two or three firkins apiece."—That is in brief, these water-pots were placed there for the convenience of performing the ritual ablutions required in the household. It is stated that they held two or three firkins apiece. The Greek translated firkin is not a measure whose definite measure is known, therefore different authorities estimated the capacities of these water pots variously. A note to the version of the Bible union says the firkin was nine gallons; the stone pots, then, would hold from eighteen to twenty gallons, and this is above the ordinary estimate. But we can judge somewhat of their capacity from the fact that they were the vessels in which the women were accustomed to bear water from the well or fountain into the city—such a one as the woman of Samania brought to the well of Sychar, where Jesus was sitting; and fifteen gallons, or one half a barrel would be an immense weight for a woman to carry on her shoulder. These stone water-pots, therefore, for the Jewish ablutions, could hardly have contained more than fifteen gallons. If we ask were there no other conveniences in the household for the ablutions required, the scriptures are silent as to any other: writers on Jewish antiquities disclose no other; Rabbinical authorities speak of no other, and we are shut up to the conclusion that the household ablutions of the Jews were performed with the conveniences which these water-pots supplied, in whatever mode, whether these ablutions were performed by sprinkling, pouring, or immersion.

When, therefore, the Pharisees marvelled that our Savior did not wash, (Greek, Baptise) himself, (*e. i.*, purify himself), before dinner, to hold that they marvelled because he did not perform the ordinary ablution by hand washing, because he did not immerse himself in one of these stone water-pots, placed for the purpose of purification, is an idea to me positively absurd, so nearly bordering on irreverence to Christ's sacred person, that I may not dwell upon it for a moment. In the absence of any authority among the Rabbins for Immersion before meals—when we have evidence in the parallel cases in Matthew and Mark that the ordinary ablution was by hand washing—without the slightest hint, either from the writings of the Rabbins, or from the Scriptures, that there was any other mode of purification before meals but by washing the hands, this fact being the more expressive from the strictness with which the Pharisees observe their traditions, and the fulness of the Rabbinical writings respecting them; with no conveniences in the house for Immersions.—I must insist that wash in these cases (Greek, Baptise,) refers to the customary ablution of the Jews before meals by washing the hands; and hence that *Baptizo* and *Baptismos*, as in Heb. 9:10. so here, pass from their ordinary classical meaning and take to themselves by the use of the sacred writers, a tropical sense and signify in the Scriptures, not the mode of immersion, but the general idea of ceremonial ablution in the performance of the purification, which the Hebrew, having the Rabbinical tradition, required. F. B.

A. ROMAN & CO.

Publishers, Booksellers & Stationers,

417 & 419 MONTGOMERY STREET,

SAN FRANCISCO,

Invite the attention of the Reading Public to the following Publications, which they have just issued:

"THE OVERLAND MONTHLY"—Devoted to the Development of the Country. Number one, published July 1st. Subscription Price, $4 00 a year, in advance; single copies, 37½ cents.

"CALIFORNIA MEDICAL GAZETTE"—A Monthly Journal; Devoted to Medicine, Surgery, and the Collateral Sciences. Number one, published July 1st. Subscription Price, $5 00 a year, in advance. Single numbers, 50 cents.

PROCEEDINGS OF THE ASSOCIATED ALUMNI OF THE PACIFIC COAST, at their Fifth Annual Meeting, held June 3d, 1868. Price, Seventy-five Cents.

NEW BOOKS.

GOING TO JERICHO; or, Sketches of Travel in Spain and the East. By John Franklin Swift.

As a describer of famous scenery and foreign society, Mr. Swift deserves to rank among our best travel writers; and as a humorist, he has no equal among them, and few superiors anywhere.—*Alta California.*

A handsome 12-mo. Price, $2 00.

ALDEANE; A Novel. By Laura Preston, author of "In Bonds," etc.

This book has a charm that will fascinate the reader at the first chapter, and the interest is well sustained to the last.—*Stockton Independent.*

A beautiful 12-mo. Price $2 00.

A liberal discount to the Trade, Clergymen, Teachers, and Canvassers.

Orders for the above Publications respectfully solicited and promptly filled.

A. ROMAN & CO., Publishers,
San Francisco.

J. D. ARTHUR & SON,

Importers and Dealers in

Agricultural Implements,

S.E. CORNER COMMERCIAL AND DAVIS STS.

SAN FRANCISCO.

Fruit and Vegetables,

G. C. HOLMAN,

223 Washington Street, below Front.

FRUIT and VEGETABLES, of the various kinds, constantly on hand, and for sale, in quantities to suit, at the Lowest Cash Price, and delivered in any part of the city.

223 WASHINGTON STREET, BELOW FRONT.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York. 151 Tremont St., Boston.

Current Literature.

BACON'S ESSAYS, WITH ANNOTATIONS BY WHATELY.

It would be presumptuous to attempt to say anything new in praise of the works of Bacon. Of all his works, the Essays were, in his own estimation, the best, and destined to exert the most lasting influence, for the reason, as he expresses it, that "they come home to men's business and bosoms." The growing popularity of the Essays for two centuries and a half, has proved his estimation of their merit and destiny correct. Says Lord Macaulay, "It is by his Essays that Bacon is best known to the multitude. In them alone the mind of Bacon is brought into immediate contact with the minds of ordinary readers. There he opens an exoteric school, and talks to plain men in language which everybody understands, about things in which everybody is interested. He has thus enabled those who must otherwise have taken his merits on trust to judge for themselves." Archbishop Whately said, "Bacon's wisdom is like the seven-league boots, which would fit the giant or the dwarf, except only that the dwarf cannot take the same stride in them." Alexander Smith says: "In this literary walk as in most others, the giants came first. Montaigne and Bacon were our earliest essayists, and as yet they are our best. In point of style these Essays are different from anything that could now be produced."

The edition before us, published by Lee & Shepard, Boston, in a large octavo form, presents the Essays in a more systematic and attractive form than any of the other numerous editions which have been offered to the public. The Annotations by Dr. Whately form a very large and interesting part of the book. To clear himself from any charge of presumption, in attempting to explain and add to the works of Bacon, the author of the Annotations states that an essay in Bacon's time, instead of signifying as now an elaborate, finished composition, was designed to be suggestive of further remarks and reflections, and in short to *set the reader a thinking* on the subject. "A commentary to explain or correct, few writings need less; but they admit of, and call for, expansion and development. They are gold ingots, not needing to be gilt or polished, but requiring to be hammered out in order to display their full value."

This work of expansion and development has been performed by Dr. Whately in a masterly manner. He has not over-done his work. The perspicuity of style which is characteristic of Bacon's writings is noticeable to a great degree in the Annotations. The book should have a place in every well selected library. It may be bought of Bancroft & Co.

In an Annotation on Bacon's Essay on "Innovations," the author contrasts and points out the equally fatal consequences of, a rash, inconsiderate spirit of Reformation, and a cold, immovable spirit of Conservatism. We quote as follows:

The two kinds of absurdity here adverted to, may be compared respectively to the acts of two kinds of irrational animals, a moth and a horse. The moth rushes into a flame, and is burned: and the horse obstinately stands still in a stable that is on fire, and is burned likewise. One may often meet with persons of opposite dispositions, though equally unwise, who are accordingly prone respectively to these opposite errors: the one partaking more of the character of the moth, and the other of the horse. This comparison, I may add, suggests a practical rule. The only way to lead a horse out of a burning stable, is to put on him his accustomed *gear*; the saddle and bridle, if a saddle-horse, or the collar, if a draught-horse; and then, by the force of association, he will submit to be led out. So also, a man of the disposition alluded to, will the more readily comply with a suggestion, if put into the form, as far as may be, of his accustomed practice. He may be led, if put into his usual *gear*.

The opposite course to this is taken by not a few, who have a passion to be accounted *original*. They exaggerate the novelty of anything they propose, and put whatever they say into the most paradoxical form, as if on purpose to make people stare. They must be always broaching something that is new; or at least, as the phrase is, putting 'old things in a new light.' But if your object be to instruct, convince, or persuade, rather than to astonish, you will find it quite as often advisable to *put new things in an old light*.

Bacon's maxim, therefore, is most wise, 'to make a stand upon the *ancient* way, and look about us to discover what is the *best* way;' neither changing at once anything that is established, merely because of some evils actually existing, without considering whether we can substitute something that is on the whole better; nor, again, steadily rejecting every plan or system that can be proposed, till one can be found that is open to no objections at all. For nothing framed or devised by the wit of Man ever was, or can be, perfect; and therefore to condemn and reject everything that is imperfect, and has some evils attending on it, is a folly which may lead equally—and indeed often has led—to each of two opposite absurdities: either an obstinate adherence to what is established, however bad, because nothing absolutely unexceptionable can be substituted; or again, a perpetual succession of revolutions till we can establish—which is totally impossible—some system completely faultless, or so framed as to *keep* itself in good order. To conceive such a system, whether actually existing or ideal, is to be beset by the same chimerical hope in human affairs that has misled so many speculators in mechanics,—the vain expectation of attaining the *perpetual motion*.

When a sensible grown person reads a book written for the young folks, and, failing to become interested in its contents, attributes his want of interest to the simplicity of style of the book, but thinks it may do for the children, our word for it, he is in error and the book may as well be thrown in the fire for any interest it will excite in the minds of youthful readers. Well written books for children have the power to interest "children of larger growth." Especially books of travel and adventure have this power, and from such books frequently more lasting impressions of distant lands and scenes are derived than from works supposed to be better fitted to the minds of older persons. A book which we judge to possess this merit in a high degree, from a hasty examination of its pages, is Warm Hearts in Cold Regions, by Chas Ede, R. N., published by T. Nelson & Sons London & New York. It is a well written account of life in the frozen regions of the North, telling the startling adventures of the sailor in the nothern seas, and the home-life of an interesting Danish family at Uppernavik on the shores of Greenland. It is a book that will please and instruct. Bancroft & Co. have it for sale. They have also, from the same publishers,

LIVING TO PURPOSE,

A series of articles written by Joseph Johnson in an interesting although didactic style, designed to instruct young men and women in the important matter of "making the best of life." A practical, useful book from which we hope to be able to make longer extracts hereafter. The following will show the style of the book:

A PURPOSE IN LIFE.

We see, then, the need of purpose, or an object in life. He who has a defined purpose and resolution to carry it bravely—will succeed. He who waits for circumstances, rather than let circumstances wait upon him, will almost certainly fail. Sir Fowell Buxton said:—"The longer I live, the more I am certain that the great difference between men—between the feeble and the powerful, the great and the insigificant—is *energy, invincible determination;* a purpose once fixed, and then *death* or *victory!* That quality will do anything that can be done in this world; and no talents, no circumstances, no opportunities, will make a two legged creature *a man* without it." Sir Fowell admirably illustrated the truth of his own maxims: he succeeded; he had a resolved purpose. So of all other great men. John Wesley for instance, in the labours he appointed himself—rising at four in summer, and at five in winter, in order that he might complete his purpose—manifested the strength of his will. Possibly there is no test so complete as early rising, with a purpose, which characterizes the man who *will* succeed. It is the mastery of the spirit over the flesh. It is the spirit marching the body out of the well-covered bed into the cold. On the other hand, the morning indulgence is indicative of a feeble mind, that will prevent its possessor accomplishing any earnest work. So certain is this the case, that Dean Swift was accustomed to say that he never knew any man come to greatness and eminence who lay in bed of a morning. Lord Chatham also said: "If you do not rise early, you can make progress in nothing." Turning out of bed early in the morning may seem to be a small matter when placed beside the great purpose of life; but it is no small matter if it tends to the attainment of a settled object—if it gives a man self-respect as well as the opportunity and time for work. The doing of any voluntary act, done with a purpose, acts marvellousy upon the character.

THE EARTHLY PARADISE. A POEM.

Mr. William Morris has published the first of two volumes, with this title. The conception of the work is rather novel, and to those whose love for poetry will sustain them through so long a career, its perusal will be interesting, for it has variety and much real merit. The author represents certain "gentlemen and mariners of Norway," as setting sail in search of the Earthly Paradise, of which they had read and heard, and after many years filled with much trouble, they come to a Western land before unknown. There they were treated with great kindness by the inhabitants, and having lived to be old men, they died highly honored of those who had made them so happy during their residence among them.

During the latter years of life they contributed to their own enjoyment and the gratification of those who made them their guests, by discussions of grave matters of belief and polity, and by narratives of classic tales, and recitations of ancient poetry. That all might have the benefit of their learning as thus displayed, it was resolved that there should be two feasts each month, at which they might amuse, or instruct the people, and the substance of the book is the succession of entertainments furnished by these old men, each being selected with some reference to the month of the feast. The method adopted has the advantage that the whole may be read in connection, or each part may be taken as a separate poem, and in either case the reader will find much to please, though he may not believe that the material thus supplied will leave nothing wanting to a real Earthly Paradise. Published in this country by Roberts Brothers, of Boston, and sold by Bancroft & Co.

Books and Periodicals Received:

A beautifully bound pocket edition of Thomas A. Kempis' work, Of the Imitation of Christ, published by J. P. Lippincott & Co., Philadelphia, and for sale by H. H. Bancroft & Company.

The History of a Pin; a book for the little folks, from T. Nelson & Sons. Suitable for a gift to a child.

The Play-ground and the Parlor, by Alfred Elliot. Published by T. Nelson & Sons, London. The last two books for sale by Bancroft & Co.

The Atlantic for July and August has been received from Ticknor & Fields, Boston.

Sabbath at Home, from the American Tract Society, Boston.

The Cornhill Monthly for July. Boston: D. Lothrop and N. P. Kemp.

Hours at Home, for August. New York: Chas. Scribner & Co.

Biblical Repertory and Princeton Review for July. Philadelphia: Peter Walker.

Educational.

Enthusiasts and Martinets.

These are the names which the two different classes of teachers are wont to apply to each other, when the wind blows from the east, or dinner is delayed. In moods more humane, the former describe the latter as "sober fellows who know how to keep the track, you see;" and the latter talk of the former as, "somebody worth while, since they mix their drudgery with a little thinking, you know." The fact is that distinctions like these are to be expected among teachers, because they are found everywhere else. In that splendid First Chapter, which is the finest compend of English history to be found anywhere, Macaulay thoroughly ventilates this idea. The classes sometimes called Cavaliers and Roundheads; sometimes, Tories and Whigs; sometimes, Conservatives and Radicals; "are found," he says, "in all societies, and will be found till the human mind ceases to be drawn in opposite directions by the charm of habit, and by the charm of novelty." Examples of these classes, drawn from the history and fiction of education, we may have occasion to adduce on another occasion. The practical point now is, the warning that, on whatever side we stand, we take no position which is extreme. Of both these classes, the writer quoted remarks, "the best specimens will be found not far from the common frontier." Be a little of each then; or, a little of an enthusiast in planning your labor, and a trifle of a martinet in performing it. C. R. C.

Personal.

Mrs. Frances Fuller Victor, authoress and newspaper correspondent, arrived in this city from Oregon on the 23d, and will proceed to New York with the manuscript of a new book, on the next steamer.

Rev. Jas. M. Newell, a graduate in the last class from Allegheny Seminary will leave New York September 1st. for California, to supply the pulpit of the Placerville Presbyterian Church for six months.

Prof. Brayton, Principal of the Oakland College School, has been travelling in the State of Nevada, his object being to make known to the people of that region, the merits of the College.

Rev. Mr. Lathrop of the Church of the Advent, in this city, has been making a visit to his old home in Nevada. He preached in Virginia City last Sabbath.

Rev. Mr. Brown, of Sacramento, will preach to the Unitarians of Stockton one Sunday in every month, if sufficient encouragement is given.

Rev. A. F. White gave the citizens of Belmont, Nev., a lecture on "Geology, Mining," etc., last week. He also preached to them on Sunday.

Mr. A. J. Easton, one of the best known and most respected of the early California pioneers, died at San Mateo on the 22d inst.

Prof. Lippett will supply the pulpit of the Congregational church at Petaluma until a successor to Rev. Mr. Pond is obtained.

Congressman J. A. Johnson has returned from Washington. He had an enthusiastic reception at Downieville.

Mr. C. J. Klein, Superintendent of the Independence Mine at Downieville, had his leg broken on the 20th.

Rev. J. W. Ross has returned from the East and resumed his work in the Methodist Church at Sacramento.

Senator Harlan, of Iowa, will probably come to this Coast to speak during the Presidential campaign.

Hon. Geo. C. Gorham arrived in this city on Wednesday night and was received with great enthusiasm.

Bishop Marvin arrived in this city last week, and preached in the Southern M. E. Church last Sabbath.

A. Badlam Esq. is President of the Freedom's Defenders in this city in place of Pixley, resigned.

Rev. Drs. Eells and Walsworth have been in the Southern part of the State for a week past.

Hons. A. A. Sargent and J. W. Coffroth will publicly discuss the issues of the pending contest.

Hon. John M. Coghlan, of Napa, will locate permanently in Suisun, to practice his profession.

Rev. A. Coplin recently gave the citizens of Auburn an interesting lecture on "Social Life."

Rev. J. R. Hammond, of Placerville, intends to go East this fall and return in the Spring.

Rev. J. Knapp, a Baptist clergyman, has been preaching during the past week at Suisun.

Mr. Nathan Coombs, of Napa, has just returned from the East by the Overland route.

Prof. E. P. Henderson takes charge of the Philomath School at Corvallis, Oregon.

Senator Williams, of Oregon, arrived in this city from the East on Tuesday, 25th.

Rev. J. McLaughlin has changed his place of residence from Rio Vista to Gilroy.

Rev. Mr. Allen has taken charge of the Episcopal church at Carson City, Nev.

Gen. S. P. Spear, A. I. R., sailed for the East on Saturday last.

Miners' Foundry and Machine Works,

Nos. 245 to 255 FIRST STREET,

SAN FRANCISCO.

HOWLAND, ANGELL, & KING, Proprietors,

Manufacturers of Machinery for

QUARTZ MILLS, SAW MILLS, POWDER MILLS, FLOUR MILLS, SUGAR MILLS, PAPER MILLS, STEAM ENGINES OF ALL KINDS, AMALGAMATORS OF ALL KINDS, MINING PUMPS, OIL WELL TOOLS, ROCK BREAKERS, HOISTING WORKS,

—AND—

Machinery and Castings of all kinds, either of Iron or Brass.
Boilers and Sheet Iron Work, in all its branches.

Shoes and Dies of White Iron, manufactured for, and imported by us, expressly for this purpose, and will last 25 per cent. longer than any other made on this coast.

Russia Iron Screens, of any degree of fineness. We are the only manufacturers on this coast of the "Hicks Engine," the most compact, simple in construction, and durable, of any Engine in use.

W. H. HOWLAND, E. B. ANGELL, [illegible] KING, CYRUS PALMER

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque . . . . . 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, ... $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, ... $5

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, . . . $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

PRACTICAL AND SCIENTIFIC.

AGRICULTURAL.

A Small Prairie Farm.

It was a small one, only 1,200 acres in extent, and six miles around it, and worth but $60,000 with its buildings; but it was a fair specimen of its class and their life. From the chamber window of the house, near the centre, the whole farm could be surveyed, and with a powerful glass the laborers overlooked at their work in any part of it. Corn, wheat, flax, potatoes and grass were the products; each in great broad fields of fifty, one hundred or two hundred acres. My host had, too, a fine apple orchard of several hundred trees, that last year yielded a large crop of very superior fruit. But he despised chickens, and eggs and butter—it was cheaper to buy them—and milked but a single cow. Much of his grain and grass he turned into horses, cattle and hogs; and his nearness to Chicago, the great live stock market, not only of the West, but the country, gives him excellent facilities both in buying and selling. Besides rearing animals, he goes to Chicago and buys young cattle or hogs from the plains by the hundred or thousand, brings them back to his farm, and after a few months of feed and growth, returns them once more to market, so reconstructed as to command a profitable advance. He was a little pinched, just now, by the loss of a lot of seven or eight hundred Texas cattle, a year or more ago, by distemper—a matter of $30,000 or so—but that was a rare accident. The farm was good for $10,000 a year from its crops; and without any risks but the weather and the markets. Machinery is used here in farming to an extent and on a scale quite unknown to New England and New York farming. Twenty acres of corn were being planted a day by three men, with a fourth man and a pair of horses to mark the rows. In gathering the hay, the mowing machines sweep down the grass from sunrise to noon, and, without having to turn it or leave it out a single night, the same afternoon's horse-rakes, and mammoth horse-forks house or stack the same, all fitly cured. "Why is this thus?" when we in New England coddle our grass three or four days, with an even chance of a week, and damaging rains, before we dare house it. Are the Western dews so much lighter and prairie suns and winds so much more drying? Or do we dry our grass unnecessarily much? Labor is plenty and reasonably cheap; ordinary farm hands were hired last season for fifteen dollars a month and board; and this year for twenty dollars. They are chiefly Germans; the Irish are not in favor, and are rarely seen.—*Samuel Bowles, in Springfield Republican.*

Hens—How to Care for Them.

After all that has been done for the improvement of fowls, not more than one half of those who keep hens, succeed in having them lay through the year. There are some who always do succeed, and, of course, reap large profits. What is the secret of success? It is neither difficult nor beyond the reach of every family who possess a few rods of land. The hen-house need not be expensive, but should be so constructed as to be neither too hot in summer nor too cold in winter. It should be whitewashed on the inside. Select the best breeds, and put several kinds together; feed regularly, and let them always have sufficient clean water. They should have both animal and vegetable food, plenty of powdered mortar, brick, burned bones, &c. Bones not burned and pulverized make a most excellent food for laying hens. Give them peppers and pickles. They need acids to prevent their becoming too fat. Pickled peppers are better than cayenne. Slight seasoning of salt in their food is good. Sand or ashes should be provided for them to dust themselves in. If they desire to set, let them stand in a tub or barrel with one or two inches of water for a day or two. Above all, they should have regular attention every day. In this way some do succeed in having their hens lay the year round. We should be glad to find more accomplishing the same thing, as it would contribute not only to the health of the family, but be of great advantage to the pocket.—*New England Farmer.*

MULBERRY TREES ON THE BANKS OF STREAMS—QUESTION FOR SILK RAISERS.—Last week we published an article from the San Francisco *Times*, in the course of which it is said: "We are told that the mulberry tree will stand the water like the willow, and in corroboration of this statement it is a fact that the Italian Government have them planted all along between high and low water mark on the river Po to protect the levees, and that they not only answer this purpose well, but the Government rent the leaves annually to individuals for a sufficient sum to pay all the necessary annual repairs to those levees." The streams of this county present a fine opportunity for thus making the mulberry tree doubly useful. But it is well known that disease among the silk worms of Italy is one of their great drawbacks, and it has been suggested to us by the largest silk grower in Los Angeles county, that perhaps the fact of the proximity of the trees to the water, and the consequent absorption of too great an amount of dampness, is one of the leading causes, if not the sole cause of the prevailing disease among the worms of that country. This presents an interesting and important subject for investigation, by the silk raisers of California, and now is the proper time for investigation, while the business is in its infancy, and while damaging mistakes may be prevented by a knowledge of the facts.—*Los Angeles Republican.*

NUMBER OF STALKS IN A HILL OF CORN.—One of our correspondents writes us that he has lately had a conversation with a neighbor, who has the reputation of being a very observing, sound and sensible man, in regard to the question in the caption above, and that it was the firm conviction of this man that in the case of Dent and of all kinds which grow to a large size, a larger amount of sound corn will be obtained, when there are not over three stalks allowed to grow in each hill, than when there are three or four, or any number over three, other things of course, being equal. He said that he had observed repeatedly that there were usually two good-sized ears of such kinds of corn on each stalk, when there were only three stalks or less in a hill, whereas, when there were four or five stalks, there was seldom more than one ear on each, and of these some would not unfrequently be small, and at harvest prove nothing but soft corn or nubbins.—*Exchange.*

POWER OF A HORSE'S SCENT—A HORSEMAN'S ADVICE.—There is one perception that a horse possesses to which little attention has been paid, and that is the power of scent. With some horses it is acute, as with the dog; and for the benefit of those who have to drive at night, such as physicians and others, this knowledge is invaluable. I never knew it to fail, and I have ridden hundreds of miles on dark nights, and in consideration of this power of scent this is my simple advice:—Never check your horse at night, but give him a free head, and you may rest assured that he will never get off the road, and will carry you expeditiously and safe. In regard to the power of scent in a horse, I once knew one of a pair that was stolen, and recovered mainly by the track being made out by its mate, and that after he had been absent six or eight hours.—*Tait.*

INTERESTING AGRICULTURAL EXPERIMENT.—A French horticulturist has recently made some very interesting experiments. In the autumn he filled three flower pots with cold ashes without admixture with any other substance; in one pot he sowed wheat, in another oats, and in the third strawberry seeds. The pots were then placed in a garden bed and left to themselves. In the month of March the plants were in a very thriving condition, and in April they were luxuriant. The wheat and oats ripened perfectly, the grain being large and heavy, and the straw, in the case of the wheat, 55 inches, and in that of the oats 43 inches high. The strawberry plants continued to flourish till October, when it was necessary to transplant them, and after being planted out in open ground they succeeded so well that they surpassed all his other seedlings.—*Mining Press.*

SOMETHING WORTH KNOWING.—One day, while purchasing a lot of dried fruit, I discovered small pieces of sassafras bark mixed amongst it, and upon inquiry was informed that it was a preventive against the worm. It is said that dried fruit put away with a little bark, (say a large handful to the bushel) will save for years unmolested by those troublesome little insects, which so often destroy hundreds of bushels in a single season. The remedy is cheap and simple—try it.—*T. S.—Gardener.*

MINING.

THE QUICKSILVER MINES IN AUSTRIA—THEIR PAST HISTORY AND PRESENT CONDITION.—Far away in the heart of Europe and the centre of the Julian Alps, there lies a valley of wondrous beauty; huge walls of bare rocks rise to vast heights all around, and shut off the secluded plain below from the rest of the world. The upper parts of the mountains are again crowned with grand old pine forests; below the rocks, spreads a beautiful carpet of green meadows and magnificent woods, while here and there tall masses of rock jut out into the valley, looking defiantly down on the scene below, and crowned with chapel and church. A poor peasant—so goes the legend—once came here to select some timber for the wooden-ware he was making, and placed a few tubs into a well to be seasoned over night. What was his surprise, when he poured the water off next morning to find at the bottom a glittering mass of silvery metal! Soon skillful miners and cunning goldsmiths came from Italy, and the place became known; but only to be made the scene of strife and bloodshed. Now the Venetians would fall with an armed force upon the German miners, and now the great Maximilian would send troops to drive out and destroy the covetous invaders. For centuries the mines have produced most abundantly; but of late they have become less profitable, and the Austrian government, always wanting money, is anxious to sell them. The ore is here roasted in extensive works, and the smoke, which contains the volatile metal, is carried into enormous iron retorts. The cast iron pipes are forty feet long and three feet wide, suspended in the air and resting only upon a few slight supports. As the constant smoke keeps them too warm for condensation, a little aqueduct, following above, trickles continually cooling showers upon them; once a year only the fires are allowed to go out, to clean and repair the whole apparatus. The soot in the cylinders, a loose, black, fatty substance, contains the mercury in countless tiny globules, some of which run out in beautiful silvery whiteness; others have to be whipped from their unsightly retreat; the soot is beaten with small brooms, and soon the silver snakes are seen to glide out of the dark mass, as if anxious to escape in all directions. Then the glittering mass is gathered in sheepskins tanned with alum, or in cast iron bottles of enormous size, to be sent all over the world.

FIRST QUARTZ MILL IN LOS ANGELES COUNTY.—A gentleman interested in the McMurtry mine, Soledad Cañon, in this county, has shipped from San Francisco the machinery for a ten-stamp quartz mill, which, when in operation, will be the first quartz mill ever put up in this county. The mines of Soledad have become a fixed fact, and promise as rich yields of the precious metal as those of any mining district in the state.—*Los Angeles News.*

MANUFACTURE.

The Silk Manufacture—Its Introduction into Europe—John Lombe.

In the reign of the Emperor Justinian, a couple of Persian Monks, on a religious mission to China, brought away with them a quantity of silkworms' eggs concealed in a piece of hollow cane, which they carried to Constantinople. There they hatched the eggs, reared the worms, and spun the silk,—for the first time introducing that manufacture into Europe, and destroying the close monopoly which China had

bitherto enjoyed. From Constantinople the knowledge and the practice of the art gradually extended to Greece, thence to Italy, and next to Spain. Each country, as in turn it gained possession of the secret, strove to preserve it with jealous care; but to little purpose. A secret that so many thousands already shared in common, could not long remain so, although its passage to other countries might be for a time deferred. France and England were behind most of the other states of Europe in obtaining a knowledge of the "craft and mystery." The manufacture of silk did not take root in France until the reign of Francis I.; and was hardly known in England till the persecutions of the Duke of Parma in 1585 drove a great number of the manufacturers of Antwerp to seek refuge in our land. James I. was very anxious to promote the breed of silkworms, and the production of silken fabrics. During his reign a great many mulberry-trees were planted in various parts of the country—among others, that celebrated one in Shakspeare's garden at Stratford-on-Avon—and an attempt was made to rear the worm in our country, which, however, the ungenial climate frustrated. Silk-throwsters, dyers, and weavers were brought over from the continent; and the manufacture made such progress that, by 1629, the silk-throwsters of London were incorporated, and thirty years after employed no fewer than 40,000 hands. The emigration from France consequent on the revocation of the Edict of Nantes (1685) added not only to the numbers engaged in the trade, but to the taste, skill, and enterprise with which it was conducted. It is not easy to estimate how deeply France wounded herself by the iniquitous persecution of the Protestants, or how largely the emigrants repaid by their industry the shelter which Britain afforded them.

Although the manufacture had now become fairly naturalized in England, it was restricted by our ignorance of the first process to which silk was subjected. Up to 1718, the whole of the silk used in England, for whatever purpose, was imported "thrown," that is, formed into threads of various kinds and twists. A young Englishman named John Lombe, impressed with the idea that our dependence on other countries for a supply of thrown silk prevented us from reaping the full benefit of the manufacture, and from competing with foreign traders, conceived the project of visiting Italy, and discovering the secret of the operation. He accordingly went over to Piedmont in 1715; but found the difficulties greater than he had anticipated. He applied for admittance at several factories, but was told that an examination of the machinery was strictly prohibited. Not to be balked, he resolved, as a last resort, to try if he could accomplish by stratagem what he had failed to do openly. Disguising himself in the dress of a common laborer, he bribed a couple of the workmen connected with one of the factories, and with their connivance obtained access in secret to the works. His visits were few and short; but he made the best use of his time. He carefully examined the various parts of the machinery, ascertained the principle of its operation, and made himself completely master of the whole process of throwing. Each night before he went to bed he noted down everything he had seen, and drew sketches of parts of the machinery. This plot, however, was discovered by the Italians. He and his accomplices had to fly for their lives, and not without great difficulty escaped to a ship which conveyed them to England.

Lombe had not forgotten to carry off with him his note-book, sketches, and a chest full of machinery, and on his return home lost no time in practising the art of "throwing" silk. On a swampy island in the river Derwent, at Derby, he built a magnificent mill, yet standing, called the "Old Silk Mill." Its erection occupied four years, and cost £30,000. It was five storys in hight, and an eighth of a mile in length. The grand machine numbered no fewer than 13,384 wheels. It was said that it could produce 318,504, 960 yards of organzine silk thread daily; but the estimate is no doubt exaggerated.

While the mill was building, Lombe, in order to save time and earn money to carry on the works, opened a manufactory in the Town Hall of Derby. His machinery more than fulfilled his expectations, and enabled him to sell thrown silk at much lower prices than were charged by the Italians. A thriving trade was thus established, and England relieved from all dependence on other countries for "thrown" silk.

The Italians conceived a bitter hatred against Lombe for having broken in upon their monopoly and diminishing their trade. In revenge, therefore, according to William Hutton, the historian of Derby, they "determined *his* destruction, and hoped that of his works would follow." An Italian woman was despatched to corrupt her two countrymen who assisted Lombe in the management of the works. She obtained employment in the factory, and gained over one of the Italians to her iniquitous design. They prepared a slow poison, and administered it in small doses to Lombe, who, after lingering three or four years in agony, died at the early age of twenty-nine. The Italian fled; the woman was seized and subjected to a close examination, but no definite proof could be elicited that Lombe had been poisoned.—Lombe was buried in great state, as a mark of respect on the part of his townsmen. "He was," says Hutton, "a man of quiet deportment, who had brought a beneficial manufactory into the place, employed the poor, and at advanced wages,—and thus could not fail to meet with respect; and his melancholy end excited much sympathy.—*Triumphs of Invention and Discovery*, (*Fyee.*)

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

THE OCCIDENT

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of PRACTICAL AND SCIENTIFIC.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance THE OCCIDENT *is acknowledged to have no equal on the Pacific Coast.*

THE OCCIDENT

Is edited by REV. JAS. EELLS, D.D., of the First Presbyterian Church, San Francisco—formerly of the Church on the Heights, Brooklyn; and REV. E. B. WALSWORTH, D.D., of Oakland, as Associate.

It is the aim of the Editors and Publishers to make THE OCCIDENT, in every respect a first class paper, and one that will be WELCOME IN EVERY FAMILY.

A year's subscription to THE OCCIDENT *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

TERMS.—$4 00 a year, in advance; $2 50 for six months.

To Advertisers,

A first-class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the VERY BEST MEDIUM for bringing their business before the public.

Direct all communications to "THE OCCIDENT, care of Bancroft & Co., San Francisco."

609 Montgomery St., San Francisco.

General Selections.

"He Saved Others."

When scorn and hate, and bitter, envious pride
Hurl'd all their darts against the Crucified,
Found they no fault but this in Him so tried?
"He saved others!"

Those hands—thousands their healing touches knew;
On wither'd limbs they fell like heavenly dew:
The dead have felt them, and have lived anew:
"He saved others!"

The blood is dropping slowly from them now;
Thou canst not raise them from Thy thorn-crowned brow;
Nor on them Thy parch'd lips and forehead bow:
"He saved others!"

That Voice from out their graves the dead had stirr'd;
Crush'd, outcast hearts grew joyful as they heard;
For every woe it had a healing word:
"He saved others!"

For all Thou hadst deep tones of sympathy—
Hast Thou no word for this Thine agony?
Thou pitiedst all; doth no man pity Thee?
"He saved others!"

So many fettered hearts Thy touch hath freed,
Physician! and Thy wounds unstaunched must bleed;
Hast Thou no balm for this Thy sorest need?
"He saved others!"

Lord! and one sign from Thee could rend the sky,
One word from Thee, and low those mockers lie;
Thou mak'st no movement, utterest no cry,
And savest us.

—*Author of Schonberg Cotta Family.*

How the Natives of Mexico and Peru Regarded Their Spanish Conquerors—Traditions of a Redeemer.

Historians have marvelled at the instantaneous collapse of the empires of Mexico, Peru, the Mayas, and the Natchez, before a handful of Spanish filibusters. The fact was, wherever the whites appeared they were connected with these ancient predictions of the spirit of the dawn returning to claim his own. Obscure and ominous prophecies, "texts of bodeful song," rose in the memory of the natives, and paralyzed their arms.

"For a very long time," said Montezuma, at his first interview with Cortes, "has it been handed down that we are not the original possessors of this land, but came hither from a distant region under the guidance of a ruler who afterwards left us and returned. We have ever believed that some day his descendants would come and resume dominion over us. Inasmuch as you are from that direction, which is toward the rising of the sun, and serve so great a king as you describe, we believe that he is also our natural lord, and are ready to submit ourselves to him."

The gloomy words of Nezahualcoyotl, a former prince of Tezcuco, foretelling the arrival of white and bearded men from the east, who would wrest the power from the hands of the rightful rulers and destroy in a day the edifice of centuries, were ringing in his ears. But they were not so gloomy to the minds of his down-trodden subjects, for that day was to liberate them from the thralls of servitude. Therefore when they first beheld the fair complexioned Spaniards, they rushed into the water to embrace the prows of their vessels, and despatched messengers throughout the land to proclaim the return of Quetzalcoatl.

The noble Mexican was not alone in his presentiments. When Hernando de Soto on landing in Peru first met the Inca Huascar, the latter related an ancient prophecy which his father, Huayna Capac, had repeated on his dying bed, to the effect that in the reign of the thirteenth Inca, white men (*viracochas*) of surpassing strength and valor would come from their father the Sun, and subject to their rule the nations of the world. "I command you," said the dying monarch, "to yield them homage and obedience, for they will be of a nature superior to ours." The natives of Haiti told Columbus of similar predictions long anterior to his arrival.

When the church of Rome had crushed remorselessly the religions of Mexico and Peru, all hope of the return of Quetzalcoatl and Viracocha perished with the institutionso f which they were the mythical founders. But it was only to arise under new incarnations and later names. As well forbid the heart of youth to bud forth in tender love, as that of oppressed nationalities to cherish the faith that some ideal hero, some royal man, will yet arise, and break in fragments their fetters, and lead them to glory and honor.

When the name of Quetzalcoatl was no longer heard from the teocalli of Cholula, that of Montezuma took its place. From ocean to ocean, and from the river Gila to the Nicaraguan lake, nearly every aboriginal nation still cherishes the memory of Montezuma, not as the last unfortunate ruler of a vanished state, but as the prince of their golden era, their Saturnian age, lord of the winds and waters, and founder of their institutions. When, in the depth of the tropical forests, the antiquary disinters some statue of earnest mien, the natives whisper one to the other, "Montezuma! Montezuma!" In the legends of New Mexico he is the founder of the pueblos, and intrusted to their guardianship the sacred fire. Departing, he planted a tree, and bade them watch it well, for when that tree should fall and the fire die out, then he would return from the far East, and lead his loyal people to victory and power. When the present generation saw their land glide, mile by mile, into the rapacious hands of the Yankees—when new and strange diseases desolated their homes—finally, when in 1846 the sacred tree was prostrated, and the guardian of the holy fire was found dead on its cold ashes, then they thought the hour of deliverance had come, and every morning at earliest dawn a watcher mounted to the house-tops, and gazed long and anxiously in the lightening east, hoping to descry the noble form of Montezuma advancing through the morning beams at the head of a conquering army.

Groaning under the iron rule of the Spaniards, the Peruvians would not believe that the last of the Incas had perished an outcast and a wanderer in the forests of the Cordilleras. For centuries they clung to the persuasion that he had but retired to another mighty kingdom beyond the mountains, and in due time would return and sweep the haughty Castilian back into the ocean. In 1781, a mestizo, Jose Gabriel Condorcanqui, of the province of Tinta, took advantage of this strong delusion, and binding around his forehead the scarlet fillet of the Incas, proclaimed himself the long lost Inca Tupac Amaru, and a true child of the sun. Thousands of Indians flocked to his standard, and at their head he took the field, vowing the extermination of every soul of the hated race. Seized at last by the Spaniards, and condemned to a public execution, so profound was the reverence with which he had inspired his followers, so full their faith in his claims, that, undeterred by the threats of the soldiery, they prostrated themselves on their faces before this last of the children of the sun, as he passed on to a felon's death.

These fancied reminiscences, these unfounded hopes, so vague, so child-like, let no one dismiss them as the babblings of ignorance. Contemplated in their broadest meaning as characteristics of the race of man, they have an interest higher than any history, beyond that of any poetry. They point to the recognized discrepancy between what man is, and what he feels he should be, must be; they are the indignant protests of the race against acquiescence in the world's evil as the world's law; they are the incoherent utterances of those yearnings for nobler conditions of existence, which no savagery, no ignorance, nothing but a false and lying enlightenment can wholly extinguish.—*Brinton's "Myths of the New World."*

Over-Eating.

The vicious habits in respect to eating, which prevail in such a marked degree among Americans, have been made the subject of much severe criticism; our cookery, so destructive of digestion, our hasty meals, where food is bolted "at sight," and the villainous proportion in which grease enters into every compound for the table. But it may be questioned whether our greatest crime against the stomach is not in the quantity consumed, rather than in its quality or the manner in which it is served and eaten. Americans generally labor under the impression that food is nourishment and strength, totally irrespective of the wants of the system or its capabilities of digestion: whereas, all that is eaten after a healthy sufficiency, is poison, and such indulgence is intemperance. We seem in this matter to have drawn more largely from the Saxon than from the Norman side of our ancestry, and to have inherited those habits of gross and gluttonous feeding which characterized that brave and capable and stubborn and sluggish people.

As a consequence of the unexceptionably false relations which Americans maintain towards their own interior economy, they are the most universally afflicted people on the globe. It is not, as a general thing, overwork, that causes the sallow complexion, the staring eyes, the restless countenance, the trembling hands, so commonly seen among us; but it is work when in a state of repletion. Somebody or other sometime was starved to death in the midst of a feast; but a Yankee starves after the feast. He so overloads his system that he gets no nourishment from his food. Nature has to expend all her power in freeing herself from the burden imposed upon her. Like a charity ball, the expenses eat up the receipts, and leave nothing for the poor sufferer. An Englishman eats not less, perhaps even more, but then he gives himself some opportunity to rest; he does not hurry about as if pursued by avenging furies; he does what he does soberly and deliberately, and has greater nerve power left to make him perform the, to him and to everybody, serious work of digestion.

Probably not one American in ten contents himself with a sufficient supply of food; not one in a hundred obeys the salutary rule to rise before appetite is wholly gone. Of those who exceed, some do so in a greater and some in a less degree, but in every case to the injury of health and the loss of physical and mental power. The economical considerations are of no mean account. When we recollect how large a portion of our time has to be given up to providing for physical necessities, when it might otherwise be employed in intellectual culture or social enjoyment, there can be no question of the importance of this element of the problem of daily life. The Frenchman is the model of true living, so far as regards food. The peasant takes his dinner with him into the field, and when the hour comes, regales himself on a handful of sorrel and two or three slices of coarse bread, where a Yankee or an English farmer would be devouring great blocks of beef or pork, and—the American at least—huge wedges of concentrated indigestibilities called pie. The result is that a French peasant family will live decently and happily on a less sum than a poor English family will waste. The French artisan, though not quite so primitive, is yet a miracle of frugality in diet, compared with his neighbor across the channel or across the western sea. And the result of this is that English manufactures, even in England's specialty, iron and steel, are being crowded out—with free trade—from the French market; and French locomotive builders are enabled to underbid their English competitors for German and Russian contracts.

These economical advantages would be valueless if they did not run in the same direction with the moral and social considerations of the case; but they do. More intellectual power and social vivacity is suppressed, neutralized, destroyed, by over-eating, than by the use of both stimulants and narcotics. The records of scholarship and of statesmanship, with very rare exceptions, prove that perfect temperance and self-control in diet are the conditions of greatness and influence, and, on a lower scale, common observation in our schools, in our professions, and even in our business, shows that nothing is so formidable and fatal an enemy to alertness, activity, enterprise, and even to geniality, as the gormandizing propensities of our people. The French vivacity and cheerfulness of temper is not owing solely to the national habit in regard to food, but it is incompatible with the contrary habit.

This matter of over-eating is more of a practical thing than we make it. The habit is generally formed in childhood. By little and little the appetite, or rather the demand, for food is increased. Children are even encouraged to eat, after anything like real appetite has disappeared. The plan of portions, which is adopted from necessity in so many

houses, is really the kindest. But if parents will not take the trouble which this imposes, or plead that as long as nature craves food it must need it, the rule should, for the best interests of the child, be invariable, that, after a reasonable indulgence only the simplest fare, without anything to tempt the appetite, should be supplied. There would be no great danger of forming a habit of gormandizing upon plain bread; whereas a child will stuff itself with pies and cakes long after anything like real hunger has ceased. It is an humble subject, but nothing connects itself more with health and happiness in after life; and if our moralists would leave loftier themes and come down for a while to this, they might accomplish more real good than by fixing the centre of moral obligation to the fraction of a second. —*Springfield Republican.*

Magnitude of London.—Its houses number more than 350,000, and its streets, if placed in line, would extend from Liverpool to New York, and are lighted at night by 360,000 gas lamps, consuming in every twenty-four hours about 13,000,000 cubic feet of gas. Of the water supply 44,383,328 gallons are used per day. The traveling public sustain 5000 cabs and 1,500 omnibuses, besides all the other sorts of vehicles which human need can require or human wit invent. Its hungry population devour in course of every year 1,600,000 quarters of wheat, 340,000 bullocks, 1,700,000 sheep, 28,000 calves, 35,000 pigs, 10,000,000 head of game, 3,000,000 salmon, and innumerable fish of other sorts, and consume 43,200,000 gallons of beer, 2,000,000 gallons of spirits, and 65,000 pipes of wine. As a consequence 2,400 doctors find constant employment. London, finally, supports 852 churches which are presided over by 930 divines of greater or less note. —*The Nation.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, Principal.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

FAMILY READING.

Vanity.

The sun comes up and the sun goes down,
And the day and night are the same as one;
The year grows green and the year grows brown,
And what is it all, when all is done?
Grains of somber or shining sand,
Sliding into and out of hand.

And men go down in ships to the seas,
And a hundred ships are the same as one.
And backward and forward blows the breeze,
And what is it all when all is done?
A tide with never a shore in sight,
Setting steadily on to the night.

The fisherman droppeth his net in the stream,
And a hundred streams are the same as one;
And a maiden dreameth her love-lit dream,
And what is it all when all is done?
The net of the fisher the burden breaks,
And after dreaming, the dreamer wakes.

—*Springfield Republican.*

Unanswered.

How sad and how awful it must be for God to listen,
Sitting in white calms upon his shining throne,
To all the ceaseless and unanswerable prayings,
Beseeching blindly for the good unknown—
The importunate pleadings of strong souls in pain,
Yearning for what they never can attain:

To answer with a blank and wordless silence
The passionate longings of the heart's desire
Over some dear one, on whose brow His finger
The awful sign hath written—"Come up higher!"
To listen, answering not, yet know one breath,
One look, would stay the chariot wheels of Death.

God is not deaf; the cry of every human creature
That out of doubt and darkness calls to Him—
The infinite, sad chorus of appeal He heareth,
Between the hymning of the cherubim;
Amid the music of the swinging spheres
The holiest breathing of His name He hears.

—*Harper's Magazine.*

Christ at the Door.

Christ pictures Himself before the sinner in many attitudes. He sits by his side conversing, He stands before him instructing, He kneels at his feet entreating, He hangs above him dying, He appears in the heavens judging. This presentation of Him is especially affecting. In the dank night air, He stands at a barred door sadly knocking. Does the inmate hear? Will he respond? Why does he not hasten to admit Him? Why, at least, does he not see who it is? Did he ever treat any other one so ill? Does he sit still in his house while persons are knocking quietly and entreatingly, and never respond to their appeal? Why does he not, then, heed this petition of Christ's? Every one hears this call. The agitation of the world concerning Him is a confession to this universal recognition. At the scholar's heart He knocks, and that scholar, Strauss, Colenso, Renan, Emerson, hears the sound thereof, and knows whence it cometh, and what it requireth; knows it is the Lord—his Lord. He knocks at the scoffer's heart, and he hears it in the midst of his blasphemous ribaldry. He sends its ringing appeal through the depths of that lost soul, sunken in sensuality—an open and awful profligate—and he recognizes the sacred summons. All attest his sad, sweet, solemn presence.

How do you treat this solemn invitation? Some, instead of letting Him in, proceed to discourse about His character and claims, with great show of learning, but with the uttermost ignorance of real knowledge. Let Him in first, and then you can intelligently speak of Him. Others come to the window, and bow and smirk to Him, with great condescension, call Him all sorts of pretty names, but are careful not to let Him in. Others say, "wait till I have made this trade, played this game, indulged in this debauch, and I will get up and invite you to enter." Others get so besotted in their sin that they only grow the more furious at every reverberation of that invitation through their hearts, and fiercely seek to drive him from their door. Thus they gnash on His ministers, thus on Him.

How is it with you, sinner? In whichever class you are, it is all the same, if you do not admit Him That is what He wishes; that is all in all. Say not, "to-morrow I'll open the door, when I am older, richer, sicker, at camp meetings, next winter, any time but now." Behold, NOW is the accepted time. Now is the day of invitation. Christ supplicates you. Christ, your Lord and your God; Christ, who left the glory which He had with the Father before the world was, has come to your door. Hasten to invite Him to open. You cannot open it yourself. It is too closely barred; too much bolted; too greatly overgrown with briars and thorns. Beg Him to unlock the bolts, unloose the bars, cut away the matted abattis, and come in. Throw away your pursuits, drop your sinful, or merely unsinful vocations, by which the pre-eminence you give them becomes sin to you; hurl from you that skeptical book; fly from that anti-Gospel preacher; implore Him to come and save you. Your heart, now the habitation of errors and sins, in which you grope blindly and vainly for the truth, in which you dwell carnally and darkly, amid your own lusts—that wicked heart of unbelief He will illumine, cleanse, sweeten, and take up His abode in. Hear Him knocking—now, this night, this day, this hour, hear and respond. If you will not, you will soon cease to hear.

Grieved, away the Savior goeth.
Death *breaks in* at last.

— *Zion's Herald.*

Startling Statistics.

Few persons, probably, are aware of the fearful facts that are well reported in regard to the drinking habits and expenditures of our country. In his Internal Revenue Report for 1867, Commissioner Wells states, it must be supposed on reliable data, that the aggregate amount of the sales for the year, as returned by the licensed retail liquor dealers in the United States, reached the enormous sum of $1,487,000,000. Remembering, too, how largely this retail traffic is carried on by unlicensed dealers, and in low and vile places, it is probable that nearly or quite as much was sold without any returns being made, and thus, in all likelihood, $3,000,000,000 were required during that single year to pay the drinking bill of our country. What a fearful thought, and what untold and inconceivable miseries must have accompanied so much drinking as its legitimate and almost necessary, and in some measure universal fruit!

During the year, Mr. Wells also shows, that the whole amount of money contributed in this country for building churches, and for supporting and spreading abroad the Gospel, was about $30,000,000, and the whole amount for educational purposes was $22,000,000, or $52,000,000 thus expended for these two great safeguards and sources of good to any community and country. At this rate, there is but too much reason to fear that, as a nation, we expended $100 in drinking for every single dollar contributed for the support of our holy religion, or $136 for this drinking, and all its awful fruits—poverty, crime, degradation, ruin to soul and body, for time and eternity, for every $1 spent in promoting good education, and all the good results that flow from it. Is not this terrible to think of? And are even the moral and religious, and order-loving and order-keeping members of the community at large altogether guiltless in this matter? Are we exerting our influence against the making and selling, and drinking the accursed thing? As citizens, are we setting our faces against the man for any public office, or for a seat in any legislative hall, who either uses it, or is not opposed to its use? As members of churches, are we striving to keep ourselves pure of the blood of all men in this matter, not using it ourselves, nor giving our example or influence, in any way, for it? Are our pulpits speaking thoroughly in this matter, crying with trumpet tongue, "Woe to him that putteth the cup to his neighbor's lips?" and "No drunkard shall inherit the kingdom of God?"

Surely, it is time to speak and act on this subject. How often is the State being robbed of some of its noblest intellects, and the Church of some its most hopeful and gifted members, and the very family of the dearest and most needed, and fondly cherished in its circle!—all by the touch of the intoxicating cup. O, is it not fearfully time to act against the ensnaring, accursed thing?—*Christian Instructor.*

Late in Church.

Church-goers who have a regard for the feelings of others, and respect for Him whom they assemble to worship, will never be late in entering the house of God. They will be in their seats a few moments before the exercises commence, so that they may be prepared to take part with calmness and devoutness in the services of the occasion. There are others, however, and their number is not as small as it should be, who are habitually late at church. They arrive a few minutes after the exercises are commenced, and proceed up the aisle to their seats. The attention of the audience is called off, and the clergymen is interrupted in his duties until the tardy comers have settled themselves in their pews.

There is, in nine cases out of ten, no necessity for such a want of punctuality. A little forethought and exertion will prevent it. It is a good deal easier for people to be always on time than to be tardy. There are some so uncharitable as to insinuate that the late goers to church are such intentionally—arriving just after the proceedings have commenced—for the express purpose of attracting the attention of the people to themselves and their finery.

Now, we cannot believe that vanity will lead anybody into such a violation of good manners as this, although we must admit that appearances sometimes are in favor of the truth of the insinuation. The only way to avoid the appearance of evil is to be always early in church.—*U. Presbyterian.*

MAKE HOME HAPPY.—Readings, declamations, pantomimes, simple games, acting and rehearsals, are all innocent amusements, and can be enjoyed at home with far less expense than to go abroad for them. This course will give you the love and confidence of your children, which you must have to serve them well, and make them feel that home is the best place in the world. It is the course that will save your sons from the haunts of vile companions, and your daughters from being enticed, through the hope of pleasure, into rude and forbidden ways. Your young folks *will* have fun and frolic, and if you make them leave it outside of your dwelling, they will go out to find it and enjoy it. Home, then, is the safest and most profitable place for amusements. Here bring your music, your gambols and carols; here let the happy voices ring in social merriment, while you, if you have cares and sorrows to weigh down your heart during the day, lay them apart from yourself for the time, and put on a glad spirit and live over again your gay and happy hours. It's no use to carry a sad face always, and it is not right to cloud the sunshine of the young heart. A child without a childhood, a youth without youth, is a sad picture for the world to look upon.—*Selected.*

HOW THEOLOGY IS OUTGROWN.—We hear of some dapper preachers who claim that the age has outgrown doctrine. They have advanced around the circle to the point from which they started, and hope they are ready again to enter the Kingdom of Heaven like little children, as far as ignorance is concerned. Let it be remembered that systematic theology has its essence simply in clear thinking and clear speaking on the subject of that religion which is revealed in the Scriptures. A man can outgrow systematic theology, therefore, either by ceasing to be clear-headed, or by ceasing to be religious. I suppose some escape, in their haste, by both ways at once.—*Prof. A. A. Hodge.*

THE following is one of Flavel's home thrusts: "Two things a master commits to his servant's care," saith one, "the child and the child's clothes." It will be a poor excuse for the servant to say at his master's return, "Sir, here are all the child's clothes, neat, clean, but the child is lost!" Much so with the account that many will give to God of their souls and bodies at the great day. "Lord, here is my body, I am very grateful for it. I neglected nothing that belonged to its content and welfare; but for my soul, that is lost and cast away forever, I took little care and thought about it."

The late Bishop of Litchfield was once traveling in a railway carriage in England, when a blustering man exclaimed:

"I should like to meet that Bishop of Litchfield. I'd put a question to him that would puzzle him."

"Very well," said a voice out of another corner, "now is your time, for I am the Bishop of Litchfield."

The man was rather startled, but presently recovered and said:

"Well, my Lord, can you tell me the way to Heaven?"

"Nothing easier," answered the Bishop; "you have only to turn to the right, and go straight forward."

Young Folks.

Which Boy do you Like Best?

"Come Guy; come fellows, let's coast. Snow's prime to-day, I know."

"No doubt of that, but where shall we go? Over by the bridge, I say."

"Over by the bridge I *don't* say. I know a place better than that, and where we'll have more fun, I'll bet."

"Where is it?" "Out with it," "Don't stand there blarneying about it if you want to do anything to-night," broke simultaneously from several voices among the cluster of boys gathered around Richard and Guy. They had just come out of school, and were aching to work off the suppressed vitality which had been accumulating during the two hours of conformity to school rules.

"Over by the marble factory," said Richard, triumphantly.

"Poh!" said one, "I don't see as that is any better than by the bridge. 'Explain its advantages,' as Mr. Bowen would say."

With an energetic kick at a tree-protector, near which he was standing Richard explained.

"The coast is no longer, but it is so steep that you can't help having a sort of a feeling that you'll go heels over head before you get to the bottom, but then you come out all right, and I like it better than I do the other."

Guy laughed, and declared himself on Richard's side, determined to find out how much enjoyment there really was in fearing a fall which one is quite certain will never take place.

Not many minutes had passed before bundles of books well strapped together had been exchanged for sleds, and the whole party were bound for the factory.

Now, for two hours a company of girls from four to ten years of age had been enjoying a coast which they themselves had made, about midway of the same bank, down which the boys intended to get their peculiar experiences. The two babies of the flock—out in the care of older sisters—had commenced by being pushed down a few feet near the bottom of the bank, but their courage had risen almost as rapidly as the mercury when a thermometer is plunged in boiling water, and now they went from top to bottom, and far out on the plain as bravely as the older ones. To be sure, they must have help to draw their wee little sleds up the steep bank, but older sisters were kind, and they were happy.

On approaching the spot, Richard ran into the group of girls, dashed down the coast followed by all the boys but Guy, overturning little Maggie Carter at the top of the bank, when his sled had nearly stopped, fortunately, running into a little girl who had preceeded him, rolling her off her sled into the snow. Before she could rise and get possesion of her sled another boy ran into it and set it flying far beyond her. Being a girl of some spirit, though only six years old, Ellen spoke her mind without stopping to think of consequences.

"You are the most impolite boys there are in the whole world I know."

"We are, are we? How do you like that then?" and seizing her roughly, he poked a handful of snow into one ear under her hat ribbons.

When the boys reached the top of the bank where Guy still stood, he begged them go a little to one side and make a new coast, and leave the girls to enjoy themselves in peace.

"It will take an hour to get another coast as good as this, I bet I wont go for these *little spuds*."

"I never knew before you were so mean a fellow, Fred. How would you like to have your sister treated so?"

"I shouldn't wonder if she had to stand around now and then when I want anything," and down the coast went Fred, followed by nearly all the boys.

Guy, with two or three others, turned away to make a new coast for themselves. After several attempts to enjoy their own coast, and being crowded, jostled, scolded, and even cuffed by Fred and two or three of his followers, the girls went to another which they had at first attempted, but had abandoned on account of an unfortunate ridge on the plain at the foot of the bank, which frequently would overturn the sleds as they struck it, unless they struck it square; and these little girls were not yet remarkably skillful in steering.

Presently Guy heard a scream, and saw little Madge Carter lying in the snow, while Fred stood near, laughing and whirling around on one foot, occasionally bending almost double in his real or pretended mirth.

All the girls were on the way to Madge's relief, but Guy reached her first, to hear her exclaim, between her screams, and all mixed up with them:

"He has broke my leg right off! It aches so, I know it's broke."

"Yes, and he did it on purpose; I saw him;" "and I," "and I," "and I," chorussed several girlish voices."

After much rubbing of the really injured leg, and much soothing of the frightened child, Guy left her to her sisters, and stood thinking a moment. Apparently despairing of success by any direct appeal, he called out,

"I'm tired of coasting; let's go and see if the ice on back bay isn't strong enough to skate on," and he was off in that direction, soon followed by all the boys.

The little girls returned to their own ground with much glee, and for the remaining half hour of daylight were as happy as children need be.

Don't fancy the above is a made-up story. It is every word true, and it happened since this year, 1868, came to bless us all; nor has half that occurred that afternoon been written out.

Some boys will say that girls had better stay in the house, but it seems to me, that since their lungs and blood and muscles are made precisely as the same organs belonging to boys are, that play out of doors, which has proved so useful to boys, must be useful to girls also.

Others will say—and I am glad there are so many who feel it—"That Fred must be a mean, miserable bully, or he would never treat girls that way;" but I must say—for I know, that he lives in a house that looks like a gentleman's; and when he walks to church and Sabbath School—for he goes to both—father and mother, sons and daughters all look like gentlemen and ladies.

Perhaps Fred thinks to gain a manly mastership over those weaker than he, by this brutal course; but he will only kindle a dislike against himself, which, at some future day he may be pained to meet.

Little Madge said, on her way home from the memorable coasting,

"I wish I knew that great big boy's name, I'd put him in my prayer, right after papa and mamma, but God will know if I say the boy that rubbed my leg till it was well, and picked the snow out of my hair."

Another, and a larger girl, when telling her mother of the afternoon troubles said:

"The boy they called Guy was so good, mother; I wish I knew something he wanted, I'd work ever so hard to make it for him. I guess I know where he lives; I've seen him go into a house on —— street; I intend to see what name is on the door the next time I go past, and then I shall remember him just as long as I live."—*Congregationalist.*

Never Put Off till To-morrow.

"I would like to have you run down to Mrs. Bowen's for me, Katy, before sun-down," said Mrs. Nelson to her daughter, who sat busily stitching away in her little willow-chair.

"Oh mother, couldn't I go just as well to-morrow? I have this pair of pillow-cases almost done for my dolly, and Aunt Martha is going to give me two nice pillows and a feather bed for her, as soon as I have the bed clothes all made neatly."

"But my dear, I wish you to take the money for the work she has sent home to-day. She is a poor woman and may need it."

Still Katy looked reluctant at the dainty sewing work before her, and laid down the ruffled pillow-case with a sigh.

Perhaps the poor woman is wondering how she shall buy food for her children to-morrow," continued her mother. "Think what a relief it will be to have that care off her mind."

That thought was enough for Katy's really benevolent little heart, and she quickly laid up her work in the pretty rosewood box, so it would not be in any one's way, and prepared herself for her walk.

"Here is a basket with some of Ann's tea biscuit, and a plate of butter," said Katy's mother; "you may take that to Mrs. Bowen, if it will not be too heavy."

"No, indeed, mother," said Katy, her eyes sparkling with pleasure, "I shall love to do it. I don't think they have biscuit and butter very often. Lucy brings just dry bread to school for her dinners."

"Why, Katy, I did not think they were so poor as that. Here, take this cup of jelly and some grapes to the little sick boy. I dare say they will be refreshing. I must certainly call around and see them, as soon as I can."

Katy returned from her errand that night a little weary, but very light-hearted.

"I am so glad I went to-night, mother," she said. "They were just sitting down to supper, with only a little cake of corn meal and a pitcher of water on the table. The woman cried when I gave her the basket, she seemed so glad. She gave the sickly boy his biscuit and grapes first, and I wish you could have seen how his pale face looked."

"I am very glad, too, that you went to-night," said her mother, "and I hope you will learn this lesson from it—never put off doing a kind action until to-morrow, when you can do it to-day."

—*New York Observer.*

The Folly of Quarrels.

"Two little boys were talking together; when one of them said, 'I wish I had all the pasture-land in the world.' The other said, 'And I wish I had all the cattle in the world.' 'What would you do with them?' said his friend. 'Why, I would turn them into your pasture-land.'

'No, you wouldn't,' was the reply.

'Yes, I would.'

'But I wouldn't let you.'

'I wouldn't ask you.'

'You shouldn't do it,' he screamed.

'I should.'

'You sha'n't.'

'I will;' and with that they seized and pummeled each other in a rough-and-tumble fight.

Such is a specimen of the causes for which people often quarrel.—*Observer.*

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 1) San Francisco, Cal.

News Summary.

PACIFIC COAST ITEMS.

Items about Portland.—There are 4,000 feet of wharf in this city. Of the Nicholson pavement, there are, in length, upwards of 5,000 feet. $200,000 will be expended in the erection of brick buildings during this summer. There are three steam saw mills, each capable of cutting 50,000 feet of lumber daily. There are fifteen hotels, with accommodtaions in the aggregate, for 2,500 guests. There about 100 saloons, reckoning all places where drinks are sold. There are eight schools with attendance of about 1,200 pupils. There are ten churches that will seat congregations numbering, in all, 5,000 persons. There are eight steamboats that ply regularly to and from this city. There is telegraphic communication in three directions—with Washington Territory, Eastern Oregon California and thence with all the world.—*Oregonian.*

A steamboat, 22 feet in length and carrying 18 persons, has been built and launched on Washoe Lake. It has a brass engine weighing 75 pounds. It is intended for a pleasure boat, and it is proposed by a pleasure party to take the boat by wagon and railroad to Wadsworth, thence by the Truckee to Pyramid Lake, the many wonders of which will be thoroughly explored.

Among the islands of Pyramid Lake are two small, rocky ones near to each other, and near the shore of the lake, that are remarkable from the fact that they are alive with rattlesnakes. Huge and lazy old patriarchs of the islands, with long strings of rattles upon their tails, bask in the shade of almost every stone, while the younger and more active members of the tribe glide about in all directions, and the intruder upon these islands of snakes is often treated to a serenade by a dozen sets of rattlers, of various degrees of power and shade of tone.—*Territorial Enterprise.*

The trials of the steam plow which have been made in this city have been highly satisfactory. There is little doubt that the plow will prove a complete success, and will add new value to our many acres of grain land which have not been cultivated for want of laborers.

There are said to be large quantities of ash timber of a superior quality in Washington Territory. This timber is very valuable for many purposes and is extremely scarce in California.

The number of deaths in this city during the month of July was 346, a larger number than was ever known, although July is one of our most unhealthy months.

The receipts of wheat in this city for the past week average nearly 2,000 tons per day. 5,000 tons have been shipped in the same time.

The Germans of Austin (Nev.), have a temperance society which restricts its members to fifteen glasses of lager *daily.*

People are still going in great numbers to the Southern counties. Some are returning, having found prices too high.

The grasshoppers have left Salt Lake City and vicinity. They complain of ill treatment from the inhabitants.

8843 pounds of silver were brought to Aurora, Nev., for assaying, on the 25th from a mine in Mono County.

Sixty tons of wheat belonging to Mr. Durbin, of Green Valley were burned last week by an incendiary.

A company of Chinamen are cultivating rice in the vicinity of Reno, on the Truckee Meadows.

The Steam Navigation Co. seems to have no idea of reducing the fare to Sacramento.

There is a tract of salt in Humboldt County (Nev.), that covers 5,000 acres.

The last Panama Steamer brought a large quantity of railroad material.

A new school house to cost over $11,000 is being built at Nevada City.

The Stockton *Gazette* has changed from a morning to an evening paper.

The new route to Sacramento is open, and seems to suit people.

Sacramento County has 7815 children under 15 years of age.

A slight shock of earthquake in this city on Monday last.

The city of Vallejo will in a few weeks be lighted with gas.

A Shock of earthquake at Los Angeles on the 2d inst.

The town of Truckee is being rebuilt with great rapidity.

The Central Pacific Railroad has 52 locomotives in use.

The population of the town of San Luis Obispo is 600.

The Napa Valley Railroad is completed to Calistoga.

The medal awarded to the State of California, by the Exposition at Paris, for the best wheat and other cereals, has been received by Gov. Haight, and placed on exhibition at the Mechanics' Institute Fair.

WEEKLY MARKET REPORT.

Wednesday, August 26, 1868.

Flour—Sales of 500 bbls Superfine, for export, private. We quote jobbing rates as follows: Superfine, in sks, ₱ 196 lbs, $5 25@$5 50; Extra, in sks, $6 25@6 50.

Wheat—Sale of 2,000 sks good shipping, $1 90; 1,300 sks do, afloat, $1 95. Market quotable at $1 85@1 95 ₱ 100 lbs for best samples.

Barley—Sale of 2,000 sks Chevalier, $2 12½; 1,800 sks choice brewing, $2 17½. At the close, 591 sks Chevalier, mixed with oats, $2 07½ ₱ 100 lbs.

Oats—Sales of 300 sks fair, $2 40; 200 sks choice, $2 55. The range of the market is $2 30@2 55 ₱ 100 lbs.

Potatoes—Sales of 750 sks Mission, in lots, 90c@$1; 100 sks Carolina, $2 ₱ 100 lbs.

Onions—Sale of 100 sks Yellow, $1 25@1 37½ ₱ 100 lbs.

Corn—None in first hands. Jobbing at $2 50@2 60 ₱ 100 lbs.

Rye—New crop is held at $1 75@2 ₱ 100 lbs.

Buckwheat—Dull of sale at $1 62½@$1 75 ₱ 100 lbs.

Beans—The market is steady at the following jobbing rates for first quality: Bayo, 5c; Butter, 6½c; Pea 12½c; Small White, 8½c; Pink, 6c; and Red, 3c ₱ lb.

Bran—Sales of 100 tons, in lots, $19@$21 ₱ ton.

Middlings—Fine, $37 50@$40; feed descriptions, $30@$32 50 ₱ ton.

Oil Cake Meal—Jobbing at $30 ₱ ton.

Hay—About 100 tons sold within the range of $10@15 ₱ ton.

Dairy Products—Fresh roll Butter is quoted at 45@50c, with 47½c as a medium figure; California pickled, 40@45c, latter an outside figure; California firkin, firm at 35c; Cheese, 14@16c for California dairies, and 18c ₱ lb for Eastern dairies; Eggs, 57½ for Hen, and 45@50c ₱ dozen for Duck.

Poultry—Live Turkeys are quoted at 18@23c, with 20@21c as medium figures. Very few dressed Turkeys are received at this season of the year, and hence the quotations are nominal at 21@23c ₱ lb. Hens, $8; Roosters, $6@$7 for large size; Spring Chickens, $3 50@6, according to size; Ducks, $4@550 ₱ doz; Geese, $2@2 25 ₱ pair; Venison, 10@12½c ₱ lb.

Provisions—California smoked Bacon 14½@15½c; Oregon do, 14½@15c; California Hams, 16@17c; no Oregon in market; California Lard, 13½@14½c; Eastern, 12½@13c½ ₱ lb.

Wool—There is no spring clip in the market, and very little fall, quotations for which are 13@13½c ₱ lb.

Hides—Sales for the week have been unusually large, aggregating 3,000 California dry at 15@16c, and 300 Mexicon, per *Herminia*, private. We quote Mexican dry at 14@14½c for usual selection and California salted at 7c.

Tallow—Sales since last Wednesday aggregate about 25,000 lbs Beef at 7½c ₱ lb.

San Francisco Cattle Market.

The market continues steady at late ruling rates. Some parties quote best qualities of Beef at 9c, and choice Mutton at 7c, though the medium figures are given below. Veal has assumed a wider range, best descriptions now being 12c. Dressed Pork is easy at 8c as an outside figure.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.
Veal—8@10c for medium, and 12c ₱ lb for choice.
Mutton—Is steady at 6@6½c ₱ lb.
Lamb—Steady at 8@9c ₱ lb.
Pork—Undressed, 4@5½c; dressed, 6½@8c ₱ lb, outside figures for milk or grain fed.

CURRENT TOPICS.

Several prominent clergymen of New York City, under the general direction of the American Christian Commission, have recently made a tour along the Erie Railroad as far as Buffalo, holding meetings in the principal towns. The design of this mission was not to interfere with any existing means of doing good, or to intimate that those engaged in regular labors in those towns were not doing all in their power. The tour was purely evangelistic, and the brethren were most cordially received wherever they stopped, addressing great crowds of people respecting the claims of personal religion, and doing much for the encouragement of those by whom they were welcomed. There is no opportunity as yet of knowing the complete result, but there can hardly be a doubt that such supplementary agency, by which churches may be quickened and men may be roused to thought on the subject of religion, must be very useful. The experiment might be tried in our own State, with even more hope of good, because our population is much less generally supplied with local means for bringing the Gospel in contact with the people. Two or three clergymen, accompanied by as many competent and earnest laymen, might go out from either of our large towns for a missionary journey of three or four weeks, and accomplish a great work. They could organize Sunday Schools; they could strengthen the hands of the few who may be disheartened by the difficulties they meet in trying to do good; they could preach the Gospel to men who have not heard it for years, and in addition to the conversion of individuals, they could prepare the way for churches in what are now the waste places of the land. The Apostles, and those who wrought with them in the early days, evangelized in this manner, and it is more than probable that apostolic success would attend such labors now.

The effect produced by the public addresses of Father Gavazzi on the popular mind of Italy, is indicated by two facts, either of which may be regarded as a mark of progress. He was requested by the citizens of Lucca to favor them with some of his sermons, and he did so, making so profound an impression that the priests thought it necessary to contradict his statements with the simple assertion that they were founded upon lies. Thereupon Gavazzi challenged them to a public discussion, which was to take place in the church on a certain day. The priests of Lucca, however, did not feel strong enough to cope with him and sent for the clergy of the neighboring towns, who came on the day appointed with a crowd of assistants, armed—not with logic and facts, but with revolvers and pitchforks. The result was that the authorities feared a bloody collision between the two parties, and prohibited the meeting. The time was, and not long ago, when a Protestant preacher would have had no influence on the masses in Italy; when the clergy would not have taken the trouble to oppose his doctrines by argument; and when there would have been none to defend him, had a mob threatened to put an end to his career.

Organizations among tradesmen for their protection against the injustice of their employers, and for securing their interests in any lawful manner, may be useful and proper. The Unions that have been formed in our cities especially, and that are having a marked effect on the expense of living, and of growth, in many ways, may have advantages that will quite offset all the evils they incidentally occasion. But facts demonstrate that they may be most tyrannical and damaging to tradesmen themselves, unless they are willing to place their interests in the hands of the majority, and work, or refuse to work, as they shall dictate. It is not wise for such organizations to be too rigid in their rules, or too sweeping in their reach, for when men find that they cannot exercise their liberty in any particular, even respecting their own work on their own premises, they will be likely to inaugurate a revolution. The demand, for instance, of a league among carpenters in an eastern city, that a member should not labor more than eight hours on the house he was building for himself; and of another that a member should not labor in his own shop, because the majority were on a strike, is justly creating great feeling, and while such demands are enforced, independent men will only wait for opportunity to rebel and disorganize.

One of the most noticeable features of the Fair, which has been in progress in this city for a month past, is the great number of mechanical inventions for use in the several departments of agriculture. From the Steam Plow to the most simple implement on exhibition, the proof is abundant that farming is to be conducted on a grand scale in California and that a large part of the wealth of the State is expected from this source. The fact is promising, and the only evil it intimates is, that these facilities may render it possible for one man to cultivate such extensive tracts of land that the State may lose the advantage to be gained from a larger number of industrious residents, who would own and improve such farms as can be purchased by the poor. It will be no gain, if means for labor-saving, out-doors or in-doors, shall diminish the number of *homes* in the country, or render those that exist less worthy of the name; but injurious results arising from the introduction of labor-saving inventions, although always predicted, have never been permanent in their effects upon any community, and there is little reason to fear that it will be otherwise in California.

The telegraph brings us once more the oft repeated declaration that there is danger of war on the Continent of Europe. There may be war, and it may come speedily, but nothing could be more emphatically proclaimed by the condition of the nations likely to be involved in its issues than that they will postpone it as long as possible. Even France, which is supposed to be most thoroughly prepared for war, and to have very ambitious hopes from the result, is by no means so firmly established as to be beyond the contingency of either revolution or overthrow, and the vast preparations, that have taxed her resources enormously, may be quite as much needed for purposes of safety as for aggressive designs. The relations of the continental Powers to one another, and the internal state of each, render it impossible to predict how war would terminate, or how the geographical lines of empire would run after it should end, and none are more aware of this than those who are managing governmental affairs. Necessity only, therefore, will fulfill the telegraphic prophecy very speedily, though it must be fulfilled in time, and the world will feel the shock of the conflict when it shall come.

The Society for the Prevention of Cruelty to Animals is evidently making its influence felt in this city. There is less display of this cruelty in our streets to offend the sight of all observers, and so far as we can learn, there is less in the markets and slaughter houses, than could be seen a few months ago. We are glad that the members of the Society regard even chickens and ducks as within the limits of their supervision, and should they be so vigilant as to check some of the practices which still prevail in the marketing of poultry, they will not pass beyond their bounds. For example: we have often heard it asserted that fowls are often purchased from those who hawk them through the streets alive, with their legs broken from the weight of the great number tied together with one string, and thus carried. We have often seen them suffering intensely from this mode of carrying. We know not whose privilege it is to complain in such cases, but have often wished we could assume it to be ours.

A gentleman, whose generous example renders him worthy of mention by name, took occasion when strawberries were abundant, to furnish a strawberry dinner to the prisoners in Albany penitentiary. There are many persons who laugh at such a disposition to show kindness to felons. There are many who say it is only a sentimental and foolish philanthropy that seeks to do anything for the comfort and welfare of those who have committed crimes. They would have our prisons as repulsive and unhealthy as possible. They would deny those confined in

them all access to physical, mental, and spiritual good. But the number of these persons is diminishing, and the time will come when, even in California, it will not be as idle as to beat the air, to ask that State prisoners may be treated as human beings, and kindness will not be ridiculed, if these men are to be the recipients of it. The world is really becoming more humane and philanthropic, and prisons will after a time feel the effect of the advance. It may not be wise to give criminals strawberries and other delicacies as a part of every day's rations, but it will be understood that occasional proofs of this kind that they are pitied, and that those not yet condemned to like infamy are disposed to do them good, will not subtract from prison discipline or render punishment less effective to reform. We hope other gentlemen will imitate the example of the one who made the criminals in Albany his beneficiaries, and if it is found that strawberries, and articles of that character do not damage the prisoners, perhaps it may be possible in time to introduce chaplains and libraries, and some other means of moral and spiritual elevation.

Religious Intelligence.

PACIFIC COAST.

Notice.—The Synod of the Pacific will hold its next annual meeting on Thursday, October 1st. Opening sermon by the retiring Moderator, Rev. J. S. McDonald, at 7½ P.M.

The members of the Synod are reminded that it is necessary to forward to the Chairman of the Committee on Narrative (Rev. J. H. McMonagle), a report of the state of their churches and fields of labor ten days before the meeting of the Synod. Will the brethren be prompt in forwarding these reports?

Presbyterial Notice.—The Presbytery of California will meet in the Larkin Street Church, San Francisco, on Wednesday, Sept. 9th, 1868, at 7½ o'clock, P.M., and will be opened with a sermon by the last Mederator, Rev. Charles R. Clarke.

John G. Fackler, Stated Clerk.

The Presbytery of Benicia will hold its next semi-annual meeting in the Two Rocks Presbyterian Church, on the last Friday of September, the exercises to commence with a sermon from the retiring Moderator, Rev. James Woods, at 7½ o'clock, P.M.

A. Fairbairn, Stated Clerk.

Organization of a Presbyterian Church.

Chico, August 30th, 1868.

I have now spent two Sabbaths in Chico where I have been hospitably entertained by General Bidwell's family. The people of Chico in concert with Bro. McDonald of Sacramento, had previously arranged for the organization of a Presbyterian church. Last Wednesday they elected their officers, two elders and two deacons, and yesterday the organization was completed.

The church has sixteen members, twelve of them heads of families; seven are males and nine females. Two gentlemen formerly officers in the Presbyterian church, with the wife and daughter of one of them, united from the Congregational church of Chico. One gentleman with his wife and daughter formerly Presbyterians, united from the Methodist church. General Bidwell was baptised and united on profession of faith. The others had no church connections in California. There was a baptism of children before the morning service. After sermon, the church was organized by the reading of, and assent to, the covenant, with a pause intervening for the baptism, and by the ordination and installation of the elders and deacons.

In the interval of service was an address to the band of hope, a very hopeful charge of Mr. Chalmers, and a baptism at Judge Hall's—out a little in the country—of two little twin sisters of a brother baptised in the morning at church.

In the evening after sermon, the communion was administered for the first time to the Presbyterian church of Chico. Although the audience was large and the weather very warm, none seemed to lose their interest up to the close of the service. The singing of the choir of nearly twenty fine voices was a very marked feature of the service. Very efficient aid has been rendered in this whole enterprise by Mr. Kennedy, of Dr. Gurley's church in Washington City, and brother to Mrs. General Bidwell. Would all Christians moving west show a like interest in their master's cause, religion would flourish all over our land.

Mr. Kennedy is about to visit the east for a few months and we bespeak for him a listening ear wherever he may endeavor to awaken an interest in this *far, far* West.

S. T. Wells.

Dedication.—The chapel which has been built at Oakland Point for the use of the Second Congregational Society, Rev. Eli Corwin, pastor elect, was dedicated with appropriate services on Sunday last. The sermon was preached by Rev. Dr. Stone, of San Francisco. Prof. Kellogg and Rev. Mr. Beckwith assisted in the exercises. The chapel is small, but neat and well arranged, and is an ornament to that part of the city. The total cost of building and furnishing was $3,450 all of which was paid or provided for before the dedication, except $306. Of this sum $232 were collected at the meeting, leaving now a debt of $74. The pastor is expected to take charge of the church early in October.

Stockton.—The Congregational Society have purchased a lot and are about to build a church upon it, capable of seating about 400 persons. We learn from the *Gazette* that, at the invitation of Rev. J. Henry Giles, pastor of the First Baptist Church, several of the pastors of the city met at the Baptist parsonage, on Monday last, for the purpose of forming a Pastoral Union, the object of which is to promote closer unanimity and fraternal co-operation in the various philanthropic and religious interests committed to their charge. The interview was pleasant and profitable, and it was decided to meet again for permanent organization.

Sabbath Meeting.—A meeting of those citizens of Oakland who desire a proper observance of the Christian Sabbath was held in the Congregational church last Sabbath evening. It is said to have been a well attended and most interesting assembly. Remarks were made by several of the clergymen of the city. The general impression seemed to be that the Sabbath is better observed in Oakland now than one year ago, and there is a general determination to make greater improvements during the next year.

Mission School.—The Mission Sabbath School, which has been held for several weeks past at the corner of Broadway and First streets, Oakland, seems to be gradually gaining ground, and bids fair to accomplish a good work in a locality where the citizens think such a work is greatly needed. 20 children were in attendance last Sunday.

EASTERN.

The Tunkers.—The recent poisoning of a congregation of Tunkers in Illinois has brought that obscure denomination into notice. Some of their peculiarities are very singular. They are a branch of German Baptists, so strict in their close-communion principles that they will not commune even with "regular Baptists," but insist that the candidate for immersion must be tumbled forward and not dipped backward, and that the immersion is good for nothing unless performed three times in succession, being once in honor of each person of the Trinity. They neither take oaths nor fight; they celebrate the Lord's Supper, with the accompanying love-feasts, the washing of the feet, the kiss of charity, and the right hand of fellowship. They also anoint the sick with oil for recovery.—*Montreal Witness.*

Associate Presbyterian.—This body, which is composed of those who did not go into the union in 1858, when the United Presbyterian Church was organized, consists of 4 Presbyteries, 12 ministers, 40 congregations, 514 families, 1,091 members. The increase during the year was 48, with a decrease of 91. The contributions for benevolent purposes were $326 07. Several of the above 40 congregations number only 6 members, some 4, and some only 2.

The Synod at its late session passed an act for a fast day; also a resolution to censure any person standing on a platform containing principles conflicting with the law of God or the standards of the church.

Dr. McCosh.—Some gentlemen in New York city have raised $60,000 to endow Dr. McCosh's chair in Princeton College, securing him $4,000 a year and leaving the present salary as a retiring pension to Dr. McLean. Robt. L. Stuart gave $10,000; John A. Stewart gave half as much, and Robt. Bonner half as much as he. (The last is—like the two former we believe—an Irish Presbyterian by what Quakers call birth-right.) Robt. Carter who is thought to be at the bottom of the movement, has raised $6,000 more to furnish the new President's house.—*American Presbyterian.*

Swedenborgian.—The General Convention of the New Jernsalem (or Swedenborgian) Church of the United States met in annual session in Portland, Me., on the morning of July 10th, Rev. Dr. Worcester, of Boston, presiding. Nearly every State in the Union was represented, and over a hundred delegtes were present. The reports read show a very considerable increase of the denomination throughout the country.—*American Presbyterian.*

Severe on Parker.—Rev. Dr. Osgood, of New York, and one of the most prominent Unitarian ministers in this country, called Theodore Parker, in a recent consecration sermon, "a rash assailant of historic Christianity, a sometimes doubtful scholar in the scriptures, an extravagant theorist, and a bitter partzan." This is plain speaking of one who, of all men, gloried in so-called liberalism and charity.—*Christian Instructor.*

Ruined by Good Fortune.—*The Springfield* (Mass.) *Republican* says a young man has been dissipating about that city who graduated at the Yale College Divinity School, and became pastor of one of the Brooklyn churches. An oil speculation, in which he made $60,000, turned his head and ruined his morals. He made a large fortune by his operations, and has since been going from bad to worse.

The Baptists have seven Theological schools in the United States. The whole number of students in these seminaries is 159.—*Churchman.*

The Wayland Theological Seminary, a Baptist institution, at Washington, D. C., has twenty-four young colored men studying for the ministry. All but four of them are supported by friends at the North.

The Baptist Publication Society of N. Y. has fitted up rooms in Broadway for its own purposes, and as a denominational headquarters.

Duffield.—Five of Mr. Duffield's eleven sons survive him; one of them is Rev. George Duffield, of Galesburg, Ill., whose eldest son is Rev. Samuel Duffield, now laboring in Philadelphia. Last September Dr. Duffield celebrated his golden wedding and on the Sunday previous, the father, son, and grandson, occupied successively the pulpit of the First Presbyterian Church in Detroit.—*Christian Intelligencer.*

Contributions.—The receipts of the principal religious societies in the United States, exclusive of the United Presbyterian Church, whose contributions amounted to considerably over $100,000 for her various religious enterprises, for the last year is reported to amount to $5,701,697. The organizations, whose income from all sources, that is from both donations and sales, exceed $100,000, are the American Bible Society, $723,106; the Missionary Society of the Methodist Episcopal Church, $584,725; the American Tract Society, $519,614; the American Board of Foreign Missions, $444,091; American Missionary Association, $400,000; American Sunday School Union, $595,945; American Home Mission Tract Society, $292,135, Presbyterian Board of Foreign Missions (O. S.) 285,689; the Baptist Missionary Union, $191,637; the Tract Society of Boston, $142,325; the Protestant Episcopal Board of Domestic Missions, $142,136; American and Foreign Christian Union, $138,526; Baptist Home Missions, $135,736; Presbyterian Home Missions (N. S.), $134,850; Presbyterian Home Missions (O. S.), $113,100.

The local societies of New York city have received during the last year $1,073,012. The charities which have reported donations exceeding $50,000 are the New York Juvenile Asylum, $115,332; the Children's Aid Society, $115,017; the New York Branch of the Freedmen's Commission, 78,556 the Howard Mission, 69,761; the Association for Improving the Condition of the Poor, $57,837; the Protestant Episcopal City Mission, 54,000. In addition to these munificent contributions large sums have been given of which no permanent record has been kept. Such facts as the above show that it does not require an established church to keep alive the spirit of Christianity.—*United Presbyterian.*

Prof. Shepard.—The numerous friends of the late Prof. George Shepard, D. D. of Bangor Theological Seminary, will be gratified that a volume of his sermons, selected by himself, is soon to be issued from the press of Messrs. Nichols & Noyes, Boston. As it is to be issued by subscription, subscribers will please to send their names and address to Mrs. Geo. Shepard, Bangor, Me.

What the World pays for the Support of Missionaries.—The income of the missionary societies of England, America, Germany, France, etc., for 1866, was $4,425,000. This sum, though large in the aggregrate, bestows less than five mills for each of the 965,000,000 souls of the earth's population who are Pagans, Mohammedans, or Jews.—*N. Y. Observer.*

Mexico.—The agent of the British and Foreign Bible Society in Mexico, reports, that during the year 1866, 14,000 copies of the Holy Scriptures were put in circulation, and that though the circulation last year was much less in consequence of the greatly unsettled state of the country, yet in this year 1868, it will probably exceed that for 1866.

Rev. J. L. Taylor has been appointed Professor in the Theological Seminary at Andover, Mass., of a department in which it is intended to prepare persons who cannot pursue a full course of study for usefulness as colporteurs and evangelists, and perhaps pastors. This Professorship has been endowed by Mrs. Sophia Smith, of Holfield, Mass.

Rebuilt.—As the result of a work of great interest for some months past at the Seamen's Bethel in Portland, Me., forty-one new members have been received. It was most emphtically burned out in the great fire, and not a few of its friends thought restoration impossible, but God has built His house and placed His name there.

Amherst.—Forty-seven years ago Amherst College had two students and an empty treasury. The two students have lived to see their college prosper beyond all expectation, and the coffers full. The treasurer reports that the college is now worth more than a million dollars, and free from debt. —*Lutheran.*

Rev. N. L. Rice, D. D., has accepted the Presidency of Westminister College, Fulton, Mo., and enters upon his duties at the commencement of next term. A Theological department is to be connected with the College.

Rev. Jonathan Blanchard, D. D., President of the Wheaton College, is soon to start a new religious journal in Chicago.

Church Burned.—The Congregational church and schoolhouse, Camden, Me., were destroyed by fire. Loss, $12,000.

Over a score of the Sunday School teachers of Rev. Rowland Conner's Society, Boston, are said to have resigned.

Rev. Dr. Hoge, of Richmond, Va., declines the call to the Central Presbyterian church in St. Louis.

Twenty Yale graduates this year will enter the ministry.

FOREIGN.

Missionary Stations Brought Near.—Gowahita, one of the missionary stations in Assan, is five hundred and fifty miles by telegraph wires from Calcutta. Mr. Stoddard in writing from Gowahiti, says—"We are in lightning communication with Calcutta, London, Boston and Chicago. A railroad has been surveyed through the entire length of this rich and beautiful valley. Thousands of coolies this moment are actively grading this road. Many years may pass before the iron horse is heard rattling and snorting through the province. But he can come—he *will* come sooner or later. Then what? Directly on to Western China, down the valley of some of those large rivers to the seaboard. Who can deny that twenty years hence, we may start from this point, and travel by railroad east through China, east by steamer over the Pacific, and east by railroad to Chicago, in less than thirty days! It can and will be done. It is truly wonderful! And so the march of civilization and Christianity is to become more rapid, and striking, and wonderful at every step, till He whose right it is to reign, shall reign King of nations as he doth King of saints. It a glorious privilege to live in this age; it is infinitely more glorious to *work* the works of God for this and coming ages." Wonderfully is God preparing the way for the conversion of the world.—*Zion's Herald.*

A Liberal Government.—A Benedictine nun was burned at the stake, in Palermo, one hundred and fifty years ago, and to cover the expense, an annual fipe has been extracted from her family up to the present time. The representative of the family has appealed to the Italian Parliament to relieve them from the imposition. It is regarded as an evidence of the increasing liberality of that Government that it gives evidence of willingness to grant the appeal.

Overtaken by Justice.—Kaleel, the accomplice in the murder of the missionary, Rev. Mr. Coffin, in 1862, was arrested a few months ago in disguise of a policeman, near Alexandretta, in Northern Syria, and on being brought to trial, was condemned to the galleys. The principal criminal, Ahmed, was condemned to death five years ago, and was beheaded at Adana, near Tarsus, in the presence of 5,000 spectators.—*N. Y. Observer.*

Italy.—Young men of piety and talents in Northern Italy, all the way from France on the West to Hungary on the East, are making application to be received as pupils in Protestant theology. Full 60 such young men have offered themselves, with the best of recommendations. There has never before been such a demand for evangelists as now, to preach the gospel in Northern Italy.—*Chicago Standard.*

A Challenge.—An English paper says that Dr. Pusey has addressed a challenge "to an appropriate quarter," courting a prosecution with regard to some of the heretical doctrines of which he is looked upon as the chief exponent, and pledging himself not to interpose any technical or legal difficulties in the way of a full discussion of the case on its merits. The challenge (it is added) will no doubt be accepted.

English Church Property.—It seems to be correctly stated by various authorities that the estimate placed by Mr. Gladstone and other English statesmen on the "vested rights of property" appertaining to the English Church Establishment, is not far from $450,000,000 in gold.

The Seventh-Day Baptist Missionary Society maintains sixteen domestic missionaries, and has in China a mission society with twenty members and a native pastor.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, Principal.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

D. Hewes,

RAILROAD CONTRACTOR.

Correspondence.

To California by the Overland Route.—No. 4.

The "new experience" that we were to enter upon was that of stage-riding. Had it not been that some of the passengers, who were already booked for the stage, could not get their baggage from the cars, I would have been put to the inconvenience of remaining longer than I had intended in Laramie City. This circumstance, embarrassing to them, was very advantageous to me, as I felt no desire to prolong my stay in a place which for me had so few attractions. A continuance of my presence in the society of many who seemed persons of questionable reputation and doubtful honesty would have been as distasteful to my mind as the accommodation of a berth on the wall of a plank house or a blanket on the floor of a canvass hotel would have been to my body. It would have been to me a "sojourn in Meshach" and a dwelling in "the huts of Kedar." I was happily spared the necessity of lamenting such a misfortune; but it is best always to secure a seat in advance by telegraph.

It was with considerable determination, and not a little doubt as to the result, that six of us—two ladies and four gentlemen—took our seats in the stage coach at ten o'clock P. M., expecting to continue our journey day and night, without interruption, for four days. So small a party, indifferently armed and having no guard, we had some misgivings, as we started out, about the Indians; but the discomfort of the stage-riding, the roads being rough and we unaccustomed to this mode of travel, diverted our minds so much from the future, that long before morning we felt quite unconcerned about the Indians. We had not slept much, but the night had passed without accident of any kind, and we were refreshed by an excellent breakfast of elk-steak, which we had when fifty miles west of Laramie. The day upon which we thus entered was somewhat tedious on account of the monotony of the scenery and the fatigues of the way. The wind being favorable, we were not troubled with dust nor with heat, and although there was little in the exterior world to interest, it was altogether a pleasant ride.

It is true, it was through a wilderness of greasewood and sage-brush, and the general view was a long line of telegraph poles, stretching through an interminable waste of drifting sand; but all this was just what the most of us had never seen before, and did not expect to see again very soon. We had seen antelope frequently during the day, and the sage-hen; in the evening, as we were going toward the Rocky Mountains, we saw several large gray wolves, who stood still and looked at us with great composure. Early in the morning we had met, and also passed, several trains of immigrants, and at night we saw a great many freight-wagons drawn by ox-teams and in many cases driven by Indians.

We took supper at a crossing of the Platte, having afterward a narrow escape from immersion in its waters, by reason of the horses balking on the bank of the river as we left the ferry-boat.

The sunset was charming in the pure air and serene sky, gilding here and there peaks of snow, and casting shadows upon the picturesque, lined and terraced walls of rock that rise on the farther bank of the river; but it was even excelled by the moonlight, which shed its mild effulgence upon us as we advanced toward Bridger's Pass in the Rocky Mountains; and when we were near the snow and in the midst of it, in the desert solitude of the road and the quietness of the night, whose stillness was broken only by the rumbling of the coach and the barking of the vagrant wolf, in the soft radiance of the moon the scenery was at the first beautiful, then fairy-like, then strange, and, as the moon went down behind the mountains, weird and dismal!

The breaking of a thorough-brace, as we went over an obstacle in the road, gave us a sleepless and very uncomfortable night. If any one ever thought of being able to sleep in a coach, with a mountain driver on the boot and the thorough-brace broken beneath, he has but to make the personal test of the matter to know that it is impossible. Any romantic notions about stage-riding that might have lingered in the minds of the passengers the previous evening, were evidently dissipated as we came in the early dawn to the bank of the Green River. Like the streams which we had crossed on former days, Green River was both rapid and turbid. At the crossing we found a thrifty settlement looking as well as a city of a few months could be expected to appear; stores, hotels, restaurants, saloons, shops of various kinds and residences of every description were there, from the temporary booth made of branches and the canvass tent to the comfortable dwelling built of sun-dried brick and covered with a shingle roof.

Having exchanged our disabled coach for one in good condition, and being ourselves refreshed by breakfast, we were soon upon our way again, and the tiresome jolting and monotonous rumbling of the coach, the snapping of the driver's whip and the grinding of the brake upon the wheel, filled up the measure of another wearisome day. Yet there was pleasure in it all. The exchange of horses every two or three hours, of drivers every morning and evening and of coaches every day, afforded us some variety and interest; and the scenery, although in general not inviting, except as I have already intimated on the score of novelty, was at times full of beauty and sublimity, so that we felt that the opportunity of beholding it much more than compensated for all the discomforts of the way. At no time had we suffered from the heat, and but little from the dust; but during this day we had a visitation of mosquitoes, which would have occasioned us great annoyance had we not been provided with veils, and even with this protection the attacks of the poisonous insect kept us continually on the alert.

At one of the stations—which in general are one-story stone stables, roofed with poles, on which there is a covering of earth—not far beyond Fort Bridger, where we stopped for supper, we found some specimens of agate, which, we were told, abounded in the vicinity.

Occasionally our interest would be attracted by the sight of Indians at these stations. Sometimes we engaged them in conversation. Sometimes they were the first to speak. Generally they learned more from us than we from them, as they seemed to have the faculty of asking without always the ability or inclination to understand or reply to questions; but whoever began, and whatever was the nature of the conversation, or its duration, long or short, it invariably terminated with this inquiry from the Indian, "Got any tobac?" All else that was said had a bearing upon, at least was preparatory to, this practical question, "Got any tobac?" The unmannerly Indian asked the question without introductory remark; the gentlemanly Indian prefaced it by general inquiries, but courteous as well as rude, never failed to reach the point at last, "Got any tobac?"

As we advanced, we read something of the history of trial that belongs to the familiar subject of "crossing the plains," in the skeletons of oxen and horses thickly strewn along the road, while there was something more painfully suggestive in the lone graves that we saw here and there, and in the occasional group of parallel mounds, indicating the last resting-places of those who had died amid the perils of the wilderness, or by the hand of savage violence. But that which occupied our attention most during the day, was a very fine prospect of a snow-clad range of mountains, which we never wearied of beholding, from early dawn till they faded from vision in the dim moonlight. There they lay on our left, to the south, an unbroken surface of snow for hundreds of miles, green at the base, furrowed in the midst with the lines of the verdant forest, spotlessly white at the summit, dazzling in the clear sunshine, seeming so near and yet so far away, so peaceful, so pure, so lovely! The young man of active imagination, sitting on the back seat, would have it that some of the peaks looked like stately moulds of ice-cream; the young lady, recently married, who occupied a seat in front, insisted that some resembled colossal bridal-cakes; while two gentlemen, both practical miners, the *drift* of whose conversation was very much affected by the geological *drift*, which they saw about us—as to the gold-producing qualities of which they were continually speculating—declared their settled conviction that those mountains must be full of the precious metal. Seeking for some thought more worthy of the subject presented in the beautiful spectacle and this sublime natural object, I found it in the passage of scripture that then arose in my mind, "Thy righteousness is like the great mountains."

In the evening we were at Fort Bridger, a U. S. post, provided with neat, one-story buildings, enclosing a spacious parade-ground, and garrisoned by a military force. The locality is remembered especially for the abundance of its mosquitoes, the purity and beauty of its streams, and the sublimity of those distant peaks of snow that supply their clear and pellucid waters.

W. R.

Letter from New York.

Brooklyn, August 14th, 1868.

Since my last (and first) letter, there has been little to write about the churches and ministers. The summer came and the pastors and flocks went—most of them to grass, some of them to Europe, but especially Paris, while a few betook themselves to Newport and Long Branch, and several to Saratoga, where it is hoped they will be able to bring a good influence to bear upon the fops and flirts, the horse-jockeys and the "gay gamboliers." Mr. Beecher retired to his farm at Peekskill, where he succeeds admirably in laying out more money than the farm returns to him; Dr. Cuyler took several turns about the country; Dr. R. S. Storrs went East to several college commencements and green fields of early memory; Dr. Spear, Mr. Carpenter, Mr. Brown, Mr. Pomeroy and almost everybody else have been away from home, but Dr. Duryea has not been out of the city at all during the season, and intends fighting it out on this line all summer. He has done much work in visiting the sick, burying the dead and addressing many meetings, but the number of applications for his services matrimonially has been rather limited. One of our local journals thought it had discovered a very smart trick, and published the statement that the Doctor was shrewdly staying at home and building up his church during the summer months, while so many churches are closed and so many ministers are out of town. But Dr. Duryea is noted for accomplishing much work in the sum-

mer and remaining at his post even if the mercury goes to the top of the tube. Yet it is not to be denied that his church is growing rapidly, and needs even all the room its new building will afford. Rev. W. W. Hicks, formerly of the State Street Church, and lately of the noted Lee Avenue Reformed Church, has been obliged to resign his connection with that church on account of failing health. The trouble with Mr. Hicks is that he has too many nerves, and when he works is not content without overworking himself. He was much loved by his people, who offered him every inducement to stay—even a long vacation for a tour in Europe, pulpit supplied and expenses paid. He thought best, however, to resign.

Rev. C. Harvey, late of the State Street Congregational Church, at which he was Mr. Hicks' successor, has also recently resigned on account of lack of coöperation on the part of his people, and also lack of friends. The State Street Church seems to fare badly; has had any number of pastors in the last ten years, and won't thrive under any of them.

The Baptist churches all remain in *statu quo*. Many of the pastors are rusticating, but few of the churches are closed, and in fact it is remarked that fewer churches than usual of all denominations are closed this year. Plymouth Church is closed, in order that the little angel on top the grand organ may have the proper dusting and washing he has been needing some time, yet I believe some other portions of the establishment are to be cleaned and painted.

Concerning the union of the two assemblies there is much discussion. Several weeks ago a meeting of the representatives of the Old and New Schools was held at the South Presbyterian Church.

The attendance was very large. Rev. Dr. Spear conducted the exercises, and, after prayer was offered by Rev. John Hancock, stated the object for which the meeting had been called, and then referred to the divisions which had heretofore taken place in the Presbyterian Church. In 1741 the Synod of Philadelphia had some difficulty, and the result was the formation of the Synods of Philadelphia and New York. In 1758 they united again. In 1789 the Assembly was organized, and in 1837 was divided under circumstances similar to those which had divided the Synod of Philadelphia in 1741. To unite the two Schools as represented by the two Assemblies is the project which the meeting has been called to consider.

Rev. C. S. Pomeroy, of the Ross Street Church (O. S.) made the first address.

If any prophet, or the son of a prophet, had told him a year ago that he would have been to-night on the same platform with the pastor of the South Presbyterian Church at a union ratification meeting, he would have considered the prophet exceedingly rash, and advised him to turn his attention elsewhere. At the Old School General Assembly a speaker mentioned the pastor of this church as so radical a New School man that he would never be in favor of the union of the two Schools. But a great change has come over the people of the Presbyterian Church; the spirit of Union—and what is that but the spirit of God?—is working. At the Old School Assembly, among other business of vast importance, it was resolved to invite back to the Assembly the Southern churches, and to hold out the olive branch to the signers of the Declaration and Testimony. The spirit of prayer was so general at the Assembly that it pervaded even all discussions; the session was perfectly fringed with prayer meetings. The four powerful seminaries were represented by professors who presented a solid front against reunion, and the number opposed to the project was large, but the question seemed to turn on the point of whether or not the churches were equally and alike Calvinistic. After a free and full discussion the report of heterodoxy by the New School men was not proved or generally believed; in fact it was proved that the New School were by no means heterodox, and the vote for reunion was carried by 187 ayes to 69 noes, or almost three to one. Now the question is to be sent down to the Presbyteries for their decisions. The speaker hoped the Basis would be adopted, and the Standards also, by the New School Presbyterians, and be sent up to the next Assembly. As to the resolution offered by Rev. Dr. Hall, at the Old School Assembly, and of which much had been said, he knew it was only to take the wind out of the sails of the opposition, and to prevent a strong protest which was coming, and for no other purpose whatsoever. In conclusion, the speaker said that the union must be natural, and not forced, or it would be good for nothing; the Basis is that of pure, unadulterated Calvinism. The seven seminaries that would be in the united body now teach the same standards of theology; and, though the union of the two branches was a very solemn subject to contemplate, it would be more solemn not to have it.

The choir then sang "Rock of Ages" in a highly artistic manner, after which Rev. John Hancock (O. S.) was introduced and made a few remarks. After referring to the importance of the subject, he spoke of the recent Old School Assembly, of the great interest among the delegates in this subject, of the long discussion of it and the vote which did not finally decide the subject, but sent it to the Presbyteries, of which three-fourths must favor the Basis for the Assembly to adopt it. He gave as reasons why the Presbyteries should adopt it and the union be consummated, that the two bodies are one in doctrine, having the same confession of faith, same catechism, same government and same institutions; because Jesus Christ prayed that all His people might be one, as He and the Father were one; because the union will have a good effect, on the world not only, but also on the Church itself. If the bodies united there would be in the Presbyterian denomination 5,500 churches, about 7,000 ministers, and nearly 100,000 members. He closed his remares by urging the *people* to work for this reunion.

Dr. Spear in closing the meeting spoke briefly. Mr. Pomeroy was not more surprised at being on the platform with himself urging the union of the Old and New School churches than he was at being with Mr. Pomeroy under such circumstances. He spoke of the overwhelming, intense, spontaneous sentiment at the New School Assembly at Harrisburg in favor of the reunion of the two branches of the Presbyterian Church, by which he himself was converted to the measure, for he had gone to the Assembly opposed to it. He had opposed it when first projected because he did not think it expedient—in which he misjudged, and did not think it practicable, in which also he misjudged. The orthodoxy of the Old School men he considered superior. He expressed his belief that the union would be made, but it must be on the basis of the substantial integrity of the Profession of Faith, with as full liberty of thought as shall not be incompatible with such integrity.

The New School asked no surrender of the Old School, and made no surrender itself. Dr. Beaman and Dr. Barnes must be Orthodox Doctors in the United Church, as should be also Dr. Hodges, Dr. Breckenridge, and Dr. Plummer.

Rev. Dr. Duryea, who was expected to be present, failed to appear, and the exercises were closed at about half-past nine o'clock.

I have sent you this somewhat extended account of the meeting because it was a very significant occasion, the remarks of Dr. Spear, who had been one of the principal opponents of union being especially noticeable.

The country has lately suffered the loss a man great in his goodness and simple in his greatness. As many readers of The Occident come from the East they will be interested in reading the following notice of the death of Dr. John Marsh, written by your correspondent for *The Brooklyn Union* in which it was published on Wednesday the 5th instant.

At a few minutes past 7 o'clock last evening, Rev. Dr. John Marsh died at his residence in this city. On Wednesday of last week he was attending to his affairs at home and in the city, and apparently in good health as usual. On Thursday morning he was found by members of his family lying on a sofa, and complaining of a severe pain in his head. His physician, Dr. Talmage, was summoned. The pain grew rapidly worse, and by 12 o'clock noon he had become unconscious. The attack was congestion of the brain, turning into paralysis—the third stroke he had suffered. It is thought that the close, hot weather of Wednesday affected his brain, and caused the attack from which he did not recover.

Dr. Marsh was born at Wethersfield, Conn., April 2d, 1788, of the Congregational Church of which place his father, Rev. John Marsh, D. D., was long the pastor. The family came from England at an early date and settled at Hingham, Mass., whence they soon removed to Haverhill. It was remarkable for longevity of its members, the grandmother of the subject of the present sketch having attained the age of 92 years, and his father lived also to a good old age. In September of 1800, and when but twelve years of age, he entered Yale College, where he graduated in regular course, and when twenty-one commenced preaching. In 1818 he took pastoral charge of the Congregational Church at Haddam, Conn., where he remained several years, and did much work in the then young cause of temperance. From this time indeed his labors in the temperance cause were many, varied, and persistent. He became Secretary and General Agent of the Connecticut State Temperance Association, the Agent of the American Temperance Society, and finally, in 1836, its Corresponding Secretary and Editor, which position he held until the fall of 1865, when the Society was merged into the National Temperance Society and Publication House, when his official connection with it ceased.

During all these years Dr. Marsh labored incessantly. In the years of the war none was more energetic than he in supplying the regiments with reading matter. In fact the first two strokes of paralysis he suffered were caused by his exertions in behalf of the army—the second resulting from cold taken by riding in the winter of 1865 after having made an address to the soldiers near Washington. He was a voluminous writer. Besides editing the *Temperance Journal*, he wrote continually essays, tracts, and pamphlets on the subject of temperance, and his sermons, addresses, and speeches in the cause he so greatly loved were almost innumerable. In 1866 he published "Temperance Recollections," and an autobiography—a volume exceedingly valuable as a handbook, and interesting to all temperance men. Last year he edited a volume of prayers of Henry Ward Beecher, and more recently issued a pamphlet against temperance secret societies. Only a few days ago he was appointed Financial Agent of the Yale Theological School, and was entering upon his work with his usual energy and enterprise. He had obtained one subscription of $10,000 for the school. For many years he had resided in this city, preaching occasionally in the churches of this and neighboring States. His degree of D. D. was given him by Washington College of Pennsylvania. He was noted for his perseverance of character, honesty of purpose, and deep religious interests, and leaves a very large number of friends throughout the country who will ever think of his life with pleasure and of him with personal affection. His wife, daughter of Lieutenant-Governor Talmage, died in 1852, and he leaves two sons and three daughters to mourn his death.

The funeral of Dr. Marsh was held on the 6th instant at his late residence where remarks were made by Dr. Buddington and Dr. Leavitt. The remains were taken to Wethersfield, Conn., for interment.

REGARD FOR THE MASSES.

That man is himself deserving of pity, who can become personally acquainted with the temporal and spiritual condition of the masses of the population in a great city, and not be moved. Those who fold their hands, and say it is useless to attempt any rescue as they stand beside this surging tide of evil on which immortal souls are being swept on to ruin, those who refuse to do anything because the plans they think to be best are not adopted, and those who strive, for any reasons, to hinder the labors of others who are endeavoring to aid them, should never be called *Christians*. Christ, as a man, has no more worthy and glorious record, than that he was moved with compassion for the wretched. Had his mission from heaven been a failure, that pity urged him to *attempt* it would have awakened higher and more rapturous notes of praise forever, as angels should bow before him. Had no blind men been made to see, no lame to walk, no deaf to hear; had no widows been cheered, no children been blessed, no sinners been forgiven, that he spoke kindly to these unfortunates, and sought to do them good, would have made the name of Jesus illustrious in the annals of man. It is noble to feel such interest, to try to help those whose state appeals to us. Tell the story of suffering, with which a visit to some cellar or garret has made you familiar, the elements of which are abject want, sickness, pain, starving children, and a hopeless prospect and if it is heard with cold indifference, you feel that this is an outrage upon the sentiments we ought to cherish, while the tears that flow at the recital are honored as proofs that the heart is not frozen. If a house is burning in which a family is likely to perish, one person may look on like a stoic, and accept the necessity without concern. Another will be agitated, will express the most anxious solicitude, and seem unable to endure the harrowing sight. Neither may be able to do anything for those in peril, yet you feel that one disgraces, and the other truly represents, the human nature, by whose ties God has bound us together. Now, there is need of much more of this *heart-interest*, in the matter of usefulness, among Christians. It may, in isolated cases, lead to excesses that would be called fanaticism by those who know nothing of such motive power in doing good, but with such a possibility, there would be far less evil from its general influence on the Church, than results from the absence of enthusiasm that is now so manifest. There should be more personal contact with those for whom we ought to care. Let one visit a poor family, as Jesus visited the publicans and harlots of Jerusalem, and witness their suffering, and become familiar with their need, and he will pity them, he will help them, for his heart will be affected. Let all the members of a church gain this personal knowledge of the evils to be remedied by the Gospel, and there will be enthusiasm in the whole body. It will force them into effort, it will breathe earnestness into their prayers, they will be found abroad on errands of mercy, they will be seen weeping among the ruins of sin, and an amount of good will be done by that church that will astonish those who do not know the stimulus of pity. It may be true that a sense of obligation ought to move us, that abstract considerations ought to rouse our utmost energies; most of all, that the love of Christ shed abroad in our hearts should constrain us, to the limit of our power. But we cannot feel the effect of these motives while standing apart from others, allowing no communication with their welfare, or their woe.

Jesus was excited because of what He saw; His love warmed into zeal, because of the appeals that came through his senses, and life was given to all other motives from the *heart* that had been wrought upon by the scenes and miseries through which He had passed. There is a place, a wide place, for the action of our hearts in the ways of usefulness. We need not fear that they will run away with the reason, and thrust us on the rocks of failure, until they gain far more control in the enterprises of the Church than is probable at present. Our powers must be taxed more by pity. Our comfortable satisfaction because we are greatly blessed must be quickened into anxiety that those may be equally blessed whom we pity in their contrast with ourselves. Our money must be poured from our coffers by the hand of pity. Duty must be more generally measured by its limits. Then that record which renders our Master's life luminous and sublime will become the glory of the Church—"*He was moved with compassion*;" and the curse and blight of sin will be rapidly taken away, as men are brought under the influence of the Gospel attended by this power of personal regard.

REUNION.

Your correspondent, "Senex," has given, in your columns, his views on the reunion question. "From this hint" I ("Juvenis") would, with becoming modesty, speak. I do not propose to discuss in detail the matters so well known in the controversies touching this subject, but to offer only a few thoughts bearing upon the general question, and this, partly, with reference to the communications of the venerable writer who has led the way for me.

Much has been said of late concerning those potent influences, "manifest destiny," "foregone conclusions," and the like, as pointing to the certain consummation of union. It may be so. Certainly, union is desirable; it may be determined as an actual event. While the question, however, is pending, those who are interested especially in it are not at liberty to turn away from sober reasoning to the doubtful venture of prophesying. It is only the logical absurdity of "reasoning in a circle," to first assume the fact which argument and circumstances alone can justify.

Delay in acting finally upon this question has been already productive of much good. This is not one of the things which, if quickly done, are well done. A better understanding of the kind of terms proper as to the doctrinal basis of union has arisen in the progress of discussion on the subject. The more simple these terms, the better will they be understood and applied. So, it has come to be seen that the descriptive language of the first article of the proposed terms of union embarrasses rather than aids the object in view. And now the proposition to confine the terms of the doctrinal basis to the acknowledged standards of the bodies, namely, the Scriptures of the Old and New Testaments and the Confession of Faith, together with the Larger and Shorter Catechisms, seems to grow more and more in favor. A change in this direction, which can be made ere the final action, is likely to go far towards harmonizing the views of the parties to reunion.

In connection, too, with this point, it will not be amiss to continue the inquiry as to the degree of agreement or diversity in theology which exists among the respective members of the two bodies. A virtual agreement is one of the necessary elements of peace. The intellect always bears superior sway. If there shall exist, or be supposed and charged to be, opposing theological views, among those seeking union, such opposing opinions must be either silently tolerated, or openly disavowed and controverted. The "yea" or the "nay" in the question must follow. "How can two walk together unless they are agreed?" And, I must conclude, even with the present strong tendency and desire for union, there is room for the open question whether there are not now in the two bodies two marked, differing "schools, in theology. "Senex," from within the pale of the Old School Church, intimates something of the kind when he drops such expressions as "alike in the main," "I felt as though there was far more necessity that a warning note should ring in the ears of the Assembly (Old School) to beware how they throw themselves into the hands of the theological seminaries," —does "Senex mean seminary, namely, Princeton? —and also, in seeming inconsistency with this last "The world can see that it is not now a theological antagonism which keeps us apart, but a sort of stern standing upon rights and dignities, and want of concessions." These and other sentences in the articles of "Senex" help at least to make the impression that there are diverse theological views among Old and New School Presbyterians. To what degree and how widely this difference extends, is a proper matter for consideration, nor can the subject be dismissed by a simple stroke of the stylus.

I have heard of a classification of opinions, as to the general character of each of the two bodies, as those of "Calvinistic orthodoxy," and "consistent Calvinism," the former based upon Augustinian and Pauline doctrine, and by Scriptural logical sequences grown up into a symmetrical system; the latter "in the main" Calvinistic, but modified by interpretations, compromises and "concessions." Does a diversity even to this degree exist, and if so, may it not involve a discordance which cannot but mar the peace and hinder the progress of the Church, if united? I simply ask the question, and submit it as well to the attention of "Senex."

"Senex" does not state how "old," or how much of an "Old School" Presbyterian he is. I ("Juvenis") am not so young that I do not remember the times of the "disruption," and also, having been "to the manor born," I may claim to know something of the character and history of the "Old School" Presbyterian Church. Therefore I read with a strange surprise, as coming from "Senex," "an Old School Presbyterian," "In my last, my fears left our old Ship of Zion floating toward a rock, beyond which rolled dark fogs and perilous icebergs, and freezing antinomian waters."

Well, something may be conceded for the infirmities of old age "Senex," which is liable to timidity and despondency, and I ("Juvenis"), characteristically sanguine and hopeful, confess my inability to sympathize in this respect with "Senex." Nay, further, without presumption, of course, I ("Juvenis") would fain do what I can to give steadiness to the nerves of "Senex" in his alarm and terror at his vision of "our old Ship of Zion floating toward a rock," etc. Excuse me. Certainly, the ship is "old," but she is also young, "all oak," or iron, or something better. As to the "rock:" I assure you I do not, with my young eyes, see any; and as to the "dark fogs, and perilous icebergs, and freezing antinomian waters," though I confess to an admiration of the rhetoric which paints them, the picture must,

I think, be only one of the fancy—peradventure, a fiction "on the brain." I fail utterly to discern that peril and ruin of the Old School Church which the excited fears of "Senex" so graphically portray. And I confess, also, to admiration of the excellent taste of "Senex," which leads him to be "glad to admit and happy to admire the symmetry of a beautiful orthodoxy in the Old School." I ("Juvenis") rejoice in this appreciation of "Senex." But it is a pity he has so marred this acknowledgment as to hint that it is a dead orthodoxy. This is what he writes about that same "beautiful orthodoxy:" that it is an "orthodoxy without vitality."

Here, again, my venerable friend must be drawing upon imagination. I ("Juvenis"), also an Old School Presbyterian, see no such thing. The Old School Church seems to me not only "a thing of beauty," but a very embodiment of life and power. Looking upon the general condition of the Old School Church, I see her marked by thrift, progress, and success, at home and abroad.

With or without reunion, "our old Ship of Zion"—I like the name—will, I trust, as she is now, long remain "in commission" to do her Lord's work, far and wide among the nations of the world.

When next "Senex" favors with his deliverances the columns of THE OCCIDENT, that he may be more cheerfully confiding towards, "our old Ship of Zion," is the sincere wish of his humble and reverential friend,

JUVENIS.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 1 San Francisco, Cal.

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

THE OCCIDENT

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of PRACTICAL AND SCIENTIFIC.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance THE OCCIDENT *is acknowledged to have no equal on the Pacific Coast.*

THE OCCIDENT

Is edited by REV. JAS. EELLS, D.D., of the First Presbyterian Church, San Francisco—formerly of the Church on the Heights, Brooklyn; and Rev. E. B. WALSWORTH, D.D., of Oakland, as Associate.

It is the aim of the Editors and Publishers to make THE OCCIDENT, in every respect a first class paper, and one that will be WELCOME IN EVERY FAMILY.

A year's subscription to THE OCCIDENT *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

TERMS.—$4 00 a year, in advance; $2 50 for six months.

To Advertisers,

A first class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the VERY BEST MEDIUM for bringing their business before the public.

Direct all communications to "THE OCCIDENT, care of Bancroft & Co., San Francisco."

H. H. BANCROFT & CO., PUBLISHERS

609 Montgomery St., San Francisco.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,

San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents.	Fourth Reader, 90 Cents.
Second Reader, 50 Cents.	Fifth Reader, $1.25.
Third Reader, 75 Cents.	Sixth Reader, $1.60.

Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.

SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 20 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,

596 Broadway, New York; 154 Fremont St., Boston.

Current Literature.

Nearing Home.

The Presbyterian Board of Publication has just issued a compilation of "comforts and counsels for the aged," with the above title, which is really all it professes to be. Many of the selections are familiar, having been in print for years and being regarded as standard religious literature, and some of them are found here for the first time though worthy of association with what has been so often read. The book needs no commendation, except it be respecting the manner in which it is executed, and it is enough to say of this that it is beautifully appropriate, in type and style, to the design of the articles it contains. Old age will be charming if sustained by the comforts and guided by the counsels that here abound. Here is an extract from Dr. Gosman, in which he speaks of piety as exempt from the decays of age.

The powers with which grace has endowed the soul never experience the exhaustion of debility. The happy independence of mind, its capacity for enjoyment, distinct and spiritual, is seen in the vigor of perception and glory of emotion attesting its divine origin. The knowledge of advanced years is comprehensive; truths long familiar by contemplation become invested with new attractions. The glory of redemption is seen more clearly; the mind becomes assured of the certainty of the word of God; and their influence is continually advancing and diffusing its sacred power over the whole character. Like the tree, it seems to shoot deep its roots. Like the lofty cedar of Lebanon, it stands unmoved by the tempests of earth.

The great essential truths of the word of God, of the sinfulness of our nature, the necessity of divine and gracious influence to quicken, purify and invigorate the soul are understood and felt to be true by the test most decisive—experience. Cut off from many sources of enjoyment, the aged believer finds an admirable substitute in the fellowship of the spirit with God.

There is an entrance now into the joys of the future; he enters now into peace—for what is spiritual life but the life of God in the soul of man? What are peace and joy in believing but the tranquility of heaven brought down to earth? It is not the attribute of elevated genius alone to soar above the skies; borne on the wings of faith, the believer can adopn the language of Milton is a more exalted sense,—

> "Upled by thee,
> Into the heaven of heavens I have presumed,
> An earthly guest, and drawn empyrean air."

The enjoyments of religion are peculiar. They depend not on the senses, which may lose their quickness, or the animal passions, which may become languid and faint, or on anything which is merely outward. They spring from the recesses of the heart. The natural eye may fade, but the eye of the spirit is vivid.

And how delightful is the following view of the possible vigor of old age, and its clear apprehension of passing events, from the pen of Mr. James W. Alexander.

The man who waits on God, the man of faith and hope, the man of melting benevolence, looks through the loopholes of retreat upon a world whose vast and often terrific revolutions interest him chiefly as included in a cycle of providential arrangements calculated to develop and exhibit the glory of grace. His heart beats responsive to these. The news of Christ's kingdom is as dear to him as when he was vehemently active in the field. He looks down the ages by the lamp of prophecy, and beholds events which will take place when he shall have been long in Paradise. This connects him with the cause of Christ on earth, and redeems him from that miserable, dungeon-like seclusion of soul which wastes away the aged worlding. So far is it from being true that these portraitures are figments of religious imagination, that we have been led to the choice of the subject by knowledge and recollection of this very paradox in actual example, to wit: extreme old age made light, strong and happy by community of interest in the progressive triumphs of philanthropy and missions.

When, according to the Talmudic fable, the eagle soars toward the sun, he renews the plumage of his former days. As the serene disciple withdraws himself from any personal agency in the entangling plans of life, he studies more profoundly what his Master is weaving into the web of history. No longer young, he has a heart which gushes in sympathy with the young, and he cheers them on. He places the weapons in their hands. He take from the wall his sword, shield and hemlet, and rejoices that God still has younger soldiers in the field. He lives his life over again in their achievements, and pictures to himself more signal victories after he shall have gone. Like the wounded hero Wolf, he could even die more happy if the shouts of victory should arouse his failing perception. Far from being shut up in morose, neglectful selfishness, he glories that God's cause still lives and must prevail.

These is much real poetry in this book from which we would like to quote, but our space does not allow us the privilege. Here are a few lines however, translated from the German of Lange, which we will give a place, as they are new to us.

> Our beloved have departed,
> While we tarry broken-hearted
> In the dreary, empty house;
> They have ended life's brief story,
> They have reached the home of glory,
> Over death victorious!
>
> On we haste, to home invited,
> There with friends to be united
> In a surer bond than here;
> Meeting soon, and met for ever!—
> Glorious hope, forsake us never,
> For thy glimmering light is dear.

The above work is for sale by Bancroft & Company. We have also received from the same firm—

Cape Cod and All Along Shore Stories, by Charles Nordhoff, and published by Harper Brothers New York. This is a collection of pieces that were first printed in Harper's Magazine and the Atlantic Monthly, and they deserve this more permanent form, as productions of more than usual literary merit, and humorous good sense.

The Prodigal Son, a series of four discourses by Rev. W. Morley Punshon, the noted London preacher who has lately visited this country. These discourses present us with many of the peculiarities of sentiment and expression for which the author is distinguished, and are calculated to be very useful. Published by Roberts Brothers, Boston.

The Overland Monthly, for September, has been sent us by A. Roman & Co., the publishers, and we are pleased to find that this number is in nothing inferior to those that preceded it. As a whole, we like it better than either of the others.

Books and Periodicals Received:

Life, Public Services, and Speeches of Schuyler Colfax. By Edward Winslow Martin. Illustrated with a steel portrait by Sartain. The most reliable and authentic history of the public and private life of this eminent statesman yet published. Sold only by subscription at $3 00, a low price for so large a work. H. H. Bancroft & Company, San Francisco, agents for the Pacific Coast.

Vaccination, Re-vaccination, Inoculation, etc.—How to Prevent Small Pox. By S. F. Elliot, M. D., late Health Officer of the port of San Francisco. Published by H. H. Bancroft & Company.

Family Treasure, for August. Philadelphia: Elm St. Printing Company.

Sabbath at Home, for August. Boston: American Tract Society.

Spirit of Missions, for August. New York: Board of Missions.

Presbyterian Monthly, for August. Philadelphia: Presbyterian House.

Putnam's Magazine, for September. San Francisco: H. H. Bancroft & Company.

Educational.

Definite Directions.

Said a mother; "William, why can't you be good, as James T. is?" The child's answer was; "Mother, you keep saying, 'Be good.' James' mother tells him just *how* to be good." The colloquy is suggestive. Our directions to children are very apt to be thus vague and general. A young sculptor would receive little guidance from the injunction, "Make a handsome hand." He would implore his master to show him some beautiful hand which he might copy. The child is a sculptor of conduct. He needs definite models for his guidance. In the school-room it may be far too general even to say, "Attend to your lessons." It may be much more edifying and graphic to refer the idler to some companion, just then very busy, saying, "Do as M. is doing." This will serve the other purpose, also, of commending the industrious M. Moreover, if your method amuses some of the observant older pupils, they will not suffer from the momentary diversion. But, perhaps the most gracious model to which to refer a pupil, is his own better self. Younger pupils bear to be referred to one another without offense. Older ones are apt to be disturbed in their pride by such references. But all enjoy being pointed to the model of their own more industrious and sober selves. "Be as you were yesterday," "Do as you did this morning," are injunctions graphic to the understanding, gratifying to the love of esteem, and stimulating to hope.

C. R. C.

Personal.

Rev. I. H. Brayton has returned with improved health from his trip in the country, in which he has visited Lake Tahoe, the Big Trees, and other places of interest.

Bishop Scott of the M. E. Church has arrived at Virginia City. He comes to attend the Nevada Conference which is held at Carson City.

N. B. Garbrick teacher of the public school at Alviso, Alameda county, was drowned while bathing in the slough, on Saturday, Aug. 29.

Mr. J. C. Pelton, formerly Superintendent of Public Instruction, has taken charge of the Grammar School in San Leandro.

Thos. Ross, an old citizen of Sacramento, and formerly Chairman of the Board of Supervisors, committed suicide on Aug 31st.

Prof. Agassiz, Sen. Conklin and a number of Congressmen from the East, are expected to arrive in this city in a few days.

Mr. John B. Felton and Gen. W. T. Wallace will discuss the issues of the pending contest together after Oct. 1st.

Rev. J. H. Giles of Stockton has commenced a series of lectures on the Pilgrim's Progress at the First Baptist Church.

Judge Hagar has been elected a member of the Board of Regents of the University, in place of Hon. A. J. Moulder, resigned.

Mr. John Tuohy has been nominated by the Democrats of San Joaquin County, for the vacant senatorship.

Rev. W. T. Lucky delivered a lecture before the Temperance Legion, last Sunday evening.

HON. C. COLE arrived in this city on Saturday, August 29. He came overland in 16 days from New York.

GOV. WOOD of Oregon is obliged by ill health to decline the invitation to stump California for Grant and Colfax.

HON. C. E. DE LONG has withdrawn from the Senatorial contest in Nevada and will support Stewart.

CHY LUNG, one of our oldest and wealthiest Chinese merchants, died on Sunday August 30.

JUDGE SHAFER formerly of Stockton, has been elected delegate to Congress from Idaho.

HON. HENRY EDGERTON spoke at Platt's Hall on Tuesday evening to a crowded house.

REV. J. L. CLARK, D.D., of Conneticut declines the call to St. John's Church Stockton.

REV. MR. FRASER preached at Carson City, Nev., on Sunday Aug. 30th.

Miners' Foundry and Machine Works,

NOS. 245 TO 255 FIRST STREET,

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

APPLETON'S EDITION

OF THE

Waverley Novels,

NOW PUBLISHING,

From New Stereotype Plates, uniform with the new edition of Dickens, containing all the Notes of the Author, and printed from the latest edition of the Authorized Text.

TO BE COMPLETED IN TWENTY-FIVE VOLUMES.

PRICE 25 CENTS EACH.

Printed on fine white paper, clear type, and convenient in size.

PRONOUNCED A "MIRACLE OF CHEAPNESS."

ORDER OF ISSUE.

1. Waverley.	14. Fortunes of Nigel.
2. Ivanhoe.	15. Peveril of the Peak.
3. Kenilworth.	16. Quentin Durward.
4. Guy Mannering.	17. St. Ronan's Well.
5. Antiquary.	18. Redgauntlet.
6. Rob Roy.	19. The Betrothed, and Highland Widow.
7. Old Mortality.	20. The Talisman.
8. The Black Dwarf, and A Legend of Montrose.	21. Woodstock.
9. Bride of Lammermoor.	22. Fair Maid of Perth.
10. Heart of Midlothian.	23. Anne of Gierstein.
11. The Monastery.	24. Count Robert of Paris.
12. The Abbot.	25. The Surgeon's Daughter.
13. The Pirate.	

On receipt of SIX DOLLARS we will send the entire set of Waverley Novels, as published, and a copy of a new

STEEL-PLATE PORTRAIT OF SIR WALTER SCOTT,

from a painting by Sir Thomas Lawrence, suitable for framing; the Books and Engraving to be sent free of postage to any part of the United States.

Either of the above sent to any address on receipt of the price, 25 cents per volume.

On receipt of TEN DOLLARS a complete set of Dickens, in uniform style, 17 volumes. and Waverley, 25 volumes, will be sent postpaid. The cheapest Ten Dollars' worth to be found in the whole range of Literature. Forty-two volumes for $10.

Extraordinary Opportunity for the Million to Purchase a Set of Sir Walter Scott's World-renowned Waverley Novels.

CLUB RATES.

One Complete Set, 25 vols., $6 00	Five Sets, $26 00.
Three Compete Sets, 25 vols, 16 00	Ten Sets, $50 00.

Mailed at our expense.

Any person obtaining Four Subscribers for the Waverley Novels, and remitting us $24, will be entitled to a set of Dickens, 17 vols., GRATIS. All mailed at our expense.

Any person obtaining eight subscribers, and remitting $48 00, will receive a copy of the "Waverley Gallery," containing 25 Steel Engravings of the Female Characters in the Waverley Novels, bound in elegant morocco, price $15 00.

Canvassers wanted in every town in the United States. A great opportunity is afforded to industrious men and women to make money, as every man, woman, and child will purchase the WAVERLEY NOVELS, at this low price.

For Special Rates, apply to the Publishers,

The Farm Home of my Youthful Days.

Between broad fields of wheat and corn,
In the lonely home where I was born,
The peach trees lean against the wall,
And the woodbine wanders over all;
There is the shaded doorway still,
But a stranger's foot has crossed the sill.

There is the barn—and still as of yore
I can smell the hay from the open door,
And see the busy swallows throng,
And hear the pewee's mournful song,
But the stranger comes—oh! painful proof—
His sheafs are piled to the heated roof.

There is the orchard—the very trees,
Where my childhood knew long hours of ease,
And watched the shadowy moments run,
Till my life had imbibed more shade than sun;
The swing from the bough now sweeps the air,
But the stranger's children are swinging there.

There bubbles the shady spring below,
With its bulrush brook where the hazels grow;
'Twas there I found the calmus root,
And watched the minnows poise and shoot,
And saw the robin lave his wing—
But the stranger's bucket is at the spring.

Oh! ye who daily cross the sill,
Step lightly, for I like it still;
And when you crowd the old barn eaves,
Then think what countless harvest sheaves
Have passed within the scented door,
To gladden eyes that are no more.

Deal kindly with those orchard trees;
And when your children crowd your knees,
Their sweetest fruit shall they impart,
As if old memories stirred their heart;
To youthful sports still leave the swing,
And in sweet reverence hold the spring.

The barn, the trees, the brook, the birds,
The meadows with their lowing herds,
The woodbine on the cottage wall—
My heart still lingers on them all;
Ye strangers on my native soil,
Step lightly, for I love it still.

—*T. Buchanan Read.*

AGRICULTURAL.

About Fences—Useless Cumberers of the Ground.—Californians may learn a useful lesson from the following which we take from the *Country Gentleman*, and may avoid the necessity of tearing down fences by never building them.

The cry, "Down with the fences," is daily becoming louder. One eminent English agriculturist has removed three and a half miles of what he regards as unnecessary fence from his farm of less than two hundred acres.

It is estimated that Great Britain might dispense with 500,000 miles of fencing now in existence. If we suppose this fence to occupy a width of nine feet, which is a very moderate estimate for the wide, live fences of England, this would be an addition to the arable land of 589,280 acres.

Our common worm-fence usually occupies a width of four-and-a-half feet—the rails being fourteen feet long. A fence made with longer rails occupies more space. If the rails are shorter, the space occupied is less. To this it is safe to add eighteen inches for land that is not cultivated. This gives a width of two yards appropriated to fence. Every 2,240 yards of such fence occupies an acre. An acre of land in a farm nearly square, and consequently in the most economical shape as regards fencing, is 220 feet by 298 feet. To fence this requires 278 yards of fencing, which occupies just about one-eight of an acre—this is one-eight of the whole. Such a fence surrounding a ten-acre lot of the comparatively economical shape of 242 yards by 200 yards, would occupy 1786 yards, or considerably less than one-eight of an acre. This would be less than 1-30 of the whole amount—a striking illustration of the advantage of large lots over small ones.

Grass for Horses.—Many persons think that horses that are kept in the stable all summer should not be allowed to eat grass. They think it will make the horse soft, wishy-washy, and that it will throw him out of condition for hard work. This is particularly the case with some of the trainers of trotting and running horses. And horses that are kept up for farm and other work, are refused grass because their drivers think they will not eat hay so well. This was formerly the case more than it is now.—But these are all erroneous opinions and practices, and are giving way, gradually, to a more reasonable and natural system of feeding.

Grass is the natural food for the horse. It is cooling and healthful food. It keeps the bowels open and sharpens the appetite. It promotes digestion and removes fever from the system. Therefore, by all means, let the horse nip grass fifteen or twenty minutes daily. Whether training for trotting or running, it will be attended with the highest benefit. The horse will lose none of its speed by such a course of treatment. Horses that are kept up the year round for farm work should certainly be allowed a nice nibble at grass every day. They work hard, and all they get for it is something to eat. Let them have, then, what they like so well.—*Rural World.*

A Safe and Useful Practice—Washing Sweated Horses.—A correspondent of the London *Field* answers an inquiry whether it is a safe practice to wash sweated horses in cold water. He says he has adopted it and with beneficial results, both in summer and winter. After washing the, animal should be rubbed dry as far as practicable, and the legs especially. Should the hair on them be too long to admit of this being sufficiently done, flannel bandages should be put on, and a woolen rug thrown loosely over, but without the roller. In the course of an hour the horse will be tolerably dry, and should then have another rub down and be clothed in the ordinary manner. If horses were treated in a more rational manner than is often the case, with pure air and scrupulous cleanliness, disease would be far less common.

What is more refreshing to a man after a hard day's shooting, or other laborious exercise, than a warm or cold bath? And I believe it to be equally so to the horse. To the tired hunter a warm foot bath and fomentation, if the animal is sufficiently quiet, is most refreshing. With gentle treatment horses can be used to almost anything. Some years ago I visited the royal stable at Buckingham Palace. There, as I was informed, and at the time myself witnessed the operation, every horse, summer and winter, was washed from head to foot with cold water, after returning from work, no matter whether it had been out one hour or six. A regular bath house, cold water and plenty of it; two men, after the ablution, scraping, scrubbing, etc.; a kind of web cloth was thrown over to admit of evaporation, and the horse was afterwards rubbed down and clothed as usual in the course of an hour or two. We cannot all have such appliances, but still I consider the plan rational and conducive to the health of the horse, if only ordinary care is taken.

Fall Colts—Food and Treatment.—There are some advantages in having colts dropped in the fall, instead of spring or early summer. The principal one is that the colts get through the first year of their lives more satisfactorily. Instead of being weaned in the fall, and in some cases left to the tender mercies of the straw stacks and the snow banks, they remain with the mares through the winter, and are subsequently weaned on grass. Even with the best care and feed it is hardly possible to make the colts thrive as well during the first winter without the mares as with them. Grain and dry hay are not adapted to their digestive organs, and they frequently get out of order, and run down in condition, even when their owners do the best by them. It is better for the colts to feed the mares the extra grain and trust to the increased richness of their milk for beneficial results to the colt. It is well to have a large box stall to shelter both the mare and the colt. In cases where farmers work their brood mares it is better to have fall colts on account of doing spring and summer work. Winter is a comparatively leisure season for the horses as well as the master.—*Rural New Yorker.*

Large Orchard.—In Ohio, a fruit farmer is planting a mammoth orchard, which will consist of 5,000 apple trees, 10,000 peach trees, 8,000 pear trees, 2,600 cherry trees, 1,500 chickasaw plums, six acres of quinces, twenty acres of strawberries, twenty acres of raspberries, and eighteen acres of grapes. So says the New York *Farmer.*

MINING.

Steatite, or Soapstone.—There are localities in all the States and Territories on this coast, except Arizona, where this mineral is known to exist in great abundance, but its consumption is limited at present. Only one or two deposits are found profitable to work, and these only to an inconsiderable extent. There is but one establishment on the coast for the manufacture of articles from soapstone. This is at San Francisco, where it was commenced in 1866. As marble can be obtained cheaper than this stone, its use is confined to blocks for lining furnaces, slabs for the chemical works, linings for stoves, beds for ovens, etc. Its peculiar property of standing a high temperature, and retaining the heat a long time, makes it valuable for such purposes. About 200 tons are used at San Francisco annually; part of it in the form of powder by soap-makers, chemists, boot-makers, and others. Twenty tons of this powder are sold annually at $3 per 100 pounds. The price of the stone, in blocks, is $4 80 per cubic foot, or $40 per ton.

Most of that used at San Francisco is brought from near Placerville, El Dorado county, where the company owning the factory have a claim containing 3,000 feet in length on a bed of this material 363 feet wide, and there are "extensions" on the same "lead" for miles on both sides of the original claim. Other quarries are worked to some extent—one near Sonora, Tuolumne county; another on Santa Catalina island, off the southern coast, near Santa Barbara; another on the south of the San Jose valley, near the city of San Jose, in Santa Clara county.

The cost of transportation from Placerville amounts $12 per ton for freight alone, divided as follows: For hauling by team from quarry to railroad, nine and a half miles, $6 per ton; by railroad to Sacramento, 40 miles, $4 per ton; to San Francisco by steamer, $2 per ton.

The California steatite is superior to that obtained in the Atlantic States or Europe for many important purposes. It contains neither mica nor iron. The Golden City Chemical Works, an extensive establishment, uses steatite to line the retorts for distillation of nitric and sulphuric acids. When commencing operations this company imported steatite from New York, which, owing to its containing mica and iron, was soon destroyed by the fumes of the acids. Induced to try some of the California stone, it was found to last for a long time, the acids having but little effect on it.

Don Abel Stearns states that when he came to California, in 1825, the common people cooked their food in vessels made of this stone, which is abundant in all the southern counties, and almost as soft as wood. These "crocks" were made of various sizes, usually about an inch thick on the sides and two inches on the bottom. Such vessels are occasionally found by the surface miners in various parts of the State. Parcels of California steatite have been exported to China, where it is used for various purposes.—*Ross Browne's Report.*

Humboldt Mining.

At no time in the history of Humboldt mining has there been more well-directed labor put upon mines, and in no instance that we know of is it being done for other than purposes of permanent development. It has been and is yet a hard struggle for very many to stay by and hold their property, but their faith in securing good pay for their time and labor and anxiety is growing firmer. A few years ago it was a long distance from main thoroughfares of travel, and but rarely could a man of means get by Virginia and Gold Hill or Austin, although they may have started out for Humboldt. The railroad's near approach and the tide of travel to and from Idaho by the Railroad Stage Line, have already brought men of means here on tours of inspection,

nd in one year from now the railroad will be com-leted and the Atlantic and Pacific travel will mostly ass through our county. This will give Humboldt niners great advantages not heretofore enjoyed ither by them or others. There is little doubt but he railroad company will put freight on ores at rates hich will tend to promote mining and build up ining enterprises in our midst, the business of hich will surpass any in the State. Capital intro-uced will naturally attract more. The influence of eavy companies extends wherever their acquain-ance does or their products are marketed. In view f these and kindred causes, our mine owners are mpelled to improve their property, and put it into a ondition that its value may be easily seen and esti-nated, and they are right. Their work will be mply rewarded.—*Winnemucca Argent.*

A VALUABLE MINE.—One of the most remark-ble mines in the State, says the Grass Valley *Union*, is that of Abergast & Nichols, located about ne mile south from Rough and Ready, in this ounty. The ledge is about six feet in thickness, nd is encased in slate, the quartz being decomposed. he owners, when they want money, take a pan and o after the gold, and often pan out a thousand dol-rs in two hours. They are now about seventy feet own on the ledge, and it shows wonderfully rich all he way down. They refuse to sell the mine or any ortion of it for any amount of money that can be ffered. Their claim is six thousand feet in extent. hey have no machinery at the ledge, and do not eem to care to crush the rock.

THE NORTH BLOOMFIELD GRAVEL CO.—This ompany now employs in all between sixty and ighty men. About fifty of these are at work upon he new ditch, which they are building for the pur-ose of conducting water from Poor Man's Creek, ear Eureka, to the mines on the ridge. The ditch ill be about twenty-four miles long, and the com-any are endeavoring to increase the force, in order o push the work more rapidly.—*Nevada Transcript.*

THINGS WORTH KNOWING.

My Tea Biscuit.

I have for biscuit and various kinds of cake bak-g, twelve tin cups, bottomless, and made so flaring hat the top is just one-quarter larger than the bot-om, the latter being two inches in diameter, and the epth of the cups two and a half inches. These ips are soldered in three rows, as close together as he tops will permit, to a sheet of tin, thus making hree rows of four cups each. With care, these will st a long time, and are far more convenient and less ouble than using separate cups. My battery of ke cups cost me fifty cents, and have done service early five years.

For our favorite tea-biscuit, I use the best flour to e had—for the dozen, one pound. Into this I put dessert-spoonful of salt, three tablespoonfuls of orris' *Azumea*—but as that is not to be had by all ouse-wives, two teaspoonfuls of cream of tartar, or he of pure refined saleratus will do nearly as well. hen work thoroughly into the flour with the hand o ounces of either butter or nice, clean, fat drip-ngs. It is vulgar, I know, using lard or fried eat fat for tea-cakes or biscuits; but I know it is tter and cheaper than butter, and it always shortens y cakes. "Wet up" with sour milk a little warm-, and knead into a pretty stiff dough. Roll about ree-quarters of an inch thick, cut out with some-ing that will fit the size of the cups, place them parately in the cells, and bake in a moderately hot en about twenty-five minutes, or until the upper rface is a light, pretty brown.

About three eggs beatten to a froth, and added to e material, add essentially to the quality of the bis-it. I generally use them but when hens decline, lay at lower rates than fifty cent per dozen, the gs are omitted, and our tea-biscuits pass out of ght very cleverly without them.—*Madeline, in Am. armer.*

HOW TO KEEP THINGS COOL—CHEAP ICE ITCHER.—The following simple method of keeping ice water for a long time in a common pitcher, is worth knowing:—Place between two sheets of paper (newspaper will answer, thick brown is better), a layer of cotton batten about half an inch in thick-ness, fasten the ends of the paper and batten to-gether, forming a circle, then sew or paste a crown over one end, making a box the shape of a stove-pipe hat minus the rim. Place this over an ordinary pitcher filled with ice water, making it deep enough to rest on the table, so as to exclude the air, and the reader will be astonished at the length of time the ice will keep, and the water remain cold after the ice is melted.—*Christian Observer.*

CLOCKS—HOW TO FIX THEM.—When the clock stops, don't take it to the repair shop till you have tried as follows: Take off the pointers and the face; take off the pendulum and its wire. Re-move the ratchet from the *tick* wheel and the clock will run down with great velocity. Let it go. The increased speed wears away the gum and dust from the pinions—the clock cleans itself. If you have any pure sperm oil, put the least bit on the axles. Put the machine together, and nine times in ten it will run just as well as if it had been taken to the shop. In fact this is the way most shopmen clean clocks. If instead of a pendulum the clock has a watch escapement, this latter can be taken out in an instant without taking the work apart, and the result is the same.—*Country Gentleman.*

WHOLESOMENESS OF APPLES.—Raw mellow ap-ples are digested in an hour and a half, while boiled cabbage requires five hours. The most healthful dessert that can be placed upon the table is a baked apple. If eaten frequently at breakfast, with coarse bread and butter, without meat or flesh of any kind, it has an admirable effect on the general system, of-ten removing constipation, correcting acidities, and cooling off febrile conditions more effectually than the most approved medicines. Leibig says they pre-vent debility, strengthen digestion, correct the put-trefactive tendencies of nitrogeneous food, avert scurvy, and strengthen the power of productive la-bor.

GOOD HARD CANDLES MADE FROM LARD.—Directions; for twelve pounds of lard take one pound of saltpeter, and one pound of alum; mix them and pulverize; dissolve the saltpeter and alum in a gill of boiling hot water, pour the compound into the lard before it is all melted; stir the whole until it boils, skim off what rises; let it simmer until the water is all boiled out, or until it ceases to throw off steam; pour off the lard as soon as it is done, and clean the boiler while it is hot. If the candles are to be dipped, let the lard cool first to a cake, and then treat as you would tallow.

HOW TO MAKE MONEY—AN OPENING FOR EVERY MAN.—Do something. There is rarely a necessity for a well man to be out of work. "Noth-ing to do," is a pitiable word. Referring to certain persons who were in want, and could find nothing to do, a friend of ours recently remarked that if he could find nothing else to do that would pay," he would roll a barrel up and down the whole length of Main street, and to everybody who asked why he did it, he would say; "Give me a cent and I will tell you!" Better that than nothing.

BURNS OR SCALDS—AN EFFECTIVE REMEDY.—The following is one of the best applications we know of in case of burns or scalds, more especially where a large surface is denuded of the cuticle: Take one drachm of finely-powdered alum, and mix thoroughly with the whites of two eggs and one tea-cup of fresh lard; spread on a cloth, and apply to the parts burnt. It gives almost instant relief from pain, and, by excluding the air, prevents inflamma-tory action. The application should be changed at least once a day.—*Reformed Church Messenger.*

THE city of Buffalo has to pay over $20,000 dam-ages to St. John's Church, caused by fire kindled by fireworks.

The Great Future.

We make the following extracts from an eloquent and suggestive article by Dr. Spear in the August number of *Hours at Home*.

"Away with this sombre meditation—this unphilosophical streak of mere sentimentalism! Yes, away with it! There is no question to be asked, and hence none to be answered. What seems in man to be a thinking *soul*, is merely a phenomenon of matter. Man himself is simply an *animal*, bipedal, it is true, yet an animal after all; and of course, death must be his final end. Nature's chemistry tells the story for man. This chemistry originally made him; and the same chemistry unmakes him. Let the priests and the whining religionists alone; and there is no trouble on this subject, any more than there is with the burning of gunpowder." Thus shouts the bold and defiant atheist, resolving everything into matter and its forces.

"Reach forth thy faith, and dismiss thy fears! Be calm, be quiet, be hopeful! This seeming destruction is just no destruction at all. The man does not die. That which dies, never was the man. The shadows which here darken the sky, seen from the other side, become sunbeams. Life is but a preliminary, and death the introduction to itssequel. The scene shifts that the prologue may give place to the grander epilogue. Death opens the future, by a spiritual translation establishes the soul in some state of good or ill, according to the affinities of moral character. It will be human fault, if this apparent tragedy be not really the sublimest coronation of man's being. To the eye of Christian virtue the last moment on earth is succeeded by the first moment in heaven. The good man dies to live. He more lives than dies." Such is the cheerful and animating voice of the Christian when he speaks of death."

Ah! what spectre is that standing with a drawn sword on every man's path, red with the blood of a race, and seeming nearer with every passing moment! What is it! Is it real? We look. We see. We cannot but see. The fate of a world speaks its name, and recounts its deeds. It is our *own individual* death. Though long delayed, sooner or later it comes. Whatever may be the effect of death, that effect we shall soon experience, each one in himself and for himself. All the questions that it raises, and all the results which it involves, are *personal*.

Where then shall I be, and what shall I be—I *myself*—this living, conscious *self*—the being I call *myself*, and of whom I think when I hear or speak my own name—this mysterious agent of thought, feeling and character—where and what shall I be, when death has dissolved my connection with earth and laid my body down to moulder in the dust? Where shall I be ages hence—in what world, and in what manner employed? These faculties of mine—this reason, this memory, this conscience, these strong affections—have they any future, and if so, what is that future? This soul—ah! this thinking soul—what about it, and what the prospects before it, when the knell of life is sounding and time approaching its final pause?

The intensely *personal* character of the question makes it widely different from a curious speculation, in which one has no direct interest. Whether the planets be inhabited or not, is not a matter of particular interest to man; but whether one does or not survive the event of death—whether this life be the whole or merely a part of his conscious being—is to him one of the greatest problems of thought. It involves himself, all that there can be in himself, and all the interests that he can feel in himself. The point once being fairly stated, will of necessity make him serious and honest as well as anxious and earnest. Hints, though obscure, will affect him with their suggestive power. Possibilities will strongly attract his notice. Presumption drawn from facts will reason with him. The sight of a revelation bringing life and immortality to light upon the authority of God, will be hailed with rapture. A sound argument upon such a theme, even though destitute of the graces of rhetoric, outstrips in interest the most captivating romance. Butler's chapter on the "Future Life" in his immortal Analogy, is cold logic and dense thinking, with none of the ornaments of fancy; and yet no one can study this chapter so as to master it, uncharmed by the arguments, or unaffected by the conclusion. Mere *negatives* are not the proper food of souls, in life or in death. To tell one what not to believe, is not enough. The pompous air of unconcern and defiance in respect to one's future destiny, is either a sheer pretense, or the stupid tranquility of an idiot. The effort to ape the stoic here, is as unnatural as it must be unsuccessful. The nature of man, his faculties, his instincts, his hopes, his fears, summon him to thoughtful solemnity; and if he will not have this solemnity in health and strength, by choice and preference, and in season to profit thereby, then the dark hour of death will coerce him to the task. Nothing can save him from it but a death so sudden as to preclude reflection, or a reason so blasted as to be incapable of it.

"What is your view," said an intelligent gentleman, who had been a skeptic, yet who professed to become a Christian in his last sickness, "as to the intermediate state of the soul between the death of the body and its final resurrection?" He immediately added: "Think me not speculative or merely curious in asking this question. It is not so. I assure you that one so near eternity as I am, cannot but feel the greatest interest in everything pertaining to that world. I thought that perhaps you could from the Scriptures shed some light upon my mind." His friend gave him the testimony ot the Bible bearing upon the point: "Well, that will do. I suppose I must wait till death itself shall make me wiser" The feelings of that man were natural. His question in its generic aspects is really the question of the world. Death crowds the individual soul with its urgent pressure.

Let us aggregate all these ideas into one great thought, and then sit down in its presence. Is death the end, or is it but a change into a larger mode of life? What, to any man, are all the other questions of earth in comparison with this? How stupendous in every possible form of its answer? It places all other questions under an eclipse. Above and beyond it, there is no higher summit for thought to climb. It is the Alpine question of time. Lifted to its startling height, and looking down from its elevation, we see this globe as a mere atom whirling in space. Its empires have dwindled into motes; monarchs have become pigmies; and centuries have passed into seconds. Manifestly humanity here wants a *faith*, and a *practice*—such a faith and practice as, in the soberest judgment of reason, will afford the surest guaranty of hope. What shall this faith be, and whence shall it come, and how shall we live in view of it? To these questions the Christian finds his answers in the Bible. He reads and believes. He adopts for himself the grand hope of Paul: "For we know, that if the earthly house of our tabernacle were dissolved, we have a building of God, a house not made with hands, eternal in the heavens." In death he makes the prayer of the martyr Stephen: "Lord Jesus, receive my spirit." It is a pertinent and grave question for every man to settle, whether he can do better than to accept the Christian volume as his guide to the Great Future.

University Education.

In the September number of the *Overland Monthly*, is a good article on this subject, now occupying so much of the public attention, from which we make the following extracts:

It will hardly be denied that, even in our newer States, the public good demands institutions for higher education. The old cry for self-educated men has been modified, the hostility to "college learning" abated. It is seen that self-trained men must study the same subjects, acquire the same information, as those who frequent seats of learning. They go toward the same goal, only by roundabout and rugged ways. In this practical age we want the best and quickest means of reaching a given end. Why should a young man struggle on by himself, at a disadvantange, when he can find a full library complete scientific apparatus, and the guidance of men who are familiar with the whole ground to be traveresed? It will be his own fault if these help make him less vigorous and manly. He will learn all the better for the genial companionship of other students, and of enthusiastic teachers. He need to know about things that he has not time to learn. The more numerous the departments of knowledge which are grouped around him, the more likely will he be to escape that one-sidedness which is the bane of so many powerful minds. No State can refuse these highest advantages without implying that its sons are less worthy of culture than those of other States. We, of the Pacific Coast, intend to make no such confession, and we are agreed that we must give them the university.

It is well for the people to familiarize themselves with thoughts about their new possession. It is well for the friends of the higher education to contribute their various suggestions toward the best possible results.

Standing at the head of the educational system the university cannot but hold its standard high.

It will provide a full variety in its courses of instruction. It must combine the theoretical with the practical, the literary with the scientific. Natural science is not enough. Great as is the place which it has won, it is not yet sole ruler. The old royalties do not own themselves cast down, while yet they gracefully acknowledge a divided supremacy. Latin and Greek must still be university studies, side by side with chemistry and geology. The Hon. Mr. Lowe may use the fine power of expression to which the ancient tongues have helped him, to decry the study of those tongues. Mr. Biglow may try to prove that Greek should, like Hebrew, be laid on the shelf for dry theologians to guard. But the truest leading minds think, with Stuart Mill, that the good old classics fill an indispensable place in the circle of the humanities. The tongue of Homer and Plato cannot yet be ignored. The mother of French, Italian, Spanish, proud as she is of her children, claims a recognition for herself, while she points to their English cousin, and defies English scholars to slight the relationship. Thorough study of English involves a knowledge of Latin and more remotely of Greek. These clear-cut tongues are the best, by all odds, to show the principles of grammar. Whoever seeks a mastery of language cannot afford to pass them by. The musician gives years to the study of expression; the sculptor toils unweariedly to make the marble express his thought. Let this prediction be noted: If scientific men, in their hurry and their enthusiasm for science, forego all the discipline of the ancient languages, they will fall below expression as teachers, writers, and lecturers. Science will have won her votaries, but they will not be silver-tongued to herald all her praise.

But this does not prove that the old classical course be insisted on for all. There is one line of study to which all should be rigidly held. In this, the new popular demand is right. If a young man really dislikes Latin and Greek, so much the worse for him; but he need not give two or three of his best years to the ungrateful task. If he shrinks from the higher mathematics, he need not be dragged to them by force. Tomatoes are an excellent edible; but if one endeavors faithfully to like them, and cannot, he is not to do penance on them for a life-time. The forcing process in education has been tried, and has signally failed. We bury it now out of sight. If the minds of young men are to be roused to manly energy, it will be henceforth by attraction not by compulsion.

We plan only for those who wish to learn, to be profited by university studies. For these we must provide what will interest them. It is better to pursue an inferior branch of knowledge with zest, than to drone through something higher. Entomology well studied is far better than the calculus botched. By interesting young men, the university can indefinitely increase its numbers. It would be better to inoculate a thousand students with the love of learning, if it should be on a lower plane, than to give a little higher training to a selected hundred. Let there be, then, widely varying courses of study.

Agriculture is calling for scientific aids; it

st fitting that it should have a course of its own
he university—not as an interloper, or an infe-
. Graduates from this department should be
sed in many branches of learning. They want
nowledge of general as well as applied chemistry;
physics, if not of mechanics; of geology, miner-
gy and botany; of meteorology and astronomy;
history and mental philosophy; of political econ-
y and the national government; of one or more
the modern languages of culture; and, indispen-
y, of the use and history of the English lan-
ge. Still other specifications might be made;
these are enough to show that he who would be
accomplished agriculturist and citizen, has no
row field before him. His course of study in
university must be made broad and liberal.
The department of mining knowledge, differing
n the last in important particulars, but the same
nany features of general study, must be furnished
n equal care. Civil engineering calls for yet
r variations. The mechanic arts demand a full
thorough curriculum.
ll these courses will have much in common with
n other, and much in common with the classical
se. This is one great advantage of the univer-
that it puts all the departments of liberal edu-
n side by side, where their parallelisms and af-
tions can be seen; and the students, passing often
n one course to another, attending many of the
e lectures and recitations, may learn their com-
n bond of brotherhood.
The classical or literary course needs greater flex-
ty. Changes have lately been made in this di-
ion in our oldest American colleges, and they will
btless go further. Latin and Greek will not
their place, but students will be permitted to
off from them at more than one tangential point.
The course will thus be better balanced, and gain
reshness of interest.
nd when the university accepts its high office as
spenser of popular blessings, it is but fair to ask
the people give it their cordial appreciation.
graduates are to be welcomed. A man is no bet-
for an academic degree; but if he has that which
degree is meant to represent—a large and gen-
s culture in the things best worth knowing—
there is a gain to him, and to the public of
ch he is a part. It is a good thing for the com-
nity that the old notion of but "three learned
essions" is already broken down. These pro-
ons were wont to form a "ring" for the manip-
ion of all graduates. If one was not to be a
er, a preacher, or a doctor, it was not to be sup-
d that he would go through college. If a grad-
declined the learned three, he was held to have
wn away his time. A juster sentiment already
ails. It is found that the best culture has ample
in the common school, in the editor's chair, in
y new "professions." More, there is a partial
gnition of the truth that the merchant and the
ufacturer, the artisan and the agriculturist, are
better for mental culture; and there is no pri-
walk which liberal learning does not adorn and
hten. Let this truth be fully recognized. Let
e who aspire not to public service or eminence,
r to their utmost their love of learning. Let
e who mean to be traders, or mechanics, or
ers, or miners, or workers in any of the bene-
t industries of the age, throw over their work-
lives the "sweetness" and the "light" of a
er culture.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

FAMILY READING.

"Let Not the Sun Go Down upon your Wrath."

"Father, forgive us," is our daily prayer,
When the worn spirit feels its helpless dearth;
Yet, in our lowly greatness, do we dare
To seek from Heaven what we refuse on earth.
Too often will the bosom, sternly proud,
Bear shafts of vengance on its graveward path;
Deaf to the teaching that has cried aloud,
"Let not the Sun go down upon your wrath."

We ask for mercy from the Throne above,
In morning worship and in vesper song;
And let us kindly shed the balm of love,
To heal and soothe a brother's deed of wrong.
If ye would crush the bitter thorns of strife,
And strew the bloom of peace around your path—
If ye would drink the sweetest streams of life,
"Let not the Sun go down upon your Wrath."

Were this remembered, many a human lot
Would find more blessings in our home below;
The checquer'd world would lose its darkest blot,
And mortal record tell much less of woe.
The sacred counsels of the Wise impart
No holier words in all that language hath;
For light divine is kindled, where the heart
Lets not the sun go downu pon its wrath.

—*Eliza Cook.*

Summer Evening.

BY JEAN INGELOW

And now
Empurpled seas began to blush and bloom,
Doves made sweet moaning, and the guelderrose
In a great stillness dropped, and ever dropped,
Her wealth about her feet, and there it lay.
And drifted not at all. The lilac spread
Odorous essence round her; and full oft,
When Muriel felt the warmth her pulses cheer,
She, faded, sat among the Maytide bloom,
And with a reverent quiet in her soul,
Took back—it was His will—her time and sat
Learning again to live.

The Swallow Finding a Nest.

The *Inverness Courier*, Scotland, relates this incident: In a parish church on the west coast there is to be seen at present a rather curious and interesting sight—namely, a swallow's nest attached to the cornice of the upper wood-work of the pulpit. The birds having discovered that there was ready ingress and egress by a small movable pane in one of the windows, left open during the summer for ventilation, took advantage of the circumstance to explore the building, and, being satisfied upon the whole with their survey, they commenced their operations with all diligence; and on a certain Sabbath, when the minister and congregation had assembled, lo! the nest was finished; nor did the swallows seem greatly disturbed by the presence of the people, the eloquence of the preacher, or even the singing of the psalms, which if anything, one would think, should have startled them. The minister ordered the nest to be left unharmed, and its builders in undisturbed possession of their "clay bigging." In due time a brood of young ones made their appearance, which are now nearly full-fledged, and no doubt will soon, piloted by their parents, pass through the open window-pane into the light and liberty which is the peculiar heritage of the race. On a recent Sunday the minister admirably improved the occasion; for, with special reference to the circumstances, the swallows flying in and out with a homely twitter that made every allusion to them tell with peculiar force, he preached an eloquent sermon, taking as his text our Savior's beautiful words—"Are not five sparrows sold for two farthings? and not one of them is forgotten before God;" and very appropriately concluding with the singing of the verses of the 84th Psalm, beginning—

"How lovely is thy dwelling-place,
O, Lord of Hosts, to me!
The tabernacles of thy grace
How pleasant, Lord, they be!

* * * *

"Behold, the sparrow findeth out
A house wherein to rest;
The swallow, also, for herself
Hath purchased a nest;
Ev'n thine own altars, where she safe
Her young ones forth may bring;
O thou Almighty Lord of Hosts,
Who art my God and King."

The people at once took up the reference and were delighted.

Unconscious Faith.

The farmer does not order ten thousand buckets added to his list of agricultural implements, so that water may be carried from adjacent wells and rivers to moisten his planted fields. He depends on the invisible agencies of the natural world to lift the water from the distant ocean, to transport it in vapors, and to scatter the gladdening drops upon his furrowed corn and harrowed wheat. No man can cultivate his farm without faith in the higher power. And so it is with the man who cultivates his own heart. He feels that he must grow in grace and in knowledge. But he cannot comfort himself with the ten thousand compliments dipped out of the wells and currents of society, however bright and sparkling. Such refreshings are artificial and easily dried away. The heart intuitively expects something out of the pure regions above. It looks beyond rituals, creeds, and ceremonies; beyond all sect-patented philosophies and confessions; beyond all systems of moral policy and bodily performance—up to the heavens of ampler revelation—up to the infinite sources of all growth and glory. The heart has faith that the eternal power which created can renew and redeem; but it trusts in nothing less. It looks up beseechingly to the Will Divine, and expects that all its thirstings for the gracious rain shall and must be supplied. It meets the heavenly word with an amen and a welcome, and opens its inmost recesses to the reviving power. In such a heart, as in the heart of a tender flower withering for rain, the blessed word falls to restore and glorify; and as the greeted rain brings odor from the reviving flower-heart, so a soul that receives the word of truth is made to offer its incense of praise for the mercy.

Now, this word, which is compared to the rain, is contained in the Sacred Scriptures. The promises of the Bible are the seasonably falling rains upon thirsty souls. When rain drops have fallen, the clouds that held them are gone. So when the spirit thrills in refreshing baptism to the heart, the page of lettered forms is unseen. The eye meets the printer words and reads them; but the soul, the keener scholar, recognizes their intensive meaning, and drinks that in revivingly, as a flower drinks in the descending drops that fall out of shadows, until shadows are rainbowed over and shined away.—*From the Gospel in the Trees, by Alex. Clark.*

Half-way to Christ.

"Half-way to Christ," said a minister, in quoting the remarks of an eminent man; "half-way to Christ is a dreadful place."

Indeed it is. But do you realize the fact when you talk so earnestly on religious topics, and enforce the laws of morality, while your heart is not given to Christ, and you fail to walk in the way of His commandments?

There is no neutral ground in Christ's territory. You must be either for or against the establishing of His kingdom; and if your sympathies are not thoroughly enlisted in the right cause, then you belong wholly to the adversary.

Half-way to Christ! Half-way home is to be still excluded from the light, the love and happiness conferred therein. If you have been absent some time, parted from those you love best on earth, and are now on the homeward journey, how the heart leaps when some one beside you whispers, "we are on the last half.

And the last half is always the longest. Full of imaginary forebodings; apprehending evil that never entered your thoughts before, home becomes each moment dearer, and over the door-post is inscribed in shining letters, "Peace" and "Safety."

"Almost saved" is—still left to perish! If you are already half-way to Christ, what is to hinder your progress? If you believe with the understanding, why should you not believe with the heart also? How can you willfully exclude yourself from participating in the delights known only to the true disciple?

Why will you halt on the threshold when the door stands invitingly open, and you may enter, if you choose? Are you satisfied with being half-way to Christ? Living at that distance from Him, you may realize no present peril, but, dying in that condition, you are lost eternally. Come nearer. The children have no need to stand afar off. "Half-way to Christ is a dreadful place!"—*Intelligencer.*

"Speak to that Young Man."

A writer in one of our exchanges says, "In the first week of October last I traveled in the cars from Trenton to Philadelphia, and at one of the stations on the way—Holmesburg—a young man, a stranger to me, entered the cars and took a seat beside me. We soon entered into conversation, and I learned he was a machinist by trade and was on his way to Philadelphia to seek employment. While conversing with him, the thought was suggested to me that Providence might have brought us together that I might point him to 'the Lamb of God that taketh away the sin of the world,' and kindly asked him, 'Do you love Jesus?'

He gave me a stern look, but after a moment's reflection, replied that he was not a Christian, nor had he given the subject any serious reflection. I then tried to show him the importance of having Christ for his friend, especially as he was now seeking employment among strangers, and in a city where there were great and trying temptations, especially for the young. I soon discovered that the truth had produced some impression, and I urged him to make an immediate surrender of himself to Christ by the act of simple faith in the perfect righteousness and atonement of his Savior and there in that car take a free ticket on the celestial railroad.

He would not promise anything, however; but he told me he had a praying, widowed mother, whose solicitude for him was greatly increased because of his leaving home to seek employment. When we parted he thanked me for the kind interest I had manifested for his welfare.

I asked him for the address of his mother, which he gave me; and on my arrival home, I wrote to his mother, telling her of the interview I had had with her son, and proposed to her to join in special prayer for his conversion every day for a month. I received no reply from her. But in the beginning of December, about two months after, I received a letter from the young man, telling me he had *found the pearl of great price*, and had joined the church, and asked me still to remember him at the throne of grace. He also expressed the thanks of his mother with his own for the kind Providence that had brought us to meet in the cars."

Such instances as these are exceedingly suggestive of the value of "a word spoken in season." What if opportunities for this kind of service were always improved?

The Bible and its Lessons.

The Bible was given to an intelligent and honest Roman Catholic who had never before seen it. He took it home and began to read it with deep interest. It opened before him an entirely new field of thought and feeling, of truth and duty. After a while he said to his wife, "Wife, if this book is true, we are *wrong!*" He went on with his reading. It showed him that he was a sinner against God. "Wife," he said, "if this book is true we are *lost!*" But still he went on reading the Bible, and soon learned from it to know and love Christ as the only and all-sufficient Savior, and then he said, "Wife, if this book is true, we are *saved!*"

These are the *three* great lessons that the Bible teaches; that in view of its perfect and holy standard, *we are wrong;* that through our sins, as its light exposes them, *we are lost;* and that by the Redemer, whom it so graciously proclaims, *we may be saved!*

ON LOOKING-GLASSES.—What if there should be a resurrection of that which has been buried in looking-glasses? Little children's faces, anxious mothers, budding girls beginning to inspect their own beauty, vain and giggling looks, grave and sad looks of those who hate to grow old, vexed looks of those who have cut themselves in shaving, timid and anxious looks of those who have been sick, double images of lovers glancing upon the sweet picture of their embrace, prim and prig pedants

uching up their gray whiskers and covering their ldness with a few strawy locks yet left, simple and ondering looks of curly and wooly Phillis, whose nest homely face is just as dear to her as if it were eopatra's.—*Beecher's Norwood.*

HOME.—The only fountain in the wilderness of e where man drinks of water unmixed with bit- rness is that which gushes up in calm and steady cess of domestic life. Pleasure may heat the art with artificial excitement, but when the ex- ement is gone, an aching void is left. That is led in the holy calm of domestic bliss, when, sur- unded by all that tends to earthly comfort, a man rns his thoughts to a life that extends through in- ity, making his home an index pointing across the a of life to one of happiness beyond.

Young Folks.

Our Little Newsboy.

Hurrying to catch a certain car, at a certain cor- r, late one stormy night, I was suddenly arrested the sight of a queer-looking bundle lying in a or-way.

"Bless my heart, it's a child! O John! I'm raid he's frozen!" I exclaimed to my brother, as both bent over the bundle.

Such a little fellow as he was, in the big ragged at; such a tired, baby face, under the fuzzy cap; ch a purple, little hand, still holding fast a few pa- rs; such a pathetic sight altogether was the boy, ing on the stone step, with the snow drifting over n, that it was impossible to go by.

"He is asleep, but he will freeze if left so long. ere, wake up, my boy, and go home as fast as you n," cried John, with a gentle shake, and a very ntle voice; for the memory of a dear little lad, fely tucked up at home, made him kind to the small gabond.

The moment he was touched, the boy tumbled up, d before he was half awake, began his usual cry th an eye to business.

"Paper, sir? Herald, Transkip, Last—" a great p swallowed up the "last edition," and he stood nking at us like a very chilly young owl.

"I'll buy 'em all, if you'll go home, my little chap; s high time you were asleep," said John, whisking e damp papers into one pocket and his purse out of other as he spoke.

"All of 'em? why there's six!" croaked the boy, he was as hoarse as a raven.

"Never mind, I can kindle a fire with 'em. Put t in your pocket and trot home, my man, as fast possible."

"Where do you live?" I asked, picking up the y cents that fell from the little fingers, too benumb- to hold it.

"Mills Court, out of Hanover. Cold ain't it"? said boy, blowing on his purple hands, and hopping bly from one leg to another to take the stiffness t.

"He can't go all that way in this storm; such a te, and so used up with cold and sleep, John."

"Of course he can't; we'll put him in a car," be- n John: when the boy wheezed out—

"No, I've got ter wait for Sam. He'll be along soon's the theater's done. He said he would and I'm waiting."

"Who is Sam?" I asked.

"He is the feller I live with. I ain't got any folks l he takes care o' me."

"Nice care, indeed; leaving a baby like you to it for him here such a night as this," I said, ssly.

"Oh, he's good to me, Sam is, though he does ock me around sometimes when I ain't spry. The fellers shove me back, you see, and I gets cold, l can't sing out loud; so I don't sell my papers, l has to work em off late."

"Hear the child talk. One would think he was teen, instead of six," I said, half laughing.

"I'm most ten. Hi! ain't that a oner?" cried boy, as a gust of sleet slapped him in the face, en he peeped out to see if Sam was coming. Hullo! the lights is out. Why, the play's done, l the folks gone, and Sam's forgot me."

It was very evident that Sam had forgotten his little *protege*, and a strong desire to shake Sam possessed me.

"No use waitin' any longer; and now my papers is sold, I ain't afraid to go home," said the boy, stepping down, like a little old man with the rheumatism, and preparing to trudge away through the storm.

"Stop a bit, my little Casabianca; a car will be along in fifteen minutes, and while waiting you can warm yourself over there," said John, with the purple hand in his.

"My name's Jack Hill, not Cassy Banks, please, sir," said the little party, with dignity.

"Have you had your supper, Mr. Hill?" asked John, laughing.

"I had some peanuts and two sucks of Joe's orange; but it warn't very filling," he said gravely.

"I should think not. Here! one stew; and be quick, please," cried John, as we sat down in a warm corner of the confectioner's opposite.

While little Jack shoveled in the hot oysters, with his eyes shutting up in spite of himself, we looked at him, and thought again of little Rosy-face at home, safe in his warm nest, with mother love watching over him. Nodding towards the ragged, grimy, forlorn little creature, dropping asleep over his supper like a tired baby, I said,

"Can you imagine our Freddy out alone at this hour, trying to work off his papers, because afraid to go home till he has?"

"I'd rather not try," answered brother John, winking hard, as he stroked the little head beside him, which, by the by, looked very like a ragged, yellow door-mat. I think brother John winked hard, but I can't be sure, for I know I did, and for a minute there seemed to be a dozen little newsboys dancing before my eyes.

"There goes our car, and its the last," said John, looking at me.

"Let it go, but don't leave the boy;" and I frowned at John for hinting such a thing.

"Here is his car. Now, my boy, bolt your last oyster, and come on."

"Good night, ma'am; thankee, sir," croaked the gaateful little voice, as the child was caught up in John's strong hands, and set down on the car-step.

With a word to the conductor, and a small business transaction, we left Jack coiled up in a corner, to finish his nap as tranquilly as if it wasn't midnight, and a "knocking round" might not await him at his journey's end.

We didn't mind the storm much, as we plodded home; and when I told the story to Rosy-face next day, his interest quite reconciled me to the sniffs and sneezes of a bad cold.

When busy fathers hurry home at night, I hope they will buy their papers of the smaller boys, who get "shoved back;" the feeble ones who grow hoarse and can't "sing out;" the shabby ones, who evidently have only forgetful Sams to care for them; and the hungry looking ones, who don't get what is "filling." For love of the little sons and daughters, safe at home, say a kind word, buy a paper, even if you don't want it; and never pass by, leave them to sleep forgotten in the streets at midnight, with no pillow but a stone, no coverlid but the pitiless snow, and not even a tender-hearted robin to drop leaves over them.—*Merry's Museum.*

Saved.

I believe the boy came to steal. Why else did he creep into the kitchen window without knocking? Pet was sitting there in one of her thoughtful moods. I could see through the side window, though the luxuriant grape-vine hid me completely from view. At first sight the boy startled me. He was uncouth—he was ugly. Not only that, but his brow was low; and to me his eye was vicious. Some children would have screamed at the sight of such an apparition—Pet did not. Instead, a smile broke over her face like a burst of sunshine.

Nothing human repulsed her. I have shuddered to see her clasp a filthy little creature round the neck. Everybody was "nice" with her; and in her vocabulary "nice" meant good.

But to go back to the rough intruder.

It startled him to see her smile, but in an instant the boy looked ashamed. A flush spread to the purplish swelling under his eyes.

"Is 'oo hungry?" cried Pet, in clear, small, bird-like voice.

A moment after, she emerged from her corner with a lovely rose apple, that filled both her wee hands, and running toward him, her eyes shining—I thought I never had seen so beautiful an expression in a human face,

"Take 'is and 'oo! be nice—'oo is nice; aint 'oo?

The boy looked down at the small blessing; his lips worked a little. Sure am I no sermon would have reached his poor heart as did that little act. He seemed to hesitate.

"Take it," said I cheerfully; "Pet would rather you would eat it, I know. What did you wish when you came? Can I do anything for you?" coming in as I spoke.

The tears stood in his eyes now.

"I don't know as I want anything, ma'am, I—well—I—I—don't know as I need any thing!"

"Have you a home?" I asked.

"A—a—home—that's what I never had."

"Dive him someffin more, mamma," said Pet, pitifully, grieving for the tears.

He looked at her with an almost worshipful glance.

"I have two or three cords of wood that want splitting and piling, down cellar," said I.

"I'll do it," he said, brightening.

I looked at him keenly.

"Can I trust you?" I asked; but I tried to say it with a smile.

"Yes, you may, ma'am; indeed, you may," he said; and then, with a swift motion, jerked his sleeve across his eyes. He told me that he was called Bertie, and I imparted his name to Pet. So every little while she would pat-a-pat to the head of the cellar stairs, and cry out.

"Bertie, is 'oo nice?" then throwing back her little head, and bursting into such silvery peals of laughter; and I laughed softly to myself every time I heard her.

Bertie came next day to finish his job, and his gray eyes grew positively beautiful at the sight of Pet.

"Oh, I love her, ma'am." he exclaimed. "Oh, I'd give anything if I might kiss her, ma'am."

"Pet, Bertie wants to kiss you," I said.

"Is 'oo nice?" laughed Pet, suspending her busy little operations.

"No—no—I aint nice," he said, remorsefully.

She seemed to deliberate a moment, then she said, slowly,

"Well, 'oo must be nice," and came up to him and put up her lips.

He kissed her—made that swift, awkward motion with his sleeve again, and hurried to his work.

My husband became interested in the boy.

"Depend upon it, Hetty," he's a neglected genius, or he never would have shown such sensibility. I'll see about him."

He did see about him to some purpose. He gave him occupation; found him reliable and steady work. The war broke out, and Bertie enlisted—was wounded and came near dying in the hosdital. From that sick bed he returned home refined, spiritnalized. Ah, me! he came home to weep over Fet's still, waxen features.

"Oh, my little salvation!" he cried, with tears of agony; "under God—my little Savior!"

Pet, in her home above, must rejoice if she sees Bertie—now an earnest student in Christ; for this sketch is not all fancy. Bertie will be a shining light, a brand saved from the burning, to minister to the heirs of glory.

As for Pet, do you think I ever wished her back? Never.

My waiting angel—my seraph guide to the gates of Heaven! My one little child that never gave the heart that loved her a single pang! "Of such is the kingdom," and with such my blessed darling is safe forevermore.—*Cleveland Messenger.*

OF the English edition of Smith's Bible Dictionary 2,200 volumes have already been sold in this country and the demand still continues.

NEWS SUMMARY.

PACIFIC COAST ITEMS.

THEY had a first class volcano in successful operation at Gold Hill, Nevada, last week. Clouds of smoke were seen issuing from Mount Butler, and on its summit was found a crater from which the smoke proceeded. To those who were brave enough to draw near the "fiery abyss" and look into its burning depths, vast sheets of flame were visible. Great excitement ensued, and Gold Hill was regarded by its inhabitants as a doomed city, lying as it does, in the very path which the melted lava would be sure to follow when said lava should make its appearance. The discovery that all the excitement was caused by a mass of rubbish set on fire by the Indians in a cave on the mountain, had a pacifying effect on the people, who, although disappointed in their hope of being dug out of a second Herculaneum in future ages, rejoice in the safety of their city.

WE learn, from the Sacramento *Record*, that a nest of tarantulas was found recently in that city by parties engaged in removing some rubbish. Both the discoverers and tarantulas were frightened and left in a hurry; but the latter returned, and a stranger passing about midnight was severely bitten, and will probably not recover. It is also said that Sacramento has produced this season an immense crop of mosquitoes, which, by their ravages, give the citizens of that place the appearance of having suffered from the small pox. This disease has not, however, become prevalent in that city, and the people are hoping to escape its ravages.

IT seems to be a settled thing that Vallejo is to have a grain elevator, although the work progresses very slowly. The *Recorder* gives the following description of the work:

"The main building is to be 85x100 feet on the ground plan. There will be two 14-feet stories for sacking grain and handling shipments in sack. Above these stories will be 50 bins, each 10x20 feet. These bins will be constructed of 2x6 inch lumber, the planks laid flat on each other, and each layer spiked to the next. Above these bins will be the cupola, 40 feet high and 42x100 feet, for weighing and distributing the grain, and occupying the centre of the building. The building will stand on about one thousand piles, averaging 40 feet in length, and will be extended out to a depth of water which will enable the largest class of vessels to lie alongside and receive cargo. The engine will be of 100-horse power. The contract for the entire work will, it is thought, be let in less than a week."

The Salt Lake *Reporter* is informed that the workmen upon Brigham Young's contracts are complaining that the contractor wishes to withhold their money until after the October Conference. They think that he wishes to retain the money until that time, in order to have an opportunity for deducting tithing from the amount due them, and that he is fearful the money, if paid now, will be spent before the tithing is due.

MANY farmers desire to see the practical working of the Steam Plow, but are not able to ascertain at what time and place if will be exhibited. The proprietors would do well to exhibit it regularly on certain days of the week, that farmers from the country may know the time and be present.

THE citizens of Vallejo are about to petition Congress to make that city a port of entry and the terminus of the Central Pacific Railroad. If Vallejo were a few miles nearer San Francisco, and the citizens of Oakland could be induced to give their consent, the petition might be successful.

AT a recent meeting of the Board of Regents, it was decided to erect a wooden building for temporary purposes. The salary of the President was fixed at $6,000 per year, and that of the Professor of Physics at $300 per month.

THE Stockton *Gazette* says that a paper is being circulated among the citizens for subscriptions to a railroad from Stockton to Paradise Valley. It will be the first step toward opening up the rich Tulare region, and will pay from the start.

THE Sonoma County and San Joaquin Valley Agricultural fairs have been held during the past week. In both counties the exhibition has been superior to any previous one.

THE *Daily Morning Chronicle* has made its appearance regularly since September 1st. It seems to meet with a flattering reception by the people.

THE San Jose *Mercury* strongly advocates the building in that city of a large, commodious pavilion, for holding fairs, mass meetings, etc.

THE first rail on the Alameda Railway was laid at San Jose, this week, with speeches and appropriate ceremonies.

HUMBOLDT CITY, 282 miles east of Sacramento was the terminus of the Central Pacific railroad on September 1st.

THE Dutch Flat *Enquirer* says that all the mining claims in that vicinity have suspended operations for the season.

A LINE of stages is to be established between Marysville and Davisville to connect with the railroad.

ONE hundred and sixty ladies are employed by the Women's Co-operative Union in this city.

THE Mechanics' Institute Fair is to close on Saturday, September 12th.

THE Italians of this city have subscribed $9 500 for an Italian Hospital.

A VEIN of stone coal has been discovered near Oroville.

TELEGRAPHIC.

EASTERN.—The Bricklayers of New York have formed a co-operative Building Association....Indian hostilities still continue in Colorado....A Soldiers' and Sailors' National convention will be held in Philadelphia about the first of October....It is thought there will be a September session of Congress....The expenses of the various Custom Houses have been reduced a quarter of a million since July 1st.....The Republicans have carried Vermont by large majorities ....A wall fell in Albany, N. Y., burying a number of women and children in the ruins....Great frauds have been discovered in the Buffalo Post Office.

PERSONAL.—Warrants have been issued for the arrest of Commissioner Rollins and other revenue officers....John Q. Adams is Democratic candidate for Governor of Massachusetts. ....The Secretary of the Interior has been holding a consultation with Southern leaders in Virginia....Geo. H. Pendleton has been stumping the State of Conneticut....Bowden, Conservative Congressman from North Carolina declares for Grant and Colfax....Gen. Rosecrans will not publish any account of his conference with Southern leaders....Sen. Fessenden has been warmly received in Portland, Me., and made a long address....The Chinese Embassy will sail for Europe on Sept. 9.

SOUTHERN.—The Democrats of South Carolina are said to be flattering the negroes with a prospect of winning many of their votes....The Legislature of Tennessee has appointed a committee to wait on the President and ask for help against the rebel organizations which threaten the State. If he refuses assistance, it is said that the militia will be called out. ....The Rebels in Arkansas have commenced hostilities on a small scale....The Govenor of Georgia will issue a proclamation disbanding the armed associations throughout the State....The Louisana Senate has removed from office the Senator from the Second District for fraud in the election, and substituted a mulatto....The rebels in Arkansas have been defeated and the courts reinstated.

In China, the Imperial troops have gained a victory over the rebels by the aid of foreign officers....There is a sensational report of a secret understanding between Gladstone and the Catholic Bishops of Ireland....Bismark's health is still very poor....There is a prospect of an alliance between Prussia and Russia....It is rumored that all English mails will hereafter be forwarded by way of Queenstown....American hay is worth $24 per ton in London. English hay of same quality, $48 per ton....The Sultan visited Admiral Farragut on the 27th ult.....The Allies occupied Humaita on July 25th....A great earthquake occurred at Callao, Peru, Aug. 23d....Garibaldi has resigned his seat in the Italian parliament.

WEEKLY MARKET REPORT.

WEDNESDAY, September 2, 1868.

FLOUR—There is a continued good demand at current rates. We quote jobbing rates as follows: Superfine, in sks, ₱ 196 lbs, $5 25@$5 50; Extra, in sks, $6 25@6 50.

WHEAT—Sales of 1,200 sks fair milling, $1 87½; 600 sks good shipping, $1 93; 460 sks do, $1 95; 150 sks do, $1 90; 330 sks low grade, $1 70; 400 sks choice, $1 97½; also, 20,000 sks shipping, prior to arrival, p. t.

BARLEY—Sales of 450 sks new, in two lots, $2 25; 200 sks do, $2 20 ₱ 100 lbs.

OATS—Sale of 200 sks very poor, $2 27½; good to choice quotable at $2 35@2 60 ₱ 100 lbs.

POTATOES—About 1,000 sks Mission, in lots, 90@95c, chiefly at the latter figure. Carolina are selling at $2 ₱ 100 lbs.

ONIONS—Sale of 100 sks Yellow, in lots, $1 25 ₱ 100 lbs.

CORN—The stock of old is very much reduced and quotations are nominal. Last sale of choice was at $2 75 ₱ 100 pounds.

RYE—New crop is nominal at $1 75@2 ₱ 100 lbs.

BUCKWHEAT—Nominal at $1 62½@$1 75 ₱100 lbs.

BEANS—There is no change to note in prices. We quote jobbing rates for first quality as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; Small White, 8½c; Pink, 6c; and Red, 3c ₱ lb.

BRAN—Moves off freely at $18@$21 ₱ ton.

MIDDLINGS—Fine, $37 50@$40; feed descriptions, $30@$32 50 ₱ ton.

OIL CAKE MEAL—Sells at $30 ₱ ton from the mill.

HAY—The range for ordinary to choice is $10@15 ₱ ton. A small cargo of medium sold at $12.

DAIRY PRODUCTS—Fresh roll Butter is quoted at 45@47½c; a few fancy dairies bring 50c; California pickled, 40@45c, and California firkin, 32½@37½c, with but little doing at the outside figures; Cheese, 14½@17c for California dairies, and 17@18½c ₱ lb for Eastern dairies; Eggs, 57@60c for Hen; a small lot of Duck Eggs sold yesterday at 50@55c ₱ dozen.

PROVISIONS—Following are the jobbing prices: California smoked Bacon 14½@15c; Oregon do, 14@15c; California Hams, 16@17c; a small lot of Oregon Hams sold yesterday at 19c; quotable at 18@19c; California Lard, 13@14½c; Eastern do, 12½@13c½c ₱ lb.

POULTRY—Live Turkeys are to-day quoted at 20@22c ₱ lb; no dressed Turkeys coming into market; Hens, $7 50@$8 50; Roosters, 6@7 50 for large size; spring Chickens, $4@$6; Ducks, $4 50@$6 ₱ doz; Geese, $2@$2 50 ₱ pair; Venison, scarce, 12½c ₱ lb.

WOOL—One of the principal receivers reports sales for the week amounting to 20,000 lbs fall at 13@13½c for clean grades and 10@11c for slightly burry. Receipts are still light. The fall clip will probably meet with good demand, though prices are not yet well established.

HIDES—In consequence of a marked reduction in quotations at New York, as per private telegram published in the Bulletin last Friday, the market here has been somewhat unsettled during the interval. Sales since last Wednesday reach 1,500 California dry at 13@14c. Salted are dull at 7c ₱ lb.

TALLOW—There is apparently a better tone to the market. A few small lots have changed hands during the week at 7¾@8c for choice Beef and Mutton. Sales to the Candle Factory for the week amount to 20,000 lb Beef at 7½c ₱ lb.

San Francisco Cattle Market.

Dealers report the supply and demand well balanced and prices without change from last week.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.
VEAL—8@10c for medium, and 12c ₱ lb for choice.
MUTTON—Is steady at 6@6½c ₱ lb.
LAMB—Steady at 8@9c ₱ lb.
PORK—Undressed, 4@5¾c; dressed, 6½@8c ₱ lb, outside figures for milk or grain fed.

CURRENT TOPICS.

The National Temperance Convention held in Cleveland, was largely attended by representatives of various temperance organizations in the country, and seems to have been useful in its influence. The principal gain from such conventions must always be in the form of stimulus and such comparison of views as shall promote co-operation, and there was much need of this in the temperance cause. Many of the organizations had become more or less jealous of each other, and some of them had failed to make much progress, owing not only to lack of zeal, but also to difference of sentiment touching the best means for promoting the end all have in view. The discussions of the Convention, and the spirit that prevailed in its sessions, must bring all more cordially into fellowship and concert of action, so that we may hope more will be done than in years past. The advance of drunkenness has been fearful in almost every portion of the country, and the evils which attend it have been more multiplied than ever, since the war. There ought to be hearty and uniform effort among all who love the race, and would hold back the tide of death that is making thousands its victims every year; and there is no time to be lost, for the tide is gaining momentum, and compass, and velocity in a ratio that is alarming. There was a time when the lower forms of intemperance (if there are any grades in a vice so essentially ruinous) seemed to be less prevalent, and the danger was thought to threaten fashionable drinkers chiefly. But now, all classes are alike invaded by it, and the contributions to the rushing stream are from the saloons, and even the parlors, of those who reckon themselves of the higher orders, as well as from the cellars and hovels of the confessedly degraded. There is demand for a pronounced public sentiment against the enormous curse, and for the union of all who would remove it.

May it not be possible that the General Council summoned by the Pope will be animated by a different spirit from that which many appear to suppose will pervade it? The Pope himself, if we may judge from the utterances that have proclaimed his views, cannot be expected to suggest in detail any plans that would afford much ground for hope that the Catholic Church may take on some more progressive features. But the subjects he has proposed, may be discussed and acted upon in such a manner as to encourage this hope greatly, and there are leading minds in the Church who will so far apprehend the advantage that this action would give them, that they will hardly hesitate in a Council to express their views. The indications have been many within the last twenty years that Romanism is being awakened somewhat by the spirit of our times. There are many particulars, by no means involving the essential elements of her faith and polity, respecting which a change would add great vigor to her whole organization, and there are many reasons urged by the condition of the Church in every part of the world why this advantage should not be neglected. If the Council shall furnish proof that there is a real purpose of progress, and ability to execute it, among the leaders of the Church, it will do good, for it will force Catholicism toward the common ground of all Christians. If it shall only reaffirm the old positions, and thus prove that it can never advance, it will do good, for it will force Catholicism so far behind all other forms of Christianity that multitudes will abandon it at once. We see no evil that can result from its decisions, and it is not impossible that great good may result.

The Astor Library in New York will remain for ages as a splendid monument in honor of the family whose head in this country was John Jacob Astor. It was a fitting tribute to the city where he amassed his fortune, that he bequeathed so valuable a gift to all classes of her citizens, while his own name could hardly have more frequent and grateful mention than as it is uttered by those who enjoy the magnificent bequest. We had supposed that Mr. Astor confined his expressions of good will for his fellows to the land of his adoption, but are pleased to learn that in his prosperity his native place and the people who knew him in his early days of poverty were not forgotten by him. A most substantial and thoroughly appointed orphan asylum, with an endowment sufficient to provide for all the orphans of his native town in Germany, was erected by him and secured against any possibility of failure during his lifetime; and a Protestant church, built largely by his money, with a clock and bells that were his gift, are the enduring proofs of his liberality. Astor might have done much more with his wealth for the good of the race, but it is pleasing to know that these works of benevolence live after him. In what better way can rich men use their money?

Judaism is certainly assuming some phases in our times that would greatly astonish the Jews of other days, could they know what their descendants believe and teach. The order of B'ni B'rith, or Sons of the Covenant, which is of quite recent origin, is said to number 112 lodges, or divisions, and to be making rapid advance; yet in their National Convention, held in New York a few weeks since, principles were announced and advocated that sound strange indeed, coming from Jewish lips. One of the speakers declared that the expectation of the Messiah, and the restoration of the Jews to Palestine, are no longer tests of orthodoxy, and that they believe in the brotherhood and common destiny of mankind. At the laying of a corner-stone of a hall in Cincinnati, Dr. Lilienthal confirmed these declarations by a still more extended and definite statement of the sentiments adopted by many modern Jews, employing these words: "America is our Palestine; here is our Zion and Jerusalem; Washington and the signers of the glorious Declaration of Independence are our Messiah, and the time when their doctrine will be recognized and carried into effect all over the world is the time so hopefully foretold by our great prophets. When men will live together united in brotherly love, peace, justice, and mutual benevolence, then the Messiah has come indeed, and the Spirit of the Lord will have been revealed to all His creatures." No language could more clearly make known the disintegration which is going on among the Jews, when its author is regarded. It is not Christian, of course, but it is certainly not Jewish, and as a sign of progress, even though it be through the region of infidelity in its first stages, it is worthy of note.

The Regents of the University are giving evidence that they are somewhat alive to the expectations of the public, and perhaps are doing as much as may be wise under the circumstances. The most important thing for them to do now is to elect a President, and it is to be hoped they are aware that much more must be required of one who shall fill that office successfully in California, than would be true in the older States. Here, *the man*, rather than the real importance of that which he represents, must be relied upon, to gain favor with the people; and even a State University well endowed, will fail unless some man shall be at its head who will win the confidence of those who must be its patrons, and awaken a degree of popular enthusiasm respecting advanced education. The President, and all others who shall have the interests of the University in charge, must know how to educate the people as to its advantages, and actually do this, before they will have many students to educate within its halls. There is a much greater preparatory work necessary than to erect buildings, and elect a Faculty, and gather the facilities for thorough culture, for all these may be furnished for a mere handful of young men who shall be thus inspired with the desire for learning. What is needed, therefore, is a President who will be *adapted to California*, as well as able to honor the position by his scholastic attainments; one who will be popular among our people, rather than one who has a "national reputation;" and, if possible, reference should be had in the choice to the wishes of those who are likely to feel the most interest in the University, and to contribute the most students, as well as money, for its prosperity. It will probably be found that it is much easier to invite the right man to be President than it will be to induce him to accept the place, for there are many

very attractive invitations which all such men have opportunity to accept. Still, with proper care and perseverance and wisdom, the right man can be obtained, and no other should be a candidate for the office in any event. Everything now depends on the choice of the Regents, and many true friends of the University are anxiously waiting their action.

Religious Intelligence.

PACIFIC COAST.

Notice.—The Synod of the Pacific will hold its next annual meeting on Thursday, October 1st. Opening sermon by the retiring Moderator, Rev. J. S. McDonald, at 7½ P.M.

John Edwards, Stated Clerk.

The Presbytery of Benicia will hold its next semi-annual meeting in the Two Rocks Presbyterian Church, on the last Friday of September, the exercises to commence with a sermon from the retiring Moderator, Rev. James Woods, at 7½ o'clock, P.M.

A. Fairbairn, Stated Clerk.

Festivals, etc.—A festival was recently given by the ladies of the Congregational church at Dalles, Oregon. The exhibition of pictures by means of a magic lantern added materially to the interest of the occasion. Receipts, clear of expenses, $100.

A festival for the benefit of the Mission Sabbath School at Sacramento was held on the evening of September 2d, in the Assembly Chamber. The proceeds are to be used in the purchase of an organ.

The ladies of the Methodist church of Santa Cruz held a fair on Tuesday and Wednesday of last week, which was liberally attended, and netted $260. Singing, recitations, and readings formed part of the entertainment.

A fair for the benefit of the building fund of the Episcopal church of Santa Barbara was held at the post-office on the 4th inst. We have not yet heard the result, but a large sum was expected, to aid in finishing the building, which has been commenced.

The Sunday Schools of St. Paul's Church, of Virginia, and St. John's Church of Gold Hill, united in their annual picnic on September 2d.

The ladies of both Methodist societies in Stockton held festivals during the week of the Fair, which were well patronized.

A festival in aid of the building fund of the Baptist church of San Rafael will be held on Sept. 15th.

The Sabbath Respected in Woodbridge.—The citizens of Woodbridge have been trying for some time past to close their places of business on Sunday. It appears that they have been more successful than have the citizens of some other towns in the State. Perhaps they have been more in earnest. The *Messenger* says:

Our citizens have great cause for thankfulness and congratulation at the marked appearance for the better which our town presented on Sunday last, in consequence of the fact that all business whatsoever, for the first time in the history of Woodbridge, was entirely suspended on that day. "Some good will yet come out of Nazareth." The day will long be remembered by our citizens, and we believe all will in future aid this great reform thus so happily inaugurated. We trust that not only ourselves will be benefitted, but that other places will follow our example.

Central M. E. Church.—At a recent meeting, the following Trustees were elected for the ensuing year: W. H. Gawley, W. B. Holcombe, J. L. Cullin, J. M. Buffington, E. Burke, and L. Aigelfinger.

Church of Christ.—The annual meeting of this denomination will be held near Stockton, beginning on the 18th inst., and continuing two or three weeks.

A Teacher's Institute.—We learn from the *Mountain Democrat* that a Sunday School Teacher's Institute, for El Dorado County, will be held in the Presbyterian church, Placerville, on Monday and Tuesday, September 14th and 15th. Eminent speakers from Sacramento and San Francisco are expected to address the meetings. All interested in the Sunday School work, especially teachers, throughout the county, are cordially invited to attend. Entertainment will be provided for delegates from Sunday Schools out of town.

Placerville.—A copy of resolutions adopted at a meeting of the congregation of the First Presbyterian Church of Placerville on August 19th, has been sent us, but as the resolutions have been delayed on the way, and have already appeared in other papers, we do not publish them in full. They express the thanks of the congregation for the faithful and earnest manner in which the pastor, Rev. J. R. Hammond, has performed his duties since his connection with the church, the regret that he is obliged, by ill health, to be temporarily absent from the church, and the hope that he may be speedily restored to health and "that his work in the future may be blessed of the Redeemer as it has been in the past."

Marysville Churches.—A Marysville correspondent of the Portland *Oregonian* writes as follows: "Marysville has seven Protestant churches and one Catholic church. The churches are pretty well supported, and the interest in religious matters, I believe is on the increase. Rev. Dr. McKaig, recently of Cincinnati, is pastor of the Presbyterian Church. He is a gentleman of more than average ability—his discourses are highly spoken of by all who have had the pleasure of attending his ministrations. His Fourth of July oration was an eloquent and learned production. Marysville may well be proud of one so highly gifted."

Mechanics' Institute Fair.—The managers have given one-half of the proceeds of the Fair during the greater part of the past week to the various charitable and benevolent societies of this city. The Fair has been successful beyond the expectation of all, and the managers show a commendable spirit in sharing their gains with our Benevolent Associations and Asylums.

Bible Union.—A meeting was held last week at the First Baptist Church, for the purpose of forming a California branch of the American Bible Union. The organization was effected by the adoption of a constitution and by-laws. C. V. Gray was chosen President, Rev. C. A. Buckbee Secretary, and Rev. C. R. Hendrickson Delegate to the meeting of the Union in New York on the 18th of October.

Sabbath School.—Blackboard exercises of various kinds have been introduced by the pastor in the Sunday School of the First Baptist Church, in this city. It is said that these exercises prove an efficient means of interesting and instructing the pupils. Other schools will adopt the custom when its usefulness shall be completely proved.

Ministerial Union.—This association met on Monday, Sept. 7th, at the house of Rev. E. C. Bissell.

Benevolent Association.—The Howard Benevolent Association appeals to the citizens of Sacramento for contributions to its treasury. An institution which has accomplished so great a work of charity in the past, should not be suffered to become less effective through a want of means.

Watsonville.—On Sunday, 31st. ult., five additions were made to the Presbyterian church in this place. The day before two Ruling Elders were elected, and it is expected that in a short time two or three more will be chosen.

Sacramento.—The ladies of Grace Church are engaged in improving the appearance of the interior of the church. The building is to be renovated throughout, but the whole of the work proposed will not be completed this season.

Church Organized.—A Baptist Church was organized at San Rafael on Tuesday evening, Sept. 8th, at the school house. Addresses were made by Drs. Thomas and Hendrickson, and other prominent Baptist clergymen.

Catholic Church.—A man at Milpitas, Santa Clara County, has given 15 acres of land for the use of a Catholic church, and an attempt is to be made immediately to raise money for the erection of a building.

Santa Barbara.—The new Episcopal church has been commenced, and the walls are already completed. It is hoped that sufficient funds will be raised to ensure its completion at an early day.

The General Association of the Congregational Churches of California, says the *Pacific*, will commence its session at Oakland, in Rev. Dr. Mooar's church, on October 7th.

Burglars.—The convent at Vancouver was recently broken into by burglars for the purpose of robbery, but they succeeded in carrying off nothing of value.

Camp Meeting.—The Conference Camp-meeting of the M. E. Church has commenced on the old grounds between Santa Clara and San Jose.

Portland.—The annual convocation of the Episcopal Churches of Oregon met at Portland, August 31st.

Salem.—A new church building is being erected at South Salem by the Methodists.

EASTERN.

The attention of the Stated Clerks of the several Presbyteries is called to the following facts;—

1. The Report of the Special Committee of Nine was unanimously adopted by the General Assembly.
2. The adoption of this Report included an approval of the Report of the Special Committee of Fifteen on Reunion; and required the Basis of Reunion, recommended by the Joint Committe of Thirty, and mutually approved by the two General Assemblies of 1868, to be sent down as an overture to the Presbyteries.
3. The proposal for an amendment of the First Article in this Basis, submitted by the Albany Assembly, not having been adopted by our Assembly, constitutes no part of the Overture, and is not to be submitted to the Presbyteries.
4. The subsequent action of the Albany Assembly, in respect to the interpretation to be given to the Basis, not having been adopted by our Assembly, is without binding force, and has nothing whatever to do with the Overture itself.
5. It is made the duty of the Stated Clerks of the several Presbyteries, to lay this action of the General Assembly before their respective Presbyte-

ries for their consideration, and, previously to the meeting of the next General Assembly, to forward to the Stated Clerk of the Assembly a duly authenticated report of the result.

The following is respectfully submitted as a correct and appropriate *form* in which to bring the *overture on reunion* before the Presbyteries:—

"Does this Presbytery approve of, and give their consent to, the Reunion of the two Branches of the Presbyterian Church in the United States of America, on the Basis proposed by the Joint Committee of Thirty, and approved by the two General Assemblies, meeting in May, 1868, respectively, at Albany, N. Y., and Harrisburg, Pa.?"

By order of the General Assembly,

EDWIN F. HATFIELD, Stated Clerk.

NEW YORK, July 15, 1868. —*Evangelist.*

ABDUCTION AGAIN.—Mary Ann Smith, the young Methodist girl who was abducted by the Catholics, has been remanded to the custody of the "Mother Superior" of a Magdalen Convent in New York, by one of our New York judges, elected by the Catholics of the city. What a curse is an elective judiciary!

In the case of young Montana, in 1849,—a Jewish boy clandestinely baptized by a Catholic servant girl —the Papists claimed him and took him in spite of his parents. It was claimed that he preferred to be a Christian, and that his rights of conscience and of choice must be respected, though he was but eight years old. But in this Protestant, land the constitution of which now forbids any one from being deprived of liberty except for crime, a girl of sixteen who has for years been her own mistress, is shut up in a Catholic Bastile by law, for becoming a Methodist, and refusing to renounce her "heresy." But the case is appealed, and will be argued next winter in Albany. Meanwhile, the poor girl is obliged to attend mass, and worship the Virgin, and cross herself, all of which she despises, and is liable to be poisoned too, before her case is finally decided.—*Zion's Herald.*

TRUTH STRANGER THAN FICTION.—In a pleasant but small Connecticut village the Methodists have lately laid the corner-stone of a church edifice, to which the following pleasant story attaches: The ground for church and parsonage was given by a Presbyterian gentleman who desired a church there; and there being a few Presbyterians, he was willing to aid in the erection of a M. E. church. The offer of the lot was first made twelve years ago, and a pious old lady, who believed that a church ought to be built there, induced him to renew the offer every year. At last the feeble society resolved to build, and determined, if possible, to erect a stone church. Just as they were about to renounce the idea on account of the expense, it was proposed to examine the ground, and instantly the search was rewarded by the discovery of a quarry of Conneticut blue-stone of first quality. Digging a little further a sand for mortar was found, and while these explorations were being made, to supplement the material, water, in quality unlimited, bubbled up.—*Advance.*

CAMP MEETINGS.—The Methodist brethen are great on camp-meetings; but it is very questionable as to the good they do overbalancing the evil. The *Methodist*, one of ablest papers among the able ones of the church, speaking of this says: "Our camp-meetings have been marred, and the good done by them thrown into doubt, by the Sabbath-breaking which they occasion. The Reading Railroad ran Sunday excursion trains, and carried thousands of passengers to the ground at Manheim, and at the Long Island Camp-meeting it was discovered, late on Sabbath, that huckstering had been going on within the precincts under the control of the Committee, as on a secular day. Are Methodists, who profess to be devout Christians, about to become notorious as Sabbath-breakers?"

OPPOSED TO UNION.—Rev. W. L. Breckenridge, D.D., is violently opposed to union with the New School brethren. In a late number of the *Western Presbyterian* he writes a communication, which is virtually a declaration of war and secession in the event of reunion. He says: "The honest and hopeful way to oppose it is for all who are truly against it to plant themselves on open and absolute refusal to unite with the New School as a body, on any basis whatever, though welcoming all suitable persons who wish to come to us from them.

DEATH IN THE PULPIT.—Rev. David E. Palmer, Presbyterian pastor at Timber Ridge, Tenn., died suddenly on Monday, July 13th. He stopped in the middle of his sermon on the Sunday previous, and requested the congregation to sing a hymn while he rested a moment. During the singing he was observed to lie down in the pulpit, and on reaching him his friends found him speechless.—*Zion's Herald.*

INTERESTING FACTS.—There are more Methodists in Ohio than in any other state, more Baptists in Georgia, more Presbyterians in Pennsylvania, more Congregationalists in Massachusetts, more Protestant Episcopalians in New York, and ten times more Unitarians in Massachusetts than in any other state.—*American Presbyterian.*

QUERY OF A POOR MINISTER'S WIFE.—When the minister's salary is fifteen hundred dollars, and a thousand are paid for music—the members of the choir having renumerative employment during the week—is that a judicious and equitable apportionment of the money raised for parochial expenses?

NOT INVITED.—Simon Bundich, a colored preacher of Brooklyn, N. Y., has published a card stating that the Association lately had a dinner in Brooklyn, but refused to receive the colored members at the table.

DARTMOUTH.—Donations to the amount of $175,000 have been made to Dartmouth College within the past four years, in addition to the $80,000 given by the State for the Agricultural Department.

BROKEN DOWN.—Thirteen periodicals of the Southern Baptist Church have broken down within two years, for want of patronage. So says the *Religious Herald* (Baptist).

FOREIGN.

ASPINWALL.—The *Churchman* states that the Rev. Henry Tullidge, late of Boston, Mass., has charge at present of the church built at Aspinwall by the railroad corporation. The structure, which is of cut stone, with a floor of marble, is of great beauty. It was erected at a cost of $10,000. The church services are attended, on an average, by 70 persons. Mr. Tullidge has inaugurated a school—the only one in Aspinwall—which numbers not far from forty pupils, including both white and colored children.

UNION IS STRENGTH.—There is a Tract Society in Stirling, Scotland, consisting of one man only. His name is Peter Drummond. He is a seedsman, and about twenty years ago he began to publish tracts, and he has put into circulation about *fifty millions.*

AN OUTPOST.—The Rev. Dr. Charteris, of Glasgow, Scotland, has been appointed by the Committee of the Foreign Correspondence of the Established Church of Scotland to proceed to Dresden to originate a Presbyterian church there.—*Evangelist.*

REV. JOSEPH K. GREENE, Congregational missionary of the American Board at Brousa, in Turkey, is obliged to return to this country, on account of feeble health, and will probably arrive by August 1st.

Young Ladies' Seminary, Benicia.

The next term of this well known Institution will commence

WEDNESDAY, JULY 29, 1868.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Biography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Children's Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All such are requested to call and examine the publications of the Presbyterian Board at the Depository for the Pacific Coast, which has been established at the store of

Correspondence.

To California by the Overland Route.—No. 4.

Leaving Fort Bridger, with its picturesque scenery and its innumerable mosquitoes, at an early hour in the evening, we continued our journey at a rapid rate—the stages generally proceed more expeditiously during the night—until it was past midnight, comforting ourselves amid our fatigue with the reflection that in another day we should enjoy a sufficient rest.

At about one o'clock, A.M., we were informed that a sudden rise in the Bear River had carried away the bridge by which we were to cross, so that we should have to ford the stream, and as the driver thought it hardly safe to attempt this at night, we were obliged to delay for a few hours. This accident we could not but regard as a blessing in disguise, as it afforded us an opportunity of having a much better sleep than we had enjoyed for several nights. Accordingly when we had stopped I first made a benevolent but useless effort to convince some of my sleeping fellow passengers, whom it was impossible to restore to any condition of consciousness, of the advantages of taking a bed in a house near by, and then hastened myself to improve the opportunity of sleeping again in horizontal position; my efforts during the previous portion of the night had fully demonstrated to my mind the impracticability of my sleeping on the middle seat of the coach, under the ordinary condition of things. Probably the greatest inconveniences of overland travel are the deprivation of sleep and the irregularity of meals. During the week we had breakfast at different hours from 3 to 11 A. M., dinner from 11 A. M. to 5 P. M. and supper from 5 to 10½ P. M. Sometimes 3 hours between meals, sometimes 11 or 12! In such circumstances it is best—for an obvious reason—to inquire while eating, when it is likely that the opportuniny of eating again will occur, a habit which the force of circumstances has a tendency to develop.

When we were again on the way we were gratified to notice the marked improvement in the general appearance of the country from what it had been on the foregoing day. Although the ground was still covered to some extent with sage-brush and grease wood there were also other varieties of shrubs and an abundance of grass; we had left behind us for the time the wastes of sand and the wearisome plains of yesterday. Our interest naturally increased also as we come nearer to the country of the Mormons and when at breakfast, the reception of our change in Salt Lake currency brought this fact home to our minds that we were actually *in* Mormondom, we were prepared to observe with greater attention all that was to be seen of this strange people. The peculiar institutions of the "Latter Day Saints" became early in the day, the subject of an animated discussion among the passengers of our stage coach excepting the lady who occupied the seat just behind myself, who did not seem disposed to take part in our deliberations and maintained generally an entire silence. For the sake of the argument the gentleman who shared with me the discomforts of the middle seat advanced the opinion that there was scripture sanction for the practice of polygamy since David was a polygamist and was said to have been a man after God's own heart, which view seemed to have force with some present until it was shown that while in other respects David was approved of God it was not in respect of his having many wives, by any means, that he was a man after God's own heart but very far from it, the practice being condemned by the example of Him who made man from the beginning of the creation male and female, and by the teachings of the Savior. A feeble plea for *liberality* as to the religious opinions of those who differed from us put forward meekly at this point by the reticent lady in the back part of the coach and addressed to us generally, received an instantaneous reply from the young bride on the front seat, who showed quickly and feelingly that such a thing as the toleration of another wife besides herself was something wholly repulsive to the instincts of a true woman, and my young friend on the back seat declared, that, *for his part* he *might* have some consideration for a man who was a Mormon, but for a woman who adhered to such an offensive degrading loathsome system, he *could not possibly* entertain the *least* respect, a deliverance which seemed to express the general conclusion arrived at by our debate, and could not have been very gratifying to the quiet lady, who proved to be a veritable "Latter Day Saint."

While engaged in this discussion we were introduced into the further end of Echo cañon and the interest of the exterior prevented the resumption during the day of moral topics. As we passed through this famed cañon, which has an average width of from two to three hundred yards and is traversed by a beautiful stream, we had on our left, at some little distance, a range of high, barren hills; on our right there arose a bare wall of brown rock, conglomerate and sandstone, apparently, reaching at some points to a great hight, inclined in some places toward the valley beneath, hollowed here and there in caves and grottoes and carved by the hand of Nature in the greatest possible variety of grotesque forms, so that any ordinary imagination could make of them rostra and benches, and amphitheatres. From the fissures and the base of this rocky wall there flowed numerous springs of cool and sparkling water. As an evidence of present enterprise, we found here a large band of Mormons engaged in grading the Union Pacific Railroad, which traverses the entire cañon. Our attention was also directed more than once to the remains of the breastworks with which, in former years, the Mormons had fortified the place, and from behind which these resolute followers of a new faith had hoped, in case of an emergency, to defend their liberties from the invasion of an uncharitable Government.

While wondering at the innumerable objects of interest that thronged everywhere upon our observation, we noticed far up in the air some small white specks, floating like flakes of snow or downy feathers. At first I took them for seeds of plants—as of the thistle—borne by the wind. They were so far up in the sky, and they sailed along in such a manner, that I did not, for sometime, think of their being grasshoppers. But such they were, and as we advanced they presented themselves in such numbers that they had, at least, the appearance of an immense swarm of bees, and by the density of their masses, actually made it difficult to clearly see the rocks within a few rods of the coach. The trees were as bare of leaves as if a fire swept through the valley, and it was easy to see that all human skill would be powerless to avert such a scourge as this destructive insect. As mountain and cañon scenery was the great feature of this day's travel, I conclude this letter with a brief description of what we saw in Parley's cañon, by which we made the passage of the mountains just East of Salt Lake city in the evening. We had stopped at the last station beyond, and it was about 7 o'clock P. M., when we entered the defile from the east. At its bottom the gorge was not more that fifty feet wide, and in this limited space a splendid mountain stream and Wells Fargo and Co.'s stage road are continually disputing each other's right of possession, and encroaching on each other's domain. As we progressed, the stream was one continued rapid, with an average depth of twelve feet and a depth of three, foaming and dashing down in the finest possible style; laughing over its riffles, shouting over its cascades, roaring over its falls, rejoicing in its irresistible strength, perfectly willing to be charitable to all opposing obstructions, because sure of its power to circumvent or override them. What a splendid stream it was; all vivacity, action and life; the emblem of an active nature which knows no rest except that of the grave, this stream finds its repose only amid the peaceful waters of the distant lake. Hanging over this grand mountain torrent are lofty summits, rising in lines almost perpendicular or in terrace upon terrace, to a dizzy hight. Immediately upon this stream, on that side which is not occupied by the road, rises an abrupt wall of rock varying from 150 to 300 feet in hight, sparsely covered with clinging shrubs and wild vines. Back of this is every variety of mountain scenery, domes, pinnacles and towers, bare rocks of granite, gray in the moonlight, shining like icebergs and drawn in lines as sharp, and lofty cones of snow-clad peaks, radiant in their soft and immaculate drapery; and through all this delightful variety we go whirling along, entranced in an ecstacy of admiration. With the exception of the silent lady, who has not been in a good humor since morning, we are all in raptures; and now we are about to make our exit from the cañon, and, as we pass out, there is on our left a majestic tower of rock, bare and alone, rising hundreds of feet, apparently, and standing as the grand sentinel of enchanted ground, guarding the gateway to this pleasant vale, while the sleeping champions of strength, mountains and rocks, repose in every attitude behind him; and just then the full-orbed moon rises upon the crest of the highest mountain-summit and casts the shadow of this castle-rock across the dark portal, from which we have even now emerged, mingling forest and rock, mountains and valley, light and darkness, while the scene grows dim to our eyes and the noise of the water becomes familiar upon the ear, and one of Nature's finest exhibitions is past.

In less than an hour we were in Salt Lake City, and at rest. W. R.

Letter from Santa Cruz County.

Watsonville, Sept. 7th, 1868.

Of course you know where our Pajaro Valley is, but unless you have seen it, you cannot know what it is—one of California's jewels nestling down here between the mountains and the sea, fast filling with thrift and its attendant wealth.

This valley is as healthy as it is beautiful and productive. We have people who came here confirmed invalids, and, after a residence of a few months, were in the enjoyment of good health. The climate is adapted to all constitutions, except those having a consumptive or an asthmatic tendency.

The agricultural district here is about ten miles square, with Watsonville in the centre, on the north bank of the Pajaro River, which is here spanned by a good bridge. The crops throughout the entire valley are excellent. Fruit is abundant. I have seen peaches as large and as well flavored as any I saw last season in Santa Clara Valley, and I see

no reason why the hardier class of grapes might not be cultivated successfully here. Fogs we have, but not so much as along the coast north of Santa Cruz.

Watsonville has some two thousand inhabitants, with the usual supply of hotels, stores, and *grog* shops. Of the latter we are cursed with sixteen, and we dare not hope for any diminution in this fiery stream—at least, until after the election, as politics and whiskey seem to be partners for life. But you must not think us the worst people in the world. To offset this machinery of Satan we have one M. E. church of some 70 members; one small organization of Methodist South; one (still smaller) of Baptists; one of the Episcopal persuasion; one Roman Catholic, one Mormon, and one Presbyterian church. Added to these six religious bodies, we have one Lodge of Good Templars, one Division of Sons and Daughters of Temperance, one Masonic lodge, and a large lodge of Odd Fellows. Of the churches, but three have church edifices: the Methodists, the Papists, and Presbyterians, and these three are the only churches having regular services.

The Presbyterians have a neat church, are out of debt, and are now engaged in an effort to secure a fine property adjoining their church, for a parsonage. For nearly a year they were without a pastor, but continued their Sabbath School. Since the beginning of the present year a prayer-meeting has been kept up. The Sabbath School has nearly doubled in numbers—now having on its roll 136 scholars, 16 teachers, and 4 officers. During this time eight additions have been made to the membership of the church and two Ruling Elders elected and installed.

The attendance on our public worship is very good, and, for California, quite regular. At the beginning of the present pastor's labors, the "free system" was adopted, and seems to work well, the plates being passed both morning and evening.

The crying need of our church and our whole town is a genuine revival of religion—one which which will shake this place down to the "bed-rock." This is our hope, and for it we are working and praying.

Watsonville has a quiet, pleasant, upward look, and is slowly but surely rising in enterprise, morals, and education. We have a large and overflowing public school. "Pajaro Institute," now in the second term, is flourishing also, and the Principal, Prof. Van Doren, has rented additional buildings, and has now the prospect of building up a fine school. C. J. A.

PRINTER,

Commercial Street, opposite Miners' Restaurant.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

STEAMERS FOR SEPTEMBER, 1868.

The following Steamships will be dispatched on dates as given below.

September 5th—GOLDEN CITY, Capt. E. S. Farnsworth, connecting with ALASKA, Capt. Gray.

Sept. 14th—SACRAMENTO, Captain Parker, connecting with OCEAN QUEEN, Capt. King.

Sept. 22d—MONTANA, Capt. Cavarly, connecting with HENRY CHAUNCEY, Captain Connor.

Sept. 30th—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship GREAT REPUBLIC, Captain Doane, will be dispatched on Saturday, October 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address
REV. P. V. VEEDER.

The Occident.

San Francisco, Saturday, September 12, 1868.

THE KEPT TREASURE.

There is more than Christians will be able to comprehend on earth, in the expression of Paul, "I am persuaded that He is able to keep that which I have committed unto Him, against that day." Little do those who are faithful in any station, serving their Master, imagine that they are accumulating wealth that will be enjoyed by them in the skies. That not alone will their souls be saved, but they will enter into the possession of all that God has laid up for them from the contributions into His hand of a lifetime of fidelity. There they will find safely preserved the gain of trial, the rewards of obedience, the bliss of conquest over evil, the treasures of knowledge, none of which has been lost, and the title to which can never be alienated, though they will be amazed to see how great are their riches. Indeed, we forget a large part of what, at the time, it gave us joy to recognize as the fruit of our labor or endurance, whether seen in ourselves or in others. But in Heaven memory will be unclouded respecting all we have done that can make us happy in the review, and the blessed aggregate will be before us. It is said that in some parts of Britain, when excavations have been made by which the surface has been removed, the mosaic pavements laid by the Romans when they possessed the land, ages ago, are found in all the perfection of their first beauty. They were covered, but not destroyed, and when exhumed speak of what had long since been forgotten. So will memory clear away the rubbish that years gather over what God is not willing shall perish in a good man's life, and none will be more astonished than he himself, at what shall be thus disclosed.

Moreover, it is not designed that we shall have a large portion of what God will permit us to enjoy as the fruit of our holy living, in this world. There is to be but little *time* for us to enjoy it here, and therefore He stores it up for us, and we shall find it all when eternity shall be before us, in which to possess it. Our life on earth is much like the century plant, that demands care, and culture, and supply, during its long growth, with but little return, comparatively, until the end, though enough to repay, at the time, all its costs; but bursts, at last, into such a wealth of beauty as charms all who behold it. This beauty is the result, not of the last days of cultivation, but of the long course of patient work. Heaven is our place to bloom, but we are ever contributing to the luxuriance of the flower by the faithful, humble, earnest lives we pass on earth. And will it not excite the praises of all the blest dwellers in that world, as they shall witness the surprise of many a saint, when he is made conscious of all God has been keeping for him! He forgets, he undervalues, even, what he remembers; he disavows what his Master intends to credit him; he comes up to his home, feeling that he has been saved only by grace, and that so as by fire, and hopes for no more than the privilege of taking some lowly place, where he may see his Savior, and unite with the mighty throng in His praise. But he cannot be hid. There has been too much garnered up for him to allow his humility to deprive him of its appreciation and enjoyment. He learns, what with all his experience of it before, he never knew, the *riches* of grace. He knows now the value of faithful living, in any station, and receives with gratitude and joy, all that has been laid up for him during those years of sincere, though imperfect, devotion to the Lord Jesus.

Surely, with such a prospect, one may escape the charge of folly who strives to live so that God may gather something from the results of life that shall be worth preserving. No one should be unmindful how solemnly—it may be how gloriously—this life may bear on that which is to come. The eager multitudes around us try in many ways to disprove the wisdom of such living. They anxiously press every power into service, in quest of treasure, but every taxed nerve, and muscle, and faculty, cries out, "Do not talk to us about a treasure in Heaven, that shall be kept for us, that shall abide forever! Give us gold! Give us pleasure! Give us fame! Give us anything that we call success for this life! What care we for the next?"

Nevertheless, let the wise man hold on his way. There is another world, and it is not far from every one of us. To be rich there will be infinitely more important than to have gain here. Give something, day by day, into the hands of God, to be *kept* for you, for eternal wealth is priceless.

A HISTORY OF EIGHTEEN YEARS.

The celebration, by the Society of Pioneers, of the 17th anniversary of the admission of California into the Union, arrests the attention of all our citizens who really deserve to be so regarded. There are many persons among us who never think about the progress of the State, as there have been, from the beginning, those who have contributed largely to its wonderful history, yet cared only to fill their coffers with gold which might be carried with them to some other home. These persons feel no interest in anything of a public nature, unless it may be made of advantage to themselves, and a recital of what has been accomplished on the Pacific Coast within eighteen years could be given in no rhetoric that would have any charms for them, except the rhetoric of their balance-sheets. The number of those who must be so regarded, however, is diminishing rapidly, and a larger proportion of Californians than ever before are now affected by more or less of State pride, and the enthusiasm which the most remarkable history that has ever been chronicled may well excite. The particulars of advance from that rude condition of affairs in the midst of which the foundations of the grand edifice we are rearing was laid, are so familiar to most of our people that we need not repeat them. We do not care to boast of the change, but allude to it for the purpose of impressing all who may be so affected with a conviction of the obligations that attach to a residence in such a land. The past is rightly interpreted only as it is made prophetic of the future. What has been done is made valuable in proportion as this is built into the superstructure that is to be. This superstructure will not rise before the vision of those who merely long to see it, or who believe it will be reared; but it will reward the anxiety and toil of those who shall take their places on the walls, and work patiently, and hopefully, and well for the achievement of the end. In political, and social, and religious affairs, there will be demands on the people of California who expect to make this their home during the next eighteen years, even more urgent and important than any that were imposed on the honored men who have thus far conducted these affairs. And if men shall be found equal to these demands, the results, as bearing on the welfare of the race, can hardly be estimated.

The Old Paths.

I am a plain old man, quite unassuming, and as such I would like to say a few things through your paper, to those who may not decline to read, after such an introduction. You know, as a general rule, old people are attached to the old paths, and I find myself being drawn pretty strongly in that direction, in many respects; perhaps in nothing more than in favoring old fashioned Christianity in its simplicity—something as it was at the time when it could be truthfully said, "And to the poor the Gospel is preached." I am not a Quaker, nor exactly a Methodist, yet from my boyhood I liked to see a Quaker hat and a Methodist coat (when worn by those who accompanied them with a cheerful face). It afforded some evidence that *they* were not ashamed of their colors. Now, I do not like to find fault, but what shall we say of those professors of Christianity in our times who ride upon the topmost wave of fashion and worldly pleasure, and yet pass for the followers of Him who hath said; "Ye are not of the world, even as I am not of the world."

Previous to coming to this city, I was for more than forty years a member of a flourishing Christian church—a church that exerted an influence outside, without compromising with the world, yet that church did not tolerate theatre-going, nor the dance. Here, these things are frequent among church members. Twice within a few months, have I seen professing Christians engage in the same whirling dance, that is practiced in the licensed dance-houses.

Now, if this is the service of the living God, where shall we look for the service of Baal?

In reference to another matter, shall I give you a peep into the interior of my mother's factory, as it was in the year 1800, a few years before, and a few after? This was before the day of our country carding-machines. Our wool and flax were brought into the house, from our little New England farm, and never left it until they went out upon the backs of the children. My mother had nine operatives, of different ages, but not a drone in the hive. These were made busy with the little picking machines, the hand-carding, the spinning-wheel, the loom, and the dye-tub in the chimney-corner. The fabric issued was quite good—as good, at least, as our neighbors had. But perhaps I ought to admit that it would not well compare with the fine array of San Francisco woolen goods, as exhibited at the Mechanics' Fair. You may well imagine that my mother's time was much taken up in her daily duties; yet she had plenty of leisure to teach her little ones the way to Heaven, and to pray with them that they might enter this way. And such teaching! Such prayers!

What of the result? We verily believe those children all gave their hearts to the Savior, either in early childhood, or in youth. The nine all reared families, and a large proportion of those families were pious.

Here, perhaps, I should draw the vail. May a gracious God have mercy upon the rising and *motherless* generation, and in answer to the prayers of a long line of pious ancestry, at least save some of them!

Old Farmer.

Union.

There are some things passing strange in our union movement. Do our churches wish to unite in one body just as they are? There is not a minister, elder, or deacon in either body who has not publicly and before God solemnly accepted and adopted the Confession of Faith. The matter of creed,

then, is all settled. But some, the objector says, have peculiar views of the Confession of Faith. The New School believe that, though man has no spiritual ability, no real power to perform a spiritual act, without Divine aid, still he has a natural ability which begets responsibility, and may be urged in enforcing obligation.

They believe Christ's sufferings are vicarious; that he died intending to save only the elect; but he so died for all men that we may freely, honestly offer salvation to all men, and whoever will believe shall be saved. Do the Old School desire to take the New School, with these and like peculiarities, into one body with themselves?

Do the New School wish to unite with the Old School with their backs up against every seeming heresy, and a wide-awake look into every nook and corner to see if it cannot be found?

Some of them, also, holding to an atonement so limited that they dare not offer Christ to sinners except in a most general way, lest they offer Him to some for whom Christ did not die. Nor dare they urge any sinner to repent, knowing he cannot repent without Divine aid. Nor dare they pray for any individual sinner, lest they pray for one who is not elect.

Do they wish to unite with a body outnumbering their own and containing such material unrebuked—so blue with orthodoxy, some of them, as to materially tinge everything around them.

There is but one material question to settle in this matter. Do we wish to unite just as we are? That is the question. For either body to expect to change the other by legislation is futile in the extreme.

The same is true with the Psalmodist churches. If they hope to persuade us to abandon our sweet hymns, their hope is vain. The only question is one of liberty. Sing what you please, brethren, and allow us the same privilege. This point conceded, we may unite. Never otherwise. A few churches might be persuaded to adopt the exclusive use of some version of the Psalms of David, but with the mass of the churches that is impossible. No conscience can be produced in the Presbyterian Church on this point, and all such conscience is gradually but surely passing away from the Psalmody churches. Their men of great heart and head are breaking from these trammels, followed by many good people. Probably there are very few men in any of those churches who would refuse a desirable call from a Presbyterian church on account of the hymns. If this is so, the time of our union with them is not far distant. It may be necessary that a few more of the fathers fall asleep first, but the signs of the times are sure. Christ's prayer that "they may be one," will ere long be answered in the Presbyterian Church.

S.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. San Francisco, Cal.

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

THE OCCIDENT

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of PRACTICAL AND SCIENTIFIC.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance THE OCCIDENT *is acknowledged to have no equal on the Pacific Coast.*

THE OCCIDENT

Is edited by REV. JAS. EELLS, D.D., of the First Presbyterian Church, San Francisco—formerly of the Church on the Heights, Brooklyn; and Rev. E. B. WALSWORTH, D.D., of Oakland, as Associate.

It is the aim of the Editors and Publishers to make THE OCCIDENT, in every respect a first class paper, and one that will be WELCOME IN EVERY FAMILY.

A year's subscription to THE OCCIDENT *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

TERMS.—$4 00 a year, in advance; $2 50 for six months.

To Advertisers,

A first class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the VERY BEST MEDIUM for bringing their business before the public.

Direct all communications to "THE OCCIDENT, care of Bancroft & Co., San Francisco."

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,

596 Broadway, New York; 154 Fremont St., Boston.

Current Literature.

Essays, Political and Miscellaneous.

Two volumes of essays, by Bernard Cracroft, M.A. of Trinity College, Cambridge, have been published by J. B. Lippincott & Co., Philadelphia. These essays are reprinted from the leading English periodicals in which they originally appeared, and treat of a great variety of subjects, political and miscellaneous. The author is an earnest advocate of the Reform movement, radically Liberal in his tendencies, a zealous friend of Gladstone, and not an admirer of D'Israeli. He treats modern English politics in an able manner, and the partizan spirit which to some extent is apparent in his writing, gives at least life and vigor to his style.

Cracroft enters boldly into the field of criticism, and freely expresses his opinions concerning the works of various authors, on all sorts of subjects, literary and scientific, with some of which subjects he claims no practical acquaintance. He justifies his pretention to criticise writers, acknowledged to be his superiors in their respective departments of literature and science, as follows:

A tea-taster may be absolutely ignorant of the processes involved in tea-growing, but as a tea-taster he will certainly beat the large average of tea-growers. A man may spend ten years in learning to play the fiddle very badly, and a girl of ten may tell him how badly he plays, and tell him, too, the very things that are disagreeable in his playing—things which escape his notice because he has become hackneyed to them in the daily and encaustic practice of his own defects.

And so it is with authors and scholars, poets and novelists. The very fact of their having been absorbed in the details of production, unfits them for the appraisal of their own work. Who can look into his own eyes?

The article on the Jews in western Europe is one of the very best that have been written on the subject. The miscellaneous essays on such subjects as "Magnanimity," "Work," "Praise," "Jealousy," "Vanity," "Cruelty," "The talent of looking like a fool with propriety," &c., are admirably written and well repay perusal. The book may be found at Bancroft's. We take the following from the essay on "Manners:"

But there is a crop of eccentricities and anomalies in second-rate English manners, which are very curious, and sometimes very distressing, and which seem to be totally indigenous. The chiefest is rather a positive defect than an eccentricity, and that is the almost total absence of any manifestation of a desire to please. In this respect foreigners have an unquestionable superiority. A well-bred foreigner will go and sit by another person without familiarity or assumption, and yet with an indefinable air over his whole being expressive of a desire to please that person. He does not look self-satisfied—he does not look busy, nor anxious, nor important—he does it without fuss, and with a certain reserve. Perhaps he looks grave, or perhaps there is the twilight of a smile, but in all cases his whole attitude seems to say, "I am glad to have met you. What topic can we discover most pleasing to yourself? And if we cannot discover anything very wonderful, still it is a pleasure to sit in your company for a few minutes." Curiously connected with the characteristically English absence of a desire to please for its own sake, as an essential part of high-breeding, is the straage infatuation of a large part of the younger generation to affect an air of indifference, varied only by fits of smirking, giggling, and flirtation, and the use of slang phrases, which supply the place of pleasant intercourse, between young people who would have enough to say, and could amuse each other much better by saying it, if they were not afflicted with the mania for being thought witty, and the dread of ever being thought in earnest. Thus, the young men of the present day seem to labor hard to be thought empty puppies, and the young women empty puppets. "*Celui qui court apres l'esprit, attrappe, la sottise.*" Doubtless we owe this in a great measure to the halo of cant with which the Puritan party have contrived to invest the idea of earnestness. Yet if we look for the distinctive feature of the best manner in foreigners, whom we twit with levity, it is precisely its pervading earnestness. And it cannot be denied that the last and most beautiful touch, the ideal varnish of perfect high-breeding, is, in fact, earnestness with simplicity. Earnestness is the outward and visible symbol of inward and invisible sincerity—the foundation of pleasant intercourse. To be in earnest is the first and last compliment we can pay to those with whom we deal. We thereby acknowledge that we respect them, without which no society is possible. And perhaps this will account for a fact which younger men often fail to comprehend. A true woman prefers feeling to wit, and still more to its pretence. Nor does earnestness exclude mirth or glee. On the contrary, the true character of earnestness is to laugh if there is anything to cause laughter, and not to laugh if there is nothing to laugh at.

Putnam's Magazine for September, like all the previous numbers since it was revived, is well supplied with ably written articles. "Camping Out in Siberia," by George Kennan, has some beautiful descriptive passages, and furnishes knowledge respecting that frozen region from a new point of observation. The article of Dr. Francis Vinton, respecting the identity of Louis XVII and Eleazer Williams, will attract attention from those who take interest in such questions. But we are best pleased by the contribution of Prof. Hoppin, entitled "Hellas." The ordinary reader must find it instructive and suggestive, but the classical scholar will be charmed with it. These are his closing thoughts:

We see the secret of the transcendent greatness of Greek art, in that it sprung from the depths of the mind, striving after some fit expression of the divine; but getting no higher than the spirit of Nature, than the enshrining of human nature, its wisdom, power, and beauty. It never gained a glimpse beyond the expressionless calmness of the face of Pallas Athena.

In Greek literature and philosophy there are a few minds who soar above the region of Greek art, which lies after all exclusively in Nature, and who seem to grasp moral ideas. Such minds as Pindar and Pericles, Plato, and he who has been called "a plank from the wreck of Paradise," the almost righteous Socrates—these show the heights of the Greek genius, and its original fiery power of thought, unaided by revelation, to attain to truth. In these days when classical education is decried, it is well for us to think what the world would be without the educating agency of the Greek mind. Perfection of language remains with the ancients. If we wish to express our thoughts with the greatest freedom, freshness, and force, we must go to the Greek models. To be educated, it is not enough to learn the facts of the outer universe; this is but a part, though important part of education; but it is far more important to understand the inner world of mind, and be developed from within outward. Here the subtle spirit of Plato is still our guide, until a greater than Plato becomes our Teacher in spiritual truth. That very truth Plato seems almost to have grasped intuitively; yet no one knows the precious boon of Christianity until he knows something of Greek literature, and Greek philosophy, by which he sees how much by wisdom the world knew not, and how far the greatest minds, the brightest intellects that were ever created, failed to come to the knowledge of God, by the way of pure thought.

Literary Items.

Longfellow in England.

A correspondent of the Boston *Advertiser* gives the following interesting statement with regard to the popularity of Longfellow's works in England:

The popularity of the author of "Evangeline" is unbounded. It is literally true that a volume of his poems is found in nearly every English home. There is no other work so certain to be encountered. If you go into the drawing-room of one of the middle classes in any of the towns, a volume of Longfellow's poems is on the centre-table, or on one of the knick-knacks which are ornamented with literature. When I was at a public school, thirty boys had each a copy of Longfellow. In the country cities, passionate lovers search his poems for tender lines wherewith to touch the heart. No young lady's collection of piano music is complete without "Excelsior." An excellent bass singer (Mr. Weiss) died the other day, whose reputation was chiefly made by his mode of singing "The Village Blacksmith," which he had himself set to music. There is no living English poet who has half the circle of readers in England than Mr. Longfellow possesses. As I write I can call to mind editions of his works in all the shapes and forms of which English publishing admits. I have seen him heavy in gold and beautiful in the best of engravings. In this form he is an annual. I know him in green, in blue, in Russia, in cloth, in paper covers. He is gilt-edged, marble-edged, and plain. I have read him in types so large that Methusaleh would not have needed spectacles in deciphering him, and I have looked with curiosity at pages where anything less than a microscope would have been of little service. Every farmer's wife has a Longfellow, it she has only a dozen books in her case. At the fairs in the villages Longfellow lies in some form or other on the stalls. He is turned into Latin and into Greek. He is quoted in sermons and lectures.

In 1866, the sale of religious books and tracts in Italy amounted to 120,000 copies, and during the last year to 148,000, being an increase of 28,000 copies. Some of these books have gone through several editions.

President Buchanan left in his will $6,000 for the editing and publishing of his biography. He showed a sensible vanity in not wishing to leave his memory to the care of unprejudiced—and unpaid history.

De Foe had great difficulty in finding a publisher for "Robinson Crusoe;" Thackeray for "Vanity Fair;" Charlotte Bronte for "Jane Eyre," and Emerson for his first essay on nature.

Sir Walter Scott's son, who bore his father's name, and succeeded to his title, used to say, and some believe with truth, that he never had read a line of his father's works.

The tomb of Tom Moore, in the churchyard of Bramham, in Wiltshire, is said to be in a dilapidated condition.

It is reported that Louis Napoléon is preparing a Life of Augustus to complement his Life of Cæsar.

A translation of Shakspeare's plays and poems into Hindostanee has been published in Bombay.

The *Boston Post* understands that the *New York Independent* is to have a religious department.

It has been suggested, and with great probability, that Goldsmith wrote "Goodey Two-Shoes."

Fanny Crosby, of Oberlin, the author of the hymn "Sweet Hour of Prayer," is blind.

The profits of the London *Times* last year were $500,000 in gold.

Educational.

Portable Virtue.

It is Hannah More, I believe, who deserves the credit of the expression, "portable iniquity." She uses it to describe certain mottoes and phrases by which evil principles have been made dangerously easy and adhesive to the memory. Examples of such are the proverbs, "*Revenge is a morsel for the gods;*" "*Better be out of the world than out of fash-*

ion," as well as the Miltonic sentence, "*Better to reign in hell than to serve in Heaven.*" In the same spirit, Webster has somewhere denounced the writer, or speaker who put in anything but cumbrous and impracticable words a sentiment such as, "The natural hatred of the poor to the rich." Such sententences, indeed, deserve the denunciations of all men, and they merit the careful attention of teachers, as things to be untaught and dislodged, from the minds of the young. But they suggest, also, corresponding vehicles of things good and salutary. Our homilies should end with proverbs. Our sermons to the young should be packed closely if we would have them transported far. A distinguished lecturer once rendered a long discourse upon depth of culture, persistently impressive to the minds of his audience by the sententious exhortation: "*Subsoil your souls.*" Our Savior has lodged all moral science and true politeness in the laconic rule, "*Do as you would be done by.*" A parent may introduce the great principle of self-denial into the mind and life of his child by some such phrase, taught to him, as, "*I want to, but I wont.*" C. R. C.

The Great Lesson.

The first great lesson a young man should learn is that he knows nothing. The earlier, and the more thoroughly this lesson is learnt the better. A homebred youth, growing up in the light of parental admiration, with everything to foster his vanity and self-esteem, is surprised to find, and often unwilling to acknowledge, the superiority of other people. But he is compelled to learn his own insignificance; his airs are ridiculed, his blunders exposed, his wishes disregarded, and he is made to cut a sorry figure, until his self-conceit is abased, and he feels that he knows nothing.

When a young man has thoroughly comprehended the fact that he knows nothing, and that, intrinsically, he is but of little value, the next lesson is that the world cares nothing about him. He is the subject of no man's overwhelming admiration; neither petted by the one sex, nor envied by the other, he has to take care of himself. He will not be noticed till he becomes noticeable; he will not become noticeable until he does something to prove that he is of some use to society. No recommendations or introduction will give him this, or ought to give him this; he must do something to be recognized as somebody.

The next lesson is that of patience. A man must learn to wait as well as to work, and to be content with those means of advancement in life which he may use with integrity and honor. Patience is one of the most difficult lessons to learn. It is natural for the mind to look for immediate results.

Let this, then, be understood at starting: that the patient conquest of difficulties which rise in the regular and legitimate channels of business and enterprise is not only essential in securing the success which a young man seeks in life, but essential also to that preparation of the mind requisite for the enjoyment of success, and for retaining it when gained. It is the general rule, in all the world and in all time, that unearned success is a curse.

Personal.

Wm. Daniels has been sent to State Prison for 4 years for an assault on the Secretary of the Alison Ranch Mine. A fortune in the shape of an interest in the mine was left Daniels a few years ago by his brother, and has proved his ruin.

Rev. Mr. Daly cleared $150 for his Church at Stockton, by his lecture on the Holy Land, in Oakland, which is, according to the *Pacific*, much better than he did in this city.

Mr. Jas. K. Edwards, a prominent citizen of Grass Valley and Superintendent of the Gold Hill mine died suddenly on Saturday last.

Rev. A. Coplin of the Methodist Church at Watsonville took leave of the Church and friends in that place, last Sunday evening.

Rev. C. G. Ames declines the invitation to renew his engagement as pastor of the Unitarian Church at Santa Cruz.

Rev. H. C. Benson, D.D., has commenced his labors as Editor of the California *Christian Advocate*. Under his care the paper will undoubtedly prosper.

Mr. George O. Tiffany has been appointed Guager of the Second Internal Revenue District of California.

Prof. Biggs has written and is circulating among the citizens of Gold Hill, a pamphlet on Infidelity.

Hon. E. D. Wheeler delivered the oration at the recent celebration of the Admission of California.

Rev. J. J. Talbot commenced his duties as rector of the Episcopal Church at Gold Hill last Sunday.

Mr. C. C. Crosby has been appointed County Superintendent of Public Schools for Placer County.

Gen. Halleck and Staff have returned from their tour of inspection on the northern coast.

Mr. W. F. Anderson has been nominated by the Democrats of Nevada for Congress.

Rev. Geo. F. Whitworth of Olympia, W. T., recently lost his dwelling house by fire.

Ned Buntline will go East about Oct. 1st but will return and settle in California.

Rev. S. D. Simonds and family arrived in this city last week from the East.

Rev. H. R. Avery is having a new dwelling house built at Walnut Creek.

Ex-Gov. John Bigler arrived in Sacramento from the East on Tuesday.

Mr. Stephen Masset (Jeems Pipes) will sail for the East in a few weeks.

Mr. C. Coffin ("Carleton") has been spending a week at Yosemite.

Rev. C. A. Buckbee left this coast for the East on Saturday last.

Rev. J. A. Skinner sailed for the East on Saturday 5th inst.

REMOVAL.

Remedy for Blind Staggers in Sheep.

We take the following from a communication to the Santa Barbara *Post:*

I wish to place before your readers, especially those engaged in the business of sheep raising, a very important remedy for the Head Disease or Blind Staggers. I have for the past two years been experimenting to overcome this fatal disorder, but have not until the past few months been able to save one from dying when once attacked with it; but have at last by patience and continual experiments overcome the once fatal disease. It seems to prevail mostly among old ewes or young lambs. My first experiment of the kind was on a lamb some eight months old which was so badly effected that I considered it as good as dead, but thinking there must be some remedy for the suffering animal, I concluded to try once more, which proved to my entire satisfaction that I had at last, after many experiments, found a sure cure, or at least nine out of ten cases. The animal was so badly affected I thought perhaps I might relieve it of its misery either by killing or curing it. Next day instead of finding my lamb dead, as I expected, I was much surprised to find it at the corral some half mile from where I left it the previous evening, almost well. Since then I have applied the same remedy to several others and have found it effectual. The remedy may seem cruel, but where the life of the animal is at stake any remedy is acceptable. The remedy is simple: A small bladed pocket knife half an inch in width, applied to the jugular vein, just back of the vertebra, or the joint that connects the head with the neck of the animal. If bleeding on the one side does not relieve the animal apply if on the other, same as the first. A cool shade and but little exercise for a few days will help to improve the animal. I would state, however, that a little precaution should be used in applying the knife so as not to sever the vein, and for that reason I think nearer the head the better, as the flesh is more solid and one can have a better idea of the depth running the knife; I have in some cases had to cut large holes in the neck of the animal before the blood would start, but when it did come it was almost as thick and black as tar; almost immediately after the blood begins to flow you can discover a change, the eyes brighten up, and the sheep is inclined to go straight forward in place of turning around as it was wont to do before. I believe other animals treated likewise when afflicted with head disease or blind staggers, would be relieved immediately. This may not be a new remedy to some who have been engaged in stock raising for a number ot years but have not been free to give it out for the benefit of those just beginning the business. Had I known this before, I could have saved a great many that have died for want of knowledge sufficient to relieve them. Thomas Snyder.

Bad News for the Rats.

Recent experiments show that squills (*Scylla Maritima*), the edormous bulbous root of which is much used in medicine, is not only a powerful poison for rodents, but also one that they are very fond of. The way of preparing it for the desired purpose is as follows: One of the bulbs is cut into thin slices, hashed and bruised, then fried in a pan with fat, which is afterward strained through a cloth and put into broken plates and saucers, to be placed in the cellars and other places infested with rats, mice, etc. To prevent dogs and poultry from eating of this poisonous compound in stables, pigeon-houses, or farm-yards, it may be put into a wooden box, about a foot and a half long, and having a hole at each end. The rat gets in at one end and goes out at the other, after partaking of the noxious food, which soon kills it. Squills may also be reduced to powder for the same purpose, by bruising them in a mortar to a pulp, which is afterwards incorporated with as much flour as it will hold. This paste is then rolled out, as you do for pastry, then cut into shreds, which are left to dry on hurdles, or on sheets of paste-board, and are afterwards pounded in a mortar. The powder thus obtained will keep for years, and may be put into boxes or barrels. If manufactured on a large scale, it may become a profitable article of exportation. In Algeria, squills cost nothing, the country being absolutely overrun with them. —*English Paper.*

How to Can Fruit Properly.—This we call a very simple process when rightly understood. We always have an abundance of small fruits up in glass jars. We think the trouble less, the fruit better, and less expensive, than by the old process of preserving in sugar, pound for pound. We use the Spencer jar with a japanned cover, and a rubber ring around its edge. We heat the fruit to a boil in a bright tin pan; have the jars filled with quite warm (almost hot) water, to warm them; pour out the water, and dip the boiling fruit rapidly into the jar, until it comes slightly above the shoulder in the inside of the neck of the jar. The end of a string, about one-eighth of an inch in diameter, is dropped inside on the fruit, retaining the other end in the hand. Now crowd in the cover down on to the shoulder, at the same time withdrawing the string, and the work is done. Any extra juice or air will follow out with the string.

Those who fail in putting up fruit to keep, do not exclude the air. This is done by having the fruit hot, and by being sure to fill the jar, so that when the cover is pushed down a little of the juice or air will be pressed out with the string. You may sweeten the fruit or not, just as you please. It is not necessary in order that it may keep. Neither is it necessary to put the fruit into the jars to boil. It necessitates extra trouble, and often loss by the breakage of the jars.—*Western Rural.*

Keep Off The Flies—How to Do it.—Protect that useful animal—the horse—from the pestilent annoyances which often molest them at this season. There is a recipe in the Farmer's Recipe Book to secure horses and other animals against the attack of flies, which we re-publish at this season in the hope that those employed about horses will be induced to try its efficacy:

"Take two or three small handfulls of walnut leaves, upon which pour two or three quarts of cold water; let it infuse one night, and pour the whole next morning into a kettle, and let it boil for a quarter of an hour; when cold it will be fit for use. No more is required than to moisten a sponge, and before the horse goes out of the stable, let those parts which are most irritable be smeared over with the liquor, viz: between and upon the ears, the neck, flank, &c. Not only the lady or gentleman who rides out for pleasure will derive benefit from the walnut leaves thus prepared, but the coachman, the wagoner, and all others who use the horses during the hot months."—*Christian Observer.*

Chinese Farming.—A correspondent calls attention to a fact which illustrates the industry and ingenuity of the Chinese. All along the coast the steep shores, and even the mountain sides, are made tillable by a system of terraces. The front or slope of these terraces is about six feet in height, and protected by sod. The level space thus obtained is devoted to raising vegetables and general products of the soil. Only one kind of seed or grain, however, is planted on the same space, and no two spaces produce the same vegetable or cereal. Thus the traveler is presented a mountain side fringed with diversified vegetation. Rows of peas, beans, turnips, carrots, vines, etc., rise in regular series until the summit is reached. The flat or bottom land immediately on the coast is invariably devoted to rice. Their system of irrigation is complete, and all the lands devoted to this crop can be easily overflowed. —*United Presbyterian.*

Go to Farming.—A good living is what comparatively few men succeed in making in village or city life, and yet nothing is more easy of accomplishment on the farm. Besides there is a pleasure in cultivating and embellishing the earth, improving and increasing its products, and thus adding to the aggregate of human happiness. Why, then, should young men hesitate to become farmers? It is both profitable and honorable. It is the nearest approximation to independence that man, as a member of society, can make. A gentleman farmer, and all farmers are, or should be gentlemen—belongs to an order of nobility that is not indebted to place holders for its installation, and may, if he chooses, be ranked amongst the greatest benefactors of the human race. Let all idle young men go to work on farms, and quit seeking third and fourth rate clerkships. In short, go to farming and quit begging.—*Exchange.*

Why Farmers are Healthy.—There are seven reasons why farmers are healthier than professional men, namely:

1. They work more, and develop all the leading muscles of the body.
2. They take their exercise in the open air, and breathe a greater amount of oxygen.
3. Their food and drinks are commonly less adulterated, and far more simple.
4. They do not overwork their brain as much as industrious professional men do.
5. They take their sleep, commonly, during the hours of darkness, and do not try to turn day into night.
6. They are not so ambitious, and do not wear themselves out so rapidly in the contest of rivalry.
7. Their pleasures are simple, and less exhausting.—*North Western Presbyterian.*

WEEKLY MARKET REPORT.

Wednesday, September 9, 1868.

Flour—700 bbls Occidental Extra, part yesterday, $6 25. We quote jobbing rates for city brands as follows: Superfine, in sks, ℔ 196 lbs, $5 25@$5 50; Extra, in sks, $6 25@6 50.

Wheat—Sales of 1,400 sks choice shipping, per *Anna* and *New York*, $1 95; 400 sks fair milling, $1 82½; 320 sks choice, per *Bay City*, $2. At the close,800 sks choice, private; 50,000 sks shipping (received yesterday and to-day), prior to arrival, private. We are informed that shippers are continuing to pay high prices in the interior. We quote good to choice in this market at $1 90@2 ℔ 100 lbs.

Barley—7,000 sks brewing sold in the interior, full figure; 125 sksdo, $2 35 ℔ 100 lbs.

Oats—Sale of 200 sks fair, $2 50; 350 sks do $2 50; 100 sks good, $2 55; 100 sks do, $2 60. At the close, 250 sks fair, $2 50 ℔ 100 lbs.

Potatoes—Mission are selling all the way from 90c to $1, though 90@95c will cover the bulk of the transactions. 260 sks Bodega sold from wharf yesterday at $1 15. We quote Carolina at $1 37½@1 62½ ℔ 100 lbs.

Onions—A small invoice of Yellow, from wharf, $1 62½ ℔ 100 lbs.

Beans—We quote jobbing rates for first quality as follows: Bayo, 5c; Butter, 5½c; Small White, 8c; Pink, 6c; and Red, 3c ℔ lb.

Bran—100 tons in lots, $23@$25 ℔ ton.

Middlings—Fine, $37 50@$40; feed descriptions, $33@$35 50 ℔ ton, with small sales at inside figure.

Dairy Products—Are generally in good demand. California fresh roll Butter is quoted at 45@50c, latter an extreme figure; Pickled, 37½@42; California firkin, 35@37½c; Cheese, 15@17c for California dairies, and 17@18c ℔ lb for Eastern dairies; Pineapple Cheese, 18@20 ℔ dozen; Eggs, 58c ℔ dozen.

Provisions—Following are the jobbing prices: California smoked Bacon 14½@15c; Oregon do, 14@14½c, with sale of 2,000 lbs second quality at 13c; California Hams, 16@17c; Oregon do, 18@19c for lots in order. with sales of 1,600 lbs off condition, private, and 2,000 lbs good at 17c; California Lard is easy to the buyer at 12½@14c ℔ lb.

Poultry—Live Turkeys are to-day quoted at 20@22c ℔ lb; Hens, $7 50@$8; Roosters, $6 50@7 50 for large size; Spring Chickens, $4@$6; Ducks, $5@$5 50 ℔ doz; Geese, $2@$2 50 ℔ pair; Venison,12½c ℔ lb.

Wool—Sales for the week 12,600 lbs fall, mixed, private, and 40,000 lbs fall, clean grades, at 13½@14c. The market closes firm at about 14c for good grades, desirable lots being taken up immediately upon arrival.

Hides—Sales for the week reach 1,500 California dry, 14@15c ℔ lb.

Tallow—Sales for the week reach reach 10,000 lbs Beef, 7½c; occasionally small lots bring 7¾@8c ℔ lb, latter figure for choice.

San Francisco Cattle Market.

The market is well supplied and demand fair at unchanged quotations.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ℔ lb.
do 2d do 6@7c ℔ lb.

Veal—8@10c for medium, and 12c ℔ lb for choice.

Mutton—Is steady at 6@6½c ℔ lb.

Lamb—Steady at 8@9c ℔ lb.

Pork—Undressed, 4@5½c; dressed, 6½@8c ℔ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

MINING.

Tin in Colorado.

A correspondent of the Denver *Tribune* gives the following information in regard to these recently discovered deposits of tin :

We can take out seventy-five per cent. of pure tin. We have done so at my laboratory, and we have *tinned iron*—coated iron with the metal thus taken out.

Mr. H. B. Grose, W. B. Hall, and myself are the discoverers. Mr. Grose has for the last twenty-five years been engaged as a tin-dresser and inspector of ores at the Cornish mines in England. He, too, has tested it by every test known there, and assayed it. He does not hesitate to pronounce it tin ore of the very richest kind—of the variety known in Cornwall as the "Resin Tin Ore."

We have plenty of it. The Spicer lode crops out for about three-eighths of a mile, and seems to be 100 feet wide—all of the same kind of ore we send you. We are sinking a shaft as fast as possible.

The Eureka lode is from 8 to 60 feet wide in a defined crevice—all of this kind of ore.

This, I believe, is the first oxyd of tin ever discovered in America. The tin ore discovered in Missouri was sulphate of tin.

I am told the Government has offered a large bounty to the discoverer of this kind of ore. If such be the case, luck is with us. We need it. I send you two specimens, and will soon send you a box of tin—Colorado tin! This will open up a new source of wealth and industry for Colorado. There is no doubt of the extent of these lodes, nor their richness, and more will soon be recorded.

White Pine Mining District.

Rev. A. F. White, State Geologist of Nevada, gives the following description of the mines at White Pine, in the Carson *Appeal:*

White Pine Mining District is about eight miles square. Within it are three mineral belts. The first occupies the western slope of White Pine Mountain. The ore has produced from fifty to one hundred and twenty dollars per ton, and is abundant. The ledges are from six to eight feet in width. The second belt lies along the eastern slope of White Pine Mountain. Assays of ore from several ledges show from twenty to six hundred dollars per ton in silver, from forty to fifty per cent. lead, and from twenty to thirty per cent. copper. The third belt is the one attracting so much public attention. It lies in the summit and western slope of Treasure Hill, and adjoins the second named on the east.

A specimen was taken from the Keystone Mine in the 17th of July, weighing thirty-one pounds, almost pure horn silver. Estimated value, three hundred dollars. Another of similar richness was taken from the same mine yesterday, weighing seventy-five pounds. Several tons of ore from different mines in this mineral belt have been worked in Austin, and produced over a thousand dollars per ton, according to returns just received. Mines are not as yet opened enough to give an opinion on their permanency. The Aurora has openings made along the croppings for about six hundred feet, and at each opening the ore is abundant and rich in almost all cases. It is obtained under the surface by uncovering and loosening up with a pick, but is more compact farther down. I have a specimen of limestone rich in silver. All assays and tests thus far prove the bullion very pure; it is estimated at 960 fine.

THE Nevada *Gazette* gives the following description of the new process of extracting gold by zinc: The process consists in gradually introducing the quartz pulp, or other pulverized gold-bearing substances, below the surface into a bath of melted zinc, which will immediately attack and dissolve nearly every particle of gold, while the debris will rise to the surface to be taken off. The mechanism is very simple and durable. Should sulphurets in which particles of gold are so firmly imbedded as not to offer any contact even on the smallest point, prevent the extraction to such a degree that it will pay to work it over by concentration, roasting, and chlorination, it may be done. But all the gold, in another manner lost as float-gold, and much more, is certainly already saved by the zinc. Dry crushers to be used in preference.

A HANDSOME NUGGET.—We have been shown a round, water-worn cobble of quartz, about twice the size of a dumpling, thickly veined and nearly one-half covered with gold, which was found last Friday in the Lincoln Tunnel, at Indian Springs, Butte County, about 1,100 feet back in the drift, 2,500 below the top of the hill, and 800 feet above the bed of Big Butte Creek. This cobble contains about five pounds of gold, of a quality worth $18 per ounce, and its total value is probably about $1,080. The owner of the mine from which this nugget came is Robert Kirk, and he states that he has in the dump gravel that will yield $4,000 as soon as the water can be had to wash it out. The finding of five-pound lumps is so rare now-a-days as to be especially noticeable.—*Bulletin.*

AT Chehalis Point, W. T., fine flour gold—evidently washed from its source in the Olympia Mountains—is obtained from the black sand on the beach. The miners make about $3 per day with their present imperfect methods of getting the gold. It is probable that very rich deposits exist in the mountains.

FROM CARIBOO.—Late intelligence from Cariboo states that great excitement has been caused by the discovery of a large prospect on Peterson Creek, situated about eighteen miles west of Bakerville.

A RICH ledge was struck recently about half-way between Graniteville and South Fork. It is large and well defined, and miners think the rock will yield from thirty-five to forty dollars per ton.

TRINIDAD.—A Mexican woman found a nugget of gold as large as a filbert two miles above Trinidad. There are about 100 men at work, sinking shafts and washing the dirt.—*Denver News.*

AN immense deposit of coal, of excellent quality, exists about fifty miles from Olympia, Washington Territory, on the line of the proposed railroad.

RICH.—A couple of miners at Willow Springs Hill, Placer County, recently washed up the snug little sum of $5,400.—*Nevada Transcript.*

THE Havilah *Courier* says a surpassingly rich quartz vein has been struck in the Relief Mine. The ore is literally bespangled with gold.

PROSPECTORS in Quartz Valley, Yreka County, have discovered some rich pieces of cinnabar on the side of the divide below Howards.

THE I X L Company in the Silver Mountain District, is getting out better ore than has ever been taken from that mine.

AT Middle Bay, Calaveras County, at a depth of 300 feet, a bed of ore has been found which pays $100 per ton.

THE Gould & Curry shaft is now down 1,050 feet and the ground is found too soft to admit of opening a level.

A VEIN of ore has been reached by the Alpha Company, of Nevada, that will pay about $60 per ton.

A COAL MINE, which promises well, has been located near Ione City.

D. Hewes,

RAILROAD CONTRACTOR.

WILLIAM JAMES, Newark, N. J.
DAVID MEEKER, J. COBBLEDICK, San Francisco.

MEEKER, JAMES & CO.

Nos. 12 and 14 Pine Street, San Francisco,

Importers and Wholesale and Retail Dealers in

General Selections.

A Word for the Speculator.

There is no class of the community that is so generally abused by everybody, and at all times, as the speculators. During the war, nine-tenths of the evils from which the country suffered were laid to their charge. Furious were the onslaughts of the whole press upon the forestallers, middlemen, produce speculators, rebel and British gold-gamblers and Hebrew money-changers; and various attempts were made by Congress to legislate the whole tribe out of existence. But the efforts of the legislature proved abortive, the fulminations of the press remained mere *bruta fulmina*, and the speculators have continued to flourish, and are likely to flourish still, in spite of the recent renewal of the warfare on the part of the press and of the fresh thunders hurled at the "bloated speculators" from within the walls of Congress. In fact, to exterminate speculators would be to exterminate a great many more people than is generally believed. For a speculator is nothing more nor less than a person who seeks to discover in advance of the rest of the community the probable course of any given market, and who, acting upon his judgment in regard thereto, buys the article likely to advance or sells the article likely to decline. In this sense every merchant or manufacturer, every shopkeeper or mechanic, is more or less a speculator. They will all buy a little more than their momentary needs when an article is unusually cheap, and will sell everything they possibly can, and contract to deliver more if an article is high and they think it likely to decline. Why should the same action be right when done occasionally by the mechanic and the merchant, and wrong when done habitually and as a business by the speculator?

It is very true that speculators frequently buy that which they have no intention of ever receiving; but they do so only because they expect that, before receiving the article bought, they will be able to sell it at a profit. It is also true that speculators frequuently sell that which they have not got; but they do so only because they expect that, before delivering the article sold, they will be able to buy it for less than what they sold it for. And wherein do they differ in this respect from the cotton factor, who buys a planter's crop at twenty cents a pound before the boll has formed upon the plant; or the manufacturer, who contracts to furnish a hundred cases of broadcloth at three dollars a yard before the roof is up on his factory building? Throughout all the large transactions of commerce, similar engagements are of daily occurrence, and, indeed, of absolute necessity. No railroad builder can contract to build twenty miles of road without speculating on the price of labor and of stone, and ties and iron, or whatever else he may agree to furnish.

It is very true that professional speculators sometimes combine to force up the price of an article, and thereby injure the consumers of that article; but they evidently benefit to the same extent the producers and holders of it. Or they combine to depress the price of an article, and thereby injure the producers and holders of that article; but they evidently benefit to the same extent the buyers and consumers of it. And if speculators do sometimes unfairly and dishonorably combine to depress or enhance prices, thereby, while benefitting some, injuring many others, we should not on that account condemn all speculators, any more than we should condemn all mechanics because the tailors or brick-layers or gas-makers sometimes forcibly seek to advance their wages, and strike work to the great injury and inconvenience of many individuals and of whole communities.

It is very true that when people go outside of their regular business to speculate in articles of merchandise or gold or stocks, about all of which they probably know little or nothing, they are very apt—nay, almost certain—to lose money. If lawyers will speculate in cotton, and doctors "dabble" in gold, it is very likely that they will come to grief, and when they have lost their money in speculating, which in *their* case is nothing else but so much *gambling*, they are certain to declaim violently against the professional speculators, by whom they think themselves injured or actually robbed. But nothing could be more unjust than such an accusation, just as nothing can be more absurd than the ignorant tirades against speculation and speculators in general that leading journals feel occasionally compelled to indulge in. The speculator is just as important and necessary a part of the business community as the merchant or manufacturer, and so far from being the cause of fluctuations in price, the speculator is really the great preventer of fluctuations, is above all classes of the community the very class whose efforts—unconsciously enough on his own part—constantly tend to keep prices steady.

In the winter of 1867 the belief was general both in Europe and here that our cotton crop was large. The receipts from India and other producing countries were heavy. The demand for manufacturing was light all the world over. Prices declined to fifteen or sixteen cents a pound in December. Planters and factors of cotton were poor; they shipped their product to England as rapidly as possible, and sold it at a very low figure. The lower the price went, the more cotton declined likewise, and the less the manufacturers wanted to buy. At this juncture keen speculators, seeing that the extent of the crop was exaggerated and that the demand was underestimated, began in increasing numbers to believe in higher prices—to turn bulls in cotton—and they bought large amounts on speculation and held it until the price advanced largely, and then sold it out, making a very handsome profit. No one buys cotton except manufacturers and speculators. What would have been the result if the speculators had *not* bought American cotton in December and January? Why, the price would have declined still further, more cotton would have been shipped to England, and when our manufacturers came into the market in February and March, they would have found an insufficient supply, there would have been a perfect scramble for what was left, we should probably have had to import cotton from Europe at a great loss to all concerned, and prices would have fluctuated double and treble what they have done.

Middling cotton sold in this city last week at thirty-two cents a pound, and good brown sheetings at eighteen cents a yard. A speculative planter in Georgia sells to his factor in Savannah his growing crop of cotton at eighteen cents a pound, deliverable in November. The speculative Savannah factor sells the same cotton to a New York merchant at twenty-one cents a pound, deliverable in December. The speculative New York merchant sells the cotton to a Lowell manufacterer at twenty-four cents a pound, deliverable by the 1st of January, 1869. The speculative Lowell manufacturer, calculating to a nicety, can make brown sheetings at fourteen cents a yard when cotton costs twenty-four cents a pound, and he immediately sells the sheetings to a Warren street dry-goods dealer at fourteen cents a yard, deliverable in February. Nothing can well be more frightfully speculative than this: selling brown sheetings that are yet to be manufactured out of cotton that is yet to be raised on a plantation in Georgia, that perhaps never had any existence! But mark the result! The dry-goods dealer knows that in February he will receive sheetings that cost only fourteen cents a yard. It will not do for him to have any stock on hand at that time that costs eighteen cents. He will set to work immediately to lower the price of his present stock. His neighbors do the same; by-and-by the retailer gets the advantage of the decline, and puts down his prices, and before we know it, three months before a bale of the new cotton crop has appeared in market, we may buy cotton goods in Broadway as cheap as they can be produced next March. This again we owe to speculation; and in precisely the same way the speculators in advance of liberal harvests cheapen the price of bread for us long before a single bushel of new wheat has been ground into flour.

We might fill column after column with examples of the manner in which speculation tends constantly to equalize prices. But those we have given will suffice. When we find in all countries of the world a number of men, against whose individual character no objection can be raised, engaged in an occupation which to us may seem useless, injurious, or immoral, it is always safer to mistrust our own judgment than to hastily indulge in abuse and indiscriminate condemnation. If the influence of speculation upon the welfare of a community is carefully examined, it will be found to be not only not injurious but overwhelmingly beneficial. It is time that the name of speculator should cease to convey a reproach.—*N. Y. Nation.*

Mistaken Liberality.

The following, from the *Dramatic Chronicle* should be read by every young man on the Coast:

"Frugality and economy are virtues almost unknown to the young men of California, though in certain circumstances they lie at the root of all the other virtues. There is something seductive to the imagination in free-handed generosity, especially to the young, and the majority of the youth of our day would rather have the reputation of being dissipated or unprincipled, than of being mean. Yet there are many young men so circumstanced that it is their absolute duty to pursue a course that will be likely to bring upon them the charge of meanness. Expenditure beyond one's income or resources is more than folly—it is, except in peculiar cases, unprincipled. There is probably no part of the world where mistaken liberality of expenditure, and false generosity are so common as in California; no place where a wise and methodical regulation of receipts and disbursements is more rare. Young men—together with many who are not young—have an idea that they make friends and admirers, that they enhance their own importance by lavish expenditure for expensive dinners and suppers, for rides, wines, liquors, oysters and "treats" generally. There cannot be a greater mistake. The true way to increase your influence and to obtain the respect of those whose respect is desirable, is to practice a judicious economy and save your money. This will increase the solidity of your character, improve your morals, and secure for you the highest position you are qualified for. The men on whom you waste your money in suppers and other batchelor hospitalities, think none the more of you for your mistaken generosity. They may call you a "jolly fellow," a "free-hearted fellow," "as good a fellow as ever lived," etc., but they would have a far more real respect for you, if you practiced a sensible frugality, and had a homestead or something else in the shape of property as the fruit of what you have so thoughtlessly and unprofitably squandered."

Drones in the Hive.

The increasing number of drones in the national hive is among the most important economical facts of the times. In his letter to the merchants of Boston, a year or two ago, Mr. McCulloch said that the thing most needed in the present condition of the country was, that the whole population should return to work. A great many journals took it on themselves at the time to ridicule this statement of the secretary. They referred to the traditional activity of the American mind, to the hot haste to be rich, and to the signs of industry on every hand; and concluded that there was no fault here; that lack of industry could not be predicated as among the causes of existing evils. And yet Mr. McCulloch was every way right. Among the worst features of the times is a disinclination, among large classes, to honest, hard work; a preference of easy or partial employments, which barely afford subsistence, without promising promotion or advancement; a lowering of that industrial and social ambition which is the spring of all beneficent activity; and a reliance on speculation, on short cuts, on sharp practice, on luck, on anything, to attain the ends which once were sought by frugality, patience and toil.

There is not one of our readers to whose daily observation this does not appeal. Was there ever a time when young men were so ready to take up with positions which secure a living after a certain fashion, but which look forward to nothing and condemn their occupants to hopeless mediocrity through life? Was there ever a time when employments not strictly reputable, though perhaps not criminal, were so crowded? Or, to rise a step higher, when the whole class of employments, which are reputable enough

ut not useful or beneficial, were so much sought fter? Are there not other classes of employments, oth useful and honorable when in proper proportion o the wants of the community, which are filled to ositive repletion and disgust because they afford an scape from pains-taking and self-denying labor?

Every possible opening connected with trade, hich dispenses with thorough training and long reparation, attracts a swarm of young men not one f whom but could do better—take ten or twenty ears together—than to accept it, yet all but one of hom will be disappointed and driven off to some- ing still poorer, or to wait for another chance. he number of expectants, that most melancholy lass, was never so large as now. The very excess f applicants on every hand cheapens their price nd so creates new positions of an increasingly lower rder. The pressure for appointments to Washing- n clerkships is an example of this. For every lace there are a score of eager contestants. Yet ose positions have no outlook whatever, afford no easonable opportunity for promotion or for social nprovement, and yield a precarious and at the best insufficient livelihood. A more miserable lot uld hardly be invoked upon an enemy.

To earn a very poor living by a very little work w seems to content a class in our country which is very year growing larger. Agencies of every sort re being multiplied far beyond the legitimate wants f business. The increase in the number of clerks akes up only in part for the poorer quality. The warms of hangers-on at establishments of every ind perfectly astonish us as we travel from town to wn, or State to State. Hotels, stables, saloons, are rved more numerously and less satisfactorily every ay. The wants of this class are very small. They ust eat and they must drink; but they make no emands for a family, for a secured support, or even r social decencies. They have no income and eed none. They aspire to nothing, are in the way nothing, and only ask a mere animal subsistence. eing Yankees, they are not afraid of hardship,— ank heaven, that cannot be bred out in a genera- on,—nor even of sweating and straining, provided does not take the form of regular, steady work. o matter what the call from the farm or the shop, is never heard by these men. They would rather ang round their accustomed haunts, and do just ough to get along from day to day.

How strongly do the young men who enter stores, the present day, remind one of the same class fifty twenty-five years ago? What part of them set t with the determination to rise through all the ades, willing to begin low, if only they find a ance to climb high, carefully economizing their rnings, in order to be able to command something tter when the time comes? We intend no disre- ect to the class, as a whole; but we mean that ere is in it a great and increasing number of those ho settle down content with an easy berth, instead planning and saving and working for an advance. o start with, they give up all idea of marrying, hich is the only guaranty society has—with very w and marked exceptions—that a man means to anybody. That condition accepted, they can easily ake an account of what they will require to dress intily, fare so so, and be seen at places of amuse- ent and fashion. Give them this, and their life is mplete; no toiling, no sparing, no climbing for em.

This miserable tendency to take up with any posi- n which escapes hard and continuous labor is get- ng to be a melancholy feature of American life. he generation gone had its dissipated and idle and grant and pauper classes; but all who did not be- ng distinctively to one of them, were emphatically en of work, of patience, enterprise and ambition. hey took in the whole of life. Ther forbore and crificed and underwent. They did not try to live eap. But the America of the present swarms ith men of another race, content with the day, bask- the sun and hiding from the rain, satisfied with irregular and scanty subsistence, shunning hard d patient labor—drones in the hive of national dustry.—*Springfield Republican.*

WE have all of us sufficient fortitude to bear the isfortunes of others.

Heuston, Hastings & Company,

ARE THE

FASHIONABLE CLOTHIERS

OF

SAN FRANCISCO.

SPECIALITIES.

PRICE AND GUARANTEE.

The largest and most varied stock of Gentlemen's Clothing, Furnishing Goods, Trunks, Bags and Valises, on the Pacific Coast. United States Life Insurance Comp'y,

IN THE CITY OF NEW YORK.

OFFICE, NO. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

This Company, having a Stock Capital, makes Insurances and Endowments with or without profits. Dividends to Policies with profits are equal to, or larger than those of other, or "Purely Mutual" Companies in available present cash value.

NEW AND IMPORTANT PLANS OF LIFE INSURANCE HAVE BEEN ADOPTED BY THIS COMPANY. SEE THE NEW PROSPECTUS.

Life Assurances, Endowments and Annuities in every form. Profits available after Policies have run one year, and annually thereafter. The reserved Cash fund, for re-insurance, is the largest known to or required by, the ablest and most experienced authorities in Life Insurance, thus affording undoubted security. A liberal non-forfeiture system, as to whole Life or Endowment Policies.

Policy Holders in this Company can use or apply the Dividends of profits in a greater number of ways than is afforded to Policy Holders by any other Company.

The law under which the company is Chartered, provides that if the Capital should, from any cause, become impaired to the extent of Twenty-five Thousand Dollars, or more, the Stockholders SHALL BE CALLED UPON TO MAKE GOOD SUCH DEFICIENCY. This is the only Cash Company in America which affords this safeguard to Policy-holders.

The assured in this Company are not personally liable as in Mutual Companies, which have the power of assessing their members or of reducing the sums insured, in case of deficiency.

CLERGYMEN, insuring in this Company, are allowed a DISCOUNT of TWENTY PER CENT. on first year's premium, and a liberal commission will be given on all Insurances influenced by them.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

The Old Schoolhouse.

Whatever else to the night has gone—
The night that never shall know a dawn—
It stands undimmed in my memory still,
The old brown schoolhouse on the hill.

I see the briers beside the door,
The rocks where we played at "keeping store,"
The steps we dug in the bank below,
And the "bear-track" trod in the Winter snow.

The corner brick on the chimney lies
Just as it did to my boyish eyes;
And in dreams I throw the stones again
I threw at the toppling brick in vain.

The names on the weather-boards are part
Of the sacred treasures of my heart;
Some yet a place with the earth-sounds keep,
And some in the holds of silence sleep.

I hear the growl, from his central lair,
Of the swiftest boy who stood for "bear;"
And the sound brings back the joy and glow
Of the chase around the snow.

Often again in thought I slide
On the stone-boat down the long hill-side;
The breathless speed and the dizzy reel,
And the wind in my lifted hair I feel.

Ah me! There are spots that hold my dead
In a sleep unstirred by memory's tread;
And many a scene of life's triumph lies
Deep in the mists that never rise.

And things of rapture and things of tears
Are hidden within the veil of years;
But the old brown schoolhouse on the hill,
It stands undimmed in my memory still.

—*Evangelist.*

The Difference.

Some murmur when their sky is clear,
And wholly bright to view,
If one small speck of dark appear
In their great heaven of blue.
And some with thankful love are filled,
If but one streak of light,
One ray of God's good mercy, gild
The darkness of their night.

In palaces are hearts that ask,
In discontent and pride,
Why life is such a dreary task,
And all good things denied?
And hearts in poorest huts admire
How love has in their aid
(Love that not ever seems to tire)
Such rich provision made.

—*Richard C. Trench.*

A Touching Incident.

The pastor of a young mother, who had recently joined his church, was talking with her about her maternal responsibilities, and urged the duty of constant and believing prayer for the early conversion of her children. She assured him that it was her daily practice to carry her little ones in supplication to the throne of grace, and yet complained of a want of faith and of definiteness in asking for them the special influences of the Holy Spirit.

"Do you pray for each child separately and by name?" inquired the pastor.

"No; that has never been my habit," was the reply.

"I think it of much importance, Mrs. Huston, especially as a help to our faith, adding to the clearness and intensity of our desires on their behalf. You pray *with* them, I trust, as well as for them?"

"Sometimes I do, but not often. They seem a little restless, and inclined to whisper together while my eyes are closed; and so I have felt less embarrassment and more freedom for supplication to be alone at such seasons."

"Let me persuade you, dear Mrs. Huston to try a different plan. Take your little son and daughter each *separately* to the place of prayer, and kneeling with them before the Lord, tell Him the name, the daily history, the special want of each, and see if your heart is not opened to plead for them as you have never done before."

Tears were in the eyes of the young mother as she said, with trembling lips,

"I'll try."

As evening came she had not forgotten her promise; but as she saw that Sarah, her daughter, was unusually peevish, she thought best to take her little son first to her chamber. Willie was a bright and pleasant boy of five years; and when his mother whispered her wish to pray with him, he gladly put his hand in hers and knelt by her side. As he heard his name mentioned before the Lord, a tender hush fell upon his young spirit, and he clasped his mother's fingers more tightly as each petition for his special need was breathed into the ear of his Father in Heaven; and did not the cling of that little hand warm her heart to new and more fervent desire, as she poured forth her supplication to the Hearer and Answerer of prayer?

When the mother and child rose from their knees, Willie's face was like a rainbow, smiling through tears.

"Mamma, mamma," said he, "I'm glad you told Jesus my name; now he'll know me when I get to Heaven; and when the kind angels that carry little children to the Savior, take me and lay me in His arms, Jesus will look at me so pleasant and say, 'Why, this is Willie Huston; *his mother told me about him;* how happy I am to see you, Willie.' Won't that be nice, mamma?"

Mrs. Huston never forgot that scene; and when she was permitted to see not only her dear Willie and Sarah, but the children afterwards added to her family circle, each successively consecrating the dew of their youth to God, she did, indeed, feel that her parson's plan was "the most excellent way." So she resolved to recommend it to praying mothers, by telling them this touching incident. When we meet our children at the last great day, may Jesus own as His those whom we have told Him about on earth.—*Richmond Presbyterian.*

"I Would not Have a Liar on Board my Boat."

In the month of August, 1848, I was traveling on the Erie Canal from Syracuse to Utica. It was on a Saturday evening—the packet boat was crowded with passengers. A young man came on board to go to a distant place on the canal. This fellow endeavored to evade the payment of his fare. The captain gave notice that some one on board had not paid, and requested him—whoever he was—to come forward and settle. No one came. To find out the rogue, the captain caused a general investigation; every one was scrutinized. The passengers assisted in the search; but, strange to tell, the last man was the sneaking rogue, who, on finding himself to be a marked man, offered the money.

"No," said the shrewd captain, "you go on shore instantly. I would not have a liar on board of my boat."

The night was dreary and rainy. The boat was stopped and the liar was ordered to step off on the tow-path and finish his journey by walking nine miles in the rain.

It is now all of twenty years since I witnessed the above exposure of a youthful sinner. Foolish parents and others who place evil examples before children, set traps for their eternal destruction. They "sow the wind and reap the whirlwind."

I knew a vicious father, who scourged and mocked his children when they confessed to wrongs that they had done. As they grew older they became eminent for deception.

Those who deceive little children, deserve to be reproached by such for their sins. Those who act dishonorably with the Eternal Jehovah will never wear a crown filled with many stars; but he has promised in language not to be mistaken, that they "who turn many to righteousness shall shine as the stars forever and ever."

Beware of all sorts of little sins amongst your "olive plants." Begin at once to "take the little foxes that spoil the vines." T. S.

The Weather-Guage.

The senior Dr. Alexander, of Princeton, being once aked whether his assurance of an interest in Christ was strong, replied, "Yes, except in a North-east storm!" Bad weather always lowered his spiritual temperature; the sunshine revived him. Now this does not make piety to be the product of meteorology. But such facts do show that spiritual phenomena are affected by physical conditions, or what everybody knows, that body and soul are so intimately connected as to act and react one upon the other. And this interaction is not to be ignored in our spiritual *diagnosis.* If we do so, we shall make many a blunder, and perhaps do irreparable injury to some delicate organization. Had the seraphic Dr. Payson understood this matter as well as did Dr. Alexander, he had been no less seraphic, but might have spared the world some morbid nervo-dyspeptic experiences, which are worse than useless. There is too much pious twaddle about this subject. Most profoundly do we believe in spiritual and Satanic influences, in grace and prayer, in watching and fighting; but as truly do we believe in atmospheric and gastronomic influences, in sunshine and east winds, in cooking and sleeping, in exercise and creation, in fun and frolic, in romping with children and being children ourselves. There is a time to pray—alas! there is too little praying; and there is a time to play—alas! there is often too little playing. Some good men are "dying of dignity."—*Examiner and Chronicle.*

Profane Swearing.

"Above all things, swear not."

Profane oaths betray pride, ignorance, alienation, and atheism. If we take Webster's definition of swearing, which is "to affirm with a solemn appeal to God for the truth of our declaration," we must regard it as no less than solemn mockery, like the purple robe intended to inflict the highest indignity upon our blessed Savior.

We may, therefore, regard this sin, however ignored by men, as one which our Maker will never tolerate. It is, in fact, openly defiant of God's judgments, and utterly inexcusable, for it is persisted in when its criminality is acknowledged.

The error is quite common with some persons to excuse profane language as a venial fault, because "it does not hurt anybody." But it *does* do hurt, great mischief. But even if it did *not* injure our fellow-men, its guilt must be measured by the authority contemned; rather than by the amount of injury inflicted, for He that said, "Thou shalt not kill," said, also, "Swear not at all."

Some sins are cured by a progressive refinement; not so with this, for it obtains countenance, I am sorry to say, from men who move in the more intelligent and refined circles.—*Evangelist.*

What is not Charity.

It is not charity to give a penny to the street mendicant, of whom nothing is known, while we haggle with a poor man out of employment for a miserable dime. It is not charity to beat down a seamstress to a starvation price; to let her sit in her wet clothes sewing all day; to deduct from her pitiful remuneration if the storm delays her prompt arrival. It is not charity to take a poor relative into your family and make her a slave to all your whims, and taunt her continually with her dependent situation. It is not charity to turn a man who is out of work into the streets with his family because he cannot pay his rent. It is not charity to exact the utmost farthing from the widow and orphan. It is not charity to give with a supercilious air and patronage, as if God had made you, the rich man, of different blood from the shivering recipient, whose only crime is that he is poor. It is not charity to be an extortioner—not though you bestow your alms by thousands.—*United Presbyterian.*

The Poor Man's Wish.

I asked a student what three things he most wished. He said:

"Give me books, health, and quiet; I ask for nothing more."

I asked a miser, and he said:
"Money, money, money."
I asked a pauper, and he faintly said:
"Bread, bread, bread."
I asked a drunkard, and he called loudly for strong drink.
I asked the multitude around me, and they lifted up a confused cry, in which I heard the words:
"Wealth, fame, and pleasure."
I asked a poor man, who had long borne the character of an experienced Christian. He replied that all his wishes might be met in Christ. He spoke seriously, and I asked him to explain. He said:
"I greatly desire three things: first, that I be found in Christ; second, that I may be like Christ; thirdly, that I may be with Christ."
I have thought much of his answer, and the more I think of it, the wiser it seems.—*Chris. Instructor.*

Young Folks.

"Thou Shalt not Steal."

"Where did you get those cherries, Frank?" asked Charlie Littlefield of Frank Dow, his schoolmate, as they were walking towards school one morning.

"Down in old Clark's garden," replied Frank. "Won't you have some?"

"No, I thank you. Did he give you leave to take them?" inquired Frank.

"Of course not! It ain't likely the mean old fool would be so generous," said Frank.

"I know he is mean, but still I don't think it is right to take his fruit without license," answered Charlie.

"Yes, 'tis too! He wouldn't do anything with them, but let them spoil, if I hadn't taken them;" said Frank, "and I'm going to help myself. Say! don't you want to go to-night and get some with me?"

"No; I don't think it is right to steal them, even from so mean a man as he is," answered Charlie.

"Well, I'm going, anyhow, and if you won't go with me, I know who will. Tom Baxter will be glad of the chance. He's a jolly fellow, always ready for sport, and in for a good time."

The two boys had by this time arrived at the school-house, and a game at foot-ball put a stop to their plans for the present; but just as the school-bell rang, Frank Dow had a chance to speak alone with Thomas Baxter, a boy of about his own age, who, as Frank had said, was always ready to take a part in anything that Frank proposed. Thomas was not a very bad boy, but he loved excitement, and his propensity for fun had been the means of getting him into many a scrape which his better judgment would not have sanctioned. So, when Frank said he knew where there was a good chance to get some cherries, "if he dared to go with him," it was enough for Tom. He would not be dared by Frank; besides, there was a prospect of some sport, for "old Clark" had threatened to whip the first boy he should catch stealing his fruit. Promising Frank that he would go with him, the two boys entered the school-room.

The day passed quietly, as usual. Charley Littlefield was the only one of the three boys, who had perfect lessons. Tom and Frank were both dull scholars, but to-day their plans for the night had so much taken up their attention that they had neglected their studies more than usual. However, they succeeded in getting off with a few bitter remarks from their teacher and a promise to do better in the future. To Charlie Littlefield the teacher spoke encouragingly, and complimented him upon having his lessons so well.

Once more out of school, the boys were on their way home. Charlie and Frank lived in close proximity to each other, and Thomas did not live far from them. As they all had to go in the same direction, and were the three largest boys, they kept together going home.

"Charlie is afraid to go with us to-night," said Frank.

"Is that so?" asked Tom of Charlie.

"No, I am not *afraid* to go; but I don't think it would be doing as I wish to be done by to steal Mr. Clark's fruit," answered Charlie.

"Hear him preach," said Frank. "One would think he was a minister by the way he talks. Old Clark is a mean old covey, and he wouldn't give a boy a cherry to save his life."

"That's so," said Tom. "Charlie can't say anything in favor of Clark. I remember the time I wanted him to give me a ride home from the depot last winter, and he wouldn't do it, because he said I had no business there, and I had to walk all the way home alone, just because he was so mean."

"Well, that don't make it right to steal his fruit. The Bible says, 'Thou shalt not steal,'" said Charlie.

"O I don't believe the Bible meant anything about taking a few cherries. But it's no use talking to him, Tom, he won't go with us," said Frank. "Well, here I am at home. Now, Tom, be on hand at the time appointed, and we shall have some fun."

Tom said he would be there, and he and Charlie walked on in silence until they arrived at Mr. Littlefield's, and then, bidding Charlie good-night, Tom walked on alone.

The evening was quite dark and cloudy, and looked like rain, but this was all the better for the two boys' plans, for they knew just where to go, and they would not be so likely to get caught in the dark, as they would if it were bright moonlight.

At eight o'clock, the time agreed upon by them, the two boys met at what was known as "Clark's corner." Probably called so from the fact that all the land and buildings in that vicinity belonged to Mr Clark, a man not generally liked by the boys, as has already been seen.

"You are the right kind of a fellow to go on a scrape with," said Frank. "I didn't know but Charlie would talk you out of the notion of going."

"O, no; after I have made up my mind to go I wouldn't back out," replied Tom.

The two exchanged a few more words, and then started for the garden, which was situated just behind the house where Mr. Clark resided. The trees were quite thick, and through the middle of the garden there was a large brook which had to be crossed as they approached from the back side. There was only one place where they could jump across, and that was difficult to find in the dark, but after a few moments Frank spoke in a low voice to Tom, saying that he had found it. They quickly sprang to the opposite side and in a few moments were under the very tree where Frank had been before. The branches were high, and it was some trouble to get into it, but this they finally did do, and at last found what they coveted so much. The cherries were thick and large, and it did not take long to fill the small basket they had brought with them. At first they had been quite still and had only spoken in low tones, but gradually they grew bolder, and at last they talked quite loud.

Suddenly a gruff, angry voice was heard directly under the tree, saying:

"Come down out of that tree, yon young scamps, or I'll shoot you!"

They could hear the click of a pistol, and did not doubt that he would keep his word, for it was old Clark himself, armed with a pistol in one hand and a horsewhip in the other. The boys dropped their basket at the first sound of his voice, and were not long in following, themselves.

Tom attempted to drop, but his foot caught in a lower branch and caused him to fall upon his side, breaking his right arm in two places.

While Mr. Clark was attending to Tom, Frank succeeded in reaching the ground safely, and springing to his feet he darted away; but in his haste he missed the place where they had crossed the brook, and hearing Mr. Clark calling for him to come back and help him to remove Tom, he thought he was pursued; so springing with all his might he attempted to leap the brook. It was very wide at this place, and the best he could do was to land on the very edge of the bank; before he could catch hold of anything the bank gave way, and he was in the water. He could swim, but the current was so strong, and his feet became entangled in some long grass which made it quite impossible, and he was forced to call loudly for help, and becoming excited, he floundered about helplessly. He had sank twice before Mr. Clark could get him out of the water, and when he had done so, was so weak that he could not move. Mr. Clark had to go after the parents of the boys, and they finally succeeded in getting them home, but it was a long time before either of them could go out of the house again.

Frank had taken a severe cold, and a fever followed, causing him to lie in bed for the next six weeks. Thomas did not have to stay in the house so long, but the pain which he endured with his broken limb lasted a long time, and it was many days before he recovered the use of it.

Suffice it to say, that both boys learned a sad lesson, which time could not efface. They became wiser and better boys, and to-day you cannot find three more honest, upright men in the town where they reside than Frank Dow, Thomas Baxter, and Frank Littlefield.

Boys, learn a lesson from this story, and remember the eighth commandment: "Thou shalt not steal."—*Portland Transcript.*

A Lie Sticks.

A little newsboy, to sell his papers, told a lie. The matter came up in Sabbath School.

"Would you tell a lie for three cents?" asked a teacher of one of her boys.

"No, ma'am," answered Dick, very decidedly.

"For ten cents?"

"No, ma'am."

"For a dollar?"

"No, ma'am."

"For a thousand dollars?"

Dick was staggered. A thousand dollars looked big. Oh, would it not buy lots of things? While he was thinking, another boy behind him roared out,

"*No, ma'am!*"

"Why not?" asked the teacher.

"Because, when the thousand dollars is all gone, and all the things they have got with them are gone, too, the lie is there all the same," answered the boy.

It is so. A lie sticks. Everything else may be gone, but that is left, and you will have to carry it around with you, whether you will or not—a hard, heavy load it is.—*Chris. Intelligencer.*

Early on the Right Track.—"Mother thinks I'm too young to take the temperance pledge," said Johnny; "but I don't think so, because, you see, the younger I take the right stand, the better; and isn't it always best to *start* right?"

So people say about the young people and the church, "too young to join the church;" but they belong to dancing clubs! Oh, consistency!

NEWS SUMMARY.

PACIFIC COAST ITEMS.

BIG MEADOWS.—There are few places in California that can compare with the Big Meadows as a desirable summer resort. At the present time there are not less than fifty families permanently located in and around the Meadows, and perhaps as many more transient ones from the lower valleys, who are making it a place of recreation, hunting, fishing, etc., during the hot months. An enterprising individual, Dr. W. Pratt, has laid off a town at the Big Springs, on the south side of the Meadows. The Doctor intends building a place of accommodation for invalids, where they will receive medical attendance at his hands. The citizens in and around the town have applied for a post-office. The prospective town mentioned above, and already having the marks of prosperity about it, is located at the junction of the roads leading from Oroville and Chico to Susanville and Indian Valley. We predict for it a successful future.—*Quincy National.*

THE Martinez *Express* relates the following: "An old gentleman of Contra Costa County, passed through bankruptcy some time since, retaining as his homestead 160 acres of land. This has recently enhanced in value. He sold half of it, paid all the debts from which he was legally released, and now has not only 80 acres, worth many thousand dollars, but the recollection of a noble deed performed, which will prove a pleasure to him even to his grave."

THE indications at present are that neither the Union nor the Central Pacific Railroad Company will stop on reaching Salt Lake City, but that they will press on and complete each its own line across the Continent. One line of railroad will accommodate the public very well at present, but it is probable that in a few years there will be work for two or more.

MOUNT BAKER was recently ascended by a party of gentlemen who, with great difficulty, succeeded in reaching the summit of the peaks, for there are two of them, which they named respectively Grant and Sherman. Between the two peaks there is the crater of a volcano, 300 feet wide and 600 feet deep, from which sulphurous vapor is constantly emitted.

THE WOOLLEN MILLS.—We are informed that the woollen mills, at Merced Falls, have been completed, and were set in operation on Thursday last. We regard the manufacture of woollen goods in this county as a business that will aid more to immediately benefit the county than any enterprise now in contemplation within our borders.—*Merced Herald.*

THE Corvallis *Gazette* speaks of a field of wheat containing 25 acres, in that vicinity, in which at eight o'clock in the morning the grain was waving in the breeze, and at sundown it was cut, threshed, cleaned, sacked, hauled to the city, and placed in a warehouse. Quick work, that.

ON Wednesday last, the 17th anniversary of the admission of California into the Union was celebrated by the Society of Pioneers of this city, assisted by several Pioneer Associations from the interior. The exercises of the day consisted of an oration, poem, and military parade and review.

THE California, Oregon, and Mexican Steamship Company have announced their intention to dispatch a steamer to the Sandwich Islands every three weeks, and if the business continues to increase, they will make semi-monthly trips.

THE Second Annual Fair of the Butte County Agricultural Society will commence on September 29, and continue through the week. We acknowledge the receipt of a complimentary ticket from the Secretary, C. L. Stilson.

SECRETARY SCHOFIELD has ordered a board of officers to assemble in San Francisco on October 1st, to ascertain and recommend the most suitable armament for the different forts on the Pacific Coast.

THE Sacramento *Bee* speaks of a well at the works of the works of the railroad company beyond Sutter Lake, the water of which is strongly impregnated with iron, and possesses remarkable medicinal properties.

THE first native of Reno made her appearance last week, and claims the fifty acres of land offered by a citizen of the place to the first born child.

THE C. P. R. R. Co. has let a contract for one hundred miles of road beginning at the north end of Salt Lake, to parties in Utah.

THE submarine telegraph connecting Vancouver Island and the island of San Juan was finished on the 7th inst.

THE benefit of the Protestant Orphan Asylum at the Fair on Wednesday, netted that institution nearly $1,000.

A NEW charitable society, called "The Mutual Provident Association," has been formed in this city.

PHYSICIANS report that the number of new cases of smallpox in this city is rapidly decreasing.

THE cupola of the Masonic Temple is being covered with slate from the Marine quarries.

GREAT quantities of wheat are being stored for shipment at all points on the Willamette.

A WHALE about forty feet long was seen near the shore at the Cliff House on Monday.

A LINE of telegraph is to be built immediately between Marysville and Colusa.

THE Dutch Flat *Enquirer* has suspended.

TELEGRAPHIC.

EASTERN.—Gen. Rosecrans says that his policy in Mexico will be opposed to annexation and filibustering....There have been rumors of a conspiracy in the interest of President Johnson to injure the reputation and cause the arrest of Commissioner Rollins. The President denies any such intention. ....At the State Democratic Convention in New York, on the 2d inst., Mayor Hoffman was nominated for Governor and A. C. Beach for Lieut. Governor....The Republican majority in Vermont is 30,000....Ex-Governor Seymour, of Connecticut, died at Hartford on the 3d inst....Secretary McCullough favors the election of Seymour. Gen. Dix, Cassius M. Clay, and Gen. Fowler, of Tennessee, are for Grant....London contractors offer to build the underground railroad in New York, and find the capital....The Internal Revenue receipts for July and August amount to $34,000,000. ....It is said that the Secretary of War has sent an armed force to Kentucky to sustain the Courts.

SOUTHERN.—The Democrats in Arkansas still seem disposed to control the politics of the State by force....The Georgia House of Representatives has passed a resolution making negroes ineligible to seats in that body, thus unseating 25 colored members elected under the new Constitution. ....The Assembly of Tennessee concurs in the Senate resolution to demand aid from the President....The Militia Bill will probably fail in Tennessee....The Democrats propose to eject all objectionable persons from the Georgia Legislature....A colored Senator in New Orleans threatens that the city will be burned unless the work of murdering men for their politics or color is stopped....The heavy rains have done much injury to the cotton crop in Georgia.

FOREIGN.—In the case of the Fenians, convicted of treason against the British Government for acts committed in the United States, Secretary Seward has requested their release, but Lord Stanley refuses to comply with the request....John Bright desires re-election to Parliament on the ground of favoring the extension of suffrage and the disestablishment of the Irish Church....All the French authorities avow their desire for peace....The heir apparent of the Persian throne died recently of Cholera....The Turks are still getting the worst of the Cretan conflict....The English papers comment unfavorably on our recent treaty with China.

SPECIAL NOTICES.

RICHEST BOOK IN THE WORLD.—Nothing need be said in praise of the new edition of Webster's Unabridged Dictionary. Its *completeness* surpasses the thought of one who has not examined it. Add to this a vast variety of classified Pictorial Illustrations, of almost every physical science embraced in the studies of the age, with various other departments, and the work is the *richest book of information in the world.* There is probably more real *education* in it than can be bought for the same amount of money in any language. Every *parsonage* should have a copy at the expense of the parish. It would improve many pulpits more than a trip to Europe, and at a much less cost.—*N. Y. Christian Advocate.*

Heuston, Hastings & Co. keep the best assortment of Clothing and Furnishing Goods in San Francisco. Visitors to our city who want a good article in the Clothing line, will do well to call on this firm in Lick House Block, where they will be sure to find what they want at reasonable rates. Orders from the country will receive prompt and faithful attention.

Simple announcements of Marriages or Deaths inserted free of charge. Additional matter, such as Obituary Notices, or Poetry, inserted at the rate of ten cents per line.

MARRIED.

In San Leandro, Sept. 1st, by Rev J. M. Alexander, Wm. H. Gray, of Gold Hill, Nev., to Rozzie Fenner, of San Leandro.

In Virginia City, Nev., Sept. 7th, by the Rev. T. E. Taylor, James T. Gardiner, of New York, to Miss Josephine Rogers of Virginia.

CURRENT TOPICS.

When the American Chapel was opened in Paris, was supposed that it would be impossible to maintain worship in it unless some form of liturgy should e adopted, as this would be more in accordance ith the tastes and habits of the people. Those ergymen who have ministered in the Chapel from me to time, under appointment of the Foreign and hristian Union, have felt themselves to be shackled mewhat by the forms adopted, yet submitted to eir use, as a necessity. But when Dr. Robinson, tely of Brooklyn, was sent to occupy the pulpit, he as permitted by the Union, to make inquiry if a urgy was really demanded by the Church, and if t, to dispense with it in the service. To his surise, it was found that general consent to the change as cheerfully granted, and now the worship is conicted as in our non-liturgical churches, while the ngregation has never been so flourishing as since e change. This fact can hardly be taken as evince that ritualism is regarded with more disfavor mong the people of Europe than was the case ars ago, yet it indicates that it is not more imperave, notwithstanding the prominence which many e inclined to give it. It should at least convince ose who advocate the introduction of more forms o our ordinary worship in this country, that these e not essential to the prosperity and advance of y real Church of Christ. "Where the Spirit of e Lord is, there is liberty," and any kind of liturgy ikely to prevent, rather than promote, true inter- in devotion.

When Dr. McCosh was offered the Presidency Princeton College, several wealthy gentlemen in w York contributed a fund, independent of the llege treasury, for his support. The compliment s delicate, and must be very pleasant to the new esident, as most of the money, perhaps all of it, e given by his fellow-countrymen from the other e of the Atlantic. Yet it suggests the considera- of a general fact, which all our institutions of rning may do well to heed. The salary paid se who serve as Presidents and Professors is genlly quite an amount less than these gentlemen ld attain were they to occupy other positions. ny find it impossible to support themselves, unless they resort to other means by which to increase their income, and even then they must be economical, or fall into debt. The result is, that when a vacancy occurs, a man must be accepted who is not the right man for the place, or the right man can only be induced to take it because he is an enthusiast in the department of study offered him, or has money with which to supplement his salary. It is safe to say that Dr. McCosh could not have been obtained for Princeton with the offer of the salary allowed by the Trustees to the President, simply because he could not have lived comfortably upon it. Would it not be wise for the friends and supporters of all our colleges and seminaries to increase the sums paid to those who conduct them? The demands from other quarters for the talent these men possess may remove them from the chairs they now occupy, and neither the Church nor the cause of learning can afford the sacrifice.

Dr. Kendall, in a letter to the *Evangelist*, speaks of two things which attracted his attention in Hungary. One was the general want of laboring men in the farming portions of the country. There were vast fields of wheat, oats, and Indian corn, all rich with the harvest, yet no laborers could be found to gather it, and 36,000 soldiers had been furloughed from regular duty to gather the crops. This seems strange to us, when we know that thousands of able-bodied men are brought from Europe to this country every year, and the new temptations here are likely to increase the number, for whom we have been wont to suppose there were few attractions on that continent. No doubt the political condition of most European nations is a serious occasion for the removal of so large a portion of what must be their life-blood, and the necessity of the case will lead to a state of things more favorable to the common classes. The other thing mentioned by Dr. Kendall is the inviting prospect before those who should now attempt, by vigorous effort, to evangelize Hungary. He finds the people neither effete nor effeminate, and thinks they are prepared to welcome colporteurs and all agencies, the object of which is to spread the Gospel and propagate Protestant Christianity. Dr. Kendall is a very careful observer, and well qualified to judge wisely respecting such a question, and his relation to the Foreign and Christian Union renders it probable that that society will be moved to do more than hitherto for a field so promising. If so, the churches should abundantly sustain them in the effort.

The rectors of the leading Episcopal churches of the Low Church division, in Brooklyn, N. Y., have issued a circular which, in some respects is remarkable, even when the persecution of that party by the dominant influence in the Church is considered. They feel the need of support from all who are in sympathy wiih the stand they have taken, and in this circular they give an epitome of the sentiments for which they are censured. They are "in favor of an unrestrained liberty to preach the Gospel under all proper circumstances, an unrestrained liberty of holding full and reciprocal fellowship with all who love our Lord Jesus Christ, the liberty to those whose consciences demand it of omitting those expressions in the baptismal and communion offices, and in the catechism, which are believed by all the sacramental party, and by many of the evangelical party, to teach, or at least countenance, the dogmas of priestly sacrifice, baptismal regeneration, and the 'real presence,' until the same can be eliminated, or alternative forms provided by a revision of the liturgy." Such an appeal ought not to be vain. These brethren deserve sympathy and support from all Christians who believe they are right. They are Episcopalians; they have a right to their place in the Church they prefer and love, and they ought to be unmolested in this place so long as they are loyal to the Constitution of the Church. It may be that the High Church portion would not regard the fact, were all evangelical Protestants to express sympathy with those whom they denounce, but it would be a just exhibition of liberal evangelical feeling, and it would strengthen men who feel that they are called to bear a grievous burden for the sake of the truth. There is no evidence that they are seeking only notoriety, as is charged, but they are good men and true to their Master and His cause, and they ought to be sustained.

Harvard College may learn that no institution, however well endowed and popular, can afford to disregard the wishes and convictions of those from whom must come at least a portion of its support, if one of the late reports respecting it is true. The statement is freely made, and has not been contradicted so far as we know, that at the last public dinner of this College, wine was used by the consent and approval of the College authorities. There are not many, even of those who drink wine themselves, and might not object to its use by the officers of a public institution to which they have sent their sons for education, if confined to their private circles or to their homes, who will be startled by this public and official approval of wine on the part of the authorities. And there are multitudes of temperance men who will never commit their sons to the care and example of those who thus throw contempt on their most solemn convictions. It surely may be hoped that the statement is unfounded, and we have looked for a denial of it, but if it shall prove to be true, we most sincerely lament the folly that finds such an expression. It can be little less than trifling with their welfare to place boys in the midst of such an atmosphere as this fact indicates, and there are but few who will not look with real anxiety for evidence that this time-honored institution has closed the door to a multitude of evils, which it so carelessly opened.

From week to week we see, in *The Banner of Progress*, notices reading as follows: "The San Francisco Children's Progressive Lyceum will assemble on Sunday afternoon," etc. We presume these meetings are held as announced, and that the children

assemble to receive instruction. What kind of instruction they receive we know not. It may be the very best. We fear it is the very worst. Members of the several *Christian* denominations teach their children what they themselves believe. It is probable that Spiritualists strive to inculcate in the minds of the young their own peculiar doctrines. We consider these doctrines dangerous—not because they are "liberal," or "progressive," but because they are the reverse, or anti-Christian. Perhaps we mistake their nature. We admit that we have never attended a "séance," or fully investigated the ennobling tendencies of table tipping. We judge the doctrines of Spiritualism by the same rules by which we are willing that the various denominations of our own religion should be judged. The Spiritualist Press, so far as we are acquainted with it, openly teaches opposition to the most cherished tenets of Christianity and morality. Many of the prominent Spiritualist speakers are so shamelessly blasphemous that no Christian can listen to them without a shudder. Very many of the believers in Spiritualism are not what are generally considered moral men and good citizens. We have heard of pure minded, honest men who have accepted the apparently ridiculous theories of this belief. Doubtless there are such men. It is *known*, however, that Spiritualism has caused a vast amount of insanity. It is *known* that the peace of many families has been wrecked by its influence. We have *never* known any one made better or happier by it. In view of these considerations, can it be regarded as "illiberal" on the part of Christians to fear the results of these "Progressive Lyceums."

Religious Intelligence.

PACIFIC COAST.

Notice.—The Synod of the Pacific will hold its next annual meeting on Thursday, October 1st. Opening sermon by the retiring Moderator, Rev. J. S. McDonald, at 7½ P.M.

John Edwards, Stated Clerk.

The Presbytery of Benicia will hold its next semi-annual meeting in the Two Rocks Presbyterian Church, on the last Friday of September, the exercises to commence with a sermon from the retiring Moderator, Rev. James Woods, at 7½ o'clock, P.M.

A. Fairbairn, Stated Clerk.

Abstract of Minutes of the Presbytery of California at its Fall Meeting.

Presbytery met in the Larkin Street Church, Wednesday, September 9th, 1868, at 7½ o'clock, P.M., and was opened with a sermon by Rev. Chas. R. Clarke, retiring Moderator, from John x: 17, 18.

Rev. John H. McMonagle was elected Moderator, and Rev. H. R. Avery, Temporary Clerk.

Rev. James Eells, D.D., Rev. A. W. Loomis, and Elder J. D. Arthur were appointed a committee on the minutes of the General Assembly, with instructions to bring in a report at 2 o'clock, P.M., on Thursday.

Thursday morning the first half hour was spent in devotional exercises, conducted by the Moderator, after which, the Rev. J. H. Marr, a licentiate under the care of the Central Presbytery of Philadelphia, laboring in the southern part of the city, made a statement of his progress, and asked the appointment of a committee to organize a church, if the way be found clear. Rev. S. T. Wells and Elder Bancroft were appointed said committee.

The First Church was selected for the place of next meeting.

The Committee on Minutes of General Assembly presented the following report:

"Your Committee report, that they have examined the minutes, and would call attention of Presbytery to the following items:

"The Boards and Committees of the Church are represented as needing more and more general support, many churches being reported as not contributing anything to some of them, and others as only supporting a part of these agencies of the denomination. Presbyteries are requested and enjoined to give attention to this matter; therefore, the Committee recommend the following resolution:

Resolved, That our churches are hereby reminded of the facts so communicated, and urged to give their serious attention.

The Assembly commends the *Sabbath School Visitor* and *Children's Praise* for use in our Sunday Schools. There is a recommendation that an order be adopted by Congress, forbidding the appointment of more than one-fourth of the Chaplains of the army and navy from any one denomination; that temperance be urged upon the attention of our people, that they may adopt all Scriptural measures to suppress the sin of intemperance. That Sessions and Presbyteries seriously consider the matter of employing laymen as expounders of the Word of God. That all Presbyteries make returns to the next General Assembly of the number of unbaptized children, either of whose parents may be a member of the Church, and that the duty of systematic benevolence be more generally regarded by our churches. Upon all these subjects the Committee recommend that Presbytery urge them on the attention of our churches.

On the subject of reunion, the Assembly has sent down the Basis for such reunion for the consideration of Presbyteries, that each Presbytery may vote whether it shall be accepted or not. Therefore, we recommend the following resolution:

Resolved, That the Presbytery of California approve the Basis submitted by the General Assembly for our consideration, and the Stated Clerk is hereby instructed to forward this action to the Stated Clerk of the General Assembly.

The last resolution is reported by the majority of the Committee, one being not in favor of it.

Respectfully submitted.

James Eells, Chairman."

All the items of the above report, with the exception of the last, on the subject of reunion were unanimously adopted.

Rev. A. W. Loomis, from the Committee on Minutes of the General Assembly presented the following minority report on the subject of reunion.

"*Whereas*, The Basis of Union proposed by the 'Joint Committee,' and sent down to the Presbyteries by the General Assembly, may be construed as giving license to hold and to preach unsound doctrines, and because its adoption may put in jeopardy a large amount of funds and valuable property belonging to our Church; therefore

Resolved, That this Presbytery declines to accept said Basis of Union.

Resolved, That this Presbytery is still, as it ever has been, ardently desirous of a union of the two General Assemblies, if it can be consummated on the basis of the Confession of Faith, pure and simple, with the Larger and Shorter Catechism; and that, at the proper time, we will overture our General Assembly to make such a change in the Basis of Union, since we believe it will then be acceptable to both branches of the Church, and may also lead to a union with us of all the other branches of the Presbyterian Church in the United States."

On motion of Elder J. D. Thornton, this last report was offered as a substitute for that of the majority.

After considerable discussion, in which a number of the brethren participated, a motion prevailed, to postpone the further consideration of the subject of re-union until the next regular meeting of Presbytery in March, 1869.

Rev. M. M. Gibson, of the United Presbyterian Church, being present, was invited to set as corresponding member.

Presbytery adjourned, to meet at the call of the Moderator.

Jno. G. Fackler, Stated Clerk.

To the Friends of the Sunday School Cause in California.

San Francisco, September 1st, 1868.

The undersigned, California State Sunday School Executive Committee, beg leave to call your attention to the following Resolution, unanimously adopted by the State Sunday School Convention, held in San Francisco in June last:

Resolved, That we recognize in the institution of the Sabbath School one of the most blessed and efficient instrumentalities, under God, for promoting early religious culture, whereby our children may be "planted in the house of the Lord, and may flourish in the courts of our God;" and that the pressing claims of the present, and the foreshadowing responsibilities of the future, demand in this direction united, zealous, and intelligent efforts on the part of all who love our Lord Jesus Christ.

These Conventions and Institutes have accomplished much good in the Eastern and Western States, and the few that have been held in this State have been highly appreciated, and acknowledged blessings to the cause. The reports of the last State Sunday School Convention, and our own experience and observation as well, show a great need and pressing demand for greater activity among the friends of the cause. While we gratefully acknowledge the good that has been done in our schools, we feel that the good work has only begun. Are we fully awake to the importance of our work? Are all the children gathered in, and are those who are in our schools receiving as faithful instruction as they should? Are we, as teachers and officers, as efficient as we should be? Do we feel the great responsibility resting upon us, as those who have to train immortals for eternity? In a word, are our Sunday Schools what they might and *should* be? *Far from it.* Until we can give a decided affirmative answer to these questions, we must not rest satisfied. The fearful increase of infidelity, and sin in all its forms, the many temptations continually besetting our children and youth on every hand, the future well-being of society and State, as well as individual and Church, all these call on us loudly to awaken to more earnest action. We are *not* awake to the demands of the cause. Our children are continually exposed to danger, while too few are brought to Him who says "Suffer the little children to come unto me."

In view of all these things, your Committee begs leave to earnestly recommend that the Sunday School laborers of California arouse to renewed action. Organize your counties by calling Sunday School Conventions, where you can awaken more interest by discussing the many important questions relating to the good work, give each other the benefit of your experience, and thus learn the best methods of "feeding the lambs."

Plan of Operation.—Let the friends in some central part of the county issue a call, inviting all to a preliminary meeting, at which you can decide on a time and place for holding the Convention. Then appoint a Committee (not too large) to prepare and circulate a programme, and provide entertainment for delegates from abroad, *thoroughly advertise* the Convention by circulars, newspapers, etc., and make all necessary arrangements for the Convention. Five or six circulars containing the programme should be sent to each school at least three weeks previous to the Convention. Also, circulate blanks

for gathering statistics, (see enclosed samples) and send a copy of them to the State Sunday School Corresponding Secretary, R. J. Trumbull, Esq., San Francisco, *before* the State Sunday School Convention in April next.

Please appoint the President of your Convention, or some other suitable person, as a delegate at large to represent your county at the next State Sabbath School Convention, and report the condition of the cause in your county. Also, appoint an alternate.

With all, and above all, make the Convention a subject of earnest prayer, for without God's blessing, no good will result.

With these few suggestions, dear brethern, we commend the work to your most earnest consideration, with the fervent prayer that God's richest blessing may attend you and your work, and that when we assemble in our State Convention next year, we may all be able to come up reporting "what great things the Lord has done for us."

Yours, fraternally,

J. A. Eaton, Secretary.

Gen. E. B. Babbitt, Chairman.

Rev. Jas. Martin,	Rev. Jas. Wylie,
L. B. Benchley,	Wm. H. Coddington,
Edward Barry,	E. R. Stockwell,
W. K. Hudson,	S. B. Stoddard,
A. C. Sweetzer,	Wm. F. Peters,
	Executive Commiteee.

Note.—The proceedings of the Convention will be published this month. Those who wish copies (at 50 cents each, 6 copies for $2 50) will apply to

R. J. Trumbull, Corresponding Secretary.

Festivals, etc.—A "Harvest Home Festival" was held by the ladies of Unity Church, Santa Cruz, on Wednesday and Thursday evenings of last week. An original poem, entitled "Santa Cruz," by Mr. Ames, was an attractive feature of the occasion.

The Fair for the benefit of the Nevada Orphan Asylum will open on Thursday, Oct. 1.

The Sacramento *Record* says that the ladies who have charge of the Protestant Orphan Asylum have secured the right to sell refreshments of all kinds at the Pavilion during the Fair, the proceeds to be applied to the support of the orphans. This a laudable undertaking—one which should touch the hearts, and we feel assured, from the liberality generally displayed by the Sacramentans, it will touch their pockets also.

The ladies of the First Presbyterian Church of San Jose will hold a Grand Festival on Wednesday and Thursday evenings, September 30th and October 1st.

Friends of Peace.—The meeting of the Friends of Peace, or, in other words, the "Educational Peace Society," held at the City Hall the other afternoon, was not a success, only some half dozen persons being in attendance. An elderly gentleman of very mild demeanor presided, and read a draft of constitution and by-laws to govern the proposed Association, and which was said to have been given by spirit power. A letter was read from the President of the Pennsylvania Peace Society, after which the meeting adjourned. It looks as though our people were of the opinion that a little fighting, now and then, is necessary 'mong the best of men.—*San Jose Mercury.*

Camp Meetings.—The camp meeting recently held at Roseburg, Oregon, under the care of Bishop Harvin, was poorly attended, but considerable interest was manifested.

The camp meeting at Los Nietos seems to have been unusually interesting. The Los Angeles *Republican* says that the attendance was large, and much religious fervor manifested in the services. A table was spread, with tea, coffee, and plenty of eatables for all visitors, which was a new and rather agreeable feature.

A Characteristic Gift.—The Sabbath School of St. John's Church, at Gold Hill, Nev., a few months since, sent a silver bar to the American Church Missionary Society, in New York, and still later, says the *Congregationalist*, a "silver brick" weighing sixteen pounds, was received from St. Paul's Sunday School, of Virginia City. It was sold for $445.

Sabbath School Anniversary.—The Fourth Anniversary of the Central M. E. Church of this city was celebrated last Sunday morning, with the usual exercises. The Superintendent, W. B. Holcombe, among other items of interest, stated that during the past year about thirty of the pupils had been converted.

Sabbath Schools in Nevada County.—At a preliminary meeting held at Grass Valley on the 7th inst., it was decided to hold a County Sunday School Convention at that place on the 29th and 30th inst. All necessary arrangements have been made to make the Convention a success.

Latter Day Saints.—A Quarterly Conference of this Society for the State of Nevada, was held at Carson City on the 12th and 13th, under the charge of Elder Blair.

New Catholic Church.—A Catholic church has just been completed at Somersville.

A Congregational Church is being erected at Walla Walla.

EASTERN.

An Interesting Table—Minutes of the Old and New School Compared.—We place in a table, side by side, the statistics of these two Churches—soon, we hope, to be united. The items are gathered from the late published minutes of both Assemblies:

	Old School.	N. School.	Un. Ch.
Synods	26	23	49
Presbyteries	142	111	253
Ministers	2,330	1,800	4,130
Licentiates	223	121	344
Candidates	326	290	616
Ministers died	42	37	79
Churches	2,737	1,590	4,327
Communicants	252,555	168,932	421,487
Added on examination	18,486	10,391	29,377
Number in S. Schools	221,340	184,687	406,027
FUNDS.			
Total contributions	$4,289,595	$3;091,885	$7,381,480
Congregational	2,919,974	2,441,086	5,361,060
Foreign Missions	285,308	108,196	393,504
Home Missions	113,109	122,848	245,957

—*New York Observer.*

Presbyterian Mission to French Setlers.—A Frenchman publishes an appeal in the *Record* for increased evangelical efforts among the French in this country, in the way of schools, pastors, and a training seminary for preachers. He says:

"Many think the French are comparatively insignificant in the United States. But let them examine the facts. Let them remember that the French population of New York alone is nearly fifty thousand. And yet there are but two French churches to accommodate them; and one of them is Episcopalian, a religion which is not at all calculated to take with the French. The French population of Chicago is somewhere about thirty or forty thousand; yet I know of no French church in that great worldly city! And in Missouri, Louisiana, and elsewhere there are many. Our church is the most adapted to occupy these fields. I am of the opinion that our church, by proper exertions, could gather many of these wandering sheep within her folds."

Baptists in New York.—In this city there are twenty-five pastors, settled over as many different churches. In Brooklyn the number of Baptist pastors thus settled is nineteen.

Called on His Merit.—The First Presbytetian church of this city have unanimously called the Rev. Arthur Mitchell, of Morristown, N. J., at a salary of $5,000, with expenses of removal. This congregation very wisely declined to invite any candidates to preach before them, but appointed a committee to take charge of the matter of inquiry for a suitable minister, and report to the congregation. Members of this committee visited the East, consulted with the leading clergymen, heard Mr. Mitchell, united upon him, reported in his favor to the congregation, when he was called as above stated. The reports that the congregation had tendered calls to Dr. Duryea and Cuyler, of Brooklyn, and Dr. Newman Hall, of London, were wholly unfounded.—*Chicago Presbyterian.*

A Flourishing Institution.—The Mount Holyoke Female Seminary, at South Hadley, has just celebrated its thirty-first anniversary. The school has 1,300 graduates and will accommodate nearly 300 pupils. None are received under the age of sixteen, and they pay for their tuition and board for forty weeks, the annual sum of $150. The buildings have cost $120,000, and a donation of $10,000 for a library has just been made by a lady, on condition that a suitable building, which will cost $15,000 shall be provided. The pupils are employed about one hour each day in performing the domestic work of the institution.—*Pittsburg Banner.*

Still Another Sect.—The Albright Methodists now number 65,000 members, their increase for the past year being 5,000. At this rate it will not be long before they count a membership of 100,000 and upward. The Methodist Episcopal Church would gladly welcome them to its fold, whence they went out years ago, and their Chicago Conference appointed a commission to the General Conference of the "Evangelical Association" (Albright Methodists), which meets in 1871, to confer with that body on the subject of an organic union.—*Evangelist.*

Longevity.—Westfield, N. J., has fairly earned a good reputation for the longevity of the inhabitants. The records of the Presbyterian church show that of 242 members deceased, the average age was sixty-nine and a fraction (69.14.) When the present pastor was settled, 1850, a new roll was made. The first sixteen on this roll have died, having lived an average of 83 years and six months, whilst the first four show an average of just 96 years.—*Observer.*

A Venerable Man.—President Hopkins of Williams College, Mass., is now the oldest in the service of any College President in the country, and his elder pupils, numbering more than 30 classes, are sending their sons to sit at his feet and listen to his teachings. The College is going to have an art gallery, with two large halls for the open library societies, to be erected just west of the gymnasium. Every third graduate of Williams College enters the ministry.—*Presbyterian Banner.*

A Failure.—The North Adams Young Men's Christian Association became a thing of the past on Monday last. Its sociables were always well attended, which makes it a mystery to some "how it could possibly have been given up?" But its prayer meetings have been so few and thin that the same wondering minds have "desired to know how they could be kept up."—*Springfield Republican.*

Recovering.—The *Northern Christian Advocate*, published at Auburn, N. Y., says: Rev. Dr. Gurley, pastor of the First Presbyterian church in Washington, D.C., and Lincoln's former pastor, is at Clifton, and is hopefully recovering. This will be welcome news to many thousands in all parts of our Republic, who have listened to his able ministry at the centre of American influence.

Universalists.—The Annual Session of the General Convention of Universalists in the United States of America was held in the City of Providence, R. I., commencing on Tuesday, September 15, 1868.

Correspondence.

To California by the Overland Route.—No 5.

The city of the Mormons is probably the most interesting object met by the traveller upon his journey overland, and it was not merely for the purpose of resting that I spent two days in its vicinity, but chiefly to learn something of the place and its inhabitants.

Taking a position at the northern extremity of the town and looking toward the South, the eye surveys a wide expanse of country lying in the form of a vast amphitheatre, beginning on the East with the mountains, sweeping around by the South in a distant range and terminating on the West in an abrupt spur, which makes up to Salt Lake itself lying upon the West and Northwest. On the North the view is circumscribed by comparatively low hills and is quite limited, while in every other direction it is extensive. Immediately in the foreground of the amphitheatre, which presents itself as has been described, lies the city of Salt Lake, and a beautiful and well-watered plain stretches away from it in every direction except the north. Situated as it is I could not but think that this plain might bear some resemblance, in a physical point of view, to the ancient valley of the Jordan, a resemblance increased by the fact that there is a river near this modern city bearing the name of the biblical stream and moreover emptying itself into a lake which in some respects is quite similar to the salt sea in which the ancient Jordan finds its rest. Whether the city so favorably situated has any points of resemblance in moral respects to those cities which at one time adorned the plain of the Jordan, is a subject on which it is unnecessary to speculate. Doubtless a certain class of immorality was and is notoriously prevalent in both.

The city, altogether, presents a very inviting appearance, physical advantages alone considered. There is a truly beautiful prospect from the town, of the glistening range lying to the east, and the sight of the snow during the warm season of the year is very refreshing to the eye. The streets are laid out with perfect regularity, and are well supplied with trees of various kinds. The entire width of the streets is *eight rods*, two rods being occupied by the side-walks, and the remaining six being given to the street proper. But that which is the peculiar beauty of Salt Lake City, chiefly impressing the mind of the new-comer, and interesting him more the longer he remains, is the system of irrigation employed; there are beautiful streams of the purest mountain water plowing down through all the streets. One stream—the main—dashes along in a paved water-course through a principal street, near the middle of the town; from this there are branch channels leading off in all directions and through these every portion of the city is abundantly supplied with water of the very best quality, which may be used for all necessary domestic purposes and beside adding greatly to the beauty and healthfulness of the city, promotes the growth of the trees lining the sidewalks, and of vegetables in the gardens. Force pumps are brought into requisition in watering the main streets at those seasons when the dust is unpleasant. The houses are, in general, built of sun-dried brick, of about ten inches in length by four deep, which seem to answer very well as building material especially where—as in many cases they are—covered with a finish of plaster. The prevailing color of the dwellings is that of the brick, a dull lead color. The yards surrounding the residences are in general spacious and filled with fruit trees and vegetables. Flowers cultivated in a tasteful manner are not often met with and it is to be observed, also, that the fences are, as a general rule, in poor repair and destitute of paint or white-wash, either of which would be a great improvement. Log cabins are to be seen here and there, and occasionally houses built of stone, some of cobble-stones cemented in a wall, some of concrete, very few of wood, probably because that material is more expensive than others.

The main business street indicates a good degree of activity in commercial matters, though I understand it is not what it formerly was. The residence of Brigham Young, President of the Church of the Latter Day Saints, having its headquarters in this city, deserves particular notice. The grounds of this modern patriarch are somewhat extended, containing ten acres of land, and lying in the centre of the city. As they are surrounded by a high and heavy cobble-stone and cement wall, and every entrance is guarded by police, it is impossible for the curious stranger to effect admission, or to explore those (far from) sacred precincts. So much is surmised by the outside world concerning the domestic arrangements of the President that I would fain have transgressed the rules which he has prudently adopted for the purpose of enjoying peace and tranquility. The enclosure contains, besides the private dwelling of Brigham, his school-house—a commodious building, made to suit the wants of a large family; his store, his corral for cattle, an indefinite family connection, and probably a great deal more besides, which I would be happy to describe had I been permitted to see it.

Another building also requires special remark, and that is the "Tabernacle," being, as it is, altogether the most remarkable building in the city—as much of a monstrosity, in the way of architecture, as is, socially and morally, the religious system it was built to propagate. It was designed by Brigham Young. It rests on 44 pillars, which are arranged in the form of an ellipse; the length 250 feet, and the width 150, and the peculiarity of the interior of the house is this: that the spacious roof rests simply and only on the walls. Rising like an immense turtle's back to the height of 150 feet, it nevertheless has no support whatever in the body of the audience-chamber. At one end there is a division for the speakers and the choir, with a reserved section for the "Fathers" of the Church. There is a stand or railing for the speakers, and in front of this railing a small inclosure occupied by some subordinate officials.

As it happened to be Sabbath when I was among the Mormons I took occasion in the afternoon to drop in and witness their religious service. On entering the tabernacle I found a very plainly seated house, without cushions, or carpets, or even curtains on the windows, and likewise a very plain and uninteresting company of people, the men wearing on their contenances the unmistakable lines of ignorance, suspicion and bigotry, the women generally without tidiness in their dress and not worthy of remark for anything besides for that bold, defiant look pecular to those ambitious of the distinction of "*strong minded.*" The manner of the services was similar, for the most part, to what is known as an "experience meeting," the exercises being singing, conference and prayer, of the last of which there was very little and what there was did not impress me favorably. The singing was conducted by a choir which was supported by an organ and directed—or *driven* perhaps would be the better word—by a chorister armed with a baton who exerted himself as much as if he had been leading a grand chorus. The speaking was purely extempore, most of the speakers introducing themselves with the remark—the truth of which could not be doubted by what followed—that they had no idea that they should be called upon to say anything. On account of the extent of the building it was very difficult, even with the aid of several devices introduced with a view of remedying the defect, for the audience to hear what was said. The general drift of that which reached my ears was intended to enjoin upon those who were there present as worshippers, the duty of submissively obeying "the powers that be" and are represented by, and in a great degree embodied in, the President of the Church. One of the speakers discoursing on the right of polygamy urged, *on the plea* of *Christian charity* (oh, how many monsters of iniquity seek for shelter in that word!) the Latter Day Saints should be permitted to enjoy their peculiar religious beliefs and to practice their peculiar institutions without molestation from those who entertained opinions diverse from them. Near the tabernacle is the site of a (on paper) splendid temple, whose foundation barely surmounted the ground and whose finely designed superstructure, bearing upon its loftiest tower in letters of gold "Holiness to the Lord," will probably never be built. From all that I heard while in Salt Lake city, I think that there is a great deal of dissatisfaction among the Mormons with regard to the tyranny of their leaders, especially of the President. It is not impossible that this abnormal religious institution of Mormonism—which never could, except by isolation, have gained and maintained its strength—is doomed to a speedy dissolution whenever it shall be deprived of that isolation, and it is certain that few regrets will attend its overthrow.

W. R.

Letter from Santa Clara County.

EVILS OF LARGE LAND GRANTS.

Gilroy Warm Springs, Sept. 1, 1868.

In no part of California are the pernicious effects of these large aggregations of land in the hands of a few individuals so manifest as in the valley of Santa Clara. There are a number of persons who own each from twenty to forty thousand acres of the best lands in the valley; and, although they cannot cultivate it all, or a tithe of it, themselves, they are unwilling to sell a foot of it at any reasonable figure, some being reluctant to sell at any price whatever; in fact, rather disposed to buy more than to part with any of the land they now own. One of these large land-holders, residing in the upper part of the valley, and owning here and elsewhere more than 200,000 acres of the best land in the State, is constantly adding to his possessions by securing desirable tracts of the public lands, or purchasing large ranches when they can be had at a bargain. These lands are rented out, in this section, at rates ranging from $2 to $8 per acre, begetting an odious system of landlordism and tenantry, and inducing a shiftless and slovenly style of farming, alike prejudicial to public and private interest. But while this evil is so wide-spread and obvious, it is not so easy to suggest a remedy. Indeed, the man who shall be able to indicate a feasible and equitable plan for its removal will prove himself a public benefactor.

In many cases the small farmers who have rented lands this season from these great *patroons*, expecting the prices of wheat to be maintained at last year's figures, will, with the present reduced rates, find it difficult to pay their rents, which have aver-

aged about $5 per acre. The custom here is for tenants to pay about $2 50 per acre where land is leased but for a single year, the price being increased where it is taken for a longer term. The reason of this is, that in the former case the landlord gets the volunteer crop that springs up the second year, and is often worth a good deal more than the rental.

HARD FORTUNE OF A PIONEER SETTLER.

At San Ysedro, a small hamlet three miles east of the town of Gilroy, resides John Gilroy, one of the first foreign settlers in California, having arrived here in 1814. Although at one time the owner of an extensive tract of land at that place, he is now without a single acre, nothing remaining of all his vast and valuable possessions but an old adobe house —not even a door-yard or garden-spot being left to him. The public roads run on three sides of the dilapidated and gloomy old mansion, that by sufferance he occupies, without an outhouse, tree, or sign of fence about it. His property was lost to him through those shiftless and improvident habits so common among most old Californians—not, perhaps, without some overreaching and fraud practiced on him by others.

Gilroy, though over seventy years old, is still hale and active, riding and throwing the riata, still his favorite pastimes, almost as well as he did forty years ago. It is his delight to own a horse and riding equipage—about the only personal property he has left to him in the world. He has a number of children by his Spanish wife; and his sons, though active fellows—being the most expert vaqueros in the country, and much sought after by stock men—have failed to acquire any property. They, however, share their earnings with their father, maintaining him in a tolerable degree of comfort, and seeing to it that he is never without some kind of a horse, to gratify his passion for riding.

The lands once owned by Gilroy are among the richest in the valley, and had he only retained a few acres of them, they would have rendered him comparatively independent. That he failed to do so is, in view of his long residence in the country and his present reduced circumstances, matter for regret, even with the stranger.

THE RAILROAD FROM SAN JOSE TO GILROY,

Now in course of construction, has made such progress that its completion early in January is assured. Three-fourths of the grading, which has been very light, is now done, with most of the material for the superstructure on the ground, with the exception of the rails, now afloat and nearly due at San Francisco. The work has been nearly all performed by Chinamen, who are found to answer for this kind of labor extremely well, using the pick and shovel with great dexterity, and learning to drill and blast with the utmost readiness, while they are docile, industrious, and possess great powers of endurance, working steadily for ten hours without complaint. The wages given them is about two-thirds that paid white laborers, with whom they are equally serviceable for the business of grading, and in aiding to lay down the track, though not so dexterous in the management of teams or the performance of mechanical labor. As there has been but little deep cutting or excavation of rock, and scarcely any high embankment required on this road, not much carting of dirt or blasting has been necessary. The country being perfectly level, and the soil free from stones, throughout the entire route, a distance of thirty miles, the work of grading has been comparatively easy, having been mostly performed with plows and scrapers, after the manner of constructing ordinary wagon roads. Following these implements come gangs of Chinamen, dressing off and putting the dyke into proper shape. The height of this embankment is not generally more than two or three feet above the adjacent surface, it being raised just enough to insure effectual drainage; as a consequence, the cost of this part of the work must be small.

This road, being considered a part of the Southern Pacific Railroad, is to be extended further south; but by what route after reaching San Juan, twelve miles from here, is not definitely known. Already active measures are in progress for the construction of a branch to connect Watsonville with this road by way of the Pajaro Valley. This branch, it is believed, will ultimately be extended to the Salinas Plains, with ramifications to Santa Cruz, Monterey, and possibly other points in that region of country.

IMPORTERS AND DEALERS IN

Norway and Bar Iron, Cast, Plow, and Toe Steel, Boiler Tubes, Gas Pipe, Fixtures, and Rivets; Case-hardened and Capp'd Half and Full Patent Carriage and Coach Axles. Also, Concord, Kinsley's, and Boston Axles, Bright and Tempered Warranted Springs, Bolts, Files, Rasps, etc., which we offer at Lowest Market Rates. Country orders solicited.

Corner of Battery and Bush streets, San Francisco, and 93 I St. Sacramento.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. San Francisco, Cal.

D. Hewes,

RAILROAD CONTRACTOR.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

The Occident.

San Francisco, Saturday, September 19, 1868.

SUNSHINE AND CLOUDS.

There is a beautiful analogy between the conditions of success in nature and in Providence. In nature we readily perceive the necessity for both sunshine and clouds, that there may be healthy and reliable growth, and we accept the changes thus indicated as the pledge of His faithfulness who has promised that "seed-time and harvest shall not cease." The necessity for such varied influences in Providence, however, that the general purpose of God for good may be attained, is not so manifest, because the object proposed is not so well understood. Were this object, in the case of an individual, that he might gain as much temporary enjoyment, each day, as possible, this enjoyment to be the satisfaction of his present tastes and wishes, there might be no more necessity for other agents than perpetual sunshine, than in the case of those plants which have such an ephemeral life. If there were no other part in the grand procession of events, for nations, than that each fill its space, having no connection with the rest, and no reference to the gradual advance of the whole, aided by the elevation and superiority of each, in succession, there might be no need of checks upon their career of fictitious and short-lived prosperity. But when it is remembered that Providence includes individuals in the economy by which the race is to be blessed, and that this blessing, for each and for all, is the discipline by which a higher life, and a permanent worth, and a glorious destiny, may be possessed; and that respecting every nation, it is that by its increase of strength, and virtue, and regard for right and truth, it may lay foundations for lasting prosperity, and forever augmenting power to bear upon other nations and to the end of time, in support of the spiritual kingdom of righteousness on the earth, we see that with all the counteracting influences which exist, there is need of means diversified, direct and indirect, gentle and severe, or the object will be sought in vain. The tender annual plant requires only the genial effect of the summer's changes, to perfect its nature, and then dies. But the oak must be nourished by summer and buffeted by winter—must be compelled to force its roots far into the earth, by the rough winds that rush upon it, and tempted to put forth all its leaves for respiration, by showers and sunshine, while cold and heat, and storm and calm, and earth and air contribute to harden the wood, and extend the branches, and prolong the life for centuries.

So is it with us as to the effect of the various agencies which Providence employs to develop, and strengthen, and fortify the character we may attain. We shall not be permitted to possess it, in the midst of so many opposing influences as abound in a world of sin, without conflict, nor would our own evil hearts suffer its control without the oft repeated attempt to drive it out. There must be trouble, there must be difficulties, both because of what is without and what is within, and the faithfulness of God to the destiny He would secure for us, is seen in these very difficulties which we are made strong by encountering.

We undertake duty, and become vigorous through the toil which its discharge requires. We take up burdens, and as we bear them, learn the worth of the effort they demand. Shall we complain of the very process by which we may become what we pray our covenant God to render us? Shall the growing oak pray that it may be the giant of the wood, yet tremble when the wind whistles through its branches, and fear death when winter strips off its mantle and checks the currents of its life? The tempest and the cold have their part in making it an oak, and the answer to its prayer involves all this rough and severe, yet kindly treatment. It has its explanation in the towering height and defiant strength of the mature tree, after it has triumphed over what it feared might kill it. The result, as seen in what the discipline of Providence renders us, when sanctified to our good, must send back its commentary upon the means adopted. He who attains a breadth of Christian character, and a sublimity of Christian faith, and a clear vision of immortal life, when passing through what he calls the adverse influences of his earthly career, may be assured that every portion of the training was essential to the blessed result, and will thank God for clouds no less than for sunshine, that He was too faithful to the design ever before Him, that He loved him too much not to mingle in his discipline so large a share of the trial which gave vigor and soul to his spiritual being.

Thus, wherever Providence is studied, whether in relation to individuals, or families, or nations, we see necessity for what we call reverses, for some check upon the growth that is too rapid for the strength of the roots, and the vigor of the wood, some means by which, in accordance with the nature of free beings, and the laws of the system in which they are, the enduring and valuable qualities of the soul may be educated, and purified for eternal life; and the higher elements of associated or national existence may be developed, as nobler objects are pressed upon the support of those, who may thus more powerfully maintain the interests of truth and right. A vision of the future should perpetually glow before us, when we are passing through present troubles. This will incline us to listen to the voice of God. It will throw a kind of glory over the wrecks that may surround us, of what we perhaps too fondly hoped would abide forever. And we shall pass under the cloud with as grateful a spirit, as when we bask in the sunshine, for both are alike good.

THE NATIONAL DEBT.

There are men who claim to have the welfare of the country at heart, yet spend a large part of their time in most lugubrious conversation about the public debt. There are newspapers that claim to be loyal, yet hardly omit in a single issue to utter their forebodings respecting the enormous debt. Devices and illustrations, abundant and ingenious, are employed for the purpose of startling the multitude who think little, as they set forth the millions that are to be paid into the treasury of the Government, and all those who thus busy themselves probably suppose they are accomplishing some good. We have before us a paper in which a mathematical calculation is presented of the height, were the debt to be piled up in one dollar bills, of the height in hundred-dollar bills, of the weight in silver dollars, of the cars and the length of the train by which these dollars could be drawn, of the number of porters necessary to carry the amount, and the length of time it would take the procession to pass a given point; of the number of years to be consumed if one should attempt to count the bills, and of the bushels of wheat the debt would represent, with the cavalcade of teams reaching round the globe that should undertake to transport this wheat! This is only an illustration of what is frequently found in the papers of a certain class, and the wondering readers dwell on the figures, announce them to their neighbors, talk them over in the little village companies where the state of the nation is discussed, and the effect can be very easily imagined. Now, there can be but one of two objects, when men speak in this way about the national debt. Either they wish to prepare the people directly to repudiate it, as a means of self-preservation, or they wish to discourage the people as respects paying it, so that they will consent to some form of revolution by which they may be relieved of taxes, and no longer obliged to face a mountain that can never be removed, otherwise, from the path of advance. It hardly need be argued that both these objects are base. Every patriot should encourage his countrymen, not depress them—should seek evidence of possible success, not create proofs of certain ruin. It is very easy to weaken the faith, and darken the vision, of multitudes in the land; and it is easy to brace them up, and render them hopeful, by the exhibition of the simple facts. The man who chooses to scatter gloom and distrust, when his country is the victim, is a public enemy, unless it is absolutely impossible for light and hope to be diffused. Anything that is large can be represented by a long row of figures, if the measure is small. Were one to calculate how many times he must fill his cup, and how long it would take him to bring the waters of Clear Lake to this city with a pint measure, he would be surprised at the result. Were he to estimate the number of square inches in one of our sand-hills, and the length of time before a row of pigmies who should carry but one inch apiece, could transport that hill into Mission Bay; he would despair of its removal by any such laborers. If Clear Lake is to furnish San Francisco with water, it is not necessary to bring it with a pint cup, and there are engines and railroads with which to move sand-hills. The class of persons of whom we are speaking, seem to forget that the debt, large though it be, is to be *paid*, and that there are millions of people, by the products of millions of acres, and the resources of myriads of avenues to gain, to pay it. They choose not to observe that there may be years before it need be all cancelled, during which the productive interests of the country may be amazingly increased.

A cheerful, hopeful, patriotic people, proud of their nation, and resolved on its prosperity, with the facilities of which we may avail ourselves, and our prospective population within twenty years, need have no fears because of our debt. The only occasion of discomfort from it is in the attempt to pay it too soon. There is no necessity for haste, and any of these mathematical croakers who publish so many figures like those to which we have alluded, will be glad if they are able to take the bonds of the Government, if no more than the interest is paid during their lifetime. It is time we heard the last of such unworthy attempts to bring the nation into bankruptcy. Good men should have faith in God, and have faith in their country, and, by their prayers and their efforts, open a wide field over which to make progress. Party names need not be regarded in this purpose, but all who are proud of citizenship in a land blessed of God above any other, should "touch elbows" in its execution.

Baptism at the Day of Pentecost.

Jesus Christ, after his resurrection, directed the disciples to tarry at Jerusalem until they should receive the promise of the Father, and be baptized

with the Holy Ghost. What was this spiritual baptism?

Let us note, in this connection, 1st. That the gifts of the Holy Ghost are essential to the existence of Christian life in the individual believer, and the establishment of Christianity in the world. Here are the words of the Great Teacher: "Except a man be born of water and the Spirit, he cannot enter into the Kingdom of God. But tarry ye in Jerusalem until ye be endued with power from on high." As there can be no question as to the absolute necessity of the supernatural gifts of the Spirit in the conversion of man, and the establishment of Christianity in the world, I proceed,

2d. To take note of the Scripture narrative, and see after what manner these gifts are administered to man. There are two cases of the bestowal of the gifts of the Spirit on the Church, which may be taken as exponents of the mode in which He is pleased to manifest His gracious influence on the hearts of men. These two cases are of marked importance, because of the distinctness of detail in the narrative; the peculiar relation which they have in the establishment of Christ's Kingdom on earth, and the general likeness and conformity of all other cases of the Spirit's manifestation to these two of peculiar importance and significance. I refer, of course, to the outpouring of the spirit at the day of Pentecost, and the gift of the Spirit to Cornelius and his friends—the one the inauguration of Christ's Kingdom on the earth in the preparation of the Apostle for the preaching the Gospel; the other, to substantiate the Divine annunciation that the Gentiles, with the Jews, were to become recipients of the blessings of the Gospel.

The first case—the pouring out of the Spirit at the Day of Pentecost—is in Acts, 2: 1, 4: "They were all in one accord in one place, and suddenly there came a sound from Heaven as of a rushing, mighty wind, and it filled all the house where they were sitting, and there appeared cloven tongues like as of fire, and it sat upon each of them, and they were all filled with the Holy Ghost."

The other is recorded in Acts 10: 44: "While Peter yet spake these words, the Holy Ghost fell on all them which heard the words. And they of the circumcision, which believed, were astonished, as many as came with Peter, because that on the Gentiles also was poured out the gift of the Holy Ghost."

All other references to the bestowal of the Spirit's influences correspond in mode to these two cases of pre-eminent importance, which, by the Holy Spirit, are called *baptisms*. Jesus Christ says: "Ye shall receive power after that the Holy Ghost has come upon you." When Paul laid his hands on the Ephesians, the Holy Ghost came upon them. "John bare record and said: 'I saw the Spirit descending from Heaven. What, know ye not your body is the temple of the Holy Ghost. The washing of regeneration and renewing of the Holy Ghost, which he shed on us through Jesus Christ our Savior."

In this last passage, the believer's salvation, the work of regeneration, is a washing, and the renewal is the work of the Holy Ghost, which is shed on us abundantly through Jesus Christ.

The work of the Holy Ghost being strictly spiritual on the heart of man, all modes indicative of His influences must, from the nature of the case, be figurative, but the figures by which he has chosen to represent, the bestowal of His gifts are all coincident and represent a system of operations in which the Holy Spirit is never a passive medium into which the soul of the believer or the Church is dipped, nor a stream flowing upon him in which he is submerged, but as something shed down upon him from Heaven, and which can be represented by no one word better than effusion.

In the last paragraph of my article, August 29, the omission of two particles entirely destroys the meaning of the passage. It should read—added particles in italics: When, therefore, the Pharisees marvelled that our Savior did not wash before dinner, to hold that they marvelled, *not* because he did not perform the ordinary ablution by hand-washing, *but* because he did not immerse himself in one of these stone water pots, placed for the purpose of purification, is an idea so positively absurd, so nearly bordering on irreverence to Christ's sacred person, that I may not dwell upon it for a moment. F. B.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

STEAMERS FOR SEPTEMBER, 1868.

The following Steamships will be dispatched on dates as given below.

September 5th—GOLDEN CITY, Capt. E. S. Farnsworth, connecting with ALASKA, Capt. Gray.

Sept. 14th—SACRAMENTO, Captain Parker, connecting with OCEAN QUEEN, Capt. King.

Sept. 22d—MONTANA, Capt. Cavarly, connecting with HENRY CHAUNCEY, Captain Connor.

Sept. 30th—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identity themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship GREAT REPUBLIC, Captain Doane, will be dispatched on Saturday, October 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Biography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Children's Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All such are requested to call and examine the publications of the Presbyterian Board at the Depository for the Pacific Coast, which has been established at the store of

Current Literature.

Californians are not generally considered over modest in their estimate of the past growth or future prospects of our young State. They are justly proud of the past, and confident in the promise of the near future. No sermon, oration or political harangue is complete without a presentation in true and glowing colors of the greatness which awaits us, and the popular theme has nearly monopolized social conversation, making fearful encroachments upon "the weather" and the other standard topics. It may nevertheless be a matter of doubt whether, after all, we are as forcibly impressed with the real extent of our wonderful natural resources as are our neighbors on the Atlantic side of the continent. They look upon California as a prodigy; we regard it as our home. They consider her history marvellous, while to the Californian nothing is marvellous that is past. The Eastern man's "castles in air" are the Californian's realities, while the "castle" of prosperity reared by the latter has even its basement in a region that the former's imagination cannot reach. The rapid progress of the Pacific railroad and the prospects of its completion at an early day have drawn the attention of Eastern people particularly to our coast of late, and a fresh impulse has been given to the feelings of wonder with which they regard this State, by the appearance of a work published by Bancroft & Co. in San Francisco, to which we have before alluded—"Cronise's Natural Wealth of California." The public mind needed exactly the information afforded in this book; consequently it meets with a flattering reception by the Eastern Press. The Chicago *Advance*, one of the leading papers of the country, in a long notice of the merits of the book says:

A noble volume is this broad octavo of seven hundred pages, with its well executed typography; creditable alike to author, publisher and the great State they represent and describe. A volume, which, for appearance and contents, a Californian may be proud to send back to his friends. It is no hastily prepared, boasting, catch-penny affair, but a sober, scientific, well labored book, giving full and trustworthy information, from the highest authorities.

The following is a brief extract from the comments of the *Advance* on our scenery, resources and prospects:

The Sierra Nevada contains some of the finest scenery in the world, and the admirers of the Alps will soon be rushing westward to behold Mount Shasta, 14,440 feet high, and towering 7,000 feet above surrounding peaks, making as striking an object as the Matterhorn at Zermatt, which is about the same altitude and rises but 4,000 feet above the range about it. But in these American Alps, Mount Whitney equals in height Mount Blanc, lifting itself 15,000 feet while it is surrounded by one hundred peaks, all above 13,000! And what can Europe show by the side of the Yo Semite valley, with its perpendicular walls of 4,400 feet? In this grand range are the deposits of gold which have already yielded $850,000,000. But gold is not now the chief product of California, the yield being at present but $25,000,000 per year, which was equaled in value last year by the wheat crop, the exported surplus of which amounted to $13,000,000! Mining is no longer the sole or characteristic occupation, but agriculture and manufactures receive equal attention, and the mining itself is carried on in a fixed, scientific manner, so that the State has now a permanent population, and in two years past has added twenty per cent. to its taxable property. In educational and religious respects similar progress is making.

The Memphis *Avalanche* says: It is a valuable book worthy of a place in every library, public and private, in the land to those who think of visiting California, this work is worth more than a six months' tour.

It is certainly pleasant to know that a knowledge of our State is so much desired and so well appreciated by our Eastern friends. Want of space forbids our quoting as we would like to do from the numerous favorable notices of this essentially *Californian* work, but we will take the following from the Pittsburg *Banner:*

In its mechanical execution the volume affords ample evidence that the young Empire State of the Pacific is not one whit behind her Eastern sisters in the book-making art. The paper, typography, and binding are of unusual excellence. But the great attraction of the work, as in the case of one of those fabulous nuggets of the Sierra Nevada, is to be found in its intrinsic value. We are here favored with an exhaustive exhibit, classified under appropriate heads, of the varied resources of the modern El Dorado. Its early history, its geography in detail, its scenery, its agricultural, mineral, and manufacturing products, its educational, literary, and social condition, its means of inter-communication, in short, full descriptions of the State as a whole, and of each county, are here presented with a fullness and a pains-taking accuracy of fact and statement, that render the work a standard authority on every subject connected with the land of gold. Such a work has long been needed, and the author and publisher have been eminently successful in meeting the demand.

Concerning our "Mammoth Trees," the *Banner* says:

Antedating by six centuries the Christian era, when some of these veterans first raised their youthful arms, Jeremiah was about beginning to lift his warning voice in Jerusalem, the first temple was still standing in all its glory, Daniel had not yet interpreted dreams, nor the Hebrew children been thrown into the fiery furnace. Vigorous saplings they were when Confucius was giving to China its code on morals, when Solon was writing laws for Athens, and when Tarquin was expelled from Rome. Who would not tread with awe the solemn aisles of these grand old groves? And who can refrain from virtuous anger with the miscreants who have dared to overthrow, by boring with their profane augers, since axes were of no avail, some of these patriarchs of so many centuries? Such an atrocity is almost sacrilege.

But the great and commendable object of the volume before us is to portray the inviting fields which California opens for the remunerative development of its industrial resources. All desirable information in regard to its mineral and agricultural treasures, its manufacturing capabilities, its commercial centres, and its prospective advantages, is here interspersed with much pleasant reading on a variety of topics connected with the main object of the work.

Books and Periodicals Received:

The Little Bible or the Instructor of Religion and Morals, for Young and Old, containing a complete extract of the Holy Writ, with instructive notes, prepared and published by G. M. Cohen, Cleveland, Ohio.

Fifty-Fourth Annual Report of the American Tract Society for the year ending April 30th 1868. Boston: American Tract Society.

The Rural Southerner for August, devoted to Agriculture, Horticulture and Home Literature. Atlanta, Georgia: Miller & Bailey.

Family Treasury of Sunday Reading, Part 51. London: T. Nelson & Sons.

The Catholic World for September. New York: Catholic Publication House.

The Ladies' Pearl. Nashville: John Shirley Wood.

Literary Items.

Bad Writing an Imposition on Society.—It has been irreverently said that speech was given to man to disguise his thoughts; but it is literally true that the penmanship of some people veils their meaning in all but impenetrable mystery. Scholars, to whom the reading of Egyptian scrolls of the days of the Pharaohs is as easy as making love, would be utterly discomfitted by the skeins of worse than "cuniform" characters which editors are sometimes called upon to unravel. We dare not subscribe to the doctrine of Poe, that men's moral natures are to be estimated by the nature of their chirography, for to believe that the immorality with which the world abounds was half as villainous as the handwriting, would make even a man of benevolent instincts a confirmed misanthrope. No man has a right to send rebuses to his friends in the form of letters. Time is money; and it is an imposition to compel a man to waste it in deciphering slovenly hieroglyphics.—*Monitor.*

Footprints on the Sands of Time.—Everybody knows Longfellow's poem from which the above is the most celebrated line. Everybody does not know, however, that with Longfellow the thought was not original. Napoleon I., when writing on the poor-law to his minister of the interior, said:

"It is melancholy to see time passing away without being put to its full value. Surely, in a matter of ths kind, we should endeavor to do something, that we may say that we have lived, that we have not lived in vain, that we may leave some impress of ourselves on the sands of time."—*British Workman.*

The great newspaper of Russia is the Moscow *Gazette*, edited by Messrs. Katkow and Leantjew. It has a daily circulation of fifty thousand copies, and devotes much attention to American affairs. It sympathizes with the Republicans, and speaks in high terms of Sumner and Stevens. It is a very profitable concern, and its editors are men of marked ability.

Victor Hugo refuses to accept the offers of American publishers for his new work. He says they are much too low, and the houses that have made these offers had treated Lamartine and other French authors so meanly that he preferred having nothing to do with them.

A French author, being desirous to write a biography of Charles Dickens, wrote to that gentleman for materials, but received none, Mr. Dickens replying that he had "long ago formed the intention of writing an autobiography."

It takes a long time to start a newspaper and bring it up to a good, established, paying condition. The proprietors of the Stockholm (Sweden) *Gazette*, after trying it one hundred and three years, have at last abandoned the enterprise.

A man could carry on his back, forty years ago, the Southern mail from New York City to Jersey City; now it requires eight four-horse teams to do that service.

Educational.

Studying Physiology.

The value of the study of human physiology is sometimes only half stated. This is found in the prefaces to some excellent works upon the subject. Thus, Dr. Cutter says that boys and girls should "acquire a thorough knowledge of the laws of their organization," for health's sake; and he goes no further. But others do not fail to remind us of another benefit from this study. "In the sciences of the inorganic world, we can learn *how* changes are accomplished, but we can rarely tell *why* they are; in those of the organic world, the question "why" can be often answered; the question "how" is generally an enigma that we cannot solve. Now, were there no other argument for the general teaching of physiology, I would be content with this: that an education which does not include the teaching of some science of natural designs, does not provide for

the instruction of one of the best powers and aspirations of the mind." (*Paget on Study of Physiology.*) The pupil, in other words, is made to study his own frame, not merely that he may avoid disease, but that he may acquire a habit of tracing design. The habit of tracing second causes may be inculcated in many sciences; that of observing final causes is best taught by the science of Physiology.

Again, it is important to observe discrimination in teaching this branch. Boys need to emphasize the chapters upon digestion; girls, those upon the nervous system. "Sexual difference produces a difference in our sensual desires; woman has more delicate, more refined desires; those of man are more vehement and more coarse." (*Rauch: Psychology.*) The boy, far more than the girl, is in danger of becoming a glutton or a drunkard; whence he needs special attention to the laws governing the proper quantity and quality of food and drink. But the girl, too, has special dangers besetting her. These are partly connected with her finer sensibilities, and demand that she should be directed specially to the knowledge of her nervous organization. For example, her sensitiveness to excessive light, added to her love of neatness, leads her too often to exclude from her household domain the beneficent sunshine. Hence, Dr. Gibbons speaks as follows, in reviewing "Winslow on Light:" "Women have more to do, practically, with the hygiene of light than men, especially when they shut out the wholesome sunlight from our habitations, as they are habitually disposed to do." (*Pacific Medical and Surgical Journal.*

C. R. C.

Personal.

Bishop Scott presides over the California M. E. Conference which met in the Howard St. Church in this city on Wednesday. 61 ministers belonging to the Conference, were present. 7 new members were received from other Conferences. Various committees were appointed including one on the "State of the Country."

Mr. Geo. V. Smith, recently gave the citizens of San Jose a lecture on the "Battle of Life." He will soon commence a tour through the Eastern States lecturing on "California."

Rev. L. P. Webber has returned from the East and resumed his work as pastor of the Presbyterian Church at Santa Clara. We regret to learn that his health is not good.

Ben. Holladay & Co., have purchased the contract for building the Oregon Central railroad, and will immediately put on a large force and push the work forward.

Rev. T. H. McGrath has been appointed to the M. E. Church at Reno, Nev., by the request of the citizens. Rev. S. D. Hammond is appointed to Carson City.

Hon. Geo. C. Gorham and Hon. S. B. Axtell have been the principal speakers who have addressed their respective parties in this city during the past week.

Gens. Porter and Babcock, of Gen Grant's staff have arrived in this city. They propose to spend several weeks on this coast.

Rev. Mr. Todd will preach in the M. E. Church at Oregon City, Oregon, for the next year. Rev. Mr. Cosper goes to Milwaukie.

Mr. H. A. Moses has been appointed Inspector of Customs, for the port of Sacramento.

The Oregon Legislature met on the 16th. Mr. B. F. Burch is President of the Senate. Ex-Gov. J. Whitaker is Speaker of the House. Gov. Wood delivered his inaugural address on the afternoon of the 16th.

Dr. C. H. DeWolfe has been lecturing against the Divinity of the Bible, at Mokelumne Hill. The *Chronicle* says his efforts are 'sick.'

Rev. D. B. Gray has left Dalles, Oregon, where he has been spending a few months, and returned to his home at Astoria.

Rev. C. F. Loop has resigned the Rectorship of Calvary Church, Santa Cruz. The resignation has been accepted.

Mr. E. H. Washburne, an old pioneer and a respected citizen died in this city on Sunday last at the age of 52.

Rev. A. M. Stewart will probably, says the *Appeal*, take charge of the Presbyterian Church at Carson City.

Rev. S. V. Blakeslee preached in the Presbyterian church at Marysville on Sunday evening.

Mr. J. A. McClelland has been elected President of the California Emigration Association.

Gen. Frank P. Blair is coming to California in a few weeks.

Mr. Israel Comstock an old and respected citizen of Sacramento, died suddenly on the 9th.

Mr. Jas. J. Green has been appointed Superintendent of Internal Revenue for California.

Gov. Haight refuses to sign the patent for a transfer of lands to the Butchers of this city.

Mr. M. C. Gault retires from the editorial chair of the Jacksonville, (Oregon) *Sentinel.*

Mr. C. F. Reed of Yolo County is President of the State Agricultral Society.

Rev. W. I. Nichols is to take charge of the M. E. Church at Austin, Nevada.

Rev. J. Knapp, has not been remarkably successful in his efforts at San Jose.

Rev. J. W. Atherton will soon remove to Los Angeles.

REMOVAL.

Rowland, Bailey & Co.

Have removed their stock of

GROCERIES AND PROVISIONS

From 516 and 518, Washington st.

To 535 & 537 Clay St,

Four doors below Montgomery St. and nearly opposite the Pacific Fruit Market.

They have on hand every article sold in a first-class grocery store, and prices are as low as the lowest.

Good Work! One Price! Punctuality!

D. Bruce,

PRINTER,

Commercial Street, opposite Miners' Restaurant.

AGRICULTURAL.

God Speed the Plough.

God speed the plough-share! Tell me not
Disgrace attends the toil
Of those who plough the dark green sod,
Or till the fruitful soil.
Why should the honest ploughman shrink
From mingling in the van
Of learning and of wisdom, since
'Tis mind that makes the man.

God speed the plough-share, and the hands
That till the fruitful earth;
For there is in the world so wide
No gem like honest worth.
And, though the hands are dark with toil,
And flushed the manly brow,
It matters not, for God will bless
The labors of the plow. —*Independent.*

How to Get the Boys to Stay on the Farm.

The boys catch new ideas much more rapidly than their fathers, and, with the impulsiveness of youth, want to test them. They go to the fairs and see the fine stock, the new tools, the premium fruits and vegetables. They read the papers, if they have them at home, and if they have not they borrow them. Agricultural papers are greatly multiplied, and no religious or political paper quite does its duty without furnishing a column or two, weekly, of agricultural matter for its readers. People, who read at all cannot very well keep themselves in the dark in regard to the changes that are coming over husbandry. If the father keeps up with the times, has agricultural papers and books, reads, thinks, and practices, he retains the confidence of his boys, and can readily guide them. But if he is a man of routine, and keeps in the ruts, the boys soon become disgusted with farming. They do not want to break their backs over the scythe, when a mowing machine can do the work better, and at a tithe of the expense. They want tenders, horse-rakes, and horse hay forks. They want subsoil plows, tile drains, and barn cellars. They want blood stock in the stable, and in the sty. They want to move a little faster and to do business on a little larger scale. The boys have the facts and the arguments on their side, and if you want to retain them upon the farm, you must keep up with the times, and make farming a live business. The subsoil plow has spoiled the ruts of this generation.

Another thing, the boys want an interest in the business, and the sooner you give them an investment in the farm or its stock, the more likely you will be to make farmers of them. It is true, the law give you a right to the avails of their labors until they reach their majority. It may be true that these services are no more than a fair compensation for the expenses of their childhood. The intercourse of parents and children should not always be graduated by the legal scale. You do not want your son for a servant, but for a companion, and a support in your declining years. You want to attach him by affection and interest to the soil that he cultivates. Begin, then, early to identify his interests with your business, as if he was under no obligations to you. If he fancies stock, give him what he likes, and let the increase be his. Especially encourage him to plant orchards or vineyards of the finest varieties of fruit. Teach him to bud, graft, prune, ripen, and market, all the fruits of your climate. Furnish him with all the books and facilities that he needs to study and to practice pomology and horticulture. If properly encouraged, he will take an interest in these things very early, and before he is old enough to think of leaving your roof, his tastes will be formed, and his course in life will be determined. His heart will go down into the soil with the roots of every fruit that he plants, and the orchards and gardens of the old homestead, or of another close by, will be his paradise from which nothing but necessity can drive him.—*American Agriculturist.*

Griddle Cakes—How to Make them.—No reader of your columns but has a vital interest in food—but desires to eat pleasant and wholesome things. Therefore may not I say to all, at least all who like griddle cakes, let me tell you how to make them without yeast, soda, or cream of tartar. Take one-third Indian meal, pour on boiling water, and stir it, while boiling, till it is free from lumps; add salt and a little molasses; then add two-thirds Graham flour, stir up hot, and bake on a hot griddle. The cakes will be light and tender, and eaten with butter, or thick cream and maple sugar, they are truly most delicious. Try them, one and all, and then vote on the question.—*Exchange.*

Do not Sell Too Soon—Beef Cattle should be Fat.—Farmers sell too many of their beef cattle when in merely ordinary beef condition. In doing this there is a two-fold loss that few consider. The animal yields a less number of pounds, and the meat brings a lower price. Between ordinary beef and really choice fat beef, there is always a difference of two or three cents a pound, and this difference, when added to the whole number of pounds when the animal is in the best condition, will be found to be no mean amount. Nothing pays better than the few bushels of grain, or the few days on good June grass, that puts the finishing touch upon what is generally denominated a good beef animal. Those of our readers who have followed this often repeated advice in live-stock market reports, are witnesses to its soundness. Do not be in a hurry to market under ordinary circumstances, until cattle are really fat. The same applies to all other market animals.—*Exchange.*

Relief for Farmers' Wives—Cottages for Laborers.—The boarding of farm help often comes heavy upon the housekeeper. The best remedy is the building of farm cottages, and the employment of married men for help. A cottage can be put up without any large outlay of money, if there is good timber upon the farm. The laborer, of course, would expect to pay rent, and the investment in the cottage would pay better than bank stock. He would also be a consumer of the products of the farm, and thus furnish a home market. One-half, at least, of his wages would be expended in the supply of his table. Extra hands, by the day or month, could be boarded at the cottage, and thus relieve the farmer's kitchen of much of its drudgery.—*American Agriculturist.*

A Useful Suggestion—Don't Boil the Sugar.—Cane sugar, says the *Mining Press*, by long boiling, is converted into grape sugar, losing one-third of its sweetness. In preserving fruits, therefore, avoid boiling the sugar. Boil the juice by itself, ane when it becomes nearly cool, add the sugar. It dissolves readily. One-third less sugar serves in this way, and fermentation is prevented as well as crystallizing. This is a useful suggestion to those who are now putting up fruit for Winter use.—*San Francisco Mining Press.*

Whitewash—all colors.—Lime for fences or outbuildings, applied in the form of a paint is a most excellent preservative. Wood washed with it will last many years. Whitewash can be made of different colors. Make a paste of lampblack, salt, and wood-ashes, and mix it with lime; add a little resin and soap; or make a paste entirely of lime, resin, and soap; and the whitewash becomes permanent, and cannot be washed off.

Scalding of the Peach Borer.—A correspondent of the *Southern Planter and Farmer* tells of a lady whose husband had planted an orchard with a view of making brandy. She feared he might become a drunkard and determined to kill the trees. To effect this she secretly poured scalding water around the roots, and to her great surprise, the trees did not die, put produced an extra crop of peaches. The scalding water killed the worms, but did not kill the trees. The writer says he adopted this practice at first, very cautiously, but now he practices it without fear. Early in the Spring he scrapes around the trees with a large knife on the morning of the washing day. He drenches the trees with buckets of boiling suds just where the trunks join the ground. In this way the larvæ of borers and other insects are killed. Lastly he applies unleached ashes to the trees, piling it around the trunks to the height of about three inches.

Stir the Ground Frequently.—A frequent stirring of the surface of the ground during the early and growing part of the season is almost, if not as good as a coat of manure. In fact, our experience and observation have taught us that we succeed better with our young plantations, or our bearing ones, etc., by a regular system of stirring the surface-soil at least once a week, than by means of a heavy dressing of manure and only two hoeings for the season. A light, loose surface admits heat, air, and moisture, and all combining necessary food for the plant; while a hard, compact surface excludes these influences and prevents the action of chemical or natural changes, and hence the comparatively moist condition of the plant.—*Horticulturist.*

We often make a parade of passions, even of the most crimlnal; but envy is a timid and shameful passion, which we dare not avow.

WEEKLY MARKET REPORT.

Wednesday, September 16, 1868.

Flour—We have heard of no round lots to report. City mills are jobbing as follows: Superfine, in sks, ₱ 196 lbs, $5 25@$5 50; Extra, in sks, $6 25@6 50.

Wheat—Sales of 1,500 sks fair milling, $1 67½; 500 sks good shipping, $1 85; 1,500 sks shipping (received to-day) sold prior to arrival, private. We quote fair to choice shipping, $1 75@1 85; ordinary to choice milling, $1 65@1 85; a choice lot of Santa Clara for local milling might bring $1 90. At the close, 1,000 sks choice milling, in three lots, $1 85 ₱ 100 lbs.

Barley—Sale of 540 sks brewing, $2 37½; quotable as to grade at $2 35@2 45 ₱ 100 lbs.

Oats—Sales of 200 sks good, $2 40; 100 sks choice, $2 50; 120 sks, private.

Potatoes—225 sks Lighthouse yesterday, in two lots, $1. Mission are to-day selling at $1@1 12½; some dealers report the price at $1 25. These figures show an advance of 12½@25c from yesterday, caused, it is said, by concerted action on the part of farmers. Carolinas are quoted from wharf at $1 15 ₱ 100 lbs.

Onions—Sales of 100 sks Yellow, $1 87½@1 90 ₱ 100 lbs.

Beans—We quote jobbing rates for first quality as follows: Bayo, 4@4½c; Butter, 5@6c; White, 67@c; Pink, 3½@4c ₱ lb.

Bran—Round lots sell at $22 50; jobbing at $25 ₱ ton.

Middlings—Fine, $40@42 50; feed descriptions, $32 50@$35 ₱ ton.

Hay—Three cargoes of about 100 tons sold within the range of $12@15 ₱ ton.

Oil Cake Meal—Sells at $30 ₱ ton.

Buckwheat—Nominal at $1 75 ₱ 100 lbs.

Rye—No demand; quotable at about $2 ₱ 100 lbs.

Dairy Products—Fresh roll Butter is quoted at 45@47½c as a general range, with 60c for a few choice dairies; pickled, 40@45c; California firkin, 36@40c; Cheese, 15@17c for California dairies, and 17@18c ₱ lb for Eastern dairies; Pineapple Cheese, 18 ₱ dozen; Eggs, firm at 60@62½ ₱ dozen.

Provisions—Bacon is jobbing at 14½@15½c for California smoked; Oregon do, 14@14½c; California Hams, 16@17c; Oregon do, 17@18c (scarce); California Lard, 12½@13½c ₱ lb.

Poultry—Live Turkeys are lower, quotable at 17@19c ₱ lb; Hens, $7@7 50; Roosters, $6 50@7; Spring Chickens, $4@5 50; Ducks, $4@5 ₱ doz; Geese, $2@$2 50 ₱ pair; Venison, 12½c ₱ lb. The restrictions against shooting Quail for the current season having been removed, the market yesterday and to-day has been well supplied. The quotations this morning were $1 50@1 75 ₱ dozen.

Wool—One of the principal receivers reports sales for the week of 40,000 lbs fall, at 13½@14½c; other sales have been made, the particulars of which are not yet at our disposal. We quote the market firm at 13@15c for medium to choice fall grades.

Hides—Are coming forward freely. Sales for the week of 2,000 California dry, 14@15c. Salted are quotable at 6½@7c ₱ lb.

Tallow—Sales of 6,000 lbs very choice at 86, obtainable only for small lots; 20,000 lbs good Beef, 7½c. The general range for Beef and Mutton is 7½@7¾c ₱ lb.

San Francisco Cattle Market.

Veal has declined to 10c for choice. The outside figure for dressed Pork, grain fed, is 7¾c, a slight decline. In other descriptions, there is no change to report.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.
Veal—Ranges from 6 to 10c ₱ lb.
Mutton—Is steady at 6@6½c ₱ lb.
Lamb—Steady at 8@9c ₱ lb.
Pork—Undressed, 4@5¾c; dressed, 6½@7¾c ₱ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

MINING.

DANGERS OF MINING—AFRAID OF THE DRAFT—Owing to the many accidents that have happened in the hoisting shafts of our mines, few like to risk life and limb by working in them. In some of our mines extra wages are paid the men who are willing to work in the bottom of the shafts, and thus men enough who are not afraid to take the chances are secured; but in other mines it is said that a plan of drafting men for this work is in existence, and we were told yesterday of two men, excellent miners, who left one of our mines rather than work in the shaft. We have been told that there are men—not only the two mentioned by us—that are in great dread of being drafted to work in the shafts of certain mines, and that some who have families and cannot well lose their places, are obliged to stand the draft and work through their turn in the shaft in mortal terror from the time they go down till they are safe upon the surface again. The work required is in most situations worth extra pay, and the plan of paying extra and using volunteers ought to be adopted in every mine. A man can be forced to work where he is afraid to work—that is, a man who has a family dependent upon him and who is in no situation to refuse to do anything required of him—but should he be? We have shown that such unwilling men are the worst in every respect that the company can send into a place of danger; but aside from this consideration those who force a man into a place of danger (require him to go against his will), cannot feel altogether guiltless in case that man is killed; they would not feel altogether at ease under the reproachful eyes of his widowed wife and orphaned children.—*Virginia Enterprise.*

MINING IN MAINE.—The recently discovered silver mines on High Cut, Garland, Me., are being thoroughly developed. Much capital has been invested in these mines and it is said that valuable ore has been taken out. Whether the enterprise will "pay," remains to be seen. Vast quantities of slate of the very best quality are found in the towns of Brownville and Sebec. The quarrying is done chiefly by Welchmen, a large colony of whom have settled in that region. The slate with which the Cupola of the Masonic Temple in this city is being covered, is brought from these quarries.

GOLD IN MARYLAND.—We understand that a gentleman of Frederick city, who has been prospecting in the spur of the Blue Ridge mountains, near and adjacent to Frederick, has discovered a fine quality of gold quartz, specimens of which have been examined and tested by experienced gentlemen, some of whom are experts having had experience in California, who pronounce it rich and very similar to the gold quartz of that El Dorado. It is genuine gold, and found in a bed of gold-bearing quartz, some 400 feet in length, five feet in depth to surface of water, and sixty feet width of vein.—*Frederick Union.*

FROM REESE RIVER—SILVER ORE.—We saw yesterday at the Union Hotel Saloon a couple of fine specimens of silver ore recently brought from Reese River by H. L. Cawley. One is from the North Star mine, and though not remarkably rich, is an elegant specimen for a cabinet. The other came from White Pine, and though not particularly beautiful to the eye, is very rich. It is of a light greyish cast and assays at the rate of over $23,000 a ton. It is so rich that it cannot be crushed, but flattens out when hammered, and the silver can only be extracted by smelting the ore.—*Nevada Gazette.*

A GOOD MINE.—The *National* says that in one of the mines at Forrest Springs, 6 men take out daily 12 tons of rock which pays $60 to the load. The expenses of opening the mine have been heavy, but it has already paid for itself and yielded besides, $25,000. The ore is constantly improving.

THE IDAHO MINES.—From the *Owyhee Avalanche* we learn that the shaft at the Surplus Oro Fino is down 130 feet, good ore is being taken out and the prospects are good both for gold and silver. Ore is being taken out and worked at the Lincoln mill. The great tunnel 1,300 feet long, draining the New York, Ida Elmore, Golden Chariot and part of the Oro Fino mines is now completed. But little is being done at present on the Ida Elmore. The Poorman continues to yield satifactory quantities of bullion.

THE Nevada *Transcript* says that for some time past a Frenchman has been engaged in putting up machinery at Canada Hill, for the purpose of working sulphurets by a new process. The works are now completed, and the experiments on gold sulphurets are said to be more than satisfactory. The Superintendent is satisfied with the experiments on gold sulphurets, and is now experimenting on silver sulphurets from the Yellow Jacket mine of Nevada. The parties have expended about $60,000 in fitting up the machinery.

RICH ORES.—Some of the mines of White Pine are yielding ore of almost fabulous richness. Parties from that section say it is by no means uncommon to see large lumps of ore that are so near pure silver that by placing a half on them and striking it a blow with a hammer, a perfect impression of the coin is left in the metal. These lumps the miners find no difficulty in disposing of in the crude state for coin.—*Enterprise.*

STONE COAL IN IONE VALLEY—GOOD PROSPECTS.—Just now the coal mine of James Morgan, in Ione Valley, presents a lively appearance. We learn that twenty tons per day are being taken out and shipped to the Oneida Quartz Mill where it is being used very successfully. Two other mines are being opened near this one, and the prospect for an abundance of fuel for our mills is very encouraging. We also learn that Messrs. Coney & Bigelow intend trying this coal in their chloronation works at this place.

SUCCESSFUL AT LAST.—By the use of the "Hagen Superheated Steam process," the ore from the Enterprise mine at Meadow Lake has been made to pay for working, a result which has never been reached by other methods.

TABLE LAND DIGGINGS.—The table lands west of and adjoining Pike's Peak gulch, contain some of the best placer mining claims in the country, many of them paying from twelve to thirty dollars per day to the hand.—*Deer Lodge City Independent.*

WEAR AND TEAR.—The annual loss by attrition, in the silver coins of Great Britain, is stated to be increasing. The weight of silver thus rubbed off by constant handling amounts to 54,750 ounces.

THE Manhattan mill, at Auburn, Reese River, is producing bullion at the rate of from six thousand to seven thousand dollars per day—an unprecedented sum for a twenty-stamp mill.

COPPER SMELTING.—The copper smelting works at the Newton mine, are now in full blast, and we learn that the prospect is very flattering.—*Amador Ledger.*

THE mines at Winters' diggings on Burnt River, Oregon, are yielding well.

THERE are 198 silver mines in Prussia.

GENERAL SELECTIONS.

Organ Chant.

I.

Alone, with God, alone, we bow before His throne,
And crave of Him His pardon for sins of the past day!
Alone with God, alone, we bow before His throne,
And pray that for the love of Christ our sins be washed away.

II.

Alone, with God, alone, we bow before His throne!
For the spirit craves a shrine where to worship and to pray.
Alone, with God, alone, rings the mighty anthem-tone,
The vesper-chant of nations at closing of the day.

III.

Alone, with God, alone, sounds the voice of ages flown,
As the sun in march sublime keeps upon his onward way.
Alone, with night, alone! Yet God upon His throne,
The evening turns to morning! the Night into the Day!

IV.

Alone, with God, alone, we bow before His throne,
And crave of Him His pardon for sins of the past day!
Alone, with God, alone! Yet with Christ upon His throne,
We feel that for the love of Him our sins are washed away.

—*Putnam's Monthly.*

Politics.

Many intelligent and estimable people feel no interest in political affairs, and deplore all political agitation. They have a pretty nearly balanced distrust and dislike of all parties, skip the politics in the morning papers, dodge the election days as best they can, and would go abroad on Presidential years if they could do so. We are inclined to think this class of men is on the increase; and such uncomfortable circumstances as the nomination of unfit. and mean men for offices, the stuffing of the ballot-boxes, the dishonesty of officials kept in office in spite of their proved peculations, the ignorance, intemperance and disgraceful depravity of even prominent officers, tend to add to its numbers and increase their disgust.

It seems to us that these men allow their feelings to run away with the reason that they were meant to invigorate and inspire. Allow that there is too much occasion for impatience and disgust, that things are done which makes the healthy heart sick and the honest head indignant. What ought we to do? Shall we run away from the evil, or set ourselves to reform it? The patriot, the Christian, the friend of his race, can give but one answer. It is brave and noble to grapple with a great difficulty, making disgust for it only stimulate to more zealous efforts for its removal; it is cowardly and mean to run away from a dislike.

Indifference to and dislike of politics are so often expressed in public and private that we fear large numbers of our people fail to see the significance of the word, and the vast importance of the thing it indicates. Politics is one of the largest terms in the language. It covers the greatest meanings. It includes all that relates to the material interest, the social comfort and the intellectual life of a people. It has to do with the industries, the customs, the culture of all classes, the development of resources, the protection of property, the decreeing of justice, the preservation of life, the formation of manhood, the building up of nationality. It embraces every application of physical, social, and industrial laws to their respective objects, implying a mastery of great sciences, a knowledge of history, a perception of laws, a grasp of principles, and a hold on the idea of justice, which human nature glorifies itself in aspiring to, and only the wisest and best men have ever acquired. Next after theology, it is the profoundest study, the most engaging and absorbing pursuit, the most important and practical theme that can engage the mind of man. And this is politics, the word we drop from our lips with indifference or spit out with scorn. To master its meaning would be to know everything that is known, and apply the knowledge for the benefit of a nation and the world.

This growing indifference to politics also shows a blindness to the peculiar genius and workings of our institutions. For what is their characteristic and their peculiar benefit? Certainly not that our people are any better governed, have any wiser laws, or are safer in person and property than those of other lands. It is a question whether they are so. We choose our rulers, to be sure; but what of that? Is a tyrant any less tyranical, an ignoramus any the less foolish, a debauchee any the less unprincipled or depraved because elected by ballot instead of birth? We talk very boastfully of our republican institutions and their superiority to other forms of government. In what does this superiority consist? What is their peculiar product that they should be thus extolled? Politics. Simply politics. Other forms of government excuse the people from considering this subject. Louis Napoleon tells his thirty million Frenchmen to laugh, dance, sing, invent, dress, make parades, anything they please; but if they talk politics on the wrong side they shall go to prison. Politics in Italy means revolution. Politics in Russia means incendiarism and ten years in Siberia. Politics in Ireland is Fenianism and an English dungeon for all who are not Tories or Churchmen. Politics in England has always been wasted breath to nine-tenths of her people. The peculiar and great gift of our republican institutions to every American is politics. They open up every subject for universal discussion. They throw every measure of public policy out into the national arena for popular consideration. They give every man a concern in every enactment. They identify the interest of each with the welfare of the whole, and the interest of the whole with the welfare of the meanest citizen. They give every man something great to think of, something noble to care for, something grand to look after and live himself into. They lift the commonest citizen out of his belittling associations and cramping conditions and petty, self-seeking life, and crowd his mind with great themes of national polity and economy, and stretch his sympathies to take in the interests and hopes of thirty millions of people, and to make him think and feel and act as an American—a man with a nation dilating his heart and beating in his pulse and inspiring his brain. They give us an American manhood.

Politics is the great educational force in American life. Not enough do we look at this subject in this light. Think of the interest felt in the coming elections, and how this interest will lead millions to think, and read, and hear, and discuss the issues involved in them. Think of the papers that will be printed, the speeches that will be made, the arguments that will be put forth, and the appeals based upon them. For the next few months the United States will be one vast university in which thirty millions of people are being drilled and disciplined and trained to a higher order of intelligence and a nobler manhood. This, with all the falsehood, and fallacy, and vice that enters into a Presidential campaign in a nation composed of diverse populations and an immense amount of foreign and domestic ignorance. What would such a campaign be if conducted on true principles? A national education.

Instead of abandoning politics, then, or being indifferent to it, we ought to feel the deepest interest in the subject, and engage in it with all the enthusiasm and nobleness of mind we can bring to bear upon it. Thus shall we correct its evils and educate ourselves.—*The Liberal Christian.*

The Alchemists.

The alchemists—including the sect of the Rosicrusians—of the middle ages, among whom are enrolled the names of many learned and talented men, philosophers of their day and generation, were credulous and entuhsiastic searchers after some mystic power, some occult essence, which would arrest those changes, as ossifications, indurations and others taking place in the body, the effect of time, and ending in the cessation of all the vital functions, and thus perpetrate youth, and augment our brief space of being to a life of ages—our little bubble of existence to a mountain wave in the boundless sea of eternity.

The medical art and science of the alchemists was mystical and visonary, in accordance with the darkness and superstition of their time. They studied, through the faint glimmerings of light just penetrating the vital sciences, and which did little more than make darkness visible, the secrets of human organism, that they might learn and successfully encounter the changes in it which disease and time produced. They further sought the power to render themselves invisible, to raise visions of the absent, and in other modes marvelously to extend the human faculties; and not, as they assumed, through any aid of magic which depends on the violation of nature but through a knowledge of, and obedienee to her, laws; or through science, that searches into and teaches the lawful control of nature.

That in the further advance of chemical science we may learn to transmute other metals into gold, may not be deemed impossible. Lord Bacon, and after him Boyle and others, believed such transmutation to be within the limit of possibility; and it has been said that even Newton did not decidedly oppose such belief. But then what would be the worth of gold could it be so readily procured? Could we, through chemical art, convert other substances into what we now value as precious stones—charcoal, for example, into diamond—it is obvious that they would no longer be *precious* stones.

There were those among the alchemists, as Van Helmont and Paracelsus, who boasted that they had achieved the marvels of their research. Paracelsus claimed that he could render life immortal, and even the power through this chemical art of originating life, and yet died at about the age of forty-eight. And many others of the same sect, who vaunted their possession of the philosopher's stone and elixir of life, passed in beggar's rags to an early grave.

The alchemists discovered neither an elixir of life, nor the philosopher's stone, still their labors were far from being in vain, far from wanting in precious fruits. Our researches after the unattainable, will often lead to incidental discoveriesof in estimable value; to results of a magnitude beyond those which the accomplishment of the original aim would have afforded. Columbus, in seeking to discover a western passage to Asia, or India as he terms it, made the far more important discovery of America. The man who dug over his field for a pot of money, though he found it not, yet found his labors rewarded by future harvests worth more than would have been his expected treasure. So the alchemists, though not finding the object of their pursuit, were opening the way to inestimable treasures in the future field of science.

The alchemists, then, were but performing their predetermined and necessary roles in the great drama of creation. Their acts were steps in progress, tending ultimately, let us trust, to clearer and fuller developments of the mysteries of life, teaching us more effectually to prevent or restore its deviations, and to extend its term. For it need not be told that the present science of chemistry, with all its wonderful revealments of nature's secrets and the practical application of nature's mysterious force, both in organic and inorganic creation, owes its origin to the labors of the alchemists. Their immediate purposes were not accomplished, but out of their misdirected labors have grown results of incalculable value. And the work begun under the visions of the alchemists is still going forward; and marvels have been and are still being achieved through that science whose foundations they were unwittingly laying—marvels beyond the stretch even of their wildest dreams. Their labors, then, were not in vain; they were doubtless ordinated in the progressive scheme of created things.—*Sweetzer's Human Life.*

MISCELLANY.

A LAD in the country was directed by his mother, a few days since, to saw and split some railroad ties, from which much of the family fuel was supplied. After listening to the sound of the saw and axe a few minutes, the lady noticed a period of silence in the yard. Stepping out, she found the lad sitting contemplatively upon the wood pile, and asked him promptly what was the matter. He rose slowly from his seat, and placed his hand upon his breast, and assuming a dramatic attitude and expression of countenance, replied, "My dear mother, I find it hard, very hard, to sever old ties."

Self love is the greatest of all flatterers.

"MADAM," said a husband to his young wife, in a little altercation, which will spring up in the best regulated families, "when a man and his wife have quarreled, and each supposes the other at fault, which of the two ought to advance toward a reconciliation?"

"The best-natured and wisest of the two," said the wife, putting up her mouth for a kiss, which was given with an unction. She was the conqueror.

BE SHORT.—Dr. Staughton, fifty years ago the most popular preacher in Philadelphia, was accustomed to preach less than thirty minutes, and to bring a whole service within an hour. When asked by one of his theological students to explain how he could make his sermons so brief, he replied, "By talking no nonsense."

NEVER TO LATE TO MEND.

"Here, wife," said Will, "I pray you to devote
Just half a minute to mend this coat,
Which a nail has chanced to rend."
"'Tis ten o'clock!" said his drowsy mate.
"I know," said Will, "it is rather late;
But 'tis never too late to mend!"—*Saxe.*

There are no circumstances, however unfortunate, that clever people do not extract some advantage from, and none, however fortunate, that the imprudent cannot turn to their own prejudice.

Happiness lies in the taste, and not in the things; and it is from having what we desire that we are happy—not from having what others think desirable.

A man often fancies that he guides himself when he is guided by others; and while his mind aims at one object, his heart insensibly draws him on to another.

The reason we are so changeable in our friendships is, that it is difficult to know the qualities of the heart, while it is easy to know those of the head.

The moderation of fortunate people comes from the calm which good fortune gives to their tempers.

Those who bestow too much application on trifling things, become generally incapable of great ones.

In order to establish themselves in the world, men do all they can to appear established there.

If we had no faults ourselves, we should not take so much pleasure in remarking them in others.

The mark of an extraordinary merit is to see those most envious of it constrained to praise.

The constancy of sages is nothing but the art of locking up their agitation in their hearts.

The happiness or unhappiness of men depends as much on their humors as their fortune.

Politeness of mind consists in the conception of honorable and delicate thoughts.

It is a proof of very little friendship not to notice a cooling in that of our friends.

Every one complains of his memory, and no one complains of his judgment.

Great names debase, instead of elevating those who cannot sustain them.

It is more disgraceful to distrust one's friends than to be deceived by them.

If we had no pride ourselves, we should not complain of that of others.

We promise according to our hopes, and perform according to our fears.

IN THE CITY OF NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

This Company, having a Stock Capital, makes Insurances and Endowments with or without profits. Dividends to Policies with profits are equal to, or larger than those of other, or "Purely Mutual" Companies in available present cash value.

NEW AND IMPORTANT PLANS OF LIFE INSURANCE HAVE BEEN ADOPTED BY THIS COMPANY. SEE THE NEW PROSPECTUS.

Life Assurances, Endowments and Annuities in every form. Profits available after Policies have run one year, and annually thereafter. The reserved Cash fund, for re-insurance, is the largest known to or required by, the ablest and most experienced authorities in Life Insurance, thus affording undoubted security. A liberal non-forfeiture system, as to whole Life or Endowment Policies.

Policy Holders in this Company can use or apply the Dividends of profits in a greater number of ways than is afforded to Policy Holders by any other Company.

The law under which the company is Chartered, provides that if the Capital should, from any cause, become impaired to the extent of Twenty-five Thousand Dollars, or more, the Stockholders SHALL BE CALLED UPON TO MAKE GOOD SUCH DEFICIENCY. This is the only Cash Company in America which affords this safeguard to Policy-holders.

The assured in this Company are not personally liable as in Mutual Companies, which have the power of assessing their members or of reducing the sums insured, in case of deficiency.

CLERGYMEN, insuring in this Company, are allowed a DISCOUNT of TWENTY PER CENT. on first year's premium, and a liberal commission will be given on all Insurances influenced by them.

Agents wanted, on the most advantageous terms.

Forms and every information will be furnished by

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also SCHOOL FURNITURE.

FAMILY READING.

No Sects in Heaven.

Talking of sects till late one eve,
Of the various doctrines the saints believe,
That night I stood in a troubled dream,
By the side of a darkly flowing stream.

And a "Churchman" down to the river came:
When I heard a strange voice call his name,
"Good father, stop; when you cross this tide,
You must leave your robes on the other side."
But the aged father did not mind,
And his long gown floated out behind,
As down to the stream his way he took,
His pale hands clasping a gilt edge book.
"I'm bound for heaven, and when I'm there,
I shall want my book of Common Prayer;
And though I put on a starry crown,
I should feel quite lost without my gown."
Then he fixed his eye on the shining track,
But his gown was heavy and held him back,
And the poor old father tried in vain
A single step in the flood to gain.
I saw him again on the other side,
But his silk gown floated on the tide;
And no one asked in that blissful spot,
Whether he belonged to "*the* Church" or not.

Then down to the river a Quaker strayed,
His dress of a sober hue was made;
"My coat and hat must be all of gray,
I cannot go any other way."
Then he buttoned his coat straight up to his chin,
And staidly, solemnly, waded in,
And his broad-brimmed hat he pulled down tight
Over his forehead, so cold and white.
But a strong wind carried away his hat;
A moment he silently sighed over that,
And then, as he gazed to the farther shore,
The coat slipped off and was seen no more.
As he entered heaven, his suit of gray
Went quietly sailing—away—away,
And none of the angels questioned him
About the width of his beaver's brim.

Next came Dr. Watts with a bundle of Psalms
Tied nicely up in his aged arms,
And hymns as many, a very wise thing,
That the people in heaven, "all around" might sing.
But I thought that he heaved an anxious sigh,
As he saw that the river ran broad and high,
And looked rather surprised as, one by one,
The Psalms and Hymns in the wave went down.
And after him with his MSS.,
Came Wesley, the pattern of godliness;
But he cried, "Dear me, what shall I do?
The water has soaked them through and through."
And there on the river, far and wide,
Away they went down the swelling tide,
And the saint astonished, passed through alone,
Without his manuscripts, up to the throne.

Then gravely walking, two saints by name
Down to the stream together came,
But as they stopped at the river's brink
I saw one saint from the other shrink.
"Sprinkled or plunged—may I ask you friend,
How you attained to life's great end?"
"*Thus*, with a few drops on my brow."
"But *I* have deen dipped, as you'll see me now,
"And I really think it will hardly do,
As I'm 'close communion,' to cross with you;
You're bound, I know to the realms of bliss,
But you must go that way, and I'll go this."
Then straightway plunging with all his might,
Away to the left—his friend on the right—
Apart they went from this world of sin,
But at last together they entered in.

And now, when the river was rolling on,
A Presbyterian church went down;
Of women there seemed an innumerable throng,
But the men I could count as they passed along.
And concerning the road, they could never agree,
The *old* or the *new* way, which it could be,
Nor ever a moment paused to think
That both lead to the river's brink.
And a sound of murmuring, long and loud,
Came up from the ever-moving crowd,
"You're in the old way, and I'm in the new,
This is the false, and that is the true,"—
Or, "I'm in the old way, and you're in the new,
"*That* is the false, and *this* is the true."

I watched them long in my curious dream,
Till they stood by the borders of the stream,
Then, just as I thought, the two ways met;
But all the brethren were talking yet,
And would talk on, till the heaving tide
Carried them over, side by side;
Side by side, for the way was one,
The toilsome journey of life was done,
And the priest and the Quaker, and all who died,
Came out alike on the other side.
No forms, or crosses, or books had they,
No gowns of silk, or suits of gray,
No creeds to guide them, or MSS.,
For all had put on Christ's righteousness.

Is your Soul Insured?

Reader, it may be you hold a "policy" from some reliable corporation, by virtue of which, after your decease, if they survive you, your widow and children will receive a sum of money that will serve for their maintenance, when deprived of your presence, support, and services. You own a house, a tenement of clay, and you have it insured against fire—that is, if it accidentally burns, the loss will be made up to you. Or, you have ships at sea, laden with merchandise, for which, if unhappily wrecked, you have made provision, that some wealthy insurance company, and not you, sustains the loss.

These "policies," as they are termed, have cost you a handsome sum in the shape of premiums. All this is wise and proper, and indicates a commendable degree of wordly prudence. But how stands it with your immortal SOUL? This is of incalculably higher value than houses and barns, wares and merchandise, or any mere temporal possessions. Once lost, the soul can never be replaced. Have you this insured? Jesus Christ, your Savior, grants you a policy, which will protect you against the possibility of loss, and that, too, "without money and without price." There is no "premium" to be paid. All that is required is to accept the salvation, the cost of which He Himself has paid—not with silver and gold, but with His own precious blood. Fail not, therefore, if you have not already done so, to effect an insurance, without delay, against the possible loss of your soul, for "what would it profit a man if he should gain the whole world and lose his soul, or what shall a man give in exchange for his soul?"—*Lutheran Observer.*

The Life of Faith.

"I may be faint and weary," says the believer, "but my God cannot be. I may alter and fluctuate, as to my frames; but my Redeemer is unchangeably the same. I might utterly fail and come to nothing if left to myself; but the Spirit of Truth hath said, 'I will never leave thee, nor forsake thee.' He will renew my strength, either by changing my weakness into strength, or by enduing me with His own power. He is wise to see and provide for all my dangers; He is rich to relieve and succor me in all my wants; He is gracious to hear and to answer all my prayers; He is omnipotent to deliver and defend me from all my enemies; He is faithful to perfect and perform all His own promises; He is eternal and immortal, to bless my poor depending soul with eternal blessedness and immortality. Oh, what a great and glorious Savior for such a mean and worthless sinner! Oh, what a bountiful and graciously indulgent Friend for such a base and insignificant rebel! What am I, when I compare myself, and all I am of myself, with what I can conceive of my God, and of what He hath kindly promised, even to me! What a mystery am I to myself, to angels, to men! A worm of earth to be like a star of Heaven; a corruptible sinner to be an incorruptible saint; a rebel to be made a child; an outlaw to become an heir; a deserver of hell to be an inheritor of Heaven; a stronghold of the devil to be changed into a temple of God; an enemy and a beggar to be exalted to a throne, to be in friendship with God, one with Christ, a possessor of His Spirit, and of all His honor, happiness, and glory forevermore; and all without any right to any one thing on my part, but the miseries of a lowest hell! Oh, what manner, and what matter, of love is this? Lord, take my heart, my soul, my all! I can render Thee no more, and I would render Thee no less."—*Ambrose Serle.*

Left a Large Property.

"He left a very large property," was the closing sentence of a recent obituary. How many reflections it suggests! What a pity he was obliged to leave it! He had taken great delight in collecting it. It was well and fairly earned. It was all the fruit of his own energy, industry, and good judgment; yet he had to leave it, and went out of the world as poor as he came in.

He might have taken it with him—rather he might have sent it forward in advance. Every dollar given in humble faith to scatter the glad tidings of salvation, every cup of cold water given to a disciple, every tear of pious sympathy for the suffering, every gift of his kindly charity to the needy, would have been treasure laid up in Heaven.

How much more blessed to go to, than to leave, a large property. The man who is poor in this world's goods, but rich in faith, closes his eyes on this life, and goes to take possession of his inheritance. He owned not a foot of land on earth, but for him

> "Sweet fields beyond the swelling flood
> Stand drest in living green."

His food here was plain and scanty, but there he will eat freely from the "tree of life." His garments here were poor and plain, but there he shall be "clothed in white robes." He associates here with those who are despised of men, but there his companions will be an "innumerable company of angels," and the "Church of the first born, which are written in Heaven."—*Pres. Banner.*

Religious Literature.

Literature is essential to the diffusion of knowledge, and a religious literature to the exposition of the doctrines, and the spreading of the moral influences of the Bible. The chief object of religious literature, is not to publish abroad the isms and peculiar dogmas of any particular denomination, but to make known the fundamental doctrines and the saving truths of the Gospel of Christ. When the former is the prominent aim, it is evident that that Church has fallen from her high position and measurably lost sight of her intended mission; but, so long as the latter is her absorbing aim and earnest endeavor—the former merely incidental and secondary—then the people of God are operating on the broad field of Divine appointment, and in the sunlight of their Master's approval. It is, however, necessary that the quarterlies and weekly periodicals of the Church should be patronized, circulated, and amply sustained.

What can the people know of the necessities, conflicts, and successes of the Christian Church, unless they read her literature and papers? The children of the world are wise! They read and spread abroad their publications, discussing politics, commerce, etc. They judge this course to be sagacious, therefore they do it extensively, zealously, and successfully. Let the "children of light" be equally wise in their sphere of activity—walk in the light of religious knowledge—and give prosperity to the Zion of our God. Let each family be taught the value of having a religious newspaper, in preference to every other kind of literature. Then we shall have efficient members in all our churches, because thdy are intelligent and qualified to work.—*Messenger.*

THE SABBATH FOR THE WORKING MAN.—The Sabbath is God's special present to the working man, and one of its chief objects is to prolong his life and preserve efficient his working tone. In the vital system it acts like a compensation-pond; it replenishes the spirits, the elasticity, and vigor which the last six days have drained away, and supplies the force which is to fill the six days succeeding; and in the economy of existence it answers the same purpose as, in the economy of income, is answered by a savings-bank. The frugal man, who puts aside a pound to-day and another pound next month, and who, in a quiet way, is always putting by his stated pound from time to time, when he grows old and frail, gets not only the same pounds back again, but a good many pounds besides. And the conscientious man, who husbands one day of existence every week; who, instead of allowing the Sabbath to be trampled on and torn in the hurry and scramble of life; treasures it devoutly up—the Lord of the Sabbath keeps it for him, and in length of days and a hale old age, gives it back with usury. The savings-bank of human existence is the weekly Sabbath.—*North British Review.*

FORMATION OF CHARACTER.—If you ever watched an icicle as it formed, you would have noticed how it froze, one drop at a time, until it was a foot long, or more. If the water was clean, the

icicle remained clear, and sparkled brightly in the sun; but, if the water was slightly muddy, the icicle looked foul, and its beauty was spoiled.

Just so our characters are formed. One little thought or feeling at a time adds its influence. If every thought be pure and right, the soul will be bright and lovely, and will sparkle with happiness; but if there be many thoughts and feeling impure and wrong, the mind will be soiled, the character depraved and darkened, and there will be final deformity and wretchedness. How important, then, that we should be on our guard against every evil impulse and desire.—*Christian Instructor.*

Young Folks.

Joe Benton's Coal Yard.

Joe Benton lived in the country. Not far from his father's house was a large pond. His cousin Herbert had given him a beautiful boat, elegantly rigged, with mast and sails, all ready to go to sea on the pond. Joe had formed a sailing company among his schoolmates. They had elected him captain. The boat was snugly stowed away in a little cave near the pond. At three o'clock, on Saturday afternoon, the boys were to meet and launch the boat. On the morning of this day Joe was up bright and early. It was a lovely morning. Joe was in fine spirits. He chuckled with delight when he thought of the afternoon.

"Glorious," said he to himself, as he finished dressing. "Now, I've just time to run down to the pond, before breakfast, and see that the boat is all right. Then I'll hurry home and learn my lesson for Monday, so as to be ready for the afternoon, for the captain must be up to time."

Away he went, scampering towards the cave where the boat had been left, ready for the launch. As he drew near he saw signs of mischief, and felt uneasy. The big stone before the cave had been rolled away. The moment he looked within, he burst into a loud cry. There was the beautiful boat which his cousin had given him, with its masts and sails all broken to pieces, and a large hole bored in the bottom.

Joe stood for a moment motionless with grief and surprise. Then, with his face all red with anger, he exclaimed:

"I know who did it—the mean scamp! It was Fritz Brown, and he was mad because I didn't ask him to come to the launch; but I'll pay him for this caper, see if I don't."

Then he pushed back the ruined boat into the cave, and hurrying on, some way down the road, he fastened a string across the foot-path, a few inches from the ground, and carefully hid himself in the bushes.

Presently a step was heard, and Joe eagerly peeped out. He expected to see Fritz coming along, but instead of that it was his cousin Herbert. He was the last person Joe cared to see just then, so he unfastened the string, and lay quiet, hoping that he would not be seen. But Herbert's quick eye soon caught sight of him, and Joe had to tell him all that had happened, and wound up by saying:

"But, never mind; I mean to make him smart for it."

"Well, what do you mean to do, Joe?" asked Herbert.

"Why, you see Fritz carries a basket of eggs to market every morning, and I mean to trip him over his string, and smash 'em all."

Joe knew that this was not a right feeling, and expected to get a sharp lecture from his cousin. But, to his surprise, he only said, in a quiet way:

"Well, I think Fritz does deserve some punishment; but this string is an old trick; I can tell you something better than that."

"What?" cried Joe, eagerly.

"How would you like to put a few coals on his head?"

"What! *burn* him?" asked Joe, doubtfully. His cousin nodded his head, with a queer smile. Joe clapped his hand. "Bravo!" said he; "that's just the thing, Cousin Herbert. You see his hair is so thick he wouldn't get burnt much before he'd have time to shake 'em off. But I'd just like to see him jump once. Now, tell me how to do it—quick!"

"'If thine enemy hunger, feed him; if he thirst, give him drink; for in so doing thou shalt heap coals of fire on his head. Be not overcome of evil; but overcome evil with good.' There," said Herbert, "that's God's way of doing it, and I think that's the best kind of punishment that Fritz could have."

You should have seen how long Joe's face grew while Herbert was speaking.

"Now, I do say, Cousin Herbert," said Joe, "that is a real take in. Why, it's no punishment at all."

"Try it once," said Herbert. "Treat Fritz kindly, and I am so certain that he will feel so unhappy and ashamed that kicking or beating him would be fun in comparison."

Joe was not really a bad boy, but he was now in a very ill temper, and he said, sullenly,

"But you've told me a story, Cousin Herbert. You said this kind of coals would burn, and they don't at all."

"You're mistaken about that," said Herbert. "I've known such coals to burn up malice, envy, ill-feeling, and a great deal of rubbish, and then leave cold hearts feeling as warm and pleasant as possible."

Joe drew a long sigh.

"Well, tell me a good coal to put on Fritz's head, and I'll see about it."

"You know," said Herbert, "that Fritz is very poor, and can seldom buy himself a book, although he is very fond of reading; but you have quite a library. Now, suppose—but no, I won't suppose anything about it. Just think over the matter, and find your own coal. But be sure to kindle it with love, for no other fire burns like that."

Before Joe had time to collect his thoughts, he saw Fritz coming down the lane with a basket of eggs in one hand and a pail of milk in the other. For a moment the thought crossed Joe's mind, "What a grand smash it would have been if Fritz had fallen over the string!" but he drove it away in an instant, and was glad enough that the string was put away in his pocket. Fritz started and looked very uncomfortable when he first caught sight of Joe, but the good fellow began at once with,

"Fritz, do you have much time to read now?"

"Sometimes," said Fritz, "when I've driven the cows home and done all my chores, I have a little piece of daylight left; but the trouble is, I've read every book I can get hold of."

"How would you like to take my new book of travels?"

Fritz's eyes fairly danced.

"Oh, may I? may I? I'd be so careful of it."

"Yes," answered Joe, "and perhaps I've some others you'd like to read. And, Fritz," he added, a little slyly, "I would ask you to come and help to sail my new boat this afternoon, but some one has gone and broken the masts and torn up the sails, and made a great hole in the bottom. Who do you suppose did it?"

"Oh, Joe, I did it; but I can't begin to tell you how sorry I am. You didn't know I was so mean when you promised me the books, did you?"

"Well, I rather thought you did it," said Joe, slowly.

"And you didn't—"

Fritz couldn't get any farther. He felt as if he would choke. His face was as red as a coal. He could stand it no longer, so off he walked without saying a word.

"That coal *does* burn," said Joe to himself. "I know Fritz would rather I had smashed every egg in his basket than offered to lend him that book. But I feel fine."

Joe turned two or three somersaults, and went home with a light heart and a grand appetite for his breakfast.

When the captain and crew of the little vessel met at the appointed hour, they found Fritz there before them, eagerly trying to repair the injuries, and as soon as he saw Joe he hurried to present him with a beautiful flag, which he had bought for the boat with a part of his egg money.

The boat was repaired and launched, and made a grand trip, and everything turned out as cousin Herbert had said, for Joe's heart was so warm and full of kind thoughts that he never was more happy in his life. And Joe found out afterwards that the more he used of this curious kind of coal, the larger supply he had on hand—kind thoughts, kind words, and kind actions.

"I declare, Cousin Herbert," said he, with a queer twinkle in his eye, "I think I shall have to set up a coal yard."

I should be glad to have all of you, my young friends, engage in this branch of the coal business. If every family would be careful to keep a supply of Joe Benton's coals on hand, and make a good use of them, how happy they would be.

Joe was sowing righteousness when he put that coal on Fritz's head, and he had a "sure reward" in the pleasure which it yielded him. Pleasure is one part of the reward of sowing righteousness. This is sure.

The other part of the reward is profit. This is sure also. Sometimes the profit of sowing righteousness is found here in this life.—*Religious Herald.*

The Boy who Didn't Care.

"James, my son, you are wasting your time playing with that kitten when you ought to be studying your lesson. You will get a bad mark if you don't study," said Mrs. Mason to her son.

"I don't care," replied the boy, as he continued to amuse himself with the gambols of Spot, his pretty little kitten.

"But you ought to care, my dear," rejoined the lady with a sigh. "You will grow up an ignorant, good-for-nothing man if you don't make a good use of your opportunities."

"I don't care," said James, as he raced into the yard after his amusing playmate.

"Don't care will be the ruin of that child," said Mrs. Mason to herself. "I must teach him a lesson that he will not easily forget."

Guided by this purpose the lady made no provisions for his dinner. When noon arrived, her idle boy rushed into the house, as usual, shouting.

"Mother I want my dinner!"

"I don't care," replied Mrs. Mason very calmly, working on with her needle without looking up.

"I am very hungry, mother," rejoined the boy.

"I don't care," repeated Mrs. Mason.

James was puzzled. His mother had never so treated him before. Her words were strange words for her to use, and her manner was so cold that he could not understand what it all meant. He was silent a while, then he spoke again:

"Mother, I want something to eat."

"I don't care," was the cool reply.

"But recess will soon be over, mother, and I shall starve if I don't get some dinner," urged James.

"I don't care."

This was too much for the boy to endure. He burst into tears. His mother seeing him fairly subdued, laid down her work, and calling him to her side, stroked his hair very gently, and said:

"My son, I want to make you feel the folly and sin of the habit you have of saying 'I don't care.' Suppose I did not really care for you, what would you do for dinner, for clothing, and for a nice home, for education? You now see that I must either care for you, or you must suffer very seriously. And if you must suffer through my lack of care for you, don't you think you will also suffer if you don't care for yourself? And don't you see that I must suffer too if you don't care for my wishes? I hope, therefore, you will cease saying 'I don't care,' and learn to be a thoughtful boy, caring for my wishes, and your duties."

James had never looked on his habit in this light before. He promised to do better, and, after receiving a piece of pie, went off to school a wiser if not a better boy.—*S. S. Advocate.*

Young Ladies' Seminary, Benicia.

The next term of this well known Institution will commence

WEDNESDAY, JULY 29, 1868.

REV. C. T. MILLS, Principal.

NEWS SUMMARY.

PACIFIC COAST ITEMS.

EARLY in the season, when wheat was selling at $1 65, the Sacramento *Union* urged the farmers to hold their wheat for higher prices, predicting that it would be worth $2 50 before the close of the season. The *Commercial Herald*, on the contrary, discouraged farmers from holding their wheat, representing that, owing to the abundant crops in Europe and the East, no considerable rise in the price could be expected. Of course the speculators favored the same views, and many farmers were induced to sell, beside the large number who are always obliged to sell early. The *Union* now shows, in a long editorial, the correctness of its former advice, and proves that on the wheat already sold, which would now bring $2, there has been a loss of $300,000. While farmers should avoid the error of holding their grain for exorbitant rates, they should by no means allow themselves to be frightened into giving it away, by the representations of speculators.

THE Health Office in this city is usually crowded with poor people, women and children, who desire to avail themselves of free vaccination. At the same time persons attacked with the small-pox and physicians attending small-pox patients, come immediately to the Health Office to report. Thus this horrible disease is spread in all directions by the very means used for its prevention. The *Times* calls loudly for the abatement of this nuisance. It says:

This criminal exposure and disregard of the lives of men, women, and children should be put a stop to at once. If small-pox cases and those attending them are to report at the Health Office, let it be so understood, and let the yellow flag be hung over the door.

THE recent earthquake in South America seems to have been one of the most destructive that has ever occurred. Full particulars of the loss of life and property are not yet received, nor is it known how far inland the force of the shock extended. On the coast of Peru many large towns, including Arequipa, the chief town of Northern Peru, were completely destroyed, and the number of lives lost is estimated at 50,000.

ZION'S HERALD, the leading Methodist paper of the East, published in Boston, has the following:

The Occident, a San Francisco Presbyterian journal, has reached its second volume. It is of the style of *The Herald*, though smaller. It is one of the best of papers. Our own journal in that city should assume the like shape and put forth like enterprise. The new book agent and editor cannot better signalize their inauguration than by these improvements.

A SHARP-SHOOTER at Marysville, preparing for a raid on the wild geese, when they shall appear, has constructed the disguise of a cow, in which he expects to approach the birds without alarming them. Unfortunately he has revealed his plans to the editor of the *Appeal*, who has thoughtlessly published all the particulars, and nothing but the most culpable neglect of the daily papers on the part of the geese, can prevent them from taking proper precautions to avoid the trap

THE *Chronicle* says: "We know of 50 cases of small-pox on the principal streets of our city, which have been reported to the Health Officer. We have taken the trouble to pass the infected premises in 21 cases, and have found only five flags exposed." On many of these premises the sign "Furnished Rooms" is displayed.

THE *Register* says that Napa City is just now one of the liveliest towns in the State. The wheat crop is coming in, and the streets are crowded with loaded teams. Many new buildings are going up. The *Reporter* appears in an enlarged and greatly improved form. It is now one of the best appearing papers in the State.

AN exhaustless source of wealth, now inaccessible, is the immense forests of sugar pine, which extend hundreds of miles through California, on the mountains. A belt of this timber extends at least three hundred miles parallel to the coast, no part of it above or below a certain altitude. It is reserved for the use of future generations; but the subject of propagating this pine in all congenial situations is engaging the attention of parties on the Pacific Coast.

A SINGLE load of grain, weighing 20 tons, was hauled to a warehouse in Vallejo last week. A large load, but a teamster in Nevada beat it badly. He hauled 14 cords of wood at one load, from Washoe City to Gold Hill, with 10 horses. The other man had 14 mules.

THE scholars of Mrs. Knight's school and those of the High School at Gold Hill, Nev., have lately had a very exciting "parsing match." Of course, the decision of the judges is not satisfactory to all, and the *News* predicts civil war at an early date.

THE *Republican* says that the supply of water from the artesian well on the plain between Los Angeles and Wilmington remains undiminished. It comes up with great force through a seven-inch pipe. The discovery of good water adds much to the value of the lands in that vicinity.

WE have already spoken of the 100 acres planted with sorghum cane near Alviso. The cane is said to be 10 or 12 feet high at the present time, and there is every prospect of an abundant crop.

THE Mechanics' Institute Fair closed on Saturday last. The total receipts were $55,000, which pays for the Pavilion, the expenses of the exhibition, and leaves $500 profit.

A MILL at Port Madison, on Puget Sound, is thought to be the finest in the world. It cuts 200,000 feet of assorted lumber every day.

EXTENSIVE paper mills have been built and put in operation in Oregon, on the road between Portland and Oregon City.

THE Postoffice is no longer kept open on steamer nights.

THE schools of this city are having a short vacation.

GOOD board six dollars a week at Denver, Col.

CURRENT TOPICS.

A few moments before the death of Thaddeus Stevens a Sister of Charity baptized him, the sick man expressing no special interest in the ordinance, or faith in the Lord Jesus as a Savior. With this single fact as the foundation of the statement, the Philadelphia *Universe*, one of the oldest and ablest Roman Catholic papers in America, declares that "he died a son of Pius IX, and as baptism expunges all sins which are on the soul before its administration, his salvation is certain." Is it, then, true that the stealthy administration of baptism when one is about to die will satisfy for all that has been wrong in a life time? Is it this ordinance, and not Christ, that expunges sin? And may even Catholics repudiate the old doctrine by which they have been most distinguished, that there is danger of eternal misery after a good man has left the body, and really believe the kind offices of a Sister of Charity, thus administered, may make *salvation certain?* Complete absolution and a positive pledge of everlasting life, if they can be so easily obtained on the verge of the grave as hardly to require the assent of the person to be blessed, will not be sought at much sacrifice of what most men prefer during their active career. Neither piety nor good morals will be greatly promoted by the prevalence of such a sentiment.

Familiarity with the light throes by which the earth is occasionally affected in California has induced a feeling among our people that no danger need be apprehended from this direction. The terrible earthquake which produced such havoc with life and property last month along the coast of South America should not fail to impress us with the folly of lightly esteeming any agency which God can employ with results so appalling. We may be thankful for the evidence that similar results have not been known in this latitude within the memory of man, and may with reason base our hope of safety for the future on this fact. There are climatic and geological reasons why so tremendous an upheaval is not probable here, and we have no sympathy with the prediction that San Francisco will yet be laid in ruins by an earthquake. Still, a hidden power that can strike 30,000 beings out of existence in an hour, and sink towns and cities where they stood, and make sport of the largest ships, while the commotion of the sea is so fearful that a huge tidal wave is rolled upon every shore washed by the Pacific, may well force upon us a conviction of our helplessness, and a humble recognition of Him who can wield it.

The fund for the support of disabled ministers should receive more general contributions than are reported by the committee who have it in charge. When the salaries of most pastors, especially in the country churches, are considered in connection with the expense of maintaining a family in the plainest manner, it is impossible that they can lay aside anything upon which to live when they become infirm or aged. There are few churches that feel under any obligation to provide for the support of those who are no longer able to serve them, no matter how long and faithfully they may have broken unto them the bread of life. The result is, that unless some general fund is furnished from which to aid these ministers, they must suffer, and many of them must resort to such means of living as will be no honor to themselves or to the cause to which they have consecrated their lives. The sight is sad and humiliating when an old or feeble clergyman is reduced to such straits that he must become a kind of pauper, or abandon his office, in either case being compelled to feel the indifference and ingratitude of those who might very easily make him both comfortable and useful. All that is necessary is that all our churches give something for this purpose. There ought to be some church pride in respect to this matter, and the excellent brethren who manage the fund should not be obliged to make affecting appeals from year to year that money enough may be placed in their treasury to meet the demands they do not feel at liberty to deny.

The question is often asked, how large the United Church will be, if the Old School and New School branches of the Presbyterian family become one. There will be 49 Synods, 253 Presbyteries, 4,130 ministers, 344 licentiates, 616 candidates, 4,327 churches, and 421,487 members. During the past year these churches contributed, for missionary and congregational purposes, $7,381,480. More than one-twentieth part of the members were united to the Church by examination last year. These figures give some idea of the extent and influence of this body of Christians, should the union be effected. The very magnitude of the Church is urged by some as an objection to union, but if there is real harmony of sentiment and purpose, the grandeur of the spectacle, as such a mighty power is concentrated upon the works of the enemy, and in support of God's cause, must increase its ability for good.

There may be good reason, viewed from the stand-point of the law, for the facility with which divorce may be obtained in many parts of our land, but the evils thus occasioned seem to increase. Until within a few years those who desired to be released from the obligations of marriage, were expected to make application in some one of the new States, since in these both the laws and the habits of the people were supposed to be less rigid than in the older portions of the country. But now the reverse appears to be true, and some of the New England States are going beyond any precedent established in the West. It is stated that on the 6th of last month the Superior Court sitting in Hartford, Conn. granted *nineteen* divorces during that single day, nor does this number surprise any one, as being unusual. The frequency of the announcement that our own judges have dissolved marriage bonds, leads many to think they are not sufficiently mindful of divine injunctions or public welfare; but such a record as this of a single day's doings in a California Court would startle the community. State Legislatures and judges of the court have need to be on their guard, lest they open flood gates in this direction through which shall rush a tide that will bear away much that in a refined society is regarded as pure, and valuable, and sacred. History demonstrates the wisdom of God in limiting so distinctly the reasons for divorce.

Marked success has attended the efforts of different missionary societies to extend the influence of the Gospel in the Southern States, by means of colporteurs. The disordered condition of the people since the war, and especially the fact that now there is direct access to all classes, black and white, have made it impossible that regular churches and an established ministry should be immediately supplied, to the extent of the demand. But men traveling with the Word of Life, and with warm hearts, who have won the confidence of the people, and proved themselves to be anxious only for their spiritual good, have been exceedingly useful. Those who have money, freely send on donations to the societies that employ such agents. Those in prominent positions testify to the good work they are doing, and appeals are made in tones of emphatic earnestness that northern Christians will liberally aid in support of those thus employed. We should not neglect the call for light that comes to us from the dark portions of the earth; but it can hardly be doubted that just now the most imperative demand on American Christians is on behalf of their own land. Neglect of this may be suicidal, as well as wicked.

The statement is made in a Russian newspaper that while a great number of books have been published in St. Petersburgh and Moscow, on an average each book finds a sale of from 30,000 to 350,000 copies. This makes known a habit of reading among the people much more general than we had supposed, and great advance must be made by a nation with such facilities for intelligence, provided the books circulated are of real value. Heretofore the country has been inundated with inferior publications, not so much because the taste of the readers demanded these, it is said, as because they could be more readily obtained and issued by the greedy speculators who care little about the good or evil

tendency of the volumes they sell. Now it is recommended that a society be formed to regulate and superintend the publication of books for the lower classes, and no doubt a great reform will soon attest the wisdom of such an organization. A similar supervision, on the part of good and able men, of books published in our country would be most healthful in its influence on the public taste and morals. It would remove a large part of the burden now borne by the shelves of libraries, and the teeming products of our steam presses, but the loss would be great gain. The intelligence of the people does not depend on the amount they read, but on what they read, and since in this land we can hardly have a committee of men with power to prevent the publication of what can be of no value, each man should shut away from himself every book and periodical the reading of which is not likely to add to his knowledge, or in some way do him good.

Religious Intelligence.

PACIFIC COAST.

Notice.—The Synod of the Pacific will hold its next annual meeting on Thursday, October 1st. Opening sermon by the retiring Moderator, Rev. J. S. McDonald, at 7½ P.M.

John Edwards, Stated Clerk.

Presbyterian.—We have received the following interesting communication from Rev. S. T. Wells, concerning the Church in Contra Costa County:

I had the pleasure of assisting Bro. Avery at his communion last Sabbath. It was held in the new and commodious school house at Limerick, in San Ramon Valley. In the more central portions of the valley, from above Limerick to Walnut Creek, he has received the hearty co-operation of the people, and here the good cause has greatly flourished.

Seven persons united with his church last Sabbath, and as many more at a recent communion. Eleven persons who are heads of families were recently united with his church, most of whom live in the neighborhood of Limerick, eight of these recent additions are men of great and good influence in the community, and most of the Protestant population of that neighborhood give him their cordial support, and are greatly pleased with the success of this church enterprise. There are some seven or eight flourishing Sabbath Schools and two strong temperance lodges within his bounds.

Every moral and religious influence has greatly gained within the last two years, and the existence of a permanent Presbyterian church among the people is no longer a problem. Those who early cooperated with Bro. Avery in this enterprise now see that their labors were not in vain. They are now prepared to erect a house of worship, and would do so at once were not their commodious new school house so convenient and ample for that purpose for the present. May the Lord bless them still more abundantly.

Brooklyn, Sept. 21, 1868.

Methodist.—The 16th session of the California Conference was held in the Howard Street M. E. Church, in this city, commencing on Wednesday, 16th inst. The meetings were well attended by the ministers of the Conference, and were presided over by Bishop Scott. During the session no questions were presented for discussion concerning which any radical difference of opinion existed among the members of the Conference, and a remarkable degree of harmony prevailed throughout. Reports of the progress of the cause from the several districts were generally favorable—from some quarters exceedingly so. Letters were read showing great successes in foreign lands, especially in England and the British Colonies. The total capital of the Western Book Concern was reported to be $460,370. The nett profits for the past year were $57,435.

Each meeting of the Conference was accompanied by interesting devotional exercises, and several public evening meetings were held, of more than ordinary interest.

The meeting of the Church Extension Society on last Sunday evening was both instructive and amusing to a high degree. The object of the meeting was to raise money for the support of a missionary among the Chinese, to establish Sabbath Schools, etc. The Methodists are never backward on such occasions, but certainly never was a raid on the pockets of a congregation more skillfully devised, or more successfully executed, than on this occasion. A strong force of city pastors is distributed among an unprotected company of men, women, and children, to solicit subscriptions. Self-defense or escape are equally impracticable. Bro. Smith yields to the pressure and timidly consents to give $5. "Bro. Smith, $5!" is echoed in thunder tones up to the speaker's desk, amid bursts of applause from the audience. Will Brother Jones calmly endure that? Will he hear Bro. Smith's name "called out aloud in meeting" as giving more than he? By no means. "$10 for Bro. Jones!" And so the good work goes on. A brilliant success was only a question of time, and in less than twenty minutes more than $2,500 was realized.

What denomination will undertake to surpass the Methodists in a good cause? Here is a chance for a noble rivalry.

The temperance meeting held on Monday evening was addressed by several fine speakers. This denomination proposes to discipline all members who make or traffic in spirituous liquors.

The next Annual Conference is to be held at Napa City.

Some of the more important personal changes and appointments made by the Conference may be found in our "Personal" department.

Baptist.—The *Evangel*, in a general review of the condition of the Baptist Church on the Pacific Coast, affords the following information on the subject. In Oregon, the Church has been much divided by different causes, personal and political. A strong effort is now being made for closer union, and with good prospects of success. Oregon preachers have failed in their work to a great degree for want of adequate support by the people.

In the northern part of California there are no Baptist churches, and no efforts have recently been made in that direction.

Rev. Mr. Ford, of Napa, has established a mission in Berryessa Valley which promises well, and Rev. Mr. Hamilton has been at work in the San Joaquin Valley with good success.

In the Sonora District the cause is dying out, owing to the prevalence of the doctrines of soul-annihilation.

There are very few Baptist churches in Southern California, but active movements are being made, and much interest is excited.

The church recently organized at Redwood City is flourishing finely. Churches have also recently been established at San Rafael and near San Luis Obispo. The new church at Oakland is rapidly approaching completion. In San Francisco and the larger towns of the State, the churches have gene rally a healthful prosperity. The Third Church in this city is taking steps towards having a new house of worship.

The 11th anniversary of the Pacific Baptist Association was held at Ukiah, commencing Saturday, 19th inst.

Young Men's Christian Association.—The new hall of the Young Men's Christian Association was thrown open for the inspection of the public on Thursday evening last. The size and general plan of construction have been given to our readers before. The building has been beautifully and substantially built, and, with its imposing stone front, is an ornament to the city. The interior of the building is well furnished, and the different apartments are conveniently arranged. In the basement is a fine gymnasium, with bowling-alley, baths, dressing-rooms, etc.; also, two stores fronting on Sutter Street. The main Lecture and Concert Hall, 50x60 feet, is in the rear part of the building, and only 11 feet above the side-walk. It is furnished with comfortable seats and has a fine gallery on the end toward Sutter Street. Connected with this hall are reception rooms provided with all conveniences. On the second floor are the Library and Reading-room, the former 13x29, and the latter 29x32; also, Ladies' Parlor, Chess Room, etc. All these are elegantly carpeted and furnished. The third floor is divided into committee rooms, dormitories, etc. The building is to be dedicated, with appropriate exercises, in a few days.

Congregational.—The annual collection in the First Church of this city, for the benefit of the Ladies' Protection and Relief Society amounted to $606 60. The collection in the Third Church, for the same purpose, amounted to $30 30.

At the annual meeting of the General Association of California, which will be held at Oakland on October 7th, each Congregational church in the State is entitled to two delegates for every 50 members in excess of 100.

Episcopal.—The Fair recently held at Santa Barbara, for the benefit of the building fund, was a financial and social success. The net receipts amounted to the handsome sum of $563.

An Episcopal church is being built at Bridgeport. It will be a small but neat building, and services will be held twice every month. Rev. Dr. Breck has already organized a Sunday School there, with a large number of children in regular attendance.

The Orphan Asylum.—The refreshment saloon kept open by the ladies of Sacramento during the Fair, for the benefit of the Orphan Asylum, has been highly successful, as it certainly deserved to be. On Tuesday evening Chiarini, the circus man, gave a performance for the benefit of this cause.

EASTERN.

Religious Views of the Chinese Embassy.—The religious belief of the native members of the Chinese Embassy, which Mr. Burlingame has brought to this country, is a matter of interest. They are not, it would seem, idolaters. A correspondent of the *American Presbyterian* affirms that the entire suite is composed of Confucianists, no Buddhist or Tauist being among the number. Confucian temples have no idols. They are not, indeed, places of religious worship, for Confucius taught nothing in respect to God or man's relation to Deity. He taught only man's duty to men. These men know

and respect our missionaries. They have seen the translations of the Bible, and know something of Jesus. One of the interpreters said he was taught English by Rev. Dr. Martin, a missionary from America, and now a Professor in the new University established at Pekin, by imperial decree, about a year ago. He seemed to think much of his teacher.—*Observer.*

AN OLD CHURCH.—There is a church in East Haven, Conn., which was dedicated in the month of September before the battle of Lexington, and the society was organized one hundred and sixty-four years ago. All the clergymen who have officiated as pastors lie buried in the cemetery near by. The church is built of stone, which was entirely worked out by the neighboring farmers, who were, with one exception, unpracticed in masonry, and though erected nearly one hundred years ago, the walls look as well and firm as if done yesterday.—*Christian Instructor.*

THE NEGRO QUESTION.—The quarrel between Gen. Howard (of the Freedm's Bureau) and his pastor, Dr. Boynton, chaplain to the United States Senate, about admitting negroes to an ecclesiastical equality in the Congregational church in Washington City, seems likely to bring matters to a division. A council has been called to try whether it can settle the dispute. The General is in favor of the measure, the pastor is opposed to it.—*N. Y. Presbyterian.*

ORPHAN ASYLUM.—The corner-stone of a large and well endowed Orphan Asylum was laid in Racine, Wisconsin, on the 8th ult. It is a monument to the liberality of the late Isaac Taylor and his wife of that city. He came to this country from England a destitute orphan boy in 1828, and at the time of his death in November, 1865, after a residence first in Cleveland, Ohio, and since 1842, in Racine, left a fortune of $400,000.—*N. Y. Observer.*

WITHOUT A PASTOR.—Since Rev Dr. Stone, of Park Street Church in Boston, went to San Francisco two years ago, that society has been without a pastor. The church is now reconstructing, and the thirty-nine tombs which were built under the vestry will all be removed, with a single exception.—*Christian Instructor.*

DIVIDED.—The Independent church at Evanston, the beautiful suburban town north of Chicago, have peacefully divided, the Presbyterian membership buying the old house, and the Congregational swarming into a new organization, which has already secured a lot, and is taking measures toward building a house forthwith.—*Chicago Presbyterian.*

TAKING TURNS.—Rev. E. G. Smith, of Bangor Seminary, has engaged to supply the Congregational and Baptist churches at Rockport, the two churches uniting in their worship and Sabbath schools, with the understanding that they are to have a Congregational minister one year, and a Baptist the next.

THEOLOGICAL SEMINARIES.—The Congregationalists have six theological seminaries, Bangor, Andover, Yale, Hartford, Oberlin and Chicago,—with 26 pastors, 11 lecturers and 271 students. Andover has 5 professors, 6 lecturers and 115 students.

THE OLDEST GRADUATE.—Jacob Newman Knapp, Esq., died at Walpole, New Hampshire, the 27th ult., in the 95th year of his age. He was the oldest surviving alumnus of Harvard College, having graduated at Cambridge in 1802.

SOUTHERN CHURCH.—The increase in the number of candidates for the ministry in the Southern Presbyterian Church during the six months ending April 1. 1868, was twenty-four.

SABBATH SCHOOL BUILDING.—Dr. R. S. Storrs' people in Brooklyn are to build a $75,000 Sabbath School edifice.—*Christian Herald.*

FOREIGN.

MISSION WORK IN HUNGARY.—The American and Foreign Christian Union now employs three laborers in Hungary, under the superintendence of Rev. R. Kœnig, of Perth. One of them, Mr. Riedel, who was Bible Ag't for the British and Foreign Bible Society in Albania for three years, has had his field of labors in Transylvania, a country which has never before been trodden by the foot of a missionary or colporteur. His success is highly encouraging.

Mr. Friklich studied for the ministry two years in Basle, and he had his work in several of the southern counties of Hungary as traveling evangelist, preaching in Hungarian, etc.

The third is a deaconess from Kaiserswerth. She is emphatically a home missionary in all branches of detail; visiting the poor, the sick, the blind, and cripples of all classes and creeds, and laying hold of such destitute poor as have no care extended to them from any other denomination. She has further succeeded in gathering an interesting Sabbath-class of 35 to 40 children, mostly Roman Catholics. Several Roman Catholics with whom she has become acquainted have given up their connection with the Popish Church and joined our congregation. Among them are several cases of decided conversion. In addition, Mr. K. has eight colporteurs under his supervision, who report as (chiefly) sold 10,000 copies of the Scriptures, in whole or in part, in ten different languages, and also 70,000 religious books and tracts. A work so well begun and so admirably sustained, in a country so interesting and important, ought to be encouraged by sympathy and prayers, and to have the means of a great extension.—*Independent.*

A VETERAN METHODIST.—Rev. W. Naylor, the oldest preacher in the British Wesleyan Conference, died July 10th, at his residence, Holyhead-road, in the eighty-seventh year of his age, and the sixty-sixth of his ministry. His itinerant labors continued from 1802 until the Conference of 1862 (three-score years), when he became a "supernumerary." He was pastor of most of the leading circuits of the connection, and chairman of influential districts. Through more than half a century he was identified with every great movement of Methodism. He was one of the ministers that took part in the formation of the Wesleyan Methodist Missionary Society, and was spared to preach one of the sermons at its jubilee. Until near the end of last year he continued to preach in the Wednesbury or neighboring circuits almost every Sabbath.—*Observer.*

SIGNS OF PROGRESS—THE SCRIPTURES IN RUSSIA.—There is at the present time an unusual interest in the circulation of the Scriptures in Russia. The Synod of the Greek Church is putting thousands of copies into the hands of the people; and the priests and clergy are everywhere encouraging the people to read them. Officers in the army and navy are directed to see that the men under them are taught to read, and copies of the New Testament are the first books put into their hands after they have learned to read.

CENTRAL TURKEY.—The progress of Protestantism in Central Turkey is more and more rapid every year, especially since the mission has hit upon the right policy of making their churches self-supporting. In Aintab the number of Protestants has increased during the year by 189, and in Marash by more than 100; while 48 have been added to its two churches. In Adana the congregation more than doubled, and now averages about 260.—*Independent.*

THE CONFESSIONAL IN AUSTRIA.—Several of the large towns in Austria have protested against the Papal Allocution. The *Lloyd* of Pesth says; "We shall no more tolerate the interference of Rome in our legislation than we did that of Vienna. We shall tremble as little before a council of churchmen in Rome as we did before a council of war in Vienna. A nation which has passed without wavering through the fusilades of Haynau will be able to defend its independence against the thunders of the Vatican.

TARSUS,—THE CHURCH THERE.—The church and congregation in Tarsus, the birthplace of the Apostle Paul, under the charge of the American Board, have doubled during the last year.

SABBATH SCHOOLS IN HOLLAND.—In Holland, as in Switzerland there are a few women who have imported from England and America the Sunday-school idea. In almost every large city there may be found a group or two of girls, and perhaps some very small boys, taught on our infant-class system; classes not yet being introduced, for want of a sufficient number of persons, male or female, to take an interest in them.—*Independent.*

SPURGEON'S COLLEGE—THE WORK IT IS ACCOMPLISHING.—During the past ten years Spurgeon's Pastors' College in London has sent out about fifty preachers, and now has eighty or ninety students. The course of study is limited to two years' actual work at preaching being mingled with study. Calvinistic theology is taught as the undoubted "teaching of the word of God." The yearly expenses are about $25,000.—*United Presbyterian.*

MISSIONARY HOME.—A movement has been set on foot for establishing a Convalescent Home for the London city missionaries. No class of men are more deserving of sympathy in case of illness. Toward this desirable object one gentleman has already offered £200 donation, and £10 annually.—*Independent.*

THERE are twenty Episcopal churches in Ireland in which the service is conducted in the native Irish tongue.

PROCEEDINGS OF THE ASSOCIATED ALUMNI OF THE PACIFIC COAST, at their Fifth Annual Meeting, held June 3d, 1868. Price, Seventy-five Cents.

NEW BOOKS.

GOING TO JERICHO; or, Sketches of Travel in Spain and the East. By John Franklin Swift.

As a describer of famous scenery and foreign society, Mr. Swift deserves to rank among our best travel writers; and as a humorist, he has no equal among them, and few superiors anywhere.—*Alta California.*

A handsome 12-mo. Price, $2 00.

ALDEANE; A Novel. By Laura Preston, author of "In Bonds," etc.

This book has a charm that will fascinate the reader at the first chapter, and the interest is well sustained to the last.—*Stockton Independent.*

A beautiful 12-mo. Price $2 00.

A liberal discount to the Trade, Clergymen, Teachers, and Canvassers.

Orders for the above Publications respectfully solicited and promptly filled.

A. ROMAN & CO., Publishers,
San Francisco.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. San Francisco, Cal.

Young Ladies' Seminary, Benicia.

The next term of this well known Institution will commence

WEDNESDAY, JULY 29, 1868.

REV. C. T. MILLS, Principal.

Correspondence.

To California by the Overland Route.—No 6.

It is often remarked that during a sea voyage, persons who are entire strangers become very thoroughly acquainted with and interested in each other. I think the same is true of those who travel in company overland; I know that this was the case with the members of the small party with which I left Laramie City and which was broken up when I departed from Salt Lake for the West.

The ride for three days after leaving the metropolis of Utah was generally uninteresting, through alkaline plains and a wilderness of sage-brush and grease-wood. Our first stage brought us to the shore of Salt Lake, which has a beautiful expanse and is remarkable for the deep blue of its surface and the pellucidity of its waters. The stage road traverses its border for some distance so that we had a fine opportunity of viewing it. In some portions of the beach the earth was quite heavily encrusted with a deposit of salt which, in the distance, shone like fields of snow. Far off on the horizon rises the dim outline of the mountains surrounding the lake, and of the islands which it encloses, while in the foreground, upon a sandy shore, where the murmur of the surf makes cheerful music, lie scattered rocks here and there, and in the shallow water the eye occasionally meets the mossy head of a submerged boulder just rising to the surface, or rests upon some dark tower of stone rearing itself still higher. As we passed, a flock of geese were disporting themselves amid the waves. During the day, as we stopped at various small towns, it seemed as if we saw, more than once, a diminutive Salt Lake City, houses being built of sun-dried brick, and spacious yards with orchards, and streams of water coursing through the streets giving them a resemblance to the larger town which we had recently visited. At 2 P. M. we entered Rush Valley, and soon after passed a beautiful little lake, which, with the adjoining land for some little distance around is included in a government reservation. The remainder of the day was spent in traversing this valley, which, with the exception of an occasional wheat field is mainly occupied by the wild shrubbery, already frequently alluded to, grease-wood and sage brush. Now and then a hare jumps from its rest by the side of the road and speeds away. Indians are met with quite frequently; one, old and nearly blind keeps far away from the stage-coach; another, young and active, has a bow and arrow in his hands and around his waist a heavy string of game. The road is strewn with the skeletons of horses and oxen, and an American eagle sitting on the top of a telegraph pole may be taken, in that appropriate and suggestive position, as an emblem of the enterprise of the state and the nation.

Noticing such items as these we pass at length, just at the close of day, out of the west end of Rush Valley, having, as we make our exit, a fine view of 22 snow-clad peaks in one clustered group—a rare and beautiful sight! The night passes without any occurrence worthy of note except the balking of a horse as we are making the ascent of a very steep hill, a piece of equine perversity which—had it not been for the efficiency of the brake—might have resulted in serious accident to us all, but, as it happened, was only the occasion of a temporary nervous agitation among the passengers and a good deal of profanity on the part of the driver.

On Wednesday we had a distant view of the great American desert, which, lying afar off beneath the horizon bears some resemblance to a vast, frozen and snow-bound lake.

On Thursday we were simply repeating the scenery and the experiences of former days, traversing barred mountains, on some of which the snow still remains and among which we frequently see the rain and the lightning, while peals of distant thunder break heavily upon the ear. The monotony of riding is sometimes varied by walking up a hill and we gather boquets of flowers, and it is a pleasant relief to change position at every station and to make inquiries of the residents and the telegraph operators as to to the latest news. With every succeeding day courage and pleasant expectations increase as the journey's end is drawing constantly nearer, and we cheerfully accept the discomforts of the way because we know they will soon be over.

At 2 A. M. on Friday we came rolling into the city of Austin, Nevada, which we find to be a mining town lying in and on the sides of a narrow and crowded valley. It has but one principal street and on this there seems to be a good deal of business done. Its dwellings, constructed of various materials are perched here and there upon the hill sides. Indians are seen in considerable numbers. Mining is carried on extensively in a number of quartz mills in different parts of the town and the hills around are full of openings from which the precious ore is produced.

After a few hour's delay at Austin we are on our way again leaving the hills behind us and for the most part of the day traversing wide plains of sand which differ from those already passed only in being more wholly given up to sage-brush and grease-wood.

Towards evening we saw a solitary pelican flying over the dreary waste and the scriptural simile of the hundred and second Psalm arose to my mind: a better emblem of lonely desolation than this bird, in these circumstances we could not hope to find.

Another night—and the last—of stage-riding, during which, notwithstanding the discipline of a week, we failed to sleep, and another day across a wearisome plain, whose grease-wood and sage-brush are still larger and more abundant than any before observed; where we are interested in noticing several new varieties of squirrels and lizards, active, nimble little fellows appearing from their color very much as if they were *animated bits of mud*; where we meet mule-trains and ox-trains of from 7 to 12 span, which, with their attachments of 2 or 3 ponderous wains make trains that are second only to those of the R. R.; another day of suffocating dust and constant warfare with innumerable gnats and we are brought at last, by the ascent of a long hill, where the road follows the course of a ravine and the ravine is made by a stream, which stream is adorned by a number of high over-shot wheels and lined with sluice-boxes and altogether the muddiest, most tormented stream that ever was seen, we are brought, weary and way-worn, into Virginia City where friends and rest await us.

The city lies on the side of a very great hill, Mt. Davidson. Its streets are, in one direction, very steep, while in another they are quite level and present as great an appearance of life and activity as those of most cities. There is a wonderful variety in Virginia City in many respects: men of all nationalities—Indian, Chinaman, Jew and Gentile—compose its population, estimated at 5,000, and all shades of religious and irreligious opinions, and grades of immorality, may be found in the community. The town is well supplied with the means of grace, and we have the pleasure of attending on the preaching of Rev. T. E. Taylor, of the Presbyterian church, from whom we hear encouraging accounts of the progress of the Faith.

To one who is just from the long journey across the continent, there is something very pleasant in the contrast between these bustling streets and the dreary wilds of the desert, and no less agreeable is it to be able to enjoy, even amid the ceaseless din of the mining machinery, a much better rest than would *ever* have been possible in the rumbling and jumbling of the stage-coach. W. R.

From a Lady Correspondent.

Absence from home, during the "heated term" in our little mountain town, illness, and the lassitude consequent upon convalescence, have combined to prevent me from sending my promised "occasional" to your excellent journal. But with a renewal of health and strength, I resume my long vacated seat at the writing desk, being prompted to enforce the very useful suggestion in a late number of The Occident, of "supplementary agencies in the work of religion," by the sad experiences of the neglect of the Sabbath, and the consequently low moral tone of most of the small mining towns in the mountains, which have come under my own personal observation, during a residence of some years here.

The idea of traveling ministers of the Gospel, stopping occasionally in remote and sparsely populated towns, to address the people on the vital interests connected with spiritual growth, has often presented itself to my mind, and I think any one looking in, upon a Sabbath day, or upon a week-day either, at the card playing, gambling, and drinking, in some of these places, would see a vast field of labor in the direction indicated by your excellent article.

Here are young men, with time hanging heavily upon their hands, who do not, or will not, go to church (if there be one in the place). Attracted by merely looking on, for the amusement of an idle hour, they learn, all the while, lessons leading to vice, profanity, and intemperance. Without the restricting influence of homes, without the coercive forces of example, without a public sentiment reproving such things, and, above all, voluntarily without the teachings of the Gospel, they glide with slight resistance down the terrible slope of sin, and, yielding to the alluring seductions of the gaming-table, neglecting their legitimate occupations, and lounging around saloons, dissipate their lives away with fearful celerity.

Now, if these and others will not go to the minister, or preacher, to be taught, let the minister come to them; let him occupy the stands set apart for our political speakers in this campaign, and which are erected in almost every town, and *force* the issues of religion upon the people as earnestly as political issues are forced upon the parties now opposing each other in the field, and it does seem to me as if great good would result.

The retiring Methodist preacher, who has officited to a few—very few—hearers here, during the past two years, solemnly assured them, as he bade farewell to the little congregation, that unless there was a change among the population, regarding serious things, that the very town itself would, to use the miner's phrase, as he used it, "peter out," and that emptiness, nothingness, and desolation would be the result of the great neglect of religious and moral interests in the place.

Dwellers in large cities scarcely know how much

they are blessed in having their children shielded by the *law* from sights which are common in mining towns—where every saloon and whiskey-shop has its knot of card-players; and the children, the little boys and girls, so quick to see, so apt to learn, may stand and look on, unnoticed and unchecked.

Send us some good men—whether they be ministers or not—who will fearlessly speak the truth in the streets; who will "cry aloud and spare not," and the same crowds who flock from curiosity, interest, or because they have nothing else to do, will at least listen. It may be a hard soil in which to sow the seed. It may fall in barren places and stony ground, but the good Lord will bless and sanctify the work done in His name sooner or later, and the disheartened mothers, the few teachers who are laboring in the Sabbath Schools, will take courage and renew hope, while the many who have forgotten the memories of home and early teachings, may stray back again, for the sake of the "old folks at home," at least to hear the good tidings. I well remember the first "Friends'" meeting ever held on the Pacific Coast. It was at my own home, and one man said to me after, "This is the first time for six years I have been in a place of worship."

The "Friends" had come from England on a religious mission to California, and traveled over many miles of country here (as you suggest now), preaching, distributing books, and doing good, as the Master led them, who "Himself went about doing good," and many souls lived to bless them as a means of renewing their faith and hope in Jesus.

The individual to whom I have alluded became a sincere and earnest seeker after Truth, and dying in this distant land, bore testimony to the saving grace of a crucified Redeemer.

It matters not what denomination a Christian pastor represents—it matters not whether consecrated to the sole work of the ministry—layman or deacon—the good word can be carried to many a remote and thinly populated locality, by any God-fearing Christian, and I trust your very excellent suggestion will be acted upon. N.

Sept. 20, 1868.

REMOVAL.

Rowland, Bailey & Co.

Have removed their stock of

GROCERIES AND PROVISIONS

From 516 and 518, Washington st.

To 535 & 537 Clay St,

Four doors below Montgomery St. and nearly opposite the Pacific Fruit Market.

They have on hand every article sold in a first-class grocery store, and prices are as low as the lowest.

Good Work! One Price! Punctuality!

D. Bruce,

PRINTER,

Commercial Street, opposite Miners' Restaurant.

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

THE OCCIDENT

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of PRACTICAL AND SCIENTIFIC.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance THE OCCIDENT *is acknowledged to have no equal on the Pacific Coast.*

THE OCCIDENT

Is edited by REV. JAS. EELLS, D.D., of the First Presbyterian Church, San Francisco—formerly of the Church on the Heights, Brooklyn; and Rev. E. B. WALSWORTH, D.D., of Oakland, as Associate.

It is the aim of the Editors and Publishers to make THE OCCIDENT, in every respect a first class paper, and one that will be WELCOME IN EVERY FAMILY.

A year's subscription to THE OCCIDENT *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

TERMS.—$4 00 a year, in advance; $2 50 for six months.

To Advertisers,

A first class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the VERY BEST MEDIUM for bringing their business before the public.

Direct all communications to "THE OCCIDENT, care of Bancroft & Co., San Francisco."

ATTENTION TO DETAILS ESSENTIAL TO PERFECTION.

Wherever the agency of God appears, in nature, or in Providence, perfection is often the result of means that seem insignificant, and in nothing is Divinity more manifest than in the control of these means. A flower is not produced by those general laws which promote the growth of vegetable matter, but, in addition to these, by all the delicate, innumerable laws which paint, and perfume, and proportion, until it is without rival in its beauty.

A mountain does not tower before us in its grandeur because of the more apparent natural causes which have formed its rocky substance, but its sublimity results from the myriad unseen, tireless agents, that work among the atoms, and compose the rocks, and pile them up, and clothe them with what we behold as we look upon the mountain. The destiny of nations is not determined by those immediately antecedent influences which seem to us to establish one, and convulse another with the throes of revolution, and whelm another in ruin. In each case, the Providence which thus appears in the conclusion has wrought for years, perhaps for ages, in the elements of the national structure, and in the remote details of national conduct, the destiny being the long foreseen termination of this complicated process. Indeed, as we have said, the majesty of God's works is seen from no point with such effect as that which exhibits the infinite particulars which thus combine; and their perfection would be impossible but for the countless contributors—each in its place—guided by the Architect who never wearies, to whom nothing is unimportant, and who never errs.

Now, it is in accordance with this universal exhibition of Himself that God has determined that a noble character in man shall not consist of outlines merely, or prominent peculiarities, which may result from a few influences, or the more general purposes, but has ordained the action of all the variety of motives, feelings, desires, thoughts, in this beautiful creation. He has decided that even these prominent features shall be produced by the long-continued, almost unnoticed, working of moral forces that gradually frame them together; and to fill up, and beautify, and complete the whole, are appointed a host of viewless artisans, of which each one adds to the noble result. He has given us instructions for all this detail of work. He makes our dignity and worth to depend on our attention to these instructions, and represents the angels and Himself as watching with perpetual interest the man who strives to bring his very emotions, and thoughts, and wishes under contribution to his self-development, heeding the directions He has given, and accepting the aid He is willing to bestow.

Yet how rarely do men respond to this necessity declared by God! Men say, "If our principal designs and acts are right, we need not be particular about our minor purposes and conduct." Indeed, there are many who declare that if they intend to live according to the *spirit* of God's requirements, they will not be condemned, though they pay no heed to the *special rules* He has given, for God looks only on the governing purpose. They behold the heavenly vision of a perfect character, vouchsafed to them as a model, and hear the voice recounting all the process by which they may resemble it, then reply: "This process is not necessary. These restrictions upon the thoughts, these demands upon the action, this constant subjection of the whole being to the will of God, cannot be essential. We mean well; the main features of our life are all correct, and that is enough!" They do not study the directions given; they assume them to be superfluous, and throw as a covering over all the imperfections they do not attempt to remedy the fallacy we have mentioned.

It is true, that a man is as is his governing purpose, but it is his duty to inform himself respecting all that it is possible for him *to do*, and this purpose must urge him over this whole field of effort; it is his duty to learn, in all particulars, what he *may become*, and this purpose must move him to constant zeal in self-improvement. It is never to be passive, never to be indifferent to God's authority, never content with a vague and general influence. You must intend to do right, but you must also intend, in the fullest extent of the knowledge, to know what is right. Here is the error of those who decide that a large part of the Bible can be of no practical use to us, because it treats of details. It is the error which would imagine a tree to be perfect that has a few sturdy, vigorous limbs, while the most are stunted and unhealthy, and the foliage is too thin to hide the defects. The tree can be symmetrical, beautiful, complete, and so may it be with character, if it shall be cared for in its growth, as God designed. There is nothing in the Bible that may not bear upon this growth, and Heaven's stern rebuke descends on those who dare to question the demand that they strive, by all the appointed means, to be thus perfect. As we look around us, we are forced to believe that there is a multitude on whom this rebuke must fall. Happy is he who, as he looks within, is not obliged to confess that he himself is among the number.

THE MEETING OF SYNOD.

By an inadvertence that is to be regretted, the Synod of the Pacific meets this year a week before the meeting of the Synod of Alta California. The purpose was to have the two bodies in session at the same time, as has been true for some years past, but because the month begins with Thursday this year, and the adjournment was to the first Thursday of October, the Old School Synod must convene next week. It is not necessary that the sessions be during the same days that good will and a fraternal spirit may be cultivated by the intermingling and association that are then as natural as they are pleasant, for were we united, there could hardly be more brotherly love than already exists among us. But it is cheering and profitable, at least once in a year, for all to meet together for conference and acquaintance, and just now there are several practical questions which should be considered by the Synods in joint session, in order that they may be fully brought before the Churches. It is to be hoped, therefore, that since this is now impossible, the Synod of the Pacific will appoint a large delegation to meet with the other Synod at its session, and confer with the brethren upon these points.

The meeting of Synod is anticipated with much interest by our churches in the city, and by those in the country, because new measures may be devised for the prosperity of all, and the Spirit of God may be expected with peculiar power when His servants convene for such a purpose. Let prayer be offered throughout the State, that these meetings this year may be productive of great good.

THE STATE FAIR.

California is not yet known to its own inhabitants. The extent and variety of its resources and products, no doubt exceed those of any other State during the first twenty years of its existence. Hence there is every argument in favor of a legitimate and well-conducted State Fair, that can be derived from either our need of the advantages possible from such an exhibition, or our ability to render it honorable to the State and an attraction to our people. What reason, then, for the performances which have been substituted for such a Fair? And what advantage can be derived from the disgraceful scenes which are reported as attending these performances? Must the public treasury be taxed for the support of a series of horse races, continued through ten days, with all the attendant evils of gambling and general dissipation? Is it a sufficient reason that more money is thus brought into the treasury than is expended, especially if the grounds are let for some side-show on the Sabbath, which may occasion so much "excitement" by its indecencies that the proprietors can afford to pay largely for their use?

We had hoped that the past would suffice for this class of entertainments, under the patronage of the State. The remonstrance, on the part of the press and the people, was so general and so emphatic, before the opening of the Fair that there was some ground for the expectation that the mere plea that more money could be obtained in this way would not avail to render the Directors regardless of the sentiment so expressed. But we infer, from all the accounts we have seen and heard, that there has never been a week of more vice in every form in Sacramento than the last week has witnessed there. It is time for reform. The citizens of the Capital should unite with all throughout the State who feel that this is wrong, in a protest against the repetition of any more State Fairs of this kind. We can have Fairs that our mothers, and wives, and children can visit with safety and pleasure, and that our farmers, and miners, and mechanics can make valuable to themselves, and to the productive interests of the State. There is no necessity for horse-racing as the principal feature of the exhibition, and for Sabbath-breaking as an incidental display. If there is, let us have no more Fairs.

Baptism of the Holy Ghost.

I remark, 3d: These effusions of the Holy Ghost are called in the sacred text, *baptisms*. All commentators agree that the promise, "Ye shall be baptized with the Holy Ghost not many days hence," had its fulfillment in the outpouring of the Spirit at the Day of Pentecost, but the subtlest ingenuity has never been able to discover any immersion connected with the Spirit's operations in the entire account of this most important transaction. Surely, if the promised baptism of the Holy Spirit was to be an immersion in the Holy Spirit, it should be clearly declared in this eminent and distinguished communication of His gifts when the Apostles were set apart and consecrated to their great work. Here, of all places, we should expect to find the immersion distinctly set forth, but *but it cannot be found.*

It is true, the *sound* filled the house, and here—in the sound—some find the promised immersion; but if they are satisfied with an immersion in sound, they are welcome to the discovery. But the sound is not the Spirit. The immersion surely was not in fire. The promised baptism of fire was not an immersion, for *it*—the fire—*sat upon them.* There is

surely no immersion in this. If the sacred writer had meant to teach an immersion in fire, some word showing a more comprehensive suffusion than what it suggested by sitting upon in the shape of a tongue, it seems to me, would have been chosen. But the disciples were *filled* with the Holy Ghost, as the empty vessel is filled when the liquid is poured into it; as the cloud filled the temple at the dedication; as "the glory of the Lord filled the house in Ezekiel," filled, not with wine, but the Spirit; as Paul to the Ephesians, filled, as our hearts, the temples of the Holy Ghost, should be by his gracious influence; but where, in each and every case, the idea of immersion would be such a violent wresting of language from its legitimate sense and meaning as would effectually prevent it any longer from serving as a medium for the communication of ideas.

But argument, after all, in this case is unnecessary; we have apostolic and prophetic authority as to the characteristic mode of the Pentecostal baptism: "But Peter, standing up with the eleven, lifted up his voice and said unto them: 'This is that which was spoken by the prophet Joel, and it shall come to pass in the last days, saith God, I will pour out of my spirit on all flesh. I will pour out in those days of my spirit, and they shall prophesy.'. Argument here, in face of divine announcement, comes to an end. If any should hold, or teach, or write, that the baptism of the Spirit at the Day of Pentecost was an immersion, I have only to turn to the words of the prophet and Apostle: "This"—that is, this baptism which Jesus Christ promised after His resurrection, and which you have seen fulfilled this day—"this is that which is spoken. In the last days, saith God, *I will pour out* of my spirit;" and in the words of God Himself, I find not an immersion, but an effusion, while the facts of the narrative correspond, as they must, necessarily, if the Scripture be true, with the words of the prophesy, and show, as the Apostle Peter himself declared, not an immersion, but an effusion.

Prof. Hackett, whose thorough investigation, as well as his devotion to Baptist principles, will not be questioned, in his comments on the narrative, never hints an immersion. No commentator who had any regard for his reputation for common sense, ever suggested an immersion. But one of two things must be true—either the baptism of the Holy Ghost promised by the Savior to come not many days hence, was not fulfilled at the Day of Pentecost, or, if then fulfilled, the baptism came by an effusion, and not by an immersion. Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

STEAMERS FOR SEPTEMBER, 1868.

The following Steamships will be dispatched on dates as given below.

September 5th—GOLDEN CITY, Capt. E. S. Farnsworth, connecting with ALASKA, Capt. Gray.

Sept. 14th—SACRAMENTO, Captain Parker, connecting with OCEAN QUEEN, Capt. King.

Sept. 22d—MONTANA, Capt. Cavarly, connecting with HENRY CHAUNCEY, Captain Connor.

Sept. 30th—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship GREAT REPUBLIC, Captain Doane, will be dispatched on Saturday, October 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Biography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Children's Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All such are requested to call and examine the publications of the Presbyterian Board at the Depository for the Pacific Coast, which has been established at the store of

Current Literature.

Barnes on the Psalms.

Harper & Brothers have published the first volumes of what is to be the last commentary of Albert Barnes on the books of the Bible. He seems to have postponed writing notes on the Psalms, because he felt himself unable to do justice to his own conception of what such a commentary should be, and it is possible that the influence of a more advanced Christian experience, as well as of advanced years, may have enabled him to produce a more valuable work than the study and thought of his full vigor would have produced. These Notes bear all the marks of labor and desire for the spiritual profit of those who read them, which are manifest in the other volumes of the series, and while one who is in search for critical items would never expect to find them to his satisfaction in what Mr. Barnes furnishes, there is enough here to meet the need of most who seek help respecting the meaning of the Word of God.

We read his preface and introduction with a degree of sadness in which we shall have the sympathy of a great company of those whom this noble and excellent expounder of Scripture has blessed. There is everywhere apparent the conviction that he is doing his last work, and his "Notes on the Psalms" may well be his farewell counsel to those who have learned to value his advice, and to be affected by his opinions. All who have not seen the book will be interested in the following remarks with which he sends it forth:

These Notes on the Book of Psalms complete my labors in endeavoring to explain and illustrate the sacred Scriptures. At my time of life—with the partial failure of vision with which I have been afflicted for more than twelve years—with the other cares and burdens resting on me—and with the moral certainty that the infirmities of age, if I am spared, must soon come upon me, I could hope to accomplish no more; and I shall attempt no more.

The work has been prosecuted with such leisure as I could command—the whole of it having been written, as all my other Commentaries have been, in the early hours of the morning, uniformly closing my daily task in this respect as the hour of nine was reached. By this arrangement I have secured the time which I have employed in preparing the Notes on the New Testament, on Job, on Isaiah, on Daniel, and now on the Psalms, without entrenching on what I felt might properly be required of me in my pastoral labors; and, at the same time, I have secured to myself personally the inestimable benefit of commencing each day with the contemplation of a portion of the Word of God.

I have performed my work as well as I could, but I have not accomplished my own cherished hopes in regard to it. It is not what I fondly trusted it might be; it is not what a work on the Psalms should be.

It is of more interest to me than it can be to the public to say that I cannot close these labors, continued through so many years of my life, without deep emotion. The very fact that any work of life is ended, however humble or unimportant it may be in itself, is fitted to suggest solemn reflections to a man's own mind. The nature of the work in which I have thus been engaged is such as to give great additional solemnity to these reflections. He undertakes a work of great responsibility, who engages in the task of endeavoring to explain the Word of God, and who may thus give direction to the views, perhaps, of thousands, on subjects that may affect their destiny forever.

In looking, now, at a labor of this kind continued for nearly forty years, and entered on with no expectation of the results which have been reached, while I am grateful for the patronage extended to my efforts in this country and abroad, I cannot be insensible to the responsibility of having in that time sent forth to influence my fellow men more than half a million volumes of Commentary on the Scriptures in my native land, and perhaps more than this number in England, Scotland, and Ireland; and of having been permitted, to a limited extent at least, thus to speak in the French and Welsh languages, in the languages of India, and in the language spoken by the millions of China.

With such feelings of gratitude, and with, I trust, some proper sense of my responsibility, I now close this part of the labor of my life, and commend these volumes, as I have endeavored to do those which have gone before them, to the blessing of God.

Dr. Smith's New Testament History.

The object of this work is to supply a manual of New Testament History, which may be appropriately placed in a series with compends of the Histories of Greece, Rome, England, France, and the other nations, for the use of students and others who desire the facts in a condensed form. The author has performed a like service in respect to the Old Testament History, and as might be inferred from his reputation, and from his success with the Dictionary of the Bible which he has published, he has made these volumes to be very valuable contributions to biblical knowledge. Having access to the most reliable sources of information because of his connection with the University of London, he has taken great pains to render the books accurate, and as full as their design would permit. Nor does he confine the range of facts to what is contained in the books of Scripture, but introduces much collateral history that has connection with what is found in the Bible, and may make this more clearly understood. In the first part of this volume, for example, he gives the outlines of all that transpired among the nations of the East, during the period commonly called "Hellenistic," and such particular information concerning the Jews during this period, as is necessary to understand their condition at the time of our Savior's advent, and the allusions of the Gospels to them. The chronological tables and views are very carefully prepared, making one of the most important features of the book, and the illustrations and maps are superior to any we have seen that have the same object. Dr. Smith has contributed much to the aid of Bible students, not only by his research, but by his concise and accurate statement of what he wishes to make known. Sunday School teachers, and those who look for short and reliable and easily remembered items, or records of events, or inferences from facts, will always find his works what they desire.

Published by Harper Brothers, New York, and sold by H. H. Bancroft & Co.

Wilson's Presbyterian Almanac.

We have received the ninth volume of this work, which is really an abridged statement of the general condition and history of Presbyterianism in this country during the year 1867. In addition to the statistical tables, and various reports, necessary to such a statement, a large part of the book is devoted to obituary notices of those ministers who have died within the year. There is also much general information respecting Presbyterians in other lands, so that any one who seeks knowledge of our Church in any of its branches, and in all countries, will find access here to more within one volume than can anywhere else be found.

Such a book, annually published, has great value, if it is prepared so as to merit confidence, and Mr. Wilson's attention to the task he has assumed during the years of which he has given the records, in succession, has won for him the belief of those who are accurate on such points, that he may be accepted as authority as to the statistics of the Church.

Literary Items.

Perfect Printing.—It has been much doubted whether an absolutely perfect copy of a classical author has ever been printed. A wealthy amateur tried to make a perfect copy of "Os Luciados," of Camoens; and with the aid of the accomplished printer, Didot, got up a magnificent edition of it at an enormous expense, which was not to contain a single error. All thought he had succeeded; but when the book was printed an error was discovered in some of the copies, by one of the letters of the word *luzituno* being displaced by some accident while working the sheets.

The same experiment was made by a famous firm in Glasgow. Every precaution was taken to procure typographical accuracy. Six experienced proof readers were employed, who devoted many hours to each page; and when they had done with it, it was posted up in the hall of the university, with a notice offering a reward of fifty pounds to any person who discovered an error. Each page was thus posted for two weeks before it went to press. No error was discovered; but when the work was printed, several errors were detected, one of which was in the first line of the first page.—*Religious Herald.*

Among the quotations in common use, "Dark as pitch," "every tub must stand on its own bottom," are found in Bunyan. "By hook or crook," "Through thick and thin," are used by Spencer in the "Fairie Queen." "Smell a rat," is employed by Ben Johnson, and by Butler in "Hudibras." "Wrong sow by the ear," (now rendered, "take the wrong pig by the ear,") is used by Ben. Johnson. "Turn over a new leaf," occurs in Middleton's play of "Anything for a Quiet Life." "The moon is made of green cheese," is found in Rabelais. "To die in the last ditch," which is popularly supposed to have originated in the South during the late rebellion, is traced to William of Orange, who once said:

"There is one certain means by which I can be sure never to see my country's ruin—*I will die in the last ditch.*"

A spelling-match at the French Court resulted as follows: No one without faults; Prince Metternich, 6 faults; Baron Coavisart, 8; the Emperor, 9; the Prince Imperial, 11; and (to the great merriment of the rest) the imperial librarian, 14. The tests employed, it is said, were severe; and it is neither stated nor implied that there was any difference between the words given to the Prince and those given to the Emperor.

The name of the English Premier is pronounced by himself and his friends, "Dizrayly," with the accent on the second syllable.

Educational.

Hints on Cheap Apparatus.

I.

"Our elementary schools cannot be equipped with expensive physical apparatus, nor should I care to dazzle the youthful eye with its glittering brass and polished mahogany as long as these would be the prevailing impressions from it; but I would have teachers, if I could find them, who would make their own apparatus with their jack-knives; or, better still, teach their boys to make it." (*W. P. Atkinson; Dynamic and Mechanic Teaching.*)

II.

"By far the grandest discoveries in natural science were made with hardly any apparatus. A pan of water and two thermometers were the tools that, in the skillful hands of Black, detected latent heat. A crown's worth of glass, three penny's worth of salt,

a little chalk, and a pair of scales, enabled the same great philosopher to found a system of modern chemistry. With a little more machinery, the genius of Scheele (a working chemist) created the materials of which the fabric was built, and anticipated some of the discoveries that have illustrated a later age. A prism, a lens, and a sheet of pasteboard, enabled Newton to unfold the composition of light and the theory of colors. Franklin (a working printer) ascertained the nature of lightning with a kite, a wire, a bit of ribbon, and a key; to say nothing of the great chemist of whose most useful—perhaps most philosophical—discovery the principle might have been traced with the help of a common wire fire-guard." (*Practical Observations on the Education of the People.*)

III.

"The most distinguished philosophers have not deemed it beneath their dignity to employ the simplest means of investigation. The teacher will not be loth to take advantage of similar means of illustrating their discoveries. An important design of this work is to show how this object may be accomplished, by the simple addition of a few test-tubes and a spirit-lamp, to a list of chemical apparatus which may be found in every house." (*Prof. Jno. A. Porter: Preface to Chemistry.*) C. R. C.

Who Named Our Colleges?

We find that a large number of our colleges have received their names from some prominent men who have liberally endowed them. A great many bear the name of the town or state in which they are situated. We have looked up the following list of some of the most prominent colleges of our country:

Harvard College was named after John Harvard, who in 1638 left to the college £779 and a library of over 300 books.

Williams College was named after Col. Ephriam Williams, a soldier of the old French war.

Dartmouth College was named after Lord Dartmouth, who subscribed a large amount and was President of the first Board of Trustees.

Brown University received its name from Hon. Nicholas Brown, who was a graduate of the college, went into business, became very wealthy and endowed the college very largely.

Columbia College was called King's College till the close of the war for independence, when it received the name of Columbia.

Bowdoin College was named after Governor Bowdoin of Maine.

Yale College was named after Elihu Yale, who made very liberal donations to the college.

Colby University, formerly Waterville College, was named after Mr. Colby of Boston, who gave $50,000 to the college in 1866.

Dickinson College received its name from Hon. John Dickinson. He made a very liberal donation to the college, and was President of the Board of Trustees for a number of years.—*College Courant.*

The graduating class in Andover Seminary this year numbered 42. At the Bangor Seminary, 15; at Yale Seminary, 12; at Union Seminary, 42; at Princeton, 39; and at Auburn, 14 students were graduated.

Rev. Dr. Mark Hopkins, President of Williams College, has written a note to the papers, denying the statement that he had expressed an intention to resign.

The Chicago Common Council has appropriated $25,000 to aid in the establishment of a Polytechnic school in that city.

Philosophy triumphs easily over past and over future evils, but present evils triumph over philosophy.

Interest speaks all sorts of languages, and plays all sorts of parts, even that of disinterestedness.

Personal.

Rev. S. D. Simonds was reinstated in his relations with the California Conference at the late session. Rev. R. Bentley was appointed to the San Francisco Central Church; Rev. C. E. Rich to the S. F. Mission; Rev. D. A. Dryden transferred from Napa to Placerville. Presiding Elders: Rev. E. Bannister, S. F. District; Rev. A. Bland, Santa Clara District; Rev. J. R. Tansey, Stockton District; Rev. J. P. Hill, Sacramento District; Rev. E. A. Hazen, Marysville District.

The following are the Union nominations made at the Nevada Convention, held on Sept. 16th: Thos. Fitch for Congress; H. Mighels, of the *Carson Appeal*, for State Printer; John Day for Surveyor-General; B. C. Whitman for Supreme Judge.

Rev. Dr. McKaig, of Marysville, who has been rusticating several weeks in the mountains, has returned from his trip with improved health. He preached in the Presbyterian church last Sabbath.

Rev. E. C. Bissell, of the Green Street Congregational Church, has resigned his charge, owing to the ill health of his wife, and will accept a call to the Congregational church at Honolulu.

Mr. E. C. Fellows, of Auburn, has been appointed Superintendent of that portion of the Central Pacific Railroad between Sacramento and Wadsworth.

Rev. I. N. Hurd will act as Grand Orator at the Ninth Annual Session of the Grand Lodge of Good Templars, which commences at Sacramento, October 7th.

Deacon D. N. Breed, of the Second Baptist Church, of which Rev. Dr. Hendrickson, his son-in-law, is pastor, died at the residence of the latter last week.

Rev. S. Whiting, of Mendocino, has been spending a few days in this city. He preached in Calvary Church last Sabbath.

Rev. Dr. Scudder, delegate from the Synod of Alta California, made an address before the Methodist Conference last week.

Mr. W. H. Troup has been appointed Mayor of Vancouver, to fill a vacancy occasioned by the absence of Mayor Tripp.

Mr. S. W. Griffith has been appointed Superintendent of Public Instruction for Alpine County, *vice* J. E. Pettingill.

General Lopez, who betrayed Maximilian, his friend and benefactor, at Queretaro, is said to be now stopping in this city.

Rev. H. H. Rhees has returned from the East and resumed his ministrations in the Baptist church at Marysville.

Gen. Crook has received a vote of thanks from the Oregon Legislature, for his gallantry in fighting the Indians.

Elder Richardson, of the Christian Church has been engaged to preach at Oregon City for the next year.

Rev. Father McGee, officiating pastor of the Catholic church at Folsom, died suddenly on the 17th inst.

Rev. A. C. Treadway will soon return to Vallejo and take charge of the Church of the Ascension.

Mr. E. H. Hall has recently arrived in this city from China, thus completing his voyage around the world on which he started in February, 1867.

Gen. E. B. Brady has been ordered to report to the commanding General of the Department of the Pacific.

Rev. W. W. Hibben, Chaplain of the Pensacola, officiated last Sunday in the Methodist church at Napa.

Gen. Cole and Prof. Lippitt addressed the people at Platt's Hall on Monday evening last.

Rev. W. L. Jones is about removing from Eureka, Humboldt County, on account of ill health.

Bishop Tuttle, of Idaho, has gone to New York. He proposes to return in a month or two.

Rev. Dr. Stone will preach the sermon at the meeting of the California Association.

Mr. Bradford the Republican candidate for Congress in Colorada, is elected.

Senator Stewart is the owner of the coal mine in Ione Valley.

Labor is Honor.

Labor is honor! God's Spirit hath spoken;
This is the song that His universe sings;
Through the vast hills of creation unbroken,
Loudly and clearly the glad echo rings;
Up from the hills and the green valleys stealing,
Seeking the light of the bright star above,
Rises the song to the blue heavens pealing,
"Labor is honor, and labor is love."

All the great deeds that are grandest in story,
Living through centuries treasured and bright;
All the great lives that are dearest to glory,
Filling the world with flashes of light;
Words from whose utterances ages are dated,
Thoughts that have held the whole world in control,
Names on whose echoes the proudest have waited,
Are but the offspring of labor and toil.

Not to the eye that glanceth there lightly
Doth the bright look of the heavens unfold;
But to the spirit that turneth there rightly,
Are all its wonders and mysteries told;
And at each step to the soul upward springing,
Cometh new radiance, new light from above,
While in the heart is an angel-voice singing,
"Labor is honor, and labor is love."

Not on her brow doth the earth bear all brightness,
Deep in her breast do the rich diamonds shine,
Down in the wave is the pearl's soft whiteness,
Hiding the gold in the dust of the mine.
Beauty and power, and riches and pleasure
Safe in her bosom lie hidden to-day;
Toil is the key that will open her treasures,
And at each touch she will give them away.

Light to the mind that in darkness was clouded,
Strength to the spirit that weakness had touched,
Joy to the soul that in sorrow was shrouded,
Life to the heart when its life-spring was hushed,
Truth as their foothold who seek it sincerely,
Skill to the hand when it toileth to live,
Eyes that can look up to heaven's light clearly—
These are the honors that labor can give?

—*Protestant Churchman.*

Keep the Skin Clean.

Our farmers, as a general thing, do not pay sufficient attention to personal neatness. Do not start in alarm or disgust at this statement, kind reader, but hear us through. We do not mean that you are coarse in your apparel, or filthy in your personal habits. We expect you to dress according to your work, and when we come to visit you, as we hope to sometime, we want to find you, if at your work, in stout clothes, and we shall grasp your hand just as warmly if bending over your spade, as if seated in your best room. We had no idea of intimating that you do not wash your hands and face in the morning, and before each meal, shave twice a week, and give your yourself a thorough bathing every Saturday night. All these things we feel sure you religiously observe—and yet, there is one point in which we hope to see great and immediate improvement.

Farmers during the severe labors of the busy season, that of planting, crop tending and harvesting, are constantly in the open air. This, as every one knows, is greatly conducive to health and vigor. But during this season they are obliged to work in the dust and dirt incident to the various processes of farm labor, and not unfrequently during some portions of the year, in a complete perspiration almost the entire day. Now the point we insist upon is, that during this season no farmer shall retire for the night without changing the entire apparel in which he has labored and perspired during the day. The very idea of a farmer, reeking with sweat and covered with dust, getting into a clean bed for the night, is anything but pleasing, has a tendency to ally him too closely with the lower species of animals, and is inconsistent with all our ideas of health, comfort and personal cleanliness.

How much better would it be for the farmer's own health, and for the well-being of his wife and family, if on retiring at night, he should remove the shirt in which he has labored all day, and put on a light clean shirt in its place, after having sponged his entire body with cool water. We know farmers will say they have no time to do this, and the farmer's wife may say she cannot wash so many pieces, and this change of clothing will only make an additional number to wash. But these are the merest shadows of an excuse. The matter we have mentioned will not take the farmer ten minutes' time, and he can hardly estimate the benefit it will be to him in promoting his health and contributing to the value of his night's rest.—*Maine Farmer.*

The Horse and Appliances for His Use.

So far as is known, the earliest employment of the horse was for the purposes of war. The ancient Egyptian chariot was drawn by two horses, attached to the chariot by a yoke suitably supported by straps, to which the pole of the vehicle was secured. To this harness were appended a breast strap and girth fastened to an ornamented saddle, a head stall with frontal, check straps, a noseband, a bit with a cheek piece, the reins for the guidance of the animal. The whip consisted of a wooden handle and a double thong, with a loop hole whereby it might be suspended from the wrist while the warrior was using his bow, the reins being often tied around the body.

It is impossible to determine when the horse was first used for riding. There is reason, however, to believe that it was at a very early period in the world's history. It is referred to in some of the most ancient books extant. Xenophon mentions a double bridle and bit in his work upon horsemanship. One bit was smooth and flexible, the other was armed with sharp points. The original method of guiding horses was, however, by means of a cord passed through the mouth around the lower jaw—a method still practiced to some extent, under circumstances where bits of iron cannot well be obtained. Horses were anciently ridden bare-backed, or supplied with cloth thrown over the back.

The invention of the saddle for riding purposes has been ascribed to the Persians, but there is probably room for some doubt as to its true origin. It is not certain that it was used before the fourth century of the Christian era. The first accounts of stirrups date from the fifth century. Spurs were early used among the Romans, but their precise origin has not been ascertained. The ordinary stable equipments, including the currycomb, brush, scraper, rake, sieve, and shovel, are also of ancient origin, although they, like other things, have been much improved in their form and materials in modern times. It will be seen from these facts, that appliances for the management and use of the horse are mostly of ancient origin. We believe there is still room for improvement in means for the more efficient use of this noble and often ill-treated animal.—*Scientific American.*

Much in Little.

A little saltpetre worked into butter that has become sour, or rancid, will render it sweet and palatable.—A writer in *The Country Genrleman* thinks that a bushel of corn ground into meal and scalded will produce twenty pounds of poultry.—To preserve hams from flies, wrap them round with one or two old newspapers, carefully tying or pasting down the ends. No insect can get through paper. Another way is, to eat them.—He who reads and thinks little must work hard, and the family pinch and save. One who reads and uses skill may work less and sleep on a spring bed.—If there are vacant places in the cornfield, tuck in some turnip seed.—The sweeter corn is, the more it shrivels in drying. It's the saccharine matter that does it.—The Department of Agriculture and the scientific wing of farmers, are teaching that wheat should be cultivated like drilled corn, and that it will yield 100 to one.—Here is somebody's receipt for that excellent article, currant jelly: Take ripe currants, free from stems, bruise them and strain the juice from a quart at a time through a thin muslin; wring it to get all the liquid; put a pound of white sugar to each pound of juice; stir it until it is all dissolved; set it over a gentle fire; let it become hot and boil for fifteen minutes, then try it by taking a spoonful into a saucer; when cold, if it be not quite firm enough, boil it for a few minutes longer.—Give the snakes credit for being useful if they are ugly. They do a heavy daily business in disposing of grasshoppers and other destructive insects.—The indefiniteness of many receipts is capitally illustrated by a colored cook, who was celebrated for making delicious corn bread. says Dinah: "Why darlin', sometimes gen'ally I takes a little meal, and sometimes gen'ally I takes a little flou', an' I kine' o' mixes 'em up with some hot water, an' I puts in eggs enough, an' a little salt, an' then I bakes it jest 'bout 'nough. An' you do so, jess so, honey, an' you'll make it as good as I do."—Feed your poultry raw onions, chopped fine, mixed with other feed, about twice a week. It is better than a dozen cures for chicken cholera.—*Chicago Presbyterian.*

Heifers Sucking—Pepper Them.—We cured a three year old heifer of sucking herself by smearing her teats, night and morning, with soft grease, and then dusting them thoroughly with pulverized cayenne pepper. The applications were continued about a week, and a perfect cure effected.—*Stock Journal.*

WEEKLY MARKET REPORT.

Wednesday, September 23, 1868.

Flour—2,000 bbls Santa Clara Extra sold on Monday, but not reported, for export to New York, private; 200 bbls do, current rates; 500 bbls Stockton City Extra, in one lot, private; 100 bbls Lane's Extra Family, $6. We quote city brands as follows: Superfine, in sks, ₱ 196 lbs, $5@$5 37½; Extra, in sks, $6 12½@6 37½.

Wheat—Sales include 300 sks choice milling at $1 87½; 464 sks do $1 87½; 280 sks fair, $1 75; 100 sks good, 21 80; 1,000 sks prime, $1 90; 750 sks pinched, $1 77½; $00 sks Santa Clara, $1 90; 300 sks fair, $1 75; 800 sks, mixed with adobe, $1 75; 6,009 sks shipping, (received since yesterday), prior to arrival, private; 700 sks choice Santa Clara, $1 85; 6,000 sks shipping, last evening, $1 82½. Considerable lots are going into store. The market is without essential change, and prices range all the way from $1 60 to $1 80 ₱ 100 lbs, according to quality and condition.

Barley—Sales include 300 sks good brewing, $2 25; 100 sks feed, $2 20; 200 sks light do, $2 12½; 500 sks good do, $2 20; 100 sks brewing, $2 25; 400 sks do, private; 500 sks feed, $2 10. We quote the extremes at $2 10@2 30 ₱ 100 lbs.

Oats—Sales embrace 250 sks fair, $2; 500 sks inferior to fair, $1 75@2. The market is weak at $2@2 25 for fair to choice.

Potatoes—Mission are still easier; sales of 300 sks in lots, $1 15@1 20, principally at the inside figure. Carolinas sold on the wharf at $1 25@1 20 ₱ 100 lbs.

Onions—A small consignment of Yellow sold at $ 2 25 ₱ 100 lbs.

Beans—200 sks new crop small white, from wharf, reported at 3¾c. The new crop is beginning to arrive in moderate quantity, and the market is decidedly easier to the buyer. We quote jobbing rates for the various descriptions as follows: Bayo, 4@4½c; Butter, 5@5½c; Pea, 5½@6c; small White, 5@6c; Pink, 3½c, and Red, 3c ₱ lb.

Bran—Sales of 100 tons, in lots, from first hands, $22 50@$23; jobbing at $24@25 ₱ ton.

Middlings—Fine sell at about $40; feed descriptions, $32@$35. Sale of 7 tons feed, $33 ₱ ton.

Oil Cake Meal—In fair demand at $30 ₱ ton.

Hay—Ordinary to strictly choice quotable at $11@15. Sales of 254 bales medium, $13; about 500 bales do, in two lots, $10 50@11 50; 100 bales choice, $15 50.

Buckwheat—Last reported sale was at $1 75 ₱ 100 lbs.

Rye—New is held at $2 ₱ 100 lbs, with nominal demand.

Dairy Products—Fresh roll Butter is scarce and firm 52½@55c; pickled, 42½@45c, and firkin, 37½@40c; Cheese, 16@17c for general California dairies, and 18c ₱ lb for Eastern dairies; Pineapple Cheese, 18@21 ₱ dozen; Eggs show an upward tendency, being to-day firm at 60@62½ ₱ dozen.

Provisions—Bacon is jobbing at 14½@15½c for California smoked; Oregon do, 14@15c; California Hams, 16@17c; no Oregon offering; California Lard, 13@13½c ₱ lb.

Poultry—Live Turkeys are quoted at 16@18c ₱ lb; Hens, $6 50@7 50; Roosters, large size, $6@7; Spring Chickens, $4 50@5; Ducks, $4@5 ₱ doz; Geese, $2@$2 50 ₱ pair; Quail $1@1 25 ₱ dozen; Venison, 8@10c ₱ lb—a decline.

Wool—Sales for the week amount to abont 100,000 lbs at 14@15. Receipts continue light and demand active. For choice light grades 15½c is sometimes obtained; burry, 10@12½c ₱ lb.

Hides—Sales for the week of 3,000 California dry, usual selection, 14½@15½c ₱ lb.

Tallow—Sales of 4,000 lbs Beef, packages returned, 7½c; otherwise we note small sales of Beef and Mutton at 8@8¼c ₱ lb.

San Francisco Cattle Market.

The supply is equal to the demand, and quotations are unchanged.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.
Veal—Ranges from 6 to 10c ₱ lb.
Mutton—Is steady at 6@6½c ₱ lb.
Lamb—Steady at 8@9c ₱ lb.
Pork—Undressed, 4@5¾c; dressed, 6½@7¾c ₱ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

MINING.

BROWN'S VALLEY MINES.—Our Brown's Valley correspondent sends us the following communication under date of the 14th instant: "John B. Howell, Superintendent of the Pennsylvania Mine has resigned and gone East with his family. His successor has not yet been appointed. The Company contemplate making great changes under the new administration and hope to be able to reduce their current monthly expenses down to a very low figure. In times when they have not a sufficient quantity of good quartz to supply their mill, their monthly expenses will not be much over one thousand dollars. For blasting purposes the Company intend to introduce and use in future the new explosive agent, the Giant powder, wherever there is an opportunity for it. They will thus greatly reduce the number of hands and consequently the expenses; or in keeping the same number of hands, they will double the amount of work and quicken and enliven everything in their underground works. Their mill and machinery cost over forty thousand dollars and are second to none on this coast. The Company can prospect and work their claim for years to come without any new outlay of money for improvements of this kind. The Rattlesnake is hoisting rich quartz from their lower level and their ledge is already over two feet in thickness; they intend starting their stamps again next week. The Jefferson is still making a little over expenses. It is rumored that their ledge is greatly improving in their lowest northern level as well as at the bottom of their shaft. Our mill men complain much about the great scarcity of good hands accustomed to blasting underground; none however but those of steady, good habits need apply."—*Marysville Appeal.*

THE *Argent* says that the Tory ledge, Humboldt Company, is four feet six inches wide, looks fine and assays 82 per cent. copper and eleven in silver.

There are five men employed in the Union Series tunnel, which is now in two hundred and eighty feet.

The rock has been very hard of late, but a softer body has been reached, and the work is advancing faster. Considerable water is coming in which may be from the vein which ought to be reached at no great distance farther.

The Golconda has a force of men at work upon it, and the vein has widened out to about fifteen feet, and the ore is fifty per cent. metal.

The great width of the Golconda at less than a hundred feet from the surface, and the general sameness of the ore of the different claims, tend to confirm the 'one-ledge theory' in Gold Run.

NEW AND CHEAP PROCESS.—The Chlorination process is working wonders far and wide. A gentleman who owns a mill and mine over near Placerville informed us a few days since, that after working off the top or decomposed, free gold ore, the mine failed to pay expenses and he closed the mill. Some parties from San Francisco came along a few months since and offered him a fair price for the use of the property, which he accepted and they in the face of scoffs and jeers from "practical" millmen, employed a young man who never had anything to do with the working of a mill before, a student fresh from one of the private mining schools of San Francisco; who went to work and put the mill in order and now the same rock that before would not pay six dollars per ton is turning out sixty, and making a splendid profit to all concerned.—*Alpine Miner.*

THE *Miner* says that the ledge of the Rippon mine has been penetrated 10 feet and steadily improves. The rock is believed to be very rich.

CONSIDERABLE excitement is caused by the recent discovery of new gold mines in Western Montana.

THE Union Copper Mine of Calaveras County has been sold at Sheriff's sale, for $113,954.

ANOTHER RICH STRIKE.—This week a large and rich quartz vein was discovered in the gulch south of the Pauper mine. We visited the discovery on Wednesday and found the quartz to be fully five feet in width, with regular and well-defined casings. A considerable portion of the quartz is decomposed and contains large quantities of both gold and silver. We were shown about a dollar in gold and a fine showing of silver obtained from one pan of the decomposed quartz. The boys feel gay over their lucky strike. As soon as the discovery became publicly known, excitement was rife and extensions were located as soon as notices could be written and posted.—*Owyhee Avalanche.*

SHASTA MINES.—From the *Idaho Statesman* we get the following information concerning these mines at Willow Creek: Two large ditches are being constructed, one 60 miles long carrying 2,000 inches of water; the other over 40 miles long and of the capacity of 1,500 inches. Both will be finished by Spring. Several quartz ledges which promise well have been discovered and prospected. The placer mines are known to be good. Most of the miners here will winter in the mines to avoid the danger of losing them.

MARIPOSA MINES.—We are pleasad to learn, says the Mariposa *Gazette*, that the copper mines at Buchanan Hollow are to be worked with renewed vigor and energy by the enterprising gentlemen who have recently taken them in hand. Liberal wages and prompt payments to *good, steady* men will be the new order of things.

FROM DEADWOOD.—The Idaho *World* is informed that river-bed mining in Deadwood is a failure, the gold product being far below expectations—not enough to pay low wages. Hill, bar, and gulch claims still hold out and will be good for many years. Only forty miners are now at work in the Basin—all doing well.

THE BRANCH MINT MINE.—The Branch Mint ledge is located on the southerly slope of the same ridge with the Banner and Pittsburg mines. The lead is two feet wide and can be worked two hundred and seventy-five feet below the surface, and the tunnel may be run for the whole distance along the ledge. This is something unusual in this locality.—*Nevada Transcript.*

VALUABLE CLEAN-UP.—THE *Owyhee Avalanche* challenges the world to produce a superior or an equal to a clean-up recently made at the Ida Elmore mine. The bullion after being assayed and moulded into bricks, weighed 8,351½ ounces and is worth $68,187. One of the bricks is worth $22,187.

MINING AT WASHINGTON.—The *Nevada Transcript* says that the past season owing to high water on the Yuba, has been unfavorable to mining upon the bars, but with the fall of the water operations are resumed with good prospects. The companies are doing well.

GOLD RUN.—Gold Run District presents an inviting field to the mining capitalist. Not a day's work has been put upon a claim there which has not improved the value of it in the estimation of every one at all acquainted with the mine there. There is no need of overrating quantity or value of Gold Run ore. It shows for itself.—*Winnemucca Argent.*

THE OLD AMADOR MINE.—We learn that John A. Fall, has taken possession of this mine, and will at once put machinery on it, and sink the shaft to a depth of 300 feet. This mine is located the first north of the Spring Hill, at Amador City, and is believed to be very good.—*Amador Ledger.*

SILVER BRICKS.—A number of silver bricks were shown us at the banking house of Hellman, Temple & Co., last week, from Lone Pine; also, a large quantity of gold bars, from the Vulture and other mines in Arizona, and a quantity of gold dust and silver amalgam, not yet reduced to bricks.—*Los Angeles Star.*

POOR MAN'S DIGGINGS.—Nearly or quite all the men who have discovered rich claims in the district of White Pine were poor men, but they are suddenly growing rich. It is the "poor man's diggings."—*Austin Reveille.*

NEW METHOD.—A man in Tuolumne County has invented a machine for saving sulphurets and rusty gold that will not amalgamate. A model has been constructed and is said to work well.

NEW MILL.—The *Amador Dispatch* says that the new quartz mill at the Kennedy mine is now ready to commence crushing rock. The Kennedy in a first class mine.

WE learn from the *Alpine Miner* that two very advantageous offers have been made for the Tarshish Mine. The Director recommends that the offer be accepted.

THE *Frontier Index* says that moss agates, of superior quality, are picked up daily on the bench land about Bryan.

A 15 stamp mill has recently been completed and is at work crushing cement from the Eddy mine at French Corral.

THE mines of Amador County are at present unusually productive.

WORK is soon to be commenced on the Anaconda mine.

WILLIAM JAMES, Newark, N. J.
DAVID MEEKER, J. COBBLEDICK, San Francisco.

MEEKER, JAMES & CO.

Nos. 12 and 14 Pine Street, San Francisco,

Importers and Wholesale and Retail Dealers in

Wagon and Carriage Materials,

Embracing all the Wood Materials for the manufacture of

WAGONS, TRUCKS, CARTS, OMNIBUSES, CARRIAGES, COACHES, EXPRESS WAGONS, BUGGIES, SULKIES, Etc.

Also, Importers of

DOLE'S SPOKE TENONING MACHINES,

DOLE'S HUB BOXING MACHINES, DOLE'S PATENT ADJUSTIBLE HOLLOW AUGERS, THIMBLE SKEINS, PLATED AND IRON-TURNED HUB BANDS, AXLE CLIPS (best hand make), TOP PROPS, FELLOE PLATES, CLIP KING BOLTS,

Wilcox's Shaft Couplings, Pole, Shaft and Yoke Tips, Malleable Iron Castings for Vehicles, all kinds.

SANDER'S NEW YORK BEST HALF PATENT AXLES, CONCORD AXLES, SIDE SPRINGS, Etc.

Having the advantage of a long experience in this line of business, and abundant facilities, we are well prepared to fill any orders with which we may be favored, upon the best terms, and with the same care, promptness, and attention as heretofore.

ORDERS FROM THE COUNTRY SOLICITED.

If from persons unknown to us, they should be accompanie with the cash or city reference.
Merchants and others bringing orders to us, will be met with liberal terms.
Persons ordering goods will please be particular in describing what they want, so as to prevent mistakes.
☞ Catalogue and Price Lists sent on application.

Oakland College School.

The next term will open Wednesday, July 22d.

I. H. BRAYTON,
E. G. BECKWITH,
Principals.

I. S. Van Winkle & Co.

IMPORTERS AND DEALERS IN

Norway and Bar Iron, Cast, Plow, and Toe Steel, Boiler Tubes, Gas Pipe, Fixtures, and Rivets; Case-hardened and Capped Half and Full Patent Carriage and Coach Axles. Also, Concord, Kinsley's, and Boston Axles, Bright and Tempered Warranted Springs, Bolts, Files, Rasps, etc., which we offer at Lowest Market Rates. Country orders solicited.

Corner of Battery and Bush streets, San Francisco, and 93 I St. Sacramento.

General Selections.

Disraeli, and Gladstone.

Mr. James Parton made some years ago, a literary discovery which was all the more remarkable it was so simple. He found out that truth was as entertaining as fiction; that veritable biography could be made as interesting as the imaginary career of Eugene Aram or Henry Esmond; and it was a discovery which made his literary fortune.

The career of the remarkable person who, toward the end of last winter, was elevated to the highest office to which a British subject can aspire, has been, perhaps, as remarkable a one as any novelist has portrayed. The consummation has been as fine an instance of poetical justice as biographical history records. It is impossible to conceive greater or more numerous obstacles than those which lay before the present Prime Minister between his first essay in Parliament and his final triumph; yet by the singular qualities of a character which in many respects, stands alone in the annals of British statesmanship, they were one by one surmounted, and the goal, after thirty years of effort was won.

Seldom has biographical history recorded so constant, so hardworking, so persevering, so absorbing an ambition as that which possessed Benjamin D'Israeli from his earliest youth. He was determined to overcome the prejudice which was attached to his name and lineage; to rise, if it were possible, by the force of genius alone—and he seems to have had unbounded confidence in his own—above the factitious merit of noble birth and aristocratic caste. He bodily entered the literary arena, and bore off a palm; he was famous already in one of the two great objects which he proposed to himself; it was sufficiently demonstrated that he could write in the solitude of his closet, books, which, put before the world would be eagerly seized and devoured. An ordinary ambition might have been content with this; for both fortune and celebrity were within his grasp. He might, in a few years, acquire a generous income, and retire, long before middle age, upon his laurels. But this point was no sooner gained, than his restless and aspiring spirit turned toward a new, and far more difficult field. With a strong will which was strengthened by a high ambition, he devoted himself to politics. He read them in his study; he talked them high and low in the fashionable soceity to which his novels had procured him an almost unwilling welcome. Conscious that elocution was an essential to success, and observing with self-complacent satisfaction that few statesmen of the day were accomplished declaimers, he studied that art with zeal, already provided with a taste for it. He appeared as an orator, and a second success was achieved. People began to talk of him as a promising young politician, and hold up their hands in amazement that this stripling of a Jew should exhibit such various and shining talents.

He must have been himself surprised—this young, foppish, rather cynical, thoroughly radical, imaginative, son of an Israelite—to find himself, one day, sitting on the benches of Parliament as a member of the House of Commons. This was, in truth, a great stride for him, to discover himself sitting side by side with the sons of Dukes and Marquises, to look about and see, on the same benches where he was entitled to sit, the famous men whom he had thought of with such awe all his life—Sir Robert Peel, and Daniel O'Connell, and Lord Stanley, and Palmerston, and Lord John Russell; actually the colleague and co-laborer with the first statesmen of England! Still, he seems to have taken his good fortune very coolly, to have reflected on his new position with rare equanimity, and to have fixed his eyes with more determination upon the far off goal of his aspirations. He was introduced, at the beginning of his political career, to Lord Melbourne, the leader of the Liberal party and then Premier, as a promising young member, who was anxious to rise; the good-natured Minister, with a smile, turned to him, and said, "Well, Mr. D'Israeli, what would you like to be?"

"Prime Minister of England, my lord," was the frank and serene response.

Thus, at the beginning, he saw the end, of his political career.

There was, at the time he entered the House of Commons, (now some thirty-four or five years ago) a young member who was likewise new to that arena, but who had already won an enviable fame for the rare beauty and persuasiveness of his eloquence. He, too, seems to have been inspired by an ambition like that of D'Israeli, to struggle on till he had reached the highest reward of political life. A graduate, with the most distinguished honors, of the aristocratic University of Oxford, the acknowledged pet and champion of that institution, he had already proved himself able to handle the most perplexing questions of statesmanship, by writing an essay on the relations of Church and State. This was William Ewart Gladstone. These two young men, starting nearly together in the race for political honors, not far from the same age, but in almost every other respect as dissimilar as it was possible for two young men possessing the same ambition to be, were destined to be rivals, and the foremost rivals of their generation, from that day to this. The contrast between Gladstone and Disraeli was very marked, even then. True, neither were of aristocratic birth. Gladstone was the son of a respectable Liverpool merchant, Disraeli the son of an Israelitish antiquarian. But, while Disraeli had started in political life almost entirely without high influence, and had won his place in Parliament by indomitable pluck, Gladstone entered the House as the pet and hope of the aristocratic Oxford party. Disraeli was not a University graduate; Gladstone had been the most brilliant scholar which Oxford had lately produced. The family traditions of Disraeli were Jewish; those of Gladstone strongly linked with the Church of England. Their political ideas at the commencement of their political careers were diametrically opposed to each other; and strange to say, they are so, by a singular series of events, to-day—both having changed sides, and each thinking now what the other thought at the beginning. Gladstone entered Parliament under the patronage of the Duke of Newcastle, and carried with him there as well the High Tory and High Church principles, as the enthusiastic hopes, of the University of Oxford. He was destined as the future chief of the Tory party, as its strongest man among the rising generation. He was looked upon as the champion of the Established Church, in all its ancient privileges, powers, and abuses; and he was welcomed to Parliament by all the great men of the old Tory coterie, which had warred upon the United States and Napoleon I., which had refused to abolish the Test Oath, refused to grant Catholic Emancipation and Reform, and which had prosecuted Queen Caroline at the instigation of the heartless and dissolute George IV.; by the Duke of Wellington, Sir Robert Peel, Lord Lyndhurst, Westmoreland, and Buckingham.

Disraeli, on the contrary, began his political life as a radical liberal. He had no aristocratic ties, no University prestige—was the pet of no Church, of no caste; he naturally allied himself with radical men, because, a Jew and a plebeian, he had nothing to hope for from the ancient ruling class in England. He was loud for reform, bitter against the aristocracy and the Church; almost preached Democracy, and doubtless would have quite done so, had he quite dared. To-day the position of each is strikingly different. Disraeli has become the leader and the soul of the aristocratical Tory and High Church party—even its Prime Minister, dictating to Dukes, turning out Lord Chancellors with a quietly curt epistle, and dining familiarly with her Majesty at Windsor. Gladstone, on the other hand, has become the captain of the advance-guard of liberalism; and so earnest to push forward, so eager to demolish the ideas of which, when young, he was the hottest champion, that he cannot keep the mass of liberals apace with him.—*G. W. Towle in Hours at Home.*

Party Spirit.

A zealous anti-Calvinist at Oxford denounced as Calvinistic a series of Discourses delivered there some years ago, because they were *not* Arminian; and when the same Discourses were afterwards published, a reviewer spoke of the author as Arminian because he was *not* a Calvinist: 'since every one,' he said, 'must be supposed to be either the one or the other.'

A large portion of mankind enrol themselves in the ranks of a party, to be saved the trouble of examining for themselves each of a great number of particular points. They like to have a ready-made *set* of opinions; like a *lot* of goods at an auction. And they conclude that others must do the like. Moreover, Man is a *classifying* animal. It is a convenience to be able to refer each individual to a Class, whose name describes him instead of going through all the particulars of his opinions. And one who cannot be so described,—though perhaps he does not differ more from his neighbors than many of them do from each other—is an *inconvenient* individual; a kind of *odd volume* on a library-table, for which we cannot find a place on any of the shelves. He is one who refuses to say 'I am of Paul, or I, of Apollos, or I, of Cephas, or of Luther, or Calvin, or Arminius,' And those, therefore who prefer convenience to accuracy, will be likely to place him in the ranks of some Party, according to their fancy; or else they will denounce him as 'eccentric,' and affecting 'singularity.'

From one or other of the above mentioned causes, he is likely to be regarded with at least as much hostility by the most zealous party men, as those of an opposite party. And accordingly, Thucydides in describing the party-contest at Corcyra and other Greek States, remarks that 'those who held a middle course were destroyed by both parties.'

And it is remarkable that party-spirit tends so much to lower the moral standard, that it makes men regard with less abhorrence what is wrong, not only on their own side, but even on the opposite. Their feelings toward those of the opposed party are very much those of a soldier toward the soldiers of the hostile army. He fires at them for *that* reason *alone*, and expects that they should fire at *him*. If they fight bravely, or if they out manœuvre him, he admires their courage or their skill. He does not think the worse of them for reckless plundering, ravaging, and slaughtering, just as he would do in their place, and as he does, on the opposite side. Even so, the most thorough-going partizans attribute to every one who is, or is supposed to be (often without any good grounds) a member of the opposite party, such conduct as is in reality unjustifiable, without thinking at all the worse of him for it. It is only what they would do in his place; and though they dislike him for *being of the opposite party*, they dislike him for *nothing else*.

As there is often a strong resemblance in character between the soldiers of two hostile armies, so, those whom some perhaps slight circumstance has enrolled in the ranks of the opposite parties, will often be found to be very much alike in the most essential points of personal character. Thus, two similar mountain-streams near the summit of the great mountain ridges, which divide Europe, will sometimes be separated by a small fragment of rock, which sends the waters of the one into the Atlantic, and the other into the Mediterranean.

And not only are the *feelings* of zealous party-men hostile to one of moderate views, who keeps clear of opposite extremes, but their *moral-judgment* also—such as it is—condemns him. If, for instance, he has been raised to some high office without solicitation, and unconditionally, and afterwards refuses to vote through thick and thin, with the Party that appointed him, against his own judgment, and without any regard for justice and the public good, he is likely to be denounced as an ungrateful traitor. And if he advocates some enlargement of popular rights, and also some wholesome restrictions, he will be reproached with '*inconsistency*;' just as the Satyr, in the Fable, rebukes the inconsistency of the traveller, whose breath warmed his fingers, and cooled his porridge!

The effects of party-spirit in lowering the moral standard are gradual, and usually rather slow. But it often happens, on the occasion of some violent party-contest, that an *apparently sudden* change will take place in men's characters; and we are surprised by an unexpected outbreak of unscrupulous baseness, cruel injustice, and extravagant folly. In such cases, however, there can be little doubt that the evil dispositions thus displayed were

lurking in the breasts of the individuals, before unknown by themselves and by those around them, and are merely called into activity by the occasion; even as a storm of wind raises the dust which it did not create. According to the proverb,

'The pond that when stirred does muddy appear,
Had mud *at the bottom* when still and clear.'

—*Whately's Annotations.*

The Melancholy of Great Men.

Aristotle has said that all great men are melancholy, and it is interesting to trace the part which melancholy plays as an almost inseparable feature of magnanimity. The ancients, when they ascribed a slow gait and the absence of eagerness to men of great minds, touched, unconsciously perhaps, upon this side of magnanimity. Zeal may, indeed, at certain critical moments, be essential to greatness of mind, but as a rule it is of the essence of a large mind to be impressed with the comparative triviality of things rather than with their overwhelming importance. Hence we come upon the true explanation of the notorious fact that zealots of all denominations are, invariably and without exception, men of little minds. It is true that zealots often do great things, and bring down men infinitely their superiors, just as some vermin fasten undaunted on the neck of the eagle, and wingless themselves, bring the imperial bird down from the skies. But the secret of their audacity is the blindness and contraction, not the largeness, of their vision. The melancholy and the magnanimity of Hamlet go hand-in-hand, and a zealot is incapable of either. And largeness of vision is inseparable from a special melancholy, due not to the peevishness and grumbling of discontent, but partly to a truer estimate of things, and partly to the perception of the infinitesimally small weight of the greatest man in the general scale of the universe. It is curious to observe also, that, as a rule, beasts and birds of prey—that is to say, animals accustomed to look down upon a portion of the world from a higher point of view—are usually, except at particular moments of extraordinary activity, melancholy, and of a brooding disposition. The sparrows that are forever chirping, the rabbits that are forever hopping about, the doves that are forever cooing, and, generally speaking, the more mobile part of creation. are illustrations on the opposite side of the great principles which Aristotle expressed in reference to mankind when he said that great men are melancholy. It does not in the least follow that peevish and melancholy people are therefore great. Peevishness and melancholy are, unluckily, as common as true magnanimity is rare. Still, in spite of this, it remains true that a certain sadness and melancholy, far removed, indeed, from the affectation of it, are the almost invariable concomitants of the greatest of human qualities. But if this be considered a drawback, what shall we say of the indefinable charm, the magnetic influence of true magnanimity? Magnanimity lends a mellowness, an ease, a grace, a boundless sense of liberty to human intercourse, which are its highest and rarest fruits. Magnanimity heightens all enjoyments, smoothes all asperities, exaggerates nothing, knows no revenge, nor selfishness, nor egotism, nor pettiness, nor spite—is not a time-server, nor a tuft-hunter, nor a fortune hunter. The pleasures of vanity may grow cold, and even those of sober and well-gotten fame may grow pale; but magnanimity never palls, for it depends alone upon itself, and is the halo of its own existence.—*Cracroft.*

We have more power than will; and it is often by way of excuse to ourselves that we fancy things are impossible.

SAN FRANCISCO,

Importers, Manufacturers, and Wholesale and Retail Dealers in Metalic and Wooden Burial Caskets, Cases and Coffins, Coffin Trimmings, Hearse Plumes, Plume Sockets, etc., etc.

Sole Agents for Barstow's Patent Improved Metalic Burial Caskets and Cases.

Heuston, Hastings & Company,

ARE THE

FASHIONABLE CLOTHIERS

OF

SAN FRANCISCO.

SPECIALITIES.

PRICE AND GUARANTEE.

The largest and most varied stock of Gentlemen's Clothing, Furnishing Goods, Trunks, Bags and Valises, on the Pacific Coast. Every article sold, being of our own manufacture, is guaranteed. Having contracts direct with European and American Manufacturers of piece goods, we thereby effect a saving of fully 50 per cent. in wholesale dealers' profits, and are thus able to offer superior Goods at less than second-rate prices.

STYLES.

Having agents in London and Paris, we introduce the new styles in San Francisco simultaneously with their appearance in New York.

GOODS MADE TO ORDER.

For the accommodation of such as may desire, we have secured the services of a celebrated European cutter, and are prepared to make up piece goods in a style superior to any other house on the coast. Shirts, Ties, Collars, etc., made to order at short notice.

COUNTRY ORDERS.

Goods forwarded by Express to any part of the Pacific Coast on receipt of orders and measures; send for directions for measurement.

Heuston, Hastings & Co.

LICK HOUSE BLOCK,

SAN FRANCISCO.

United States Life Insurance Comp'y,

IN THE CITY OF NEW YORK.

OFFICE, NO. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

This Company, having a Stock Capital, makes Insurances and Endowments with or without profits. Dividends to Policies with profits are equal to, or larger than those of other, or "Purely Mutual" Companies in available present cash value.

NEW AND IMPORTANT PLANS OF LIFE INSURANCE HAVE BEEN ADOPTED BY THIS COMPANY. SEE THE NEW PROSPECTUS.

Life Assurances, Endowments and Annuities in every form. Profits available after Policies have run one year, and annually thereafter. The reserved Cash fund, for re-insurance, is the largest known to or required by, the ablest and most experienced authorities in Life Insurance, thus affording undoubted security. A liberal non-forfeiture system, as to whole Life or Endowment Policies.

Policy Holders in this Company can use or apply the Dividends of profits in a greater number of ways than is afforded to Policy Holders by any other Company.

The law under which the company is Chartered, provides that if the Capital should, from any cause, become impaired to the extent of Twenty-five Thousand Dollars, or more, the Stockholders SHALL BE CALLED UPON TO MAKE GOOD SUCH DEFICIENCY. This is the only Cash Company in America which affords this safeguard to Policy-holders.

The assured in this Company are not personally liable as in Mutual Companies, which have the power of assessing their members or of reducing the sums insured, in case of deficiency.

CLERGYMEN, insuring in this Company, are allowed a DISCOUNT of TWENTY PER CENT. on first year's premium, and a liberal commission will be given on all Insurances influenced by them.

Agents wanted, on the most advantageous terms.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also SCHOOL FURNITURE.

Watch for the Morning.

Watcher, 'tis dark, and thy dwelling is lonely!
The night-lamp shines dimly, and so does thine eye;
Thou art thinking thy portion is wretchedness only,
Disheartened, despairing, and longing to die!
Watcher, look out where the day-star is dawning!
Hope in thy soul let its promise awake;
And, sleepless though weary, still wait for the morning—
Never a night but its morning shall break!

Wanderer, 'tis dark, and the tempest is roaring
Wildly above thee, and raging around;
Terrors and dangers their vials are pouring
Right on thy pathway, where quicksands abound!
Wanderer, 'tis better to bow than to bide it;
Harmlessly o'er thee the storm-king shall ride;
Deep yawns the chasm; it were death to bestride it—
Pass on, where the valley is sloping and wide.

Weeper, 'tis dark, for the Angel of Sorrow
Hath spread o'er thy landscape the gloom of his wing;
No hue from the rainbow thy sadness can borrow,
No joy to thy bosom the spring-time can bring.
Weeper, despair not; there is that can cure thee!
Yes, e'en to the heart-sick a balm can be given,
A draught that shall comfort and gladness insure thee;—
Drink deeply, drink freely, its fount is in Heaven!

Oh! ye who are suffering, and toiling, and sighing;
Who in darkness of spirit are groping your way;
Who are weary of hoping, and trusting, and trying;
Who are sure that your midnight can never be day—
Look forth where the day-star of promise is dawning;
Stand fast by your duty, your God, and your right;
And patient and faithful, thus watch for the morning,
Assured it shall bring ye both healing and light!

—*Independent.*

Nelly.

Only a little child,
Who sings all day in the street,
Such a tuneless song
To an idle throng,
Who pity her shoeless feet;
A poor, pale, pretty child,
With clothes so ragged and mean,
And a wild, weird face,
On which ne'er a trace
Of childhood's joy can be seen.

Out in the damp, wet fog,
Out in the sleet and the rain,
Out when the cold wind
Sends its blast unkind
Through her again and again;
Out in the dreadful night,
By the hinge of the tavern-door,
In hope as she sings
Of the pity that flings
Some pence on the beer-stained floor.

Mothers who pass her by
Shudder with terrible fear,
Praying her fate may
Never be some day
That of their little ones dear,
Children who hear her sing
Stare at her features so wild,
O'er her life ponder,
Thinking with wonder,
"What, can she, too, be a child?"

Out in the damp, wet fog,
Out in the sleet and the rain,
Out when the cold wind
Sends its blasts unkind
Through her again and again.
Brought up in Satan's school,
Hell's abyss falling in;
Is there no pity
In this great city
To save her from shame and sin?

—*St. James' Magazine.*

Angel Lilly.

Although a wonderful child, Lilly was by no means a grave, unearthly, precocious little one. Her smile was as sunny as her hair, and her eyes were always laughing. She was indeed a beam of light wherever seen. At the sight of her lovely face the stern visages of worldly men relaxed, and the old always held open arms for her. She warmed their hearts with her happy, artless prattle. One day her mother took her on board a steamboat, on a pleasure excursion. At first Lilly looked grave, finding herself among so many strange people, but spying at the farther end of the saloon a venerable man, who held a little girl by the hand, she begged her mother to let her go and see the rosy cheeked child. Mrs. —— was not afraid to trust Lilly. If she said "Lilly, remember and do not go out of the door or by the window," she knew that she might rely upon the sweet child's implicit obedience. So away went Lilly; her beautiful great eyes shining, her step rather slow, but when she got near the child she looked for a moment in the chubby face, and smile answered smile; the two quickly understood each other and were busily playing together. The old gentleman regarded them with a look of interest that was not lost upon Lilly, so by-and-by sliding up to his knees, she asked:

"Is that your little girl?"

"Yes, dear," was the reply; "at least she is my grand-daughter."

"Are you her grandpa?"

"Yes, dear."

"I got a grandpa," said Lilly, with that sweet, coaxing way that is in some children so irresistible, "and he's a good man and loves Jesus. Do you love Jesus?"

The old man looked at her with a strange expression, but did not speak.

"Say! you love Jesus, don't you? Don't you love Him because he died to save you? Say, *don't* you love Jesus?"

"My little child," murmured the old white-headed man, and his lips began to quiver.

She looked at him earnestly, thoughtfully—then a grieved expression crossed her face, and she said softly, "You do love Jesus, don't you?"

"My little one—ah! I wish I did—I wish I did!" and he shook his head mournfully.

For one full moment she stood gazing on the floor, then flying from the knee where she had been resting, she sought her mother, caught hold of her hand, and saying, "Oh! mamma, that little girl's grandpa over there don't love Jesus; won't you come and tell him he must."

The child would take no denial, but besought with such earnestness, that her mother was fain to go and seat herself by the old man's side, after which Lilly, feeling perfectly assured that the old man would soon love Jesus whether he had before or not, resumed her merry play with her new found companion.

Mrs. —— sat for some time silent and embarrassed where her daughter had escorted her.

"That's a wonderful little one," said the old gentleman, after he had mastered his emotion.

"Oh, no, sir! a very pleasant, good child, but there is nothing wonderful about her," replied her mother.

"Madam, pardon me—but no one ever took that much interest in me before, to ask me the simple question that the child put to me, and I am now in my eighty-third year."

"The Bible, sir, you know, says, that 'out of the mouths of babes and sucklings God hath ordained praise.'"

"Ah! yes, I remember—I read my Bible a good deal, madam;" and he sighed heavily.

"And you find comfort in its truths, I hope, sir?"

"No, madam. I have for many years been shaping the Scriptures to suit some peculiar views of mine and so busy and zealous have I been, that I have given no attention to it as a saving medium. When your child put that question to me, madam, I seemed suddenly to awake, as it were, out of a slumber of ages" and again he sighed heavily.

"I think, sir," said Mrs. ——, "if you would not disdain so humble an instrument, my little daughter, as she has perhaps begun the good work, might lead you to the truth."

"The boat is stopping, madam," said the old gentleman, then he added eagerly, "will you accompany me to my home? It will be pleasanter than the hot grove at this hour of the day, and I would talk more with that angel child."

His new found friend consented, and they walked together, for some moments, the little children hand in hand, until they came in sight of a splendid mansion. A park, dotted with beautiful timber, lay in front, and the sun brightened its open path, and threw threads of light in among the shadowed foliage spreading broadly over the green. This led into a garden well laid out, blooming with various flowers. The glass of the roof of a large conservatory glittered in the red light of that hour, and through its transparent windows the lemon and the orange could be seen.

They entered the house. It wore an air of grandeur, and every room was adorned with rich and costly furniture.

"Oh, what a happy home!" cried the angel Lilly.

"She means," said her mother, smiling, "that everything is so beautiful, one ought to be happy here."

Again came that sigh swelling up from the heart of the aged man, and he shook his head sadly, holding out his arms to the child.

"Come to me and tell me how I can love Jesus," he said.

"Why, don't you love him *yet*?" she cried, looking from him to her mother.

"Is it so easy, then, my sweet child?"

"Why, it's so easy you can't help it," said the little one, simply. "Mother says she loves me dearly when I'm good, and how can you help loving Jesus who is good all the time?"

"Do you think He loves me?"

"Oh, I *know* He does!" replied the child earnestly.

The eyes of the aged unbeliever filled with tears, as he said, "Then surely, if He loves me, who have always been so ungrateful towards him, I ought to love Him. Thank God, I see it in a new light!" he murmured to himself. "Oh, madam! how can I ever be thankful enough that I met this angel? Surely if I seek Him, He will be found."

In her own sweet way the mother of little Lilly unfolded the plan of salvation to this hoary-headed skeptic—removing his impressions where they conflicted with the truth; and when she left him, he had humbled himself in prayer, and promised not to give up the search till he had found the Savior precious to his soul.

It was, perhaps, a week after this conversation that the mother of Lilly received a letter from the old gentleman, in which he wrote the glad tidings of great joy: now he loved the Savior.

"Ask my little angel," he added, "what she would most like to have me buy for her. It must be something very beautiful and very costly. I am curious to know what she will say."

"What shall the old man buy for you Lilly?" asken her mother as she read the latter part of his letter.

"For me, mother?"

"He says he will get you whatever you wish, no matter what it costs."

"Oh, mother! will he?" and Lilly clapped her hands. "*Will* he buy a whole new library for our Sabbath school? Oh! that would be so nice!"

"Always another—never self!" thought the gratified parent, as the tears came into her eyes. Then she added aloud, "Well, daughter, I will tell him what you want."

Before the next Sabbath, a new and beautiful library graced the Sabbath school room of L———, and Lilly's eyes sparkled like diamonds as she heard the Superintendent tell that it was a gift through one of the Sabbath school scholars. Was it not strange that every eye turned toward the beaming face of angel Lilly? No; for they knew that she delighted in such deeds. And when the questions came pouring in upon her, "Was it you? was it you?" her childish answer was—

"Yes; arn't you glad we've got such a beautiful library?"

That old man lived to build a house unto the Lord, and when it was completed, and they told him that angel Lilly lay in her white robes, pale and motionless, his only reply was, as he wiped the tears from his furrowed cheek, and pointed to the new and elegant edifice—

"There is her monument!"—*Examiner and Chronicle.*

We Never Drink.

On the stage were seven or eight soldiers from the Eighth Maine Regiment. While at the stage house, in Lincoln, there came into the office a poor blind man—stone blind—slowly feeling his way with his cane. He approached the soldiers and said, in the gentlest tone,—

"Boys, I hear you belong to the Eighth Regiment. I have a son in that regiment."

"What is his name?"

"John ——."

"O yes; we know him well. He was a sergeant in our company. We always liked him."

"Where is he now?"

"He is a lieutenant in a colored regiment, and a prisoner at Charleston."

For a moment the old man ventured not to reply; but at last, sadly and slowly, he said,—

"I feared as much. I have not heard of him for a long time."

They did not wait for another word, but these soldiers took from their wallets a sum of money, nearly twenty dollars, and offered it to the old man, saying,—

"If our whole company were here we could give you a hundred dollars."

The old man replied,—

"Boys, you must put it in my wallet, for I am blind."

But mark what followed. Another individual in the room, who had looked on this scene, as I had, with feelings of pride in our soldiers, immediately advanced and said,—

"Boys, this is a handsome thing, and I want you to drink with me. I stand treat for the company."

I waited with interest for the reply. It came.

"No sir; we thank you kindly; we appreciate your offer—*but we never drink.*"

The scene was perfect—the first was noble and generous; the last was grand.—*American Presbyterian.*

The Baby Soldier.

Another little private
Mustered in
The army of temptation
And of sin.

Another soldier arming
For the strife,
To fight the toilsome battles
Of a life.

Another little sentry
Who will stand
On guard while evils prowl
On every hand.

Lord, our little darling
Guide and save,
'Mid the perils of the march
To the grave.

Curfew Bells.

Many have heard of the "curfew bell," but not all know its origin. Its history in England runs back to the time of William the Conqueror, who ordered a bell to be rung about sundown in summer, and at eight o'clock in the evening in winter, at which time fire and lights were to be put out, and the people to remain within doors, and penalties were imposed upon those who neglected or refused to comply with the law. This was called the "curfew," a word derived from the French *couvre-feu*—cover-fire—and so the appropriateness of the name is readily seen.

The old king has been generally charged with instituting this custom in order to impress upon his subjects a sense of their abject condition; but, as the "curfew bell" was rung in France long before William's time, as a safeguard against fires, it is not improbable that he brought the custom with him into England from the Continent, and that he has been slandered as to his motives. At any rate, he has sins enough to answer for without this. In the sixteenth century "bellmen" were added to the nightwatch in London. They went through the streets ringing their bells and crying,

"Take care of fire and candle; be kind to the poor, and pray for the dead."

It was the bellman's duty, also, to bless the sleepers as he passed their doors. In "Il Penseroso," Milton refers to this custom:

"The bellman's drowsy charm,
To bless the doors from nightly harm."

Poets have often referred to the curfew, or cover-fire bell. Gray begins his beautiful "Elegy" with

"The curfew tolls the knell of parting day."

Longfellow, too, has a pretty little poem, telling the story of this bell with charming simplicity:

"Solemnly, mournfully,
Dealing its dole,
The curfew bell
Is beginning to toll.

Cover the embers,
Put out the light;
Toil comes with the morning,
And rest with the night.

Dark grow the windows,
And quenched is the fire;
Sound fades into silence—
All footsteps retire.

No voice in the chambers,
No sound in the hall;
Sleep and oblivion
Reign over all."

King William died, and the original obligations of the curfew were at last removed, about the time of Henry I, in 1100; but the custom of ringing an evening bell is still kept up in England, with variations as to the hour. The "nine o'clock bell," familiar to most New England people—which sends so many young people home and to bed, and which in the early history of our country was almost as rigidly obeyed by all, both old and young, as the old curfew, traces its origin directly to the cover-fire bell. In Longfellow's "Evangeline" the custom is well described:

"Anon the bell from the belfry
Rang out the hour of nine—the village curfew—and *straight way*
Rose the guests and departed; and silence reigned in the household."

But now the customs have changed; and though the bell still rings out on the evening air, in country village and city street, it has lost its power, save as a tell-tale of passing time. Let the old bells ring on; we love their soothing sound; or, in the words of Moore—

"Those evening bells! those evening bells!
How many a tale their music tells,
Of youth and home; and that sweet time
When last I heard its soothing chime!"

—*Our Boys and Girls.*

Time Enough.

"Fred, you must clean your boots before you go to school," said Mrs. Lawrence to her son.

"I know it, mother, but it's time enough," said Fred, who sat reading a story book.

Presently the lady spoke again:

"Fred, have you looked over your grammar-lesson this morning? It is too difficult to learn in a hurry."

"Well, I almost learnt it last night; it's time enough; I want to finish this chapter," answered Fred.

"Oh, my son!" said Mrs. Lawrence, "I wish you would overcome that habit of putting off necessary duties."

Fred closed the story-book reluctantly, and took his grammar, wishing that his mother "would not bother him so; he *knew* he had time enough."

Presently Mrs. Lawrence left the room, feeling very much troubled about Fred's bad habit, and wishing that he could be induced to break it off before he became a man. Knowing that God only could give him strength and a disposition to do so, she went to her own room, and, kneeling down, prayed to this effect.

That day a gentleman visited the school, and, after listening with apparent pleasure to various exercises by the scholars, the principal requested him to talk to the boys a little while. He did so, and interested them very much by relating some anecdotes of his own school-life. One of these incidents was the means, by God's blessing, of curing Fred's habit. It seemed to Fred that the gentleman must have known what his bad habit was, or he could not have said anything so suited to his case. The gentleman said that one day he was stopped on the street by a very shabby looking man, who, after calling him by name, and asking him if he did not remember Harry Brown, begged him to lend him some money.

"I remember Harry Brown very well," replied the gentleman. "Can it be possible you are he, wishing to borrow five dollars?"

"Yes, I am," answered the man, in a despairing, sorrowful tone.

"What has brought you to this condition? Your prospects on leaving school were as bright as mine."

"*Time enough* has brought me here," replied he. 'I was always putting off necessary business by saying that. Now I am old, the habit is fixed, and I cannot break myself of it. If you do not lend me five dollars, I shall have to go to the poor-house, or starve."

"Boys," continued the gentleman, "*time enough* ruined that man's life. Take care that it does not ruin yours."—*Child at Home.*

Mary's Prayer.

Little Mary's mother had occasion to correct her the other night. Mary was angry, and when she said her prayers, instead of asking God to bless papa and mamma, as she was wont to do, she said:

"God bless papa, and don't bless mamma."

Her mother took no notice, and Mary jumped into bed without her good-night kiss. By-and-by she began to breathe hard, and at length she whispered,

"Mamma, are you going to live a great while?"

"I don't know," was the answer.

"Do you think you shall?"

"I cannot tell."

"Do many mothers die and leave their children?"

"A great many."

"Mamma," said Mary, "I'm going to say another prayer;" and clasping her little hands, she cried: "God bless papa, and the dearest, best mamma any little girl ever had in the world!"

That's the way, children. If you knew your mothers were going to die very shortly, you could not be half kind enough to them. But do you not know that, be they long or short lived, there lies before you, written so plainly that he who runs may read, "Honor thy father and thy mother?"

Remember that every wrong committed against loving parents will, when they shall have passed from earth, bite like a serpent, and sting like an adder.—*Well-Spring.*

NEWS SUMMARY.

PACIFIC COAST ITEMS.

THE Synod of the Pacific will meet next Thursday at Calvary Church, in this city. The place of meeting was, by an oversight, omitted in the regular notice on another page.

THE Synod of Alta California will meet, on the first Wednesday in October, at the Howard Presbyterian Church. Sermon by retiring Moderator, Rev. I. N. Hurd.

E. B. WALSWORTH, Stated Clerk.

A STEAM thrashing machine near Stockton is threshing about 2000 bushels of grain per day. The Santa Cruz *Sentinel* says that thirteen steam-threshers are now at work in the Salinas Valley threshing out an average of five hundred bushels per day, and that there is a demand for at least eight more; that there are one hundred thousand sacks threshed, and that this year's crop will foot up the enormous amount of five hundred thousand bushels, over thirty thousand tons. This we think beats the Pajaro.

A MAN coming from his ranch in Shasta Valley to Yreka with a load of hay, encountered an immense swarm of flying ants, about 10 miles in length, filling the air so that it was almost impossible to see. A rather tough story but it was an honorable man who told it to the *Yreka Journal*, "so are they all honorable men" who furnish items to the newspapers.

STILL another invention in the way of plows. The main feature is a series of pulleys placed on the same shaft, supplied with knife-like spades attached like spokes to a wheel. As this machine advances, the shaft revolves, the spades raise the earth and pulverize it, throwing it backward. It takes six horses to draw it and it plows a furrow about 6 feet wide.

THERE are 27 public school-houses in Solano County, 5 of which have been built during the past year.

THE people of Santa Cruz are badly in need of a new school building. The *Times* says that 100 pupils are deprived of instruction for want of suitable rooms.

STOCKTON has voted $15,000 to build a public school-house.

IONE CITY at this time, presents a rather lively appearance. The coal mine is being actively worked, and a number of teams are employed in hauling the coal to the quartz mines in this vicinity. Both of the flouring mills are running night and day and turning out an immense amount of flour which finds a ready market at the mills.—*Amador Ledger*.

WITHIN the last year business in Folsom has increased to a considerable extent; new buildings have been erected, and real estate has taken an upward tendency, and there has been a steady increase in population, and confidence in the future growth and prosperity of the town has been established.—*Bulletin*.

EXTENSIVE fires have been raging for the past week in the pine forests of Oregon, where it is said that over 200 square miles were burning at once. Large fires have also been burning in Marin County, about Tamalpais. These fires resulted from the carelessness of hunters.

THE *Salt Lake Reporter* says that the following dispatch has been sent by the managers of the Union Pacific Railroad to the Central: "If we lay any track on your grading, we will pay you for the grading. If you lay any on ours, we won't charge you a cent for it."

THE proposed junction between the California Pacific and the Napa Valley Railroad below Suscol, cannot be effected owing to a disagreement as to the terms. Negotiations have been finally broken off. This state of affairs will be much regretted by the travelling public.

THE Academy of Sciences has decided that the peculiar appearance of the sun during the smoky period was not caused by smoke from Oregon or Marin County, but by the presence of "saline or silicious matter floating in the atmosphere."

ON or before November 1st, the horse railroad between San Jose and Santa Clara will be in operation. This road will be a great convenience to the public, and already property along its line has greatly increased in value.

PARTIES from Napa City bought, last fall, a tract of land in San Joaquin Valley for $1,110, raised wheat on it which they have sold for $20,000, and have resold the land for $22,000. Not a bad investment.

THE people of Reno complain that the railroad company are so busily engaged in pushing forward the work of tracklaying that they will not carry to Reno even the necessaries of life.

THE Stockton *Independent* suggests a convention of California editors. Other papers second the motion.

CITIZENS of Tuolumne County are jumping a large tract of land claimed by the California Navigation Company, and the *News* thinks that the jumpers will succeed in holding it.

THE *Commercial Herald* fears that San Francisco will lose the trade of Salt Lake City, unless immediate steps are taken to build a branch road to that city.

THE Union and Democratic papers agree on one point: they urge voters to put their names on the Register and Poll List without delay.

A CONVENTION of the fruit-growers of Utah is to be held at St. George. The object, says the *News*, is to encourage horticulture.

NEARLY 2,000 acres of flax have been raised in Oregon this season. It is expected to produce over 30,000 bushels of seed.

THE county road from Haywood to Amador is sprinkled daily, the cost being paid by subscription.

THE cost of the Central Pacific Railroad to Salt Lake City will be about $65,000,000.

THE Oregon City *Enterprise* is now printed on paper manufactured at that place.

IN a Sacramento garden there is a tomato vine sixty-nine feet in circumference.

EFFORTS are being made by the Montana farmers to domesticate the buffalo.

IT is said that the Vallejo Railroad is doing a business of $2,000 per day.

STEERAGE FARE between this city and Victoria will be reduced to $15.

THE Mount Diablo coal mines yield eleven thousand tons per month.

A LARGE portion of the town of La Porte will be rebuilt this fall.

THE Humboldt potato crop is unusually large this season.

TELEGRAPHIC.

EASTERN.—Geo. B. Taylor has resigned the presidency of the Missouri Pacific Railroad....Snow fell in Utica, N. Y., on the 16th, and some damage has been done to the crops by the frost....An election takes place in Western Virginia on the 22d of October....District Attorney Courtney will prosecute all cases of fraud on the revenue....The State Agricultural Fairs of Ohio and Illinois opened on the 21st....Surratt has been discharged on the charge of murder, and is to be tried for conspiracy....Congress met on the 21st, and adjourned to October 16th....The U. S. Grand Lodge of Odd Fellows is now in session at Baltimore. All the States and Territories are represented....Mrs. Stanton has been admitted as a delegate to the National Labor Congress from the Woman's Suffrage Association....Robert Lincoln was married on the 24th.

SOUTHERN.—The Alabama Legislature met in extra session on the 16th....Gov. Brownlow has issued a proclamation, calling upon all patriotic people, of all colors, to raise without delay companies of loyal, able-bodied men. He says he will use these companies, if necessary, to keep order....The Louisiana Senate has passed a bill prohibiting all distinctions of color in public conveyances or public places....Gov. Bullock, of Georgia, protests against the action of the Legislature....There are rumors of another riot in New Orleans....20 Apaches were killed by U. S. Cavalry, at Austin, Texas. Two captives were recovered, and all the supplies of the Indians were destroyed.

POLITICAL.—John Q. Adams accepts the Democratic nomination for Governor of Massachusetts, and the platform, all but the financial part of it. He has a weakness for hard money....The Democrats are still resisting by force the execution of the Federal writs in Kentucky....General Dix writes a letter, in which he speaks of the election of Seymour as "one of the greatest calamities that could befall the country," although he regards him as a gentleman of unexceptionable private character and respectable talents....Secretary Seward comes out for Grant and Colfax....By the Labor Congress it has been resolved to form a National Labor Party for political purposes.

FOREIGN.—In Hayti an amnesty has been declared in favor of all but the rebel leaders....600 women claimed the right to be registered as voters in England, but the judges decided against them....The Government of Brazil has apologized to the United States for having detained a gunboat with Minister Washburne aboard....Napoleon, Eugenie, and the Prince Imperial have visited the Queen of Spain near Biarritz....Peabody has bought an estate in Hungary....Large discoveries of gold have been made in Ophir, Australia....It is said that the Queen of Spain has abdicated....The Catholics of Ireland strongly support Gladstone's resolution to disestablish the Irish Church....The Hungarian Diet has established religious freedom....The Brazilians have taken the city of Asuncion....Generals Prim and Deroda are at the head of the insurgents in Spain, and are marching on the Capital. The revolution is assuming large proportions. France will remain neutral....The cotton crop in Egypt is enormous.

SPECIAL NOTICES.

ITS MERITS GROW UPON YOU.—"It is not a careless reading we have given to the new illustrated edition of Webster's Dictionary, and we have found that the more care we spent upon it, and the further perusal, the more pleasure and profit we got from it. We commend it heartily, and we believe with reasons which those who consult it will understand."—*Christian Examiner*.

CURRENT TOPICS.

The condition of affairs in many of the Southern States is such as to excite the grave solicitude of those who have been watching their progress during the past few months. Whether the interests of one class or another be considered, whether the relations that must be sustained by all to the welfare of the region so greatly disturbed, or to the general government, so seriously affected by the evils that seem to increase, there is occasion for regret that so few in any class appear to have any just apprehension of these interests and relations. It is easy to say, when standing at a distance, and unable to know all the facts, that this party or that is to be blamed, and to call for the interposition of national authority, according to the ignorance or prejudice of those whose judgment finds such expression. The truth is, no doubt, there is much to exasperate and annoy all classes in the very posture they maintain towards each other, so new and strange, and likely to foment bad feeling. Human nature would not wear its ordinary forms in that portion of the land if the new order of things should be assumed without friction; and in some cases violence and outrage must be the fruit of a revolution so radical. Yet, one would suppose that every motive would urge those who are able to check the tide of lawlessness and disregard of rights, to do this by all means in their power. The readiness to add to the volume and fury of this tide, on the part of those who must still further suffer from its devastation, is incomprehensible. The result can be anticipated by none if the hostility between the parties shall continue. Certainly, all hope of prosperity will be at an end. The evils that exist will be multiplied a hundred-fold, and the evils that must soon spring up will come in legions. We trust the people themselves will become convinced of this before it shall be too late, and all will be moved by the necessities of their condition, as is advised by some of their prominent men, to cultivate peace and strive after its blessings.

At a time when vast regions of country are being opened for settlement, and demands come from all parts of the world for those who may preach the gospel, it is cheering to notice that in several of our Theological Seminaries the number is increased of those who are studying for the ministry. This year the Old School Board of Education has received under its care 106 candidates, or nearly one-third more than during the year previous. Were all branches of the Church to have a like addition to the number in preparation for the sacred office, it would hardly be possible to answer the demand. Nor is this a time when men can be safely placed in our pulpits, who are not thoroughly equipped for their work. If they succeed they must be *able* to to succeed. But little will be conceded to their office, or their claims. They must cope with error, and conquer though error be supported by strong men. They must maintain truth, at a time when those to whom they address themselves are accustomed to think, as never before. They must make known the salvation of God, when men will not hesitate to reject it, unless earnestness and devotion seconds its offers of life. There is an unprecedented call for able, self-denying preachers of the gospel, and all such will be rewarded with great success.

Some one who has collected the statistics, makes the statement that the large sum of $15,212,500 has been given to literary institutions and for educational purposes, during the last five years in this country. This amount has been distributed among all classes of schools, from the highest to the lowest, and most of it has been placed in the form of permanent funds for the endowment of those that are not supported by the treasuries of the States. Scarcely any fact could be more honorable to the wise liberality of our people, or more direct in its bearing on the welfare of the nation. There is protection for our cherished privileges in these well-established fountains of intelligence. There is a prophecy of our unexampled prosperity in the removal of these institutions beyond the contingencies of temporary events. Their open doors will be a perpetual invitation to the youth from all ranks of our citizens, to prepare themselves by mental training for the duties which our country imposes, and for the future that is waiting for those who are able to press on to it. Education, not in the merely scholastic sense of the word, but in its true sense as the means of developing and disciplining and storing the minds of those subjected to its influence, should be provided for all. It should be, not like the sun in the East that gilds the mountain tops with its beams, but like the sun in the zenith that lights up mountains and valleys with its universal splendor. Money is expended for noble ends that thus contributes to the cultivation and elevation of our people, and they are wise who avail themselves of the advantages it brings within their reach.

Missionary Boards, in several denominations, are seriously revolving the question whether they must curtail their expenses and diminish the agencies by which they are making known the Gospel to the heathen. Because of the demands they did not feel at liberty to refuse, and of the larger amount necessary for the support of the missions already established, they have been constrained to advance in their work, with the hope that the necessity would be appreciated by the churches, and that they would contribute enough for their wants. But, at a time when the prospects are most hopeful, when wider fields than ever invite their cultivation, when everything in Providence seems to forbid hesitation or hindrance, they find themselves burdened with heavy debts, with no offer of relief from those whose representatives they are. The possibility that schools among the heathen may be closed, that those who have learned to be useful among them may be summoned home; that printing presses may be stopped, and chapels may be abandoned, and the light of life that has begun to dawn on the darkness of ages may expire just as thousands are hailing its beams, and the melancholy reason must be given for all this disappointment and loss that Christians will not furnish the money for the support of even so meagre a supply of missionary influence, should force upon each one the question, "Have I done all I ought to do in this department of labor and sacrifice?" The debts should be paid, and our Boards should be encouraged to advance, not compelled to retrench. In their work, retrenchment is loss, and they have resisted it as long as possible. Now, they must submit to it, and commence the sad duty, or we must enable them to throw off their burden and give fresh impulse to the blessed cause they are striving to maintain. The responsibility is on the Church, and it cannot be evaded.

The American Missionary Association calls for more help in carrying forward the work it has in hand among the Freedmen. The purchase of real estate necessary for its prosecution, the greater cost of living at the South, and the inability of the Bureau to furnish transportation, are given as the reasons why they must look for more money, even if they do not enlarge their operations. And if they undertake to meet the urgent demands upon them, they will need much larger sums. They ask for $50,000 at once, lest they become seriously embarrassed.

The revolution appears to be gaining ground in Spain, and, so far as we can judge from telegraphic reports, it may overthrow the reigning power. What will be the future condition of the nation, and who will be placed at its head, can hardly be determined with certainty, though it will, no doubt, be true in this case as in others, that revolutions do not go backward, and no sovereign can manifest less regard for the welfare of the people than has been shown by the Queen who is likely to lose her crown. There are many indications that this rebellion is not urged on by a mere faction in the interest of an aspirant for the throne, but is a ground-swell of excitement from the masses that increases as it rolls, affecting all portions of the government and all classes of the people, except those who are hopelessly under the dictation of the ecclesiastics. The Church party, of course, supports the Crown, and all means will be employed to crush the opposition, but the latest intelligence does not favor success in the attempt. There

are multitudes in Europe who will watch the progress of events in this revolution with other feelings than those of mere curiosity. Problems respecting the political state of other nations are to be affected by the result, and the hopes of liberty-lovers all over the Continent will be stimulated or depressed by the position, soon to be determined, of the country to which the eyes of none have been directed for years past with the expectation that it could become of the least importance in the issues that must soon be settled. So strangely does Providence work among the counsels of men, and so surely are all interests safe that are allied with God's plans for the elevation of the race.

RELIGIOUS INTELLIGENCE.

PACIFIC COAST.

THE Synod of Alta California will meet, on the first Wednesday in October, at the Howard Presbyterian Church. Sermon by retiring Moderator, Rev. I. N. Hurd.

E. B. WALSWORTH, Stated Clerk.

BUILDING AND REPAIRING.—The new building of the Young Men's Christian Association, which has been completed, and was thrown open to the public for inspection last week seems to give satisfaction to all concerned. It is the intention of the Directors not to dedicate the building, nor to open it for its designed uses until the remaining debt—about $15,000, we believe—is paid. The entertainments given by the ladies last week produced some money, which is to be used in furnishing the ladies' rooms. An appeal is to be made immediately to the wealthy men of the city, who will undoubtedly respond liberally to the call, and thus prevent the necessity of giving this fine building to the Lord, as too many are given, with nothing but a quit-claim deed.

Work on the new Calvary Church is progressing rapidly, and the building is now sufficiently advanced to give a tolerably correct idea of its size and architectural proportions when completed. It will certainly be surpassed in appearance by no church in San Francisco. The workmen are now at work on the roof.

St. Francis Church (Catholic), on Vallejo Street, has long been in an unfinished state, for want of funds. A successful effort has, however, been made recently, to raise money for the purpose of finishing the interior of the church to correspond with the imposing exterior. The work is now being done, and when completed, at a cost of $14,000, the building will be one of the most attractive Catholic edifices in the city.

The Third Baptist Church (colored) which has hitherto held its meetings in the building on Natoma Street, formerly occupied by the Howard Presbyterian Church, is having built for its use a new frame building on Powell Street, between Bush and Sutter. The building, which is already far advanced toward completion, is to be 42x76 feet. The style of architecture will be gothic, and the cost will be about $13,000.

The corner-stone of the new school, or convent, which is being built at the corner of Ellis and Taylor streets, was laid on Sunday last, in the presence of a large number of spectators. The building is intended for a school for girls, of whom it will accommodate about 700. It is built under the care of the order of "Sisters of the Presentation."

A fine brick building, three stories in height, is being erected on Van Ness Avenue, near Post St., for the use of the "Ladies' Protection and Relief Society." It is to cost $15,000, and is to be divided into school rooms, family apartments, and sleeping rooms.

The new M. E. church at Los Angeles will be dedicated on Sunday, Oct. 11th. Rev. Dr. Thomas and Rev. Mr. Bland will conduct the services.

TEMPERANCE.—A union meeting of the different churches of Oakland was held last Sunday evening, in the Methodist church, the services in the other churches being omitted. The meeting, which was largely attended, was presided over by Rev. L. Walker, and was addressed by several clergymen of the city. All seemed to agree as to the great evils of intemperance and the necessity of an active movement to check its ravages. Rev. Mr. Hamilton and Rev. Mr. Walker, the principal speakers, differed somewhat as to the method by which the Church should show its opposition to this great evil, the former holding that efforts in this cause must be confined, to a great extent, to the members of the churches as individuals, and that the Church, in its governmental and associated capacity, cannot work to the greatest advantage in this matter, although he admitted that something might be accomplished. He considered it perfectly right to hold temperance meetings, or do any other good thing on Sunday. He gave special importance to the work of training the young in the paths of temperance.

A CORRECTION.—The *Christian Instructor*, organ of the United Presbyterians, published in Philadelphia, complains that the list of Presbyterian clergymen published in THE OCCIDENT, recently, does injustice to the United Presbyterian Church on this coast, which, according to the *Instructor*, besides her missionary in San Francisco, Rev. M. M. Gibson, has a Presbytery of Oregon, with four ordained ministers, viz: Revs. James Worth, S. G. Irvine, J. M. Dick, and T. S. Kendall, with eleven organized congregations in Oregon and Washington Territory. We regret the omission, which was not intentional, and we shall be glad to add the names of our United Presbyterian brothers to the list, which will soon be republished, if some one will inform us of their location. We wish all branches of the Presbyterian Church to consider THE OCCIDENT their own paper, and all Presbyterian clergymen to consider themselves entitled to a representation in its columns.

CHARITY.—A short time since, the case of a widow left in very destitute circumstances was made known to the various daily papers, and through their columns to the people. By the commendable efforts of the papers and the liberality of the citizens, quite a large sum of money, with many useful articles of clothing and furniture, were contributed, and have been given to the needy family, placing them temporarily beyond the reach of want.

A meeting of citizens was held on Monday to devise means for rendering aid to the inhabitants of Peru, who are suffering greatly from the loss of almost all their possessions by the recent destructive earthquakes. A committee was appointed to receive contributions, and a vessel will be dispatched on the 6th inst., with supplies for the sufferers.

SABBATH SCHOOL CONVENTION.—We learn from the *Appeal* that the Convention recently held at Carson City was not numerously attended, although the exercises were very interesting and ought to have attracted a larger audience.

FAIRS, ETC.—A Fair for the benefit of the free schools of the Convent of the Presentation began on Wednesday, at Platt's Hall. One of the attractions was Parepa Rosa; another, a vote for President, which may possibly be decisive of the real contest in November.

The ladies of the United Presbyterian congregation gave an entertainment at the chapel of the City College on Stockton Street, Tuesday evening. We were not able to be present, but understand that it was in every respect an enjoyable and profitable occasion. The proceeds are to be devoted to the building fund.

DAY OF ATONEMENT.—Last Saturday was the most solemn of the days of fasting observed by the Jews, in which these people abstain from food and engage in religious exercises. The day was scrupulously observed in this city, all the synagogues being open and all the places of business closed. It is not known exactly what event this day was appointed to commemorate, but it has been always observed by the Jews since Old Testament times, with, as is claimed, very little change in the ceremonies since the time of Moses.

Y. M. C. A.—A Young Men's Christian Association has been organized in Portland, Oregon, and will soon open a library and reading-room for the use of citizens and of strangers passing through the city.

The Association at Stockton is moving on with "Excelsior" on its banner, according to the *Herald*. The late monthly meeting was well attended, and was addressed by Rev. Mr. Woods and Mr. Elliott.

Rev. Mr. Walker stated that the Methodist Church was a temperance society, and would discipline those who broke the pledge. He regarded this as the true course, thus differing from the gentleman who preceded him. Rev. Mr. Beckwith also made some very interesting remarks on the subject.

AN ACCESSION.—Seven Catholic clergymen, who have just completed their education at All Hallows College, Ireland, recently arrived in this city, and have been set at work; four have been retained in this city, two go to Grass Valley, and one to Oregon.

UNITARIAN.—The report of the Superintendent of the Sabbath School on Geary Street shows a falling off in attendance of pupils, and also of teachers.

AFRICAN.—It is said that there is a colored population on this coast of 15,000, with 13 prosperous African M. E. churches already established.

M. E. SOUTH.—The Annual Conference of the Methodist Church South will commence at Sacramento on the 7th inst.

EASTERN.

QUESTIONABLE TASTE.—An exchange comments on the questionable taste of a city clergyman who advertises in the daily papers that he "will preach with Divine assistance," etc.:

The mock humility which prefaces every proposed enterprise with a "with Divine permission," is bad enough; but what shall we say of the minister who advertises that he shall preach "with Divine assistance?" Need we wonder that worldly-minded people are shocked at such impious assumption of familiarity with the Divine Being as this? If a man has "Divine assistance" in conducting worship, would it not be a great deal more modest, and more Christian, too, to let his congregation infer the fact

from the solemnity and impressiveness of the service itself than to advertise it in the papers?

Missionary Ground in Maine.—Aroostook and Washington counties, in Maine, embrace a territory, says the *Congregationalist*, almost equal to one-half of Connecticut. They are as really missionary ground as Kansas and Nebraska. Not a self-sustaining church of any faith is found in Aroostook, and of the twenty churches in Washington County not more than five or six are able to live without aid. Rev. Messrs. W. Warren, of the American Board, and S. Thurston, of the Maine Missionary Society, are on a six weeks' tour of visitation through this region. They hope to aid in the formation of one new church, and to speak words of instruction and comfort to many that are feeble and struggling for life.

Presbyterianism in Western New York.—Nowhere has the increase of our Church been more striking and interesting; nowhere are our churches stronger or in a more healthful condition than in this section of the State. The growth is steady, uniform, permanent. We wonder if it is generally known how large a portion of our Church belongs to the "Empire State." Of the 168,932 members, the churches of this State embrace 72,710, or three-sevenths of the whole; and in Central and Western New York alone we have 43,597, or a little over one-fourth of our entire communion.—*Cor. American Presbyterian.*

Freedom of the Pulpit in Chicago.—Recently, Rev. Dr. Hatfield, of Chicago, preached in that city a sermon on Romanism. A good deal of stir resulted in consequence. At the next meeting of the City Council one of its members, Mr. Sheridan, introduced a set of resolutions denouncing Dr. Hatfield, and directing the mayor to issue a proclamation forbidding such preaching hereafter, and threatening with prosecution those who indulge in it, as disturbers of the peace.—*United Presbyterian.*

Evangelists — Their Shortcomings.— The Portland *Mirror*, orthodox Congregationalist, objects to the methods usually practiced by evangelists. It dislikes their exaggerated reports of revivals, and questions the propriety of taking the names of persons who promise, by the grace of God, to meet the evangelists in Heaven, as these pledges are too apt to be made the test of conversion. It also objects to an evangelist taking the management of things out of the hands of the pastor.

Startling Facts.—The great mass of the people attend no church. There are 57,000 places of worship in this country, but not 100 persons, on an average, are found in each on the Sabbath. Of our population of 40,000,000, not more than 5,000,000 attend any place of worship. 35,000,000 of our people have no church accommodations, or do not improve them. These are startling facts.—*United Presbyterian.*

Christian Convention.—The first State Christian Convention was held at Manchester, N. H., during a part of the second week of August, and was attended by nearly 300 delegates, many of whom were ministers. Col. F. W. Parker presided, and much enlivening discussion was had upon subjects of practical interest to all who desire to see the Gospel made effectual in destitute communities.—*Evangelist.*

A Precedent.—Rev. E. E. L. Taylor, D.D., formerly of Brooklyn, N. Y., has received from the Government $13,000 for the Baptist Board of Home Missions, to cover losses inflicted upon the Indian Missions during the war, together with $2,039 to indemnify the Joneses, father and son, for personal losses in the Cherokee country from the same cause. —*Evangelist.*

The order of Deaconesses is to be revived in Mr. Beecher's church in Brooklyn. Some of the Deacons proposed it, Mr. Beecher approves, and there are several sisters willing to accept the office.—*Religious Herald.*

Laudable Undertaking.—The ladies of the four Presbyterian churches in Richmond, Virginia, have undertaken to furnish the outfit of Mr. G. Nash Morton and E. Lane, who have been appointed missionaries to South America by the Committee of Foreign Missions of the Southern Presbyterian Church.—*Independent.*

The *Evangelist* says that Rev. Dr. H. W. Bellows reached home by the *China* last week. Either he, or the Rev. James Martineau, of London, will preach the occasional sermon to the Unitarian National Conference, which is to open at the Church of the Messiah, in New York City, October 6th.

Rev. Joseph K. Greene, for ten years a missionary of the American Board in Western Turkey, at Broosa, near Constantinople, has reached this country with his wife and five children. He had become greatly worn by his labors, but the journey home has proved almost a restorative.

A Busy Association.—The Young Men's Christian Association of Lowell, Mass., carried on eight prayer-meetings in the surrounding towns on a recent Sabbath, besides having two open-air services in the city, at one of which over a thousand people were present.—*Evangelist.*

Call Accepted.—The Rev. J. B. Dunn, formerly pastor of the Central Presbyterian Church, New York City, has accepted a call to the First Presbyterian Church, Boston, Mass., and entered upon his duties on the first Sabbath in September. His salary is $4,000.

Rev. John McLeod, of Newport, Nova Scotia, has been called by the United Presbyterian Church of East Boston, in the Boston Presbytery, to become its pastor. It is not yet known whether he will accept.

Rev. Dr. Joel Parker, of Newark, N. J., at a late meeting of the Newark Presbytery, presented his resignation of the church under his charge. He retires in consequence of ill health.—*Evangelist.*

Congregational.—Thirty-eight Congregational churches were organized in April, May, and June; 24 at the West, seven in New England, 3 at the South, and 2 in California.—*Presbyterian.*

Secession among the Ladies.—Twenty-eight ladies, members of a Congregational church in the East, have seceded because denied the right of taking part in church meetings.

Mr. Morris Tyng, a son of the Rev. Dr. Tyng, has left the law and politics, and is now studying for the ministry.

Rev. Dr. Dickson, of Baltimore, has accepted the Secretaryship of the Board of Domestic Missions.

FOREIGN.

Madagascar—Idols Abolished.—The Rev. Charles Jukes, of the London Missionary Society, in a letter from the capital of Madagasca, describing the death and funeral of the late Queen, conveys the gratifying intelligence that neither at the proclamation or the funeral was there *any idol present.* The Queen, who knew something of Christianity, lost faith in her idols some time before her death; and when conscious that she was about to die she called upon some Christian officers who were in attendance, *to pray to the true God.* Since her death the idols have been sent away, to the annoyance and loss of their keepers. The Prime Minister himself, until recently a bigoted heathen, is said to have become a diligent student of the Bible, and the native preachers by turns, at his request conduct a daily service in his house.—*Evangelist.*

Rev. Wm. E. Punshon the well known minister of the Wesleyan Methodist Church, who has awakened considerable attention in many of the churches both in Canada and the United States, was married on the 15th of September, in Toronto, Canada.

A Change.—Mr. Coffin writes to the Boston *Journal* from India: "The Baboos have given up idols and the Shastees, and have for themselves accepted Theodore Parker. Some are Pantheists, others Deists. I am informed by those who are intimate with the educated Hindoos that no modern writings have exercised a greater influence than those of Theodore Parker. It involves no loss of caste to believe in him, but to become a Christian, to attend church and receive the rite of baptism, to believe in Jesus as a Savior, is to become an apostate, unclean and impure. No man can become a Christian without being cast off by his dearest friends; wife, children, father, mother, all hate and curse him; but no such consequences follow when idols and Shasters are rejected, and the theology of Mr. Parker is accepted instead."

A Chinese Commentary.—The New York *Christian Advocate* makes the interesting announcement, that arrangements have been made by the various Methodist missionaries in China to prepare at once a commentary on the New Testament, to be issued in the Chinese language. Those of Wesley's sermons considered adapted to the Chinese are also to be published. The commentary and sermons will be issued from the Methodist Episcopal Mission press in Foochow. The Wesleyan missionaries connected with the British Conference unite with the other missionaries in the movement. The mission work in China is full of hope.

Changes in Church Officers—By the District Church Titles Amendment Act, which has just received the Royal assent in England, every beneficed clergymen not a rector, obtains the style and designation of vicar. The anomalous title of perpetual curate, which has attached to the incumbencies of distinct churches and of the greater part of the appropriate and impropriate rectories, has ceased to exist, and the nominal inferiority implied by its use has been removed. All beneficed clergy of the Church of England are now either rectors or vicars. —*N. Y. Observer.*

Total Abstinence.—A meeting of total abstainers has been held at the Alhambra Music Hall, Shoreditch, "to protest against the return of brewers, publicans, and licensing magistrates to Parliament at the next general election." Mr. J. W. Richardson, of the Temperance Hospital, took the chair, there being some hundreds of people present. The meeting having been addressed by several speakers, a resolution was unanimously carried pledging the meeting not to vote for any candidate in the interests of producing and selling intoxicating drinks. —*Independent.*

Catholic and Protestant Countries.—Speaking in the French Legislative Assembly M. Gueroult said: "And here let me point out the inferior position occupied by the Catholic countries. What are the nations which take the lead in the world? Prussia, Russia, England, America. I will not speak of France at this moment. Then see the countries which have remained Catholic: Spain, Italy until a recent period, South America, Ireland, and Poland."

The Sabbath in England.—The shareholders of the Crystal Palace, at Syndenham, England, have voted by a heavy majority to close the place on Sundays for non-shareholders. They voted down a resolution to close it to themselves. They are very anxious that other people should keep the Sabbath, but insist upon the privilege of breaking it themselves when they choose.—*Springfield Republican.*

Liberia.—A Baptist Missionary Union has been formed in Liberia by a convention representing ten churches, "for the evangelization of the heathen within the borders of the republic, and contiguous thereto."—*Presbyterian.*

Send Me.—The London Missionary Society received last year no less than forty-four offers of service from young men willing to engage in pioneer Christian labor.

Correspondence.

To California by the Overland Route.—No 7.

As the traveller leaves Virginia City for the West after having accomplished the transit of the wilderness that lies to the East, there is the greatest possible contrast between the retrospect of his past journey and the anticipation of that which is to come. He leaves behind him the fatigues, annoyances, and perils of an arduous pilgrimage and exchanges for them the entertainment and diversion of a holiday excursion. That part of the journey which for many years was the most difficult and dangerous has been so completely changed in this respect that it is now accomplished with the greatest safety and facility. With many pleasant expectations of what was to occur during the ensuing day we were embarked on the stage in Virginia City at the very earliest possible time on Monday morning to be conveyed thence to Reno, a distance of 21 miles. Arriving there we had the pleasure of hearing once again the whistle of the locomotive, and remembering where we had last heard it before, it seemed like the echo of that farewell greeting which the iron horse had given us on our departure from Laramie; a welcome sound, full of pleasant associations and prophetic of progress, soon to be as familiar among the peaks of the Sierras and the caverns of the Rocky Mountains and on the plains and sandy deserts, as it now is in the rugged summits of the Alleghanies and in the fertile fields and populous regions of the Atlantic States.

It is about 3½ A. M. when the train is ready to leave Reno and in the dim twilight we are unable to form any very definite idea of the place, though it is evident from the appearance of the streets and the buildings adjacent to the depot that quite a thrifty little city is springing into existence.

There is a delightful feeling of exhiliration as we go aboard the cars and the power of steam begins to hurry us onward toward the mountains, whose passage is to be the great event of the day, and the conclusion of this overland journey. We are moving rapidly through a gently rolling country, occasionally passing herds of cattle and dwellings of men, and ere long come upon the Truckee river, a beautiful, clear and rapid stream, which in the course of an hour and a half we cross no less than 5 times, plunging for variety's sake meanwhile into and out of 3 small tunnels. We have been making considerable ascent, probably since our departure from Reno though it has been so gradual that it is scarcely perceptible.

At 5½ A. M. we are at Truckee station. From this point the scenery increases in interest as we enter the rich, deep verdure of the forest. Looking out ahead of the train as we go slowly up the grade we see, directly in front of us, wide fields of spotless snow far up toward the summits of the mountains, girdled about on their lower edges by wide belts of dark evergreen timber and dotted here and there by isolated trees but stretching far beyond these in unbroken expense of glittering whiteness. Everywhere around us there are trickling streams of water, filled by the melting snow, and the chill air, borne against our faces makes the temperature more like that of December than of July.

On we go again after a few shrill warnings from the engine, which resound grandly through the valleys and glades of the mountains and die upon their summits; onward, through deep cuts in the rocks, around graceful curves which seem to be made as concessions to the dignity of the venerable mountains whose power is so often set at naught and overcome by the superior forces of engineering skill; then dashing into the side of the granite wall and through a tunnel which confines us for a minute and a half and out again, continuing our tortuous course and gradually creeping up towards the crowning elevation. It is just 6 A. M. and in 40 minutes more we will be at the western end of the great Summit tunnel. At present we are journeying leisurely along, admiring that beautiful lake to the right and far below the railroad, nestling down in the deep valley and begirt all around with fresh covered mountains which cast the reflection of their foliage and verdure upon the glassy surface beneath and enrich it with the softest and richest tints of the emerald. Our progress becomes quite slow and the snow is all around us above and below the railroad, even the granite walls that flank the railroad being, in some instances, lined with the soft curtain that summer has not yet dissolved.

It is 6.30 A. M. and we are again looking upon the beautiful lake, well-set gem of the mountains; our speed is increasing; presently we are in the darkness of another underground passage and after our exit we have scarcely time to take a general survey of our position when we are submerged again and as we emerge, the water is trickling down over the rocks at the opening, descending from the banks of snow which cover the granite hills above. We are in the midst of fields of snow and noisy streams are hurrying along their courses in every direction and plunging through the stone-built culverts of the road. Hardy vegetation is springing up wherever the ground is released of its wintry garment, and the lofty trees of the forest, stately firs and waving pines are clustered in picturesque groups around. Here and there is a huge mangled trunk, telling, in its own expressive manner, how the blocks of granite had been flying about when a *blast*—more severe than any of those amid which it had been nurtured in its mountain home—sent the missile, which cruelly severed its majestic head and cast it down upon the slope toward the lake beneath.

Darkness again! and we are threading ourselves through another subterranean avenue, meeting at our exit a party of Chinaman laborers at their work.

Beneath the earth once more! in the most tangible gloom; then out again into the blaze of the morning sun, shining upon the glistening snow. Under the canopy of granite again! From day to midnight, with a brief midnight and a very rapid dawn; out again—exceedingly tantalizing to one who wishes to see the mountains; but eclipsed again in another tunnel! There, it is over. No! *in again*, and this is THE TUNNEL—a third of a mile in length—and as I sit on the last seat in the rear car, I look back until the opening behind us diminishes to a mere speck, and at last disappears entirely in turbid clouds of smoke. It is 6.40 A.M.; seven tunnels in just ten minutes!

And now commences the descent, and our speed is considerably accelerated, though we seem to be for some distance upon a dead level. At 7 A.M. we pass a fine piece of trestle-work; a few minutes later we are going through the snow-sheds, designed and erected to protect the railroad from the accumulation of snow during the winter. These sheds are very simple in construction, consisting of heavy posts of timber set in the ground on each side of the track, and sustaining a simple roof of rafters and boards, which has an additional support in braces extending from the ground to the middle of each rafter. As we proceed, sheds multiply even beyond the number of the tunnels, two more of which are added, and every variety of mountain scenery is presented to the eye, the view becoming more extended at times.

Sharp air gives a sharp appetite. We breakfast at Cisco. At 8.10 we pass Emigrant Gap, whose interest is becoming every day, happily, more and more *historic*. At 9 o'clock we are solving the mystery of "Cape Horn"—a most magnificent curve—where is proved satisfactorily that which has become proverbial, about the longest way around being the nearest way home.

Another tunnel! 9.20, Alta, and beautiful watercourses traversing the mountains above and below the railroad, led away to perform service in mining and milling enterprises; and any number of curves and windings in the track, around which the train whisks as if it were sporting in gleesome mood over its past success. 9.55, Colfax; and in a few minutes more our locomotive becomes disabled; in fact, it has not been doing any work for some time previous, but chiefly going by force of its own weight, and dragging us after it down the grade. After a detention of an hour a fresh locomotive arrives and returns with us to Sacramento, whence we go by boat to San Francisco in the afternoon.

The expense of the whole trip overland, including incidentals, was $320 in currency. As to the outfit necessary, I may subjoin this, from a letter to a friend, who inquired of me regarding the subject a few days ago, and with this I conclude: "A substantial traveling suit, a stout and ample overcoat, a veil for protection against gnats and mosquitoes, a field-glass, an india-rubber drinking-cup, a small supply of medicines; the very *minimum* of baggage and the *maximum* of patience." W. R.

A Psychological Mystery.

Wilmington, Del., Aug. 20, 1868.

Can a good man of sound mind deliberately destroy himself? is a question scarcely necessary to ask. Thursday morning the 13th instant, John Hare, of this city, left his home never to return alive. He proceeded to the Brandywine Creek, about a quarter of a mile distant, along whose banks hundreds of people are accustomed to stroll every day, and remained wandering up and down from early morning until dark, in a state of great mental depression. Not a syllable was definitely learned of his whereabouts by his estimable and distressed family, until Saturday morning, when the body was discovered lying upon a submerged rock a few yards only from the bank. The writer was the first to observe it, though unknown to him at the time.

On its identification and recovery, the right hand was raised towards the breast, as though holding a hat, and the left was also elevated to the head in the natural position of a man about to bathe his forehead—a habit which for some weeks before had been peculiar with the deceased. It is possible that at the time of his death, he may have lost his balance while stooping over the water to cool his head. But his mysterious disappearance and singular actions as observed on Thursday, his lingering so long from home without food and his remaining after dark, look very like the conduct of one bent on self-destruction. He had not been habituated to walk for recreation, and was afraid of the water. The body was unmutilated, and in no wise discolored, except the face which was black from strangulation. The eyes were closed, said to be unusual with persons who are found drowned, and the expression of the coun-

tenance was tranquil. A coroner's jury decided that he committed suicide while laboring under aberration of mind.

According to my informant, who kept a huckster's stall but a stone's throw from the place where the deceased disappeared, he was seen three times on Thursday. When he passed the stand slowly, he held his head down, observing no one, as in great melancholy. Several times he was seen sitting with his elbows on his knees and his head supported by the hands, which occasioned the remark from the person who communicated the facts to me "*That man is in trouble.*" The last time he was observed by him he was lying upon the ground as though designing to remain there after nightfall. Why he returned and went *up the river*, where the body was found, unless to destroy himself, is inconceivable. The last person known to have met him, chanced to be an acquaintance, who had formerly worked with him and who remarked his dejection and disinclination to converse. He was then seated on a rock near the river.

Other circumstantial indications of insanity appeared as long before as on the preceding Monday, when a gentleman visiting him at home, said afterwards to the family "his mind is failing: it is a wreck;" though he used no language that could be called irrational. For two weeks he had conversed but little with any one. Wednesday night just before retiring, his wife overheard him at the bed-side, supplicating for strength *to endure his trials!*

His daughter reported that he always seemed to her to have an almost childish fear of death, alluding to it constantly in his accustomed family devotions. Wednesday afternoon he conversed rationally enough with a neighbor, who remained with him two hours and who only noticed a wild staring expression of the eyes, and an unusual tendency to taciturnity. Nothing appeared to interest him and he brooded over the veriest trifles. He was a man of property, in comfortable circumstances, owning two or three houses in the city, although he had not entirely paid for the handsome new dwelling which he occupied. He had been ill for a number of weeks, until finally the disease which had left him much reduced in flesh, terminated, as is believed, in a kind of congestion of the brain. Whether conscious or insensible when he died, he might have apprehended hopeless imbecility, until, dwelling too long upon this idea, he became deprived of all power of reasoning upon his moral obligations.

That he was a Christian, no one who knew him intimately could doubt. His character was without reproach. He was sixty years of age, and had been for years a Ruling Elder of the Presbyterian Church in a neighboring city. Few men of his standing showed a better acquaintance with the Scriptures, or sounder evangelic views of doctrine. His family were scrupulously trained in the knowledge of the Bible and in the Calvinistic catechism.

Although not a member of the First Church of Wilmington, he was very active in the meetings for prayer and exhortation, taking the lead frequently, to the satisfaction of all, and expounding the Scriptures very sensibly. His prayers were unusually pertinent and appropriate.

Although naturally reserved and thoughtful, no one would appear less liable to aberration of mind, or to folly of word or of conduct. He loved the cause of Christ, and liberally contributed for it of his time and means. Naturally, he was posssesed of a strong intellect. In his habits he was industrious and practical—perhaps too practical; for in this weary world both mind and body need timely recreation.

Would there not be less insanity if our people would give themselves more rest and innocent pastime? To the writer, the death of this good man is clouded with mystery. His funeral was largely attended. Two clergymen officiated, who testified to his habitual piety and sterling worth of character.

An associate of the deceased stated that an equally painful case came under his observation. A gentleman who was related to him conducted family prayers one morning, and then repairing to his barn, proceeded deliberately to erect his own gibbet! But for the interposition of friends he would have hung himself. He, too, was perfectly rational in his conversation, and was an Elder of the Church. In about two weeks afterwards he died of congestion of the brain. From these, and similar cases, it would appear: 1st. That insanity may exist where unsuspected.

2d. That when not hereditary, as in the case under consideration, bodily disease may bring it on.

3d. That it may take the one form of a secret purpose for self-destruction, using all the means suggested by education, intelligence, and deliberate forethought. At what stage of disease moral accountability ceases, God only knows. H.

A. ROMAN & CO.

Publishers, Booksellers & Stationers,

417 & 419 MONTGOMERY STREET,

SAN FRANCISCO,

Invite the attention of the Reading Public to the following Publications. which they have just issued:

"THE OVERLAND MONTHLY"—Devoted to the Development of the Country. Number one, published July 1st. Subscription Price, $4 00 a year, in advance; single copies, 37½ cents.

"CALIFORNIA MEDICAL GAZETTE"—A Monthly Journal; Devoted to Medicine, Surgery, and the Collateral Sciences. Number one, published July 1st. Subscription Price, $5 00 a year, in advance. Single numbers, 50 cents.

PROCEEDINGS OF THE ASSOCIATED ALUMNI OF THE PACIFIC COAST, at their Fifth Annual Meeting, held June 3d, 1868. Price, Seventy-five Cents.

NEW BOOKS.

GOING TO JERICHO; or, Sketches of Travel in Spain and the East. By John Franklin Swift.

As a describer of famous scenery and foreign society, Mr. Swift deserves to rank among our best travel writers; and as a humorist, he has no equal among them, and few superiors anywhere.—*Alta California.*

A handsome 12-mo. Price, $2 00.

ALDEANE; A Novel. By Laura Preston, author of "In Bonds," etc.

This book has a charm that will fascinate the reader at the first chapter, and the interest is well sustained to the last.—*Stockton Independent.*

A beautiful 12-mo. Price $2 00.

A liberal discount to the Trade, Clergymen, Teachers, and Canvassers.

Orders for the above Publications respectfully solicited and promptly filled.

A. ROMAN & CO., Publishers,
San Francisco.

REMOVAL.

Rowland, Bailey & Co.

Have removed their stock of

GROCERIES AND PROVISIONS

From 516 and 518, Washington st.

To 535 & 537 Clay St

Four doors below Montgomery St. and nearly opposite the Pacific Fruit Market.

They have on hand every article sold in a first-class grocery store, and prices are as low as the lowest.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

Gov. H. H. Haight,	Hon. H. P. Coon, M.D.,
Rev. C. Wadsworth, D.D.,	H. H. Bancroft, Esq.,
Rev. Jas. Eells, D.D.,	J. D. Thornton, Esq.,
Rev. H. M. Scudder, D.D.,	F. Henderson, Esq.,
Rev. Thomas Frazer, A.M.,	R. B. Woodward, Esq.,
Rev. F. Buell, A.M.,	H. M. Newhall, Esq.,
Jas. B. Roberts, Esq.,	N. G. Kittle, Esq.,
A. Campbell, Esq.,	Erwin Davis, Esq.,
A. J. Ralston, Esq.	

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.
Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.
L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.
Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

The Occident.

San Francisco, Saturday, October 3, 1868.

GROWTH IN KNOWLEDGE.

It is a condition of advance in every department wherein advance is possible, that one be willing to move on step by step. There must be the perception of, and assent to, subordinate facts or truths, in order to a knowledge of those more difficult of comprehension. This is true in science. The statement of facts revealed in the higher departments of chemistry, or astronomy, or geology, to a farmer or mechanic who knows nothing of their fundamental principles, would seem to him like the declaration of impossibilities. But after he has learned those at the base which he can understand, and rises upon these as a platform from which to examine those next above, and thus proceeds, leaving none unknown, he will find himself at length in the presence of what at first he was ready to deny, surprised that it seems so easy of comprehension, or, if not comprehended, seen to be essential in its place. The same is true in philosophy. The school-boy would listen to an unknown tongue, were he present when the men converse who are familiar with the sublime themes in this wide realm of thought. But after he has studied, and grown, and pressed on from field to field of inquiry, he will rise, in time, into the same realm, and keep pace with those who once astonished him with their progress.

Now, this is no less true respecting the doctrines of theology—often called the "deep things of God." No doubt there are truths among these—as, indeed, there are everywhere among the exhibitions of divinity—which will never be understood in all their extent. But God has made it necessary for us to know the less, as a means of learning the greater, and this is to be the rule forever, in our advance. He occupied ages in teaching men the foundation doctrines of grace before He illustrated to them the connection between these doctrines and the more glorious attributes of His own nature and the grander purposes of His will. Our Savior only by degrees communicated to His disciples the higher truths of His system, which related to the domain of simple faith, and His whole series of instruction, or rather of revelation, was conducted according to His intimation to Nicodemus: "If I have told you earthly things, and ye believe not, how shall ye believe if I tell you of heavenly things."

The ruler of the Jews asked an explanation of one of the most difficult doctrines as the condition on which he would accept it, implying, although he was a sincere inquirer, that he ought not to be expected to receive what he could not understand. The Lord replied by this reference to what must be known before this, but which Nicodemus had failed to learn. The process is from the earthly to the heavenly, from the lessons of sense to the lessons of faith, from the careful, intelligent examination of what is within our reach, and the honest reception of this, to the comprehension of those things that are now beyond our reach, and can only thus be approached.

It is often observed, however, that while men admit this order, in respect to other forms of knowledge, they refuse to accept it as the mode of learning Scripture doctrine. Here they require that there should be nothing incomprehensible, or if there be, that it shall be made known by some supernatural means. The incarnation of the Son of God, or the Trinity, or the method of regeneration, is announced upon Divine authority, and we are told that we shall know, at least concerning the *necessity* of what is thus declared, if not *how it can be*, by a study of our own wants, by the perception of what must be effected before grace can be extended to the guilty, and by the enlightening influence of a faith which, thus prompted, shall believe what God has said. In this way *experience* may assist *reason*, the imparted light of the *Holy Spirit* will shine upon the words that seemed mysterious, and we shall no longer remain under the dark shadow of towering, yet profitless doctrines. But men say this is not the proper way for God to make known, or confirm, what He designs to teach. They say: "Illumine these heights for us, while we stand here; send down from the skies the proof we require, and then we will believe; but we will reject all other proof." Experience is not suffered to interpret, by leading the mind from point to point, where it can take a wider and loftier view. Faith is forbidden to teach what will help to explain the present mystery. The process is rejected which accords with God's universal arrangement, and there is demand for miraculous aid in the knowledge we seek. The spirit thus manifested is opposed to the truth, and to such demands that God depart from the plan He has seen fit to ordain, the answer will always be given that what God has determined man must not question. Try His plan; adopt the means He has appointed; do this with an earnest spirit and a sincere heart, and if these fail, there will be opportunity to require some different method. But they will not fail, for respecting these truths, the heart supplies much help in the interpretation, bearing us higher and higher after reason alone has confessed its inability to rise. If one will be content to make such progress, he shall be satisfied. But if he call upon God to change the order, he will call in vain.

A WASTED LIFE.

That life is wasted that attains none of life's great and worthy ends. To one who really believes this what a sad spectacle presents itself wherever he urns. There is one company, in gay attire, running hither, running thither, dissatisfied yet always seeking something that will satisfy, and the eager inquiry of every one is "how can I be happy?" There is another company of sterner visage, and more anxious mien, oppressed with care, carrying burdens that seem enough to crush them at every step, pushing aside their fellows, trampling upon honor and honesty, when in their path, and asking with earnestness that sometimes startles us, "how can I be rich? can you tell me where there is money?"

Still another company is composed of those wrangling, struggling, hurling each other to the ground, in their strife as to who shall have the greatest number of inferiors, on whom to elevate himself, until at last, perhaps, one rises above the rest, and though right and the happiness of others are sacrificed, declares that he will be *great*. While, here and there, may be seen one who separates himself from the whole number, and going to some retreat, buries himself in its depths, saying to the world in the midst of which he should be a reforming and saving power, "be far off, ye dissipating, distracting influences, I desire to be *holy!*"

Alas! what a waste of life in all this throng of men! What a surrender of the soul to the control of selfishness! What a sacrifice of all that is pure, and noble, and lovely and good! The earliest lessons of childhood are often lessons of selfishness. The follies and dissipation and blight of youth, are the outgrowth of selfishness. The distrust and knavery and outrage of right, among those in mature years, have the same source; and, strange to say, old age trembles on the grave's verge, selfish, miserably selfish still. How refreshing, and delightful to turn from this vision, to the few who will not prostitute themselves; who feel the sacred impulses of benevolence, and uniting their interests with those of other men, seek how they may be *useful* in the world. Their path does not take them from amid the throng, nor is their goodness lost, like the rain upon the desert, in the waste around them, but a green line of verdure and beauty marks their progress through the world, and a worthy life makes them happy, while it blesses others. All know this and confess it, yet upon the great majority of tombstones, the honest epitaph would be, as to the really valuable ends for which years are given, "this is the monument of a *wasted life!*" And among the number of those who should lie beneath that inscription, would be many whom the world has been pleased to honor. The time is coming when we shall be weighed, and everything that has not abiding worth will be removed from the balance.

Baptism of Cornelius.

This second notable case of the baptism of the Holy Ghost is, if possible, more marked and precise in the terms of the narrative than even the Pentecost baptism: "While Peter yet spake these words, the Holy Ghost *fell on* all them which heard the word. And they of the circumcision, which believed, were astonished, as many as came with Peter, because that on the Gentiles also was *poured out* the gift of the Holy Ghost."

I do not know what words in the human language could be used which should more definitely and positively declare an effusion than these two, "*fell on*," "*pour out*." The terms are clear, sharp, and incisive. It is not a suffusion of the Holy Spirit, or imbued with the Holy Spirit; still less immersed in the Holy Spirit, but an *effusion* of the Holy Spirit, and there is no possibility of finding an immersion without a violent, unauthorized assumption and proposition of new ideas in the case, which are not set forth in the narrative.

As in the outpouring of the Spirit at the Day of Pentecost, so in the case of Cornelius, while the effusion is positive and marked, there is given us in the sacred narrative no glimpse of an immersion —"the Holy Ghost fell on all them that heard the word; and they heard them speak with tongues and magnify God." The conclusion is immediate and direct. There is no kind of an intermediate or attendant immersion. Those who find one, find it solely in their own imaginations, and not in the sacred narrative; or as it may be with a late writer on the subject, in the Baptistry of a church of their own faith, to which they bring down the facts of revealed truth, and force an interpretation upon them drawn from their own dogmas and ecclesiastical usages.

And now, while the Holy Ghost "fell on" and was "poured out" on Cornelius and his Gentile friends, in the sight of Peter and the brethren of the circumcision as he began to speak, what was the reminiscence which was forced upon the mind of the Apostle in view of these important facts? "Then remembered I," says Peter, the word of the Lord: John indeed baptized with water, but ye shall be baptized with the Holy Ghost." We have here a

second fulfillment of the promised baptism of the Holy Ghost, and the figure by which the Holy Spirit choses to manifest His gifts is again not an immersion, but, in the plainest terms possible to be found in the English language, an effusion—"fell on," "poured out." That is, we are again taught by the sacred writers that the manifestations of the Holy Spirit, though in mode by effusion, are, in fact, baptisms.

We consult again Prof. Hackett's commentary, and find, in respect to this passage, as in the Pentecostal baptism, no claim for an immersion. It cannot be from any want of zeal in the cause of immersion, for in the baptism of Paul he claims an immersion. In the baptism of the jailor, he finds, either in the prison or in the river Gangas, a place for an immersion, but in this eminent transcendant baptism of the Holy Ghost, Prof. Hackett suggests no immersion, for the good and sufficient reason that it hath pleased the Holy Comforter to indicate the bestowal of His gifts upon the Church, not by the figure of an immersion, but an effusion, while, beyond any denial, they are by the spirit of inspiration called baptisms. It seems to me very much as if the learned professor, in omitting to plead an immersion in the fulfillment of the promised baptism in these cases, has let the cause of his denomination go by default—even confessed judgment, for if he thought there was the opportunity to show an immersion, he is too good a Baptist to let the opportunity slip unimproved, as we have seen in the cases of Paul and the jailor.

I cannot refrain here from a very natural inference arising out of the *mode* of the Spirit's baptism. The *outpouring* of the Holy Spirit at the Day of Pentecost was not only by the appointment of Jesus Christ a baptism, and designated by Him as such, but it was inaugural, introductory, and typical of the ministrations of the Divine Spirit to the Church ever after, so that Peter could immediately plead with the multitude in his preaching, "Repent and be baptized, and ye shall receive the gift of the Holy Ghost." We have, then, been following in direct succession: 1st. The outpouring of the Holy Spirit designated by the Lord Himself as a baptism.

2d. The announcement of the Apostle Peter to the multitudes that in baptism the promise should be fulfilled to them, and they should receive the gift of the Holy Ghost.

3d. The universality of this promise, "Unto you and your children, and to all that are afar off, even as many as the Lord our God shall call."

All that are called of God in our day, then, are the inheritors of the promise and the recipients of the promised gift of the Holy Ghost in baptism, of which the great Pentecostal baptism was the type.

I am aware that this great truth, the typical nature of the Spirit's baptism, is ignored in our day by the Baptists, and even denied by some, while it is held that baptism, or immersion in water, "is the rite set by Christ for initiating those whom the Spirit has renewed into His Kingdom as organized on earth." Baptism being thus set aside as an ordinance typical of the bestowal of the gifts and graces of the Holy Spirit, and made a mere ecclesiastical, initiatory rite.

I am aware, also, that it is a denominational necessity that the symbolical nature of baptism should be denied, for if it be admitted that baptism is typical of the ministration of the Spirit's graces, then that mode of administration of the ordinance which should most nearly conform to the architype, when the promise of the Savior—"Ye shall be baptized with the Holy Ghost not many days hence"—was fulfilled, would give us, not an immersion, but an effusion, and the pleasing figment of the "liquid grave," would float away to Milton's limbo, and give place to the Pentecostal mode, which signifies, by an appropriate emblem, the fulfillment of the promise: "It shall come to pass in the last days, saith God, I will *pour* out of my spirit on all flesh." F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, Principal.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Biography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Children's Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All such are requested to call and examine the publications of the Presbyterian Board at the Depository for the Pacific Coast, which has been established at the store of

Advice to a Wife.

Prof. Pye Henry Chavasse has acquired the right to speak some plain truths to wives, respecting health, because of his eminent position as a medical teacher, and because he has contributed so much through the press for the instruction of women upon points that they need especially to understand. The book now before us with the above title, is published in this country by J. B. Lippincott & Co., Philadelphia, and contains an amount of good counsel and valuable information that should make it welcome among those for whom it was written. We are inclined to agree with the author, that there is lamentable, and often culpable ignorance, respecting the most essential facts and principles that relate to health, and while this should be true of none, it is occasion for general regret when it is true of those upon whom comes so great reponsibility, by the laws of nature, for the health of their families.

Many of the suggestions in the book are worthy of attention from all others, as well as wives, and we heartily commend them. For example, let those who "love darkness rather than light," and therefore desire the most effectual expedients for the exclusion of all sunlight from their houses, read the following:

"I must not forget to speak of the paramount importance in a dwelling, of an abundance of *light*—of *daylight*. Light is life, light is health, light is a physician! Light is life: the sun gives life as well as light, and if it were not for the sun, all creation would wither and die. Light is health: it strengthens the frame, it cheers the heart, and tints the cheek with a roseate hue. Light is a physician: it drives away diseases, as the mists vanish at the aproach of the sun, and it cures numerous ailments which drugs alone are unable to relieve. Look at the bloom on the face of a milkmaid. What is it that tints her cheeks? An abundance of light. Behold the pallid, corpse-like countenance of a factory girl. What blanches her cheek? The want of light, of air, of sunshine. A room, then, ought to have large windows, in order that the sun may penetrate into every nook and corner of the apartment. Some ladies, to keep off the sun, to prevent it from fading their furniture, have in the summer time all the blinds of the house closed. Hence they save the fading of their furniture, and instead of that, they fade their own and their children's cheeks. It is a grievous sin to keep out from a dwelling the glorious sunshine. We have heard of "trap to catch a sunbeam;" let the open windows be the traps, and a more desirable prize cannot be caught than a sunbeam. Sunbeams, both physical and metaphysical, make a house a paradise upon earth!"

In connection with this subject is another, on which the author discourses with seemingly less enthusiasm, and his words deserve careful reflection.

"Cheerfulness, contentment, occupation, and healthy activity of mind cannot be too strongly recommended. A cheerful, happy temper is one of the most valuable attributes a wife can have. It not only makes herself, but every one around her happy. It gilds with sunshine her humblest dwelling, and often converts an indifferent husband into a good one. Contentment is the finest medicine in the world; it not only frequently prevents disease but if disease be present it assists in curing it. Happy is the man who has a contented wife! A peevish, discontented helpmate, (helpmate good the work!) is always ailing, is never satisfied, and does not know, and does not deserve to know, what real happiness is. She is a thorn in the flesh."

These extracts give an idea of the practical character of the book. For sale by H. H. Bancroft & Co.

Bancroft & Co. have also received lately an assortment of new Sunday School books, published by the Sunday School Union, of which the following have been placed on our table, and so far as we have had time to examine them, we believe they are fit to be placed in the hands of children and youth. Not all books that are printed for this purpose ought ever to be given to children to read.—

The Twin Roses, and how they were trained.

Cherry, the Missionary; by the author of "The Chinese Boy."

Pilgrim Street; a republication from the London Tract Society.

The agent of the *Scripture History for Youth*, has furnished us the current numbers of this little work, to which we have before referred. The 7th and 8th numbers have just been received.

Books and Periodicals Received:

The Spirit of Missions for September. New York: Board of Missions.

The Presbyterian Monthly for September. Philadelphia: Presbyterian House.

The Family Treasure for September. Cincinnati: Elm Street Printing Company.

Pacific Medical and Surgical Journal for October. San Francisco: H. H. Bancroft & Co.

LITERARY ITEMS.

Misused Words.

Editorial.—An unpleasant Americanism for *leader* or *leading article*, which name is given to the articles in newspapers upon the leading topics of the day. These articles are not generally written by the editor of the paper, although he is responsible for them; but so is he for the other articles, and for the correspondence. And even were the case otherwise, *leader* or *leading article* would, none the less, be a good descriptive name for them, and *editorial* would be poor, both for its meagre significance, and for its conversion of an adjective into a noun.

Consider is sadly perverted from its true meaning by most of those who use it. Men will say that they do not consider Chief Justice Chase's course right in regard to the Democratic nomination—that they do not consider Mr. So-and-So a gentleman—and even that they do not consider gooseberry tart equal to strawberry shortcake. Now, *consider* means to take counsel with the stars, (*con*, with, *sidera*, the stars,) to peer into the future by watching the heavens, and so to ponder, to contemplate. A court reserves its opinion that it may consider a question which it sometimes has for weeks under consideration. A business man asks until to-morrow to consider your proposition, and meantime he ponders it, *i. e.* weighs it carefully, ruminates upon it. A man, whose ability, character, or position gives weight to his opinion is a man of consideration, because what he says is worthy to be considered; and whatever is large enough or strong enough to deserve serious attention is considerable. All this fine and useful sense of the world is lost by making it a mere synonym for *think*, *suppose*, or *regard*.

Quite means completely, entirely, in a finished manner. It is from the French *quitte*—dicharged, and is akin to *quits*, the word used by players of games to mean that they are *even* with each other. Therefore the common Americanism, *quite a number*, is unjustifiable. A cup or a theatre may be quite full; and there may be quite a pint in the cup, or quite a thousand people in the theatre, and neither may be quite full. But *number* is an indefinite word which *quite* cannot qualify.

Locate is another Americanism which is insufferable to ears at all sensitive. If a gentleman chooses to say, "I guess I shall locate in Muzzouruh," meaning that he thinks he shall settle in Missouri, he has doubtless, the right as a free and independent citizen of the United States to say so. Certainly *locate* and *Muzzouruh* should be left together; they are very fit company for each other. *Locate* is simply a big word for *place* or *settle*; and a man for whom those words are not ample enough, may correctly speak of locating himself his family or his business here or elsewhere. But *locate* without an object is suited to the use of those only who are too ignorant and too restless to settle anywhere.

Restive means standing stubbornly still, not frisky, as some people seem to think. A restive horse is a horse that balks; but horses that are restless are frequently called restive. Restiveness, however, is one sign of rebellion in horses. Thus, Dryden (quoted by Johnson):

> The pampered colt will discipline disdain,
> Impatient of the lash, and *restiff* to the rein.

Hence a misapprehension, by which those who did not understand the word were led to a complete reversion of meaning.

Esquire.—To attempt to deprive any citizen of this democratic Republic of his right to be called an esquire by whomsoever thinks fit so to call him, would be an outrage upon our free institutions, and I do not known but treason to the natural rights of man whatever they may be. Upon this subject I confess myself fit only to be a learner, and shall be very glad if any of my readers will tell me what he means when he addresses a note to John Dash, Esq., except that Mr. Dash shall think he means to be polite.—*Galaxy.*

Educational.

Poetry for a Geography Class.

THE ORINOCO.

"The strife which currents rage
Where Orinoco in his pride
Rolls to the main no tribute tide,
But 'gainst broad ocean wages far
A rival sea of roaring war,
While, in ten thousand eddies driven,
The billows fling their foam to heaven."

THE NILE.

"Flows through old, hushed Egypt, and its sands,
Like some grave, mighty thought, threading a dream;
And times and things, as in that vision, seem
Keeping along in their eternal stands,—
Caves, pillars, pyramids; the shepherd bands
That roamed through the young earth; the glory extreme
Of high Sesostris; and that southern beam,
The laughing queen that caught the world's great hand!"

—*Leigh Hunt.*

THE THAMES.

O, would I flow like thee, and make thy stream
My great example, as it is my theme!
Though deep yet clear, though gentle yet not dull,
Strong without rage, without o'erflowing full.

—*Sir John Dedham.*

Hints in Geography.

I.

Should Australia (New Holland) be called a continent or an island? This is one of the debatable questions among geographers. What the Australians call it themselves is interesting, although not conclusive. Men sometimes call themselves "Professors" when they are only amateurs. The following is a sentence from the Melbourne *Christian Review*: "We have here on this *continent* of New Holland, our colonies, in each of which there is a body of Christians formed mainly by a body of emigrants, who in the mother-land were attached to different subdivisions of Scottish Presbytery.

II.

The curiosities of New Orleans have always been many. Visitors have found there a city lower than its river; graves above ground on account of the wetness of the soil; the famous battle ground of General Jackson, now transformed into a Union cemetery; a French *patois* and a Parisian Sunday. Another is now promised. Boring has revealed below the city a stratum of carbonetted hydrogen gas. The city may thus be lighted, like Fredonia, N. Y., with gas made by nature. This will be cheaper even than the plan proposed for New York and Philadelphia. It has been seriously suggested to

connect these cities with the coal mines of Pittsburg, by means of pipes, and thus illumination would be effected across the whole length of Pennsylvania.

III.

Some of our popular writers are sinners exceedingly against geography. One of these writers is Parton. The following paragraphs occur in his sketch of John Jacob Astor: "Particularly he noted the spots where Rochester and Buffalo now stand, one having a harbor on Lake Erie, the other upon Lake Ontario." It can hardly be said that Rochester has a lake harbor in the same sense as Buffalo. Lake Ontario is eight miles from Rochester, and the shipping-point there is called Charlotte. "He walked to Lake George which he ascended in a canoe, and having thus reached Lake Champlain, he embarked again and sailed to the head of that lake." He is speaking here of a journey to Montreal, and, therefore, means to say that Astor *descended* Lake George, and sailed to the *foot* of Lake Champlain.

C. R. C.

Personal.

Rev. W. T. Mayne from Australia takes charge of the M. E. church of Haywood and San Leandro, in place of Rev. J. Corwin who goes to Los Gatos. Mr. Corwin is a very desirable preacher, especially for a community which has no church building. The M. E. church at Haywood is almost entirely the work of his hands.

M. le vicomte de Suarez d'Aulan connected with the French Legation at Washington, and M. L. Simonin, French mining engineer, have arrived on this coast, the former on a pleasure tour and the latter on business connected with the Pacific Railroad.

Rev. John Daly delivered an address at the Presbyterian Church at Portland, Oregon, last Saturday, for the benefit of the Y. M. C. A. Mr. W. S. Ladd has generously given the use of rooms for the Association.

Prof. W. F. Bliss who has been recently appointed to the Agricultural College in this city is a native of Vermont and a graduate of Harvard. He has been a tutor in Washington University, St. Louis, Missouri.

Dr. Henry DeGroot connected with press of California, petitions the Courts to change his name to Henry Dunblane. A relation in Scotland left him a large sum of money on those conditions.

Rev. Mr. Gibney from St. Patricks church in this city, takes the place of Father Cotter, in Sacramento, and Rev. Mr. Kelly of the same church takes Father McGee's place at Folsom.

Revs. Eagan and Lathrop are delivering each a course of Sunday evening lectures in their respective pulpits, on Scriptural subjects.

Hon. J. N. Johnson, formerly Governor of California, has been nominated for Supreme Judge by the Republicans of Nevada.

Rev. F. Buel, Agent of the American Bible Society, preached in the Presbyterian church at Stockton last Sunday.

Mr. James A. Rogers one of the School Directors of this city, died on Saturday last of small-pox.

Hon. John A. Bingham will come to California and make 10 speeches for Grant and Colfax.

John Ferguson formerly Deputy Postmaster in this city, died on Tuesday last aged 62.

Gen. Frank Blair has concluded to defer his trip to California until after election.

The Largest and Best

FAMILY AND RELIGIOUS NEWSPAPER

ON THE PACIFIC COAST.

Special Organ and Representative of the Several Branches of the Presbyterian Church.

The Occident

Having been Enlarged and Improved, now contains

SIXTEEN PAGES OF READING MATTER,

Well Written, Carefully Selected, and Systematically Arranged, under Fifteen Different Heads, as follows:

I. **Current Topics.**—Consisting of original notes on general subjects of popular interest. Many of the ablest writers in San Francisco and Oakland contribute to this department.

II. **Religious Intelligence.**—Three divisions: Pacific Coast; Eastern; Foreign. The first is a complete record of events of interest connected with churches of all denominations throughout the coast. The Eastern and Foreign departments comprise items of the latest Religious news, carefully selected from our large exchange list, which embraces all the leading religious papers and periodicals.

III. **Correspondence.**—We have engaged the services of talented and experienced Eastern writers for this department, and regularly receive letters from clergymen in all parts of our own coast.

IV. **Contributions**—On religious and other subjects, by our best writers.

V. **Editorials**—The character of which is sufficiently indicated by the names and reputation of the Editors.

VI. **Current Literature**—Consisting of notices of the latest and best works, and quotations from their pages; containing, also, Literary Items, fresh and interesting.

VII. **Educational.**—Containing original articles by practical teachers, and selected matter from the best educational works.

VIII. **Personal.**—The most complete collection of Personal News, concerning clergymen, public men, etc., to be found in this city.

IX. **Agricultural.**—Fresh and useful hints for farmers, gardeners, housekeepers, etc., with full Market Reports.

X. **Mining.**—Containing accounts of the progress of discovery and development of our mineral resources.

XI. **Scientific.**—The latest discoveries in all branches of Science and Art. The last three heads are comprised under the general head of Practical and Scientific.

XII. **General Selections**—From the leading Reviews and Periodicals, American and foreign.

XIII. **Family Reading.**—A variety of poetry and reading matter of a religious nature, adapted to the home circle.

XIV. **Young Folks.**—Short stories and sketches for children of all ages. This department has given universal satisfaction.

XV. **News Summary.**—Pacific Coast Items and Telegraphic Summary—a complete résumé of the Domestic, Eastern, and Foreign secular news of the week.

In Typographical Execution and Appearance The Occident *is acknowledged to have no equal on the Pacific Coast.*

The Occident

Is edited by Rev. Jas. Eells, D.D., of the First Presbyterian Church, San Francisco—formerly of the Church on the Heights, Brooklyn; and Rev. E. B. Walsworth, D.D., of Oakland, as Associate.

It is the aim of the Editors and Publishers to make The Occident, in every respect a first class paper, and one that will be WELCOME IN EVERY FAMILY.

A year's subscription to The Occident *is an appropriate present to friends in the East who are interested in the progress of religion on our coast.*

Subscribe at once, and see that your friends and neighbors are supplied with the paper.

Terms.—$4 00 a year, in advance; $2 50 for six months.

To Advertisers,

A first class religious paper like this, reaching the homes and families of the most intelligent and prosperous classes of every community, carefully read by each member of the family, and then bound and preserved for future reference, is justly considered by business men the very best medium for bringing their business before the public.

Getting in Debt.

Is it ever advisable for a man to get in debt? Most certainly, for it is by doing so that at least ninety out of every hundred of our most successful merchants and farmers have reached the positions in which they now stand. We know that such advice is not generally considered orthodox among our political encomists, but we also know that our forests and prairies would in a great measure have remained in their primitive wilderness if the men who now people them had kept out of debt.

Shall a young man get in debt for a farm, or would it be better to work for somebody else until he is able to pay for it with his own money? We say buy the farm, and pay for it when you can. This is the system which has been in vogue ever since the settlement of America, and we know of no country that has made more rapid progress, nor one in which the farmers are more independent. Suppose a man has a little capital, say three thousand dollars, and he wishes to purchase a farm worth that sum; now, it becomes a question of policy whether he shall pay all the purchase money down or only a portion of it, reserving the balance as working capital. We believe that the latter would be the best plan, for what can a man do with his land if he has neither a team nor tools with which to cultivate his crops? This being in debt is not always a very agreeable position, but it has been the means of making more fortunes than all other causes put together. Debt is often the poor man's capital, and the young man who can establish a good credit is on the high road to success, and if he does not reach the goal it is because he is too much of an imbecile to take advantage of his circumstances.

The great secret of getting into debt is in never purchasing anything that is not worth as much or a little more than you pay for it, or to put it in a better light, buy that which is sure to rise annually in value more than the interest on the sum paid.

Fine clothes, fast horses, jewelry, and wines that you and your friends have consumed during the year are not usually in this class of property, but a good farm well tilled, good stock well cared for, are pretty sure to pay; therefore we say again, young men who mean to work need not be afraid to get into debt. To owe money which you mean to pay is one of the greatest of preventives against sloth with which we are acquainted, and it has been the saving of many a naturally indolent man.

There are plenty of men who have more capital than they can use to advantage, and there are others who have energy, tact, and good financial abilities, but no money. It must be apparent that each can be of no assistance to the other, but one of them must get into debt.

The man of means is usually satisfied with seven per cent. per annum, and the man without it can, if he has the ability, afford to pay this sum, for it becomes the implement with which he is to carve out a competency, if not a fortune.

No man can cut cordwood with two axes at the same time and work to an advantage, consequently he had better lend one to his neighbor who has none, than to keep both of them himself; and further, cannot the neighbor better afford to pay a small sum for the use of the axe than to do nothing for the want of it? We think so.

This is just the position in which we often find two men—one has a farm to sell on credit, or money to lend, while another has neither.

There are thousands of farmers who have more land than they can cultivate profitably, therefore it would be to their advantage to sell a portion on credit to those who could.—*N. Y. Sun.*

Norway Oats—A Remarkable History.—In the Spring of 1864, Mr. D. W. Ramsdell, a well-known farmer in Orange county, Vermont, discovered a single kernel of this grain in a package of peas which had been sent from the Agricultural Bureau at Washington. Its large and plump appearance so attracted his attention, that he planted it for experiment. Its generation of numerous stalks, and their immense growth and yield were a surprise to all who saw them. The Commissioner of Agriculture was notified of these facts, and it was decided to call them the Norway Oats, from the supposition that the peas came from Norway. The second year's experiment was with 2,040 grains, which produced the enormous yield of over three bushels of oats, weighing 45 pounds to the bushel. The stalks grew nearly seven feet high, and the heads were from 12 to 14 inches long. On Dr. Randall's farm the yield is said to have been 130 bushels to the acre, which grew 5½ feet high. P. C. Jones, Esq., President of the Chelsea Bank, and ex-Lieutenant Governor Burnham Martin, and others, are also raising these oats with great success.—*N. Y. Tribune.*

Cheap Living.—Experience at the Working Woman's Home in New York shows that there is a possibility of cheap and at the same time good living at the Metropolis. It is found that coffee and tea, with sugar and milk, can be furnished for two cents a cup; milk for two cents; meat for three cents a plate (in quantity equal to that of a cheap eating-house, where fifteen cents are charged); a slice of bread about five inches square and an inch thick for one cent; several potatoes for two cents; a plate of peas, beans, or other vegetables, for three cents; a pat of butter, two cents; pudding with sauce, four cents; pie, three cents; strawberries, four cents; and other eatables in proportion. To enable persons to economise still more closely, if necessary, and to accommodate those who prefer to select their own diet, the restaurant principle has been adopted by the managers of the Home. Now $1 25 a week is charged for room rent and incidental expenses, and the boarder can order what she will from the restaurant, which is charged to her at nearly cost prices. The provisions are bought at wholesale in Washington market. The above figures are a strong argument in favor of combination in making household purchases, either according to the co-operative system or otherwise.—*N. Y. Observer.*

Painting Stoves.—A writer in an English magazine proposes, instead of black-leading stoves and grates, that they should be painted with water-glass (silicate of potash), colored with pigment, to harmonize with the coloring of the apartment. Before this is applied the iron must be thoroughly cleansed from grease, and all rust spots must be rubbed off with a scratch brush. Two or three coats of the paint may then be put on and allowed to dry, after which the fire may be lighted without fear of injury to the color, which may, indeed, be exposed to heat with impunity. Grease or milk spilt over the paint has no effect upon it, and it may be kept clean by washing with soap and water. Dutch-ovens and other similar utensils may also be coated with the same material, and the labor spent in polishing them may thus be saved. A good coating of this paint, it is said will last a year or two.—*Christian Intelligencer.*

Plum Cake.—One pound of dry flour, one pound of sweet butter, one pound of sugar, twelve eggs, two pounds of raisins, two pounds of currants; as much spice as you please. A glass of wine, one of brandy, and a pound of citron. Mix the butter and sugar as for pound cake. Sift the spice, and beat the eggs very light. Put in the fruit last, stirring it gradually. It should be well floured. If necessary, add more flour after the fruit is in. Butter sheets of paper, and line the inside of one large pan, or two smaller ones. Lay in some slices of citron, then a layer of the Mixture, then of the citron, and so on until the pan is full. This cake requires a tolerably hot and steady oven, and will need baking four or five hours according to its thickness. It will be better to let it cool gradually in the oven. Ice it when thoroughly cold.

Useful Receipt—Preparing Molasses to Preserve Fruit.—For preparing molasses for preserving fruit—which renders it much better suited for that purpose than syrup prepared from the best loaf sugar, as it is not liable to candy, nor, if well prepared, to ferment—take eight pounds of molasses, (bright New Orleans, or sugar-house;) eight pounds of pure water, one pound of coarsely powdered charcoal; boil for twenty minutes; then strain through fine flannel double; put it again in a kettle with the white of an egg, and boil gently, till it forms a syrup of proper consistence, and strain again.—*Lutheran.*

Horse Feed—A Good Suggestion.—A correspondent sends us the following communication: "In the matter of horse-feed, a great saving may be made if teamsters, farmers, surgeons and others, would feed chopped wheat with straw, to their stock, instead of ground barley and hay. The inferior grades of wheat can be purchased much cheaper than barley; say, at $1 43 per cental, while barley readily sells at $2 20 per cental. It is well known, wheat ground for feed and mixed with cut straw affords a horse or mule more nourishment than the same amount of barley fed with hay."—*Stockton Herald.*

We have not strength enough to follow all our reason.

We are never so happy or so unhappy as we imagine.

WEEKLY MARKET REPORT.

Wednesday, September 30, 1868.

Flour—200 bbls Farmers' Extra, in half sks, $6. We quote jobbing rates for city brands as follows: Superfine, in sks, ₱ 196 lbs, $5@$5 25; Extra, in sks, $6@6 25.

Wheat—Sales include 7,000 sks choice shipping, to arrive, sold last evening, private; 10,000 sks do, by a farmer, private; 2,000 sks do, afloat, full figure; 1,500 sks do, afloat, $1 90. We quote the range for fair to extremely choice at $1 70@1 95. At the close, 500 sks inferior, $1 67½; 1,000 sks choice white, $1 95 ₱ 100 lbs.

Barley—460 sks choice old brewing reported sold at $2 85. We quote new nominal at $2 10@2 25 ₱100 lbs. At the close, 1,300, in two lots, private.

Oats—Sale of 300 sks choice, $2 25. The range is $2@$2 30 ₱ 100 lbs for the various qualities. At the close, 200 sks choice heavy, $2 30 ₱ 100 lbs.

Potatoes—150 sks Lighthouse, $1 10; 300 sks Mission. in lots, 90c@$1; Carolina are quoted at $1 25 ₱ 100 lbs.

Onions—Sales of Yellow from wharf at $2 12½ ₱ 100 lbs.

Beans—We quote jobbing rates as follows: Bayo, 3½@4c; Butter, 4@5c; small White, 4@4½c; Pink, 3@3½c, and Red, 2¾@3c ₱ lb.

Bran—Sale of about 100 tons, in lots, $22 50@25 ₱ ton.

Middlings—Fine sell at $37 50@40; feed descriptions, $32@$35 ₱ ton.

Oil Cake Meal—Quotable at $30 ₱ ton.

Hay—About 80 tons sold at current rates; quotable at $11@16 ₱ ton.

Rye—Quotable at $2 ₱ 100 lbs.

Buckwheat—Nominal at $1 75 ₱ 100 lbs.

Mustard Seed—Another consignment to the New York market went forward by the steamer this morning. We quote California Black 3¼@3¾c and White 5c ₱ lb.

Dairy Products—California fresh roll Butter continues scarce at 55@60c; pickled ranges from 40@45c, medium quality selling at 42½c; California firkin is scarce and nominal. Cheese sells from 15c to 18c, according to quality; good California dairies command 16@17c; Eastern Cheese is scarce at 18c ₱ lb; Pineapple Cheese, 18@20 ₱ dozen. Eggs are firm at 60@62½ ₱ dozen.

Provisions—Bacon is jobbing at 14½@15½c for California smoked; Oregon do, 14½c; California Hams, 16½@17c; Oregon do, scarce, 18@19c; California Lard, 12½@13½c, and in small tins, 14c; Eastern Lard, selected lots, 12½c ₱ lb.

Poultry—Live Turkeys are quoted at 16@18c ₱ lb; Hens, $7@7 50; Roosters, $6@6 50; Spring Chickens, $4@5; Ducks, $5@5 50; Quail $1@1 25 ₱ dozen; Geese, $2@$2 25 ₱ pair; Venison, 8@10c ₱ lb.

Wool—Sales for the week, by two of the leading receiving houses, 122,000 lbs fall at 14½@15½ for good to choice fall shipping grades. Demand active. Fall burry, 10@11 ₱ lb.

Hides—Sales since last Wednesday reach 2,500 California dry at 14½@15½c for usual selection, a decline of ½c on best descriptions. We quote Salted at 7c ₱ lb.

Tallow—Sales for the week of 16,000 lbs Beef, 7½c; 15,000 lbs do, 7¼@8c. At the close, 7⅞c is bid for Beef by the principal consumers.

San Francisco Cattle Market.

The market presents no changes of interest. Some dealers quote best qualities of American Beef at 7@9c, though the general range is 7@8c.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.

Veal—Ranges from 6 to 10c ₱ lb.

Mutton—Is steady at 6@6½c ₱ lb.

Lamb—Steady at 8@9c ₱ lb.

Pork—Undressed, 4@5¾c; dressed, 6½@7¾c ₱ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

MINING.

The Comstock Mines.—Stock in these mines has lately declined to a great extent. The papers of that region do not agree as to the cause of the decline, some of them insisting that there is no falling off in the yield. But the future prospects do not seem encouraging. The Nevada *Gazette* says:

Many of the mines have still fair bodies of ore in the upper levels; but in all the deep levels (quite a number of shafts are down to a depth of 1,000 feet), but little pay ore has been found. In most of the great silver mines there are alternate belts of rich and barren ground; and this is doubtless the case with the Comstock, where the barren belt set in at a depth of 600 or 800 feet below the surface. The companies that persevere must eventually strike rich ore again, but there is not likely to be many more dividends from the Comstock for a long period to come.

Mohawk and Montreal Mines.—The shaft is now down 212 feet, and further down the face of the mountain are two tunnels (about 150 feet apart) running in toward the shaft, from all which good paying ore is taken—mostly decomposed quartz, with an abundance of free gold, and very rich in sulphurets. The ledge is from three to six feet wide, and the rock will probably average about $100 per tun. There are already 400 tuns of ore at the mill, and a chute leading from the tunnels to the batteries will keep the mill supplied without the expense of hauling. It is believed that the company will be free from debt and commence paying dividends within three months. Energy and perseverence, with mines so rich to stimulate them, are sure to be rewarded with a golden harvest. Success to the Mohawkers!—*Virginia Trespass.*

Rich Pay on Humbug.—The Lower Humbug Flume Company are taking an immense quantity of gold dust lately. Last week's work yielded $1,200 and the gold as shown to us by Mr. Pfeninger, of the Humbug Express, is very coarse, nuggets of upwards of half an ounce being found in great profusion. There are eight men at work, and one of them in one cut is making as high as 2 and 3 ounces a day from his drifting. The claim, purchased of Ringgenberg some yeas ago for $24,000 by Chinamen, and supposed to be of littte value, is also said to be paying handsomely. All Lower Humbug is exceedingly rich, but it takes hard work and some capital to open claims.—*Yreka Journal.*

Mines in Wyoming.—A letter from this region to the *Frontier Index*, says: "The gold fever is at blood heat. New discoveries are being made every day or two. One man came in from the south of Elk Mountain this morning with seven hundred dollars in dust which he had worked out in seven days with the aid of nothing more than a pick and a frying pan.

The mines in North Park, forty miles west of Laramie, are producing a handsome yield. Omaha and Chicago send out heavy reinforcements by every train to take a part in the Medicine Bow discoveries, notwithstanding the prospects of an early winter.

Morning Star Mine—The *Alpine Miner* says that the present movements of this company all indicate a faith in their mine and a determination to show the world upon what their faith is based. A complete set of hoisting and pumping machinery is now on the ground and a large force of men is engaged in putting the works in order. The ore promises to be very rich. It is thought that the "Chlorination process" will be adopted for the reduction of this ore.

The stampede from the east to the Elk Mountain, Douglass Creek, and North Park gold mines, still continues. The men are "panning out" better wages than are to be had at any other placer diggings in the mountains at this day.—*Index.*

Yuba District—Items from the *Oregonian.*—The mill of the Greenback Company is engaged in crushing ore from the Atlanta ledge, which is yielding considerable bullion.

The English Company, W. Willis, agent, has fine mills, which they propose to set up on some rich ledge, and they are now making a critical examination of the Lucy Phillips, will be purchased by them if results are satisfactory.

The Monank Company, E. C. Atkins, agent, have purchased, recently, 1,000 feet of the Atlanta lode, and are engaged in erecting a mill and taking out ore. They paid $225,000 for 1,000 feet of the richest portion of the Atlanta.

The Minerva Ledge has a reputation for richness—has no superior in the Yuba District. A tunnel has been driven into the mountain, which strikes the lead at a point 150 feet below the surface where the ore is immensely rich, containing both gold and silver, with but very little baser metal. It is therefore worked at a smaller expense than ordinary ore. There are many other ledges which have been prospected, to some extent, and promise favorable results when facilities for reducing the ore are furnished.

Mining men of California and Nevada, who have visited Yuba District, pronounce it to be the richest and most extensive camp on the Pacific slope.

White Pine District—Its Location.—Inquiry has been made of us about the location of this mining district. It is situated one hundred and twenty miles east of Austin, and twenty miles south of it. Its distance from the railroad is about one hundred and twenty miles, and it is expected that all freight for that district will be shipped by rail to a point something near to one hundred and ninety miles east of Winnemucca.—*Argent.*

Eureka District.—We are informed that quartz mining in the Eureka district is in a prosperous condition. The great disadvantage of the district is the deep snow in the winter, which effectually puts a stop to prospecting for half the year; but when the mines are fairly opened, this drawback in a measure can be overcome. Scarcely a crushing has been made this season that has failed to yield what would be considered large pay in this part of the country.—*Nevada Gazette.*

Valuable Discovery.—We learn, says the *Argus*, that an extensive deposit of per-oxyd of manganese has been discovered in the vicinity of San Jose. This mineral is largely employed in the manufactures, it is consequently a valuable article of commerce. Large quantities of it are exported from California to Europe.

The *Butte Record* says that the only flume of importance that is being put in on Feather River, is one on the North Fork at the foot of Bloomer Hill. The company have commenced drying their claim, and have a prospect of a rich and extensive deposit. Last year the flume was washed away just as work was about to be commenced.

Cerro Gordo Mines.—The Virginia *Enterprise* learns from a returned miner that the mines of Cerro Gordo, in Arizona, are yielding as rich ores as at their discovery, not only from the surface of the various veins, but at the greatest depths yet attained on any of them by sinking of shafts or driving of tunnels.

The Highest and the Deepest Mine.—The highest mine in the world is a silver mine, and is that of the Potosi, in the Andes of Peru. It is situated 11,375 feet above the surface of the ocean. The deepest mine in the world is a salt mine in Westphalia, which is 2,050 feet below the surface of the ocean.

New diggings have been found near Canyon City, which promises to yield better than anything yet found in the John Day country.—*Oregonian.*

Good News from the Bullion Mine.—A ten-pound specimen has been found at the Bullion Mine. Whether the Trustees will decide upon declaring a dividend remains to be seen. Mr. Owen probably considers the specimen private property. For a mine without a blower this is doing well.—*Enterprise.*

The Montana *Post* sent a special correspondent to the recently discovered Cœur d' Aléne Mines, who reports very unfavorably on the prospects in that region.

A letter to the Dalles paper states that it is generally conceded that the Burnt River District will be one of the best mining camps east of the mountains.

Bullion.—The *Argent* has seen 124 pounds of bullion for shipment, the product of one week's run, from the Golconda Ledge. The mine pays as usual.

The Blue Wing slope of the Chollar-Potosi Mine of Nevada, is now yielding over 1,000 tons of ore per week. Average assay, $60 per ton.

A miner working a claim thirty miles from Baker City, Oregon, recently picked up a chunk of pure gold valued at 11,500.

The Savage Mine of Nevada yields 1,086 tons of ore per week. The ore will average $37 21 per ton, net.

It takes 100,000 ounces of silver a day to supply the demand for that metal in manufacture and the fine arts.

The Overman Mine, of Nevada, is now turning out 50 tons of ore per day, which assays $21 per ton.

Yellow Jacket.—The lower level of this mine continues to yield rich ores.

Gold fields have been discovered at the Cape of Good Hope.

Congregational Singing.

ROBINSON'S SONGS OF THE SANCTUARY. Hymns and Tunes for Congregational Singing. 35,000 copies already sold. Editions for Congregational, Presbyterian, and Baptist Churches. Price, $2 50. A liberal deduction to churches for first introduction.

HERNY WARD BEECHER'S PLYMOUTH COLLECTION. 75,000 copies sold. Congregational and Baptist editions, $2 50.

EPISCOPAL COMMON PRAISE. Appropriate Tunes for all the Psalms and Hymns in the Book of Common Prayer, with select chants. Just published. $2 75.

A. S. BARNES & CO.,
Publishers, New York.

For sale by H. H. Bancroft & Co., San Francisco.

Oakland College School.

The next term will open Wednesday, July 22d.

General Selections.

Concentrated Progress of the World.

Few phenomena are more remarkable, yet few have been less remarked, than the degree in which material civilization—the progress of mankind in all those contrivances which oil the wheels and promote the comfort of daily life—has been concentrated into the last half-century. It is not too much to say that in these respects more has been done, richer and more prolific discoveries have been made, grander achievements have been realized, in the course of the fifty years of our own lifetime than in all the previous lifetime of the race, since states, nations, politics, such as history makes us acquainted with, have had their being. In some points, no doubt, the opposite of this is true. In speculative philosophy, in poetry, in the arts of sculpture and painting, in the perfection and niceties of language, we can scarcely be said to have made any advance for upwards of two thousand years.

But in how many other equally significant anp valuable particulars has the progress of the world been not only concentrated into these latter days, but singularly spasmodic in its previous march.

Take two of the most remarkable inventions of all time, but of comparatively modern date,—gunpowder and printing. One is four, the other five centuries old. How infinitesimal the difference between the fire-arms of the year 1400 and the year 1800! The "Brown Bess," the field gun and the carronades with which Nelson and Wellington and Napoleon won their victories when we were young, were superior in little except readiness to the matchlocks and the cannon with which the Barons of the Middle Ages fought out their contest, as soon as they had discarded the bows and arrows which had sufficed for mankind from the days of Thermopylæ, and earlier, to the days of Agincourt, and later. But now contrast the progress since 1840 with the progress of the previous five hundred years. Compare the needle-gun of Sadowa, or the Chassepot rifle of Mentana, or the Enfield of our own troops, or even the Minié of Inkerman, with the common musket which the veteran pedants of the Duke of Wellington's army could scarcely be persuaded to discard. Compare the Armstrong, the Blakesley, or the Whitworth ordnance of to-day,—with their almost boundless calibre, their terrible projectiles, their marvellous precision, and their three-mile range,—with the round shot or shell fired from the field-pieces which battered Badajoz and St. Sebastian. It is probable that within fifty years from the first application of gunpowder to war, the destructive power of the fire-arms then invented was nearly as great as as those used in the reign of Napoleon. It is probable that we are now within far less than fifty years of the furtherest point to which the conditions of matter will permit that destructive power to be carried.

Then as to printing. The books printed within five-and-twenty years after the first use of movable types were as clear, as perfect, as beautiful specimens of typography as any that were produced five-and-twenty years ago. A little more rapidity and a great deal more cheapness make up, perhaps, the sum-total of the improvements in the typograpic art between the time of Caxton and the time of Spottiswoode. But within the memory of those still young, the wonderful art of rapid stereotyping has been introduced; and to this alone it is owing that newspapers are able to supply the demands of their hundred thousand readers.

But it is in the three momentous matters of light, locomotion, and communication, that the progress effected in this generation contrasts most surprisingly with the aggregate of the progress effected in all previous generations put together since the earliest dawn of authentic history. The lamps and torches which illuminated Belshazzar's feast were probably just as brilliant, and framed out of nearly the same materials, as those which shone upon the splendid *fetes* of Versailles when Marie Antoinette presided over them, or those of the Tuileries during the Imperial magnificence of the First Napoleon. Pine wood, oil, and perhaps wax, lighted the banquet-halls of the wealthiest nobles alike in the eighteenth century before Christ and in the eighteenth century after Christ.

Fifty years ago, that is, we burnt the same articles, and got about the same amount of light from them, as we did five thousand years ago. *Now* we use gas, of which each burner is equal to fifteen or twenty candles; and, when we wish for more, can have recourse to the electric light or analogous inventions, which are fifty fold more brilliant and far-reaching than even the best gas. The streets of cities, which from the days of Pharaoh to those of Voltaire were dim and gloomy, even were they not wholly unlighted, now blaze everywhere (except in London) with something of the brilliancy of moonlight. In a word, all the advance that has been made in these respects has been made since many of us were children. We *remember* light as it was in the days of Solomon, we *see* it as Drummond and Faraday have made it.

The same thing may be said of locomotion. Nimrod and Noah travelled just in the same way, and just at the same rate, as Thomas Assheton Smith and Mr. Coke of Norfolk. The chariots of the Olympic Games went just as fast as the chariots that conveyed our nobles to the Derby, "in our hot youth, when George the Third was King." When Abraham wanted to send a message to Lot, he despatched a man on horseback, who galloped twelve miles an hour. When our fathers wanted to send a message to their nephews, they could do no better, and go no quicker. When we were young, if we wished to travel from London to Edinburgh, we thought ourselves lucky if we could average eight miles an hour,—just as Robert Bruce might have done. *Now*, in our old age, we feel ourselves aggrieved if we do not average forty miles. Everything that has been done in this line since the world began—everything, perhaps, that the capacities of matter and the conditions of the human frame will ever allow to be done—has been done since we were boys. The same at sea. Probably, when the wind was favorable, Ulysses, who was a bold and skillful navigator, sailed as fast as a Dutch merchantman of the year 1800, nearly as fast at times as an American yacht or clipper of our fathers' day. *Now* we steam twelve and fifteen miles an hour with wonderful regularity, whether wind and tide be favorable or not; —nor is it likely that we shall ever be able to go much faster. But the progress in the means of communication is the most remarkable of all. In this respect Mr. Pitt was no better off than Pericles or Agamemnon. If Ruth had wished to write to Naomi, or David to send a word of love to Jonathan when he was a hundred miles away, they could not possibly have done it under twelve *hours*. Nor could we to our own friends thirty years ago. In 1867 the humblest citizen of Great Britain can send a message not a hundred miles, but a thousand, in twelve *minutes*.—*London Spectator*.

Building Eras in Religion.

The following is made up of short extracts from an article by Dr. Bushnell in *Hours at Home*. We regret that our space will not permit us to present the article in full.

The greatest buildings of the world are not palaces, or forums, or amphitheatres, but temples. Men do their greatest things for religion. Thus we have the vast temple-works of Central America, built by we know not whom, or for what god. The temple of Karnac, most stupendous of all structures—who was the god, and what the religion, we do not know. The Druids of England built the prodigious fence of their religion called Stonehenge, we know not when, and can only discover that there was force enough in their religion to build gigantically. The Incas of Peru and the Aztecs of Mexico, kept themselves in remembrance, chiefly by their temples of the Sun, and their altar pile of Cholula, though their religions themselves and their very gods are forgot. The Budhist cultus set up its grand masonries all over the East, in times so long gone by, that its people have now lost the measures of their ancestors, and cannot believe in them. The fanes of the Greeks and Romans, and of the later people of Islam, are familiarly known. So it is that every religion, above the rank of mere fetichism, is fated to become, at some time, a builder; matching its ideas and ideal inspirations by its masonries.

So it is to be with the ancient Jehovah religion. Nine whole centuries must pass, before the great building day arrives, but it will finally come. Down to that late time, there has never anything been built for the Jehovah worship, but a tent and a box. So long will it take for the great, everlasting ideas of the religion, to settle the roving or fugacious habit of the people, and make them want a temple. History grinds slowly even when it grinds for God. At the end of this long period Solomon takes the plans and supplies for the temple, and, for seven years and a half, the holy hill-top swarms with its many thousand workmen, even as the bees at their hive. The work is done, and the great building era of the Jew's religion is passed.

Descending now through twenty centuries, we come upon a second era, commonly regarded as the consummate building time of Christianity. I speak of the Cathedral age. Then went up the magnificent Minister of New York, the grandly studied pile of Antwerp, the gossamer web of Strasburg, the sublime incipiency of Cologne, the mountain peak of St. Steven's of Vienna, and the immortal beauty and unmatched miracle of St. Ouen; not to name well nigh a hundred other celebrated structures, all over Germany, Belgium, France, and England. David's temple may have cost more in the weight of the gold than they all—it probably did—but gold in that day was scarcely a precious metal in comparison. The architectural merit meantime of the temple must have been vastly inferior; because, apart from the courts, and the external breadth and magnificence added by their circumjection, it was a comparatively small structure.

What now shall we say? Do we stop here? After these two building eras, one under the old religion, the other under the new, is there to be no other? The architects will answer No; because the capacities and combinations of lines are now exhausted. The high-going ritualists will say No, because the cathedrals represent the ideal age of the Church and religion, beyond which nothing more advanced is possible. The plain people will say No, for humility's sake, imagining that all high building slurs the spiritualistics; not observing that our truest littleness consists, in doing our greatest thing for God. The last-days's people will say No, because the end is at hand, and there is no time left for any building era to come. Another class will say No, more argumentatively; alleging that a worship for the eyes, as in the lifting of the host before vast mutitudes of people, must give way henceforth to a preaching and hearing exercise, and accordingly that only small edifices will hereafter be wanted; such as may be called audience rooms and used as stands for preaching. Encountering, at the outset, so many kinds of negatives, we must consent, perhaps, to part company with a good many of our readers, in conceiving the possibility, or probable fact, of any building era more magnificent hereafter to appear.

Still great things are yet to be done here, and we must not too soon conclude that nothing is to appear transcending what is, or has been. There has never before been a time, we may see at a glance, when such vast assemblies could be gathered at single points as now, if there were any occasion for it. Our railroad circulations could hurl in, almost any day, on the great centres, a hundred or five hundred thousand people. We are going to have resources for building, if building is wanted, that have never yet been devoted to any such purpose. We have more wealth now in our roadways, measured in creative industry, than Solomon put into his temple, and it is not money spent as with him, but money invested for a larger production. And it will be strange, if resources so immensely great do not some time appear, in structures that, for magnitude and majesty, are unequalled.

And we need not be afraid lest the art of building should be found to have come to its limit. Supposing that no new forms and orders are ever to be added, any least inventive bigot of routine can see, that putting down a Greek cross for the centre, and drawing out the four limbs into four Latin crosses, a most perfect five-fold whole can be constructed of any conceivable extent. There is also a kind of

architectural effect proposed by Ezekiel, in his mystic temple, that has never yet been exhausted. It proposes a cutting into the walls of the structure, built immensely thick, of open corridors and open stairways, to be used in processions that shall be seen moving onward and back, and up and down, all over the structure, without and within, and making it alive with marching hosts of praise.

So far, we are looking at the ways and means and possibilities of another building age, or ages. Let us look here, for a moment, into what wants may be rising, to require it. After all, this cathedral age that we so commonly copy and praise, and sometimes idolize, is a great way off from being completely and genuinely Christian. The structure itself is called a cathedral, because the bishop is conceived to be sitting *in cathedra* there, as presiding in the functions of his spiritual lordship. Now it is not difficult to see, that something different from this, and more advanced, and built upon a larger scale, is yet to be demanded. We are to look, in particular, for something more nearly in the type of the Pentecost, and the new brotherly communion there displayed. In that great day which we think the Spirit is preparing, we can see, at a glance, that changes will be coming to pass that will demand great feasts and anthems of koinonial worship, such as our world-brotherhood has never yet imagined.

We have been split up, for example, by many thousand debates, trying to settle bases of unity by the settlement of opinions. But these notional points or entities breed, as we find, only sects and sub-divisions without end, and all our longings after the complete fellowship are disappointed. But when these nits of opinion are all hatched, these dissidences will wear out. We shall flow together, most likely, with an ardor of brotherhood now inconceivable. The roadways will be rivers of men, crowding downward on the centres of appointed fellowship, and the assemblies gathered will not be satisfied with anthems that are not as the waves of the sea.

Far be it from us to reflect, in the suggestions here offered, on the dignity of our common audience chambers, or preaching stands, called churches. Still father be it from us to stir up any puffy conceit; as if, in the building of these, we were doing something very magnificent, such as belongs to the last great day and final glory of our religion. We need, first of all, to understand that this is the day of small things, and not despise the day of small things because a greater is to come. Probably never, in the most advanced age of religion, will our small structures, called churches, be dispensed with.

And yet it cannot be less than immensely important, as we cast our eye forward, and take our auguries of the future, that we do not cram it with people and things in our own petty measures. As we expect a great future, so we must expect to have something great done in it. And I know not anything that will fire us with higher thoughts and tone our energies for a loftier key, than to see just what our prophets saw with so great triumph, glorious ages of building for God, such as never were beheld before; a city of God, or it may be many, complete in all grandeur and beauty, and representing fitly, the great ideas, and glorious populations, and high creative powers of a universal Christian age.

Books

Of all kinds, on all subjects, conveniently classified, occupy one-half of the first story and the entire second floor of BANCROFT'S BOOKSTORE.

Stationery

Of every description, including all kinds of Writing Papers, Envelopes, Inks, etc., is sold at wholesale and retail at BANCROFT'S.

The American Tract Society

Is represented, in both its New York and Boston branches, by a large stock of its publications, at BANCROFT & COMPANY'S, who are the general agents for this coast.

The Presbyterian Board of Education

Has a Depository of its Works at BANCROFT'S BOOKSTORE, which is their headquarters for the Pacific Coast.

Sunday School Libraries

In great variety, supplied at the lowest wholesale prices. A fin assortment to select from at the Book and Stationery House of

BANCROFT & COMPANY,
San Francisco, Cal.

Heuston, Hastings & Company,

ARE THE

FASHIONABLE CLOTHIERS

OF

SAN FRANCISCO.

SPECIALITIES.

PRICE AND GUARANTEE.

The largest and most varied stock of Gentlemen's Clothing, Furnishing Goods, Trunks, Bags and Valises, on the Pacific Coast. Every article sold, being of our own manufacture, is guaranteed Having contracts direct with European and American Manufacturers of piece goods, we thereby effect a saving of fully 50 per cent. in wholesale dealers' profits, and are thus able to offer superior Goods at less than second-rate prices.

STYLES.

Having agents in London and Paris, we introduce the new styles in San Francisco simultaneously with their appearance in New York.

The Midnight Train.

As I lay awake in the night,
And heard the pattering rain,
Faintly I caught the rumbling sound
Of the coming midnight train.

The world was murky and still,
The air was loaded with damp,
And on the folds of the mist it came,
The noise of the iron tramp;—

Plunging through darkness and fog;
Screaming its signals before;
Searching the night with its eye of flame,
And filling the earth with its roar.

I knew all the track, and could tell,
By the sinking and swell of the sound,
When it darted through woods, or toiled up a grade,
Or leaped o'er a bridge at a bound.

Now the sound floated free on the air;
Now it died round the curve of a hill;
Now lost to the ear in the deep rocky pass;
But the mad thing was rushing on still;—

Plunging through blackness and mist;
Sending wild 'larums before;
Howling like demon of darkness let loose
From Acheron's fiery shore.

And now all the windings are passed,
And out it comes to the plain,
Shaking the earth as it tears along
Through midnight blackness and rain.

O that some forest chief,
From his ancient woodland nest,
Might peer through the night, and catch the wild sight
Of this monster troubling his rest.

Nearer and nearer it comes,
Louder the crash and the roar,
Bearing its precious load of life,
Two hundred souls and more.

Many their errands be—
Some journey for traffic and gain—
Some go to the gloomy chambers of death,
And some to the bridal train.

Here are eyes heavy with sleep,
Here bright with the light of love,
In joy and in tears, with hopes and with fears,
On through the darkness they move.

And now it goes by at a leap,
Wild the weird flashes it throws!
Out of thick darkness it comes in its flight,
And into thick darkness it goes.

Plunging through blackness and fog;
Sending loud signals before;
Searching the night with its eye of flame,
And filling the earth with its roar.

—*Presbyterian.*

Three Old Saws.

If the world seems cold to you,
Kindle fires to warm it!
Let their comfort hide from view
Winters that deform it.
Hearts as frozen as your own
To that radiance gather;
You will soon forget to moan,
"Ah! the cheerless weather!"

If the world's a wilderness,
Go build houses in it!
Will it help your loneliness,
On the winds to din it!
Raise a hut, however slight;
Weeds and brambles smother;
And to the roof and meal invite
Some forlorner brother.

If the world's a vale of tears,
Smile till rainbows span it!
Breathe the love that life endears,
Clear from clouds to fan it.
Of your gladness lend a gleam
Unto souls that shiver;
Show them how dark sorrow's stream
Blends with Hope's bright river.

—*Evangelist.*

Fenelon.

Fenelon, although a French Catholic, was one of the most pious of men, and a faithful, prudent, and devoted pastor. The following is an instructive incident:

The amiable disposition and high spiritual attainment of Fenelon made him, in his day, the most beloved man in France, and his name, even now, is tenderly spoken, and falls sweetly on the ear. Although he was an educator of princes, no man could be more susceptible to the sorrows of the poor. On receiving the intelligence of the burning of the archiepiscopal palace at Cambria, and the consequent destruction of his rich libraries, he thoughtfully observed that it was better all these should be burned than the cottage of one poor family.

Some of the best years of his life had been passed amid the splendor of the palace of Versailles; he had been on familiar terms with the king, and intimate with statesmen and nobles; he had possessed a dukedom, and was Archbishop of the conspicuous diocese of Cambria, yet his favorite and heart-felt motto was *Ama Nesciri*—love to be unknown. He had enemies, for he received with favor the opinions of the French Quietists, and believed in an experimental union of the soul with God. But the beauty and loveliness of his character softened the asperity even of his foes. "I know not," said a famous writer, "whether Fenelon was a heretic for asserting that God ought to be loved for Himself, but I know that Fenelon deserved to be loved."

After his retirement from the Court to the diocese of Cambria, he performed the duties of Archbishop with great fidelity and simplicity. His own soul was completely immersed in the love of God, and he felt an unwonted fervor for the welfare of others. He was constantly employed in promoting the happiness of the people of his spiritual charge, and in alleviating the burdens of the poor.

In one of his frequent journeys among the people of his diocese, he once met a peasant in great stress of mind. Fenelon, with his usual feeling, inquired the cause of the trouble. The peasant replied that he had lost his cow. Fenelon endeavored to comfort him, and, as a proof of his sympathy, gave him the money to purchase another. The man received the gift thankfully, but was still sad, for he was much attached to the animal he had lost. The heart of Fenelon was touched by the circumstance, for the creature was probably one of the few things in which the simple peasant took pride. The archbishop continued his journey until evening, when he chanced to meet the missing animal. It was a long way back, and the night was growing dark, but the good man retraced his steps, driving the cow, until he reached the peasant's cottage. The poor man was delighted, not only at recovering the lost treasurs, but by the reflection that, in the wide, wide world there was one person who was truly his friend.

Let the young minister who would be beloved and successful, learn a lesson from this simple incident. Jesus washed His disciple's feet, and the servant is not above his Lord.

Isn't it Worse for a Man, Father?

It is two years since I left off the use of tobacco. I only chewed a little, but I did enjoy my cigar. I prided on my fine Havana, and might have been seen almost any morning with a cigar in my month, walking down Broadway in a most comfortable manner.

The way it happened I left off was this: I had a little son about six years of age. He almost always hurried to be ready to walk down with me as far as the school. His bright face and extended hand were always welcome, and he bounded along beside me, chatting as such dear little fellows only can.

The city has in it many dirty uncared-for boys, whose chief delight seems to be to pick up pieces of discarded cigars and broken pieces of pipe, and with their hands in their pockets, puff away in a very inelegant manner.

One morning it seemed as if little Edgar and I met a great many of these juvenile smokers. I became very much disgusted, and pointed them out to little Edgar as awful warnings of youthful delinquency, talked quite largely, and said the city authorities ought to interfere and break it up.

A little voice, soft and musical, came up to me as I gave an extra puff from my superb Havana. His bright little face was upturned and these words came to my ear:

"Isn't it worse for a man, father?"

I looked down at the little fellow by my side, when his timid eye fell, and the color mounted to his boyish cheek, as if he had said something bold and unfitting.

"Do you think it worse for a man, Edgar?" I asked.

"Please, father, boys would not want to smoke and chew tobacco, if men did not do it?"

Here was the answer. I threw away my cigar, and have never touched tobacco in any form.—*California Christian Advocate.*

God's Time.

"Doomed to disappointment, as usual."

"Don't say 'as usual,'" a soft voice replied. "You sometimes are wonderfully prospered."

"Yes, I say *as usual*," was the quick and angry response. I find the path blocked up whichever way I turn; try hard as I may, something or other upsets all my plans. I might as well give up one time as another."

"Perhaps, it isn't the right time," said the soft voice again, "may-be God would prove you before he blesses you; perhaps he sees that you are not prepared for prosperity. We must take the blessings thankfully as they come, John, and the disappointments, too, as a part of His loving discipline. Everything comes best in God's time.

Yes, joy or sorrow, sunshine or cloud, plenty or poverty, all come in "God's time." However much our efforts may bring to us, it is well to remember that God alone orders our success or our failure.

"God's time"—the best time we shall always find it to be, if we but look for His guiding and wait on Him. Disappointments, viewed and received aright, may prove the richest blessings.

"God's time"—not that we must idly wait for the sun of prosperity to shine upon us, but humbly, earnestly, faithfully do each duty as it arises, leaving the rest with God. His time will bring us gladness and prosperity, if He sees it for our good. Thus trusting, we shall always "be glad in the Lord," even "though the earth be removed, and though the mountains be carried into the midst of the sea; though the waters thereof roar and be troubled, though the mountains shake with the swelling thereof."—*American Messenger.*

Simply Believe.

Let me entreat you to look to the word of God's testimony, and think not that any thing else than a simple acception of these words, 'that the blood of Christ cleanseth from all sin,' is necessary for the purpose of your being cleansed from sin. It is the idea that something more is necessary, which obstructs this reception. It is the imagination of a great personal work to which you must set yourself, and in which you have hitherto sat down in listlessness and despair, that keeps you from God. He approaches you with overtures; and what you have to do is to close with them. He approaches you with tidings; and what you have to do is to give credit to them. This is doing the work of God, that you believe on Him whom he hath sent; and could this transition be accomplished, then would you be translated into a habit of cheerful and progressive obedience, which, in a way of legalism, or in an attempt to establish a righteousness of your own, you never can attain.—*Dr. Chalmers.*

A Beautiful Incident.

A naval officer being at sea in a dreadful storm, his lady, who was sitting in the cabin near him, and filled with alarm for the safety of the vessel, was so surprised at his composure and serenity that she cried out—

"My dear, are you not afraid? How is it that you can be calm in such a dreadful storm?"

He rose from his chair lashed to the deck, supporting himself by a pillar of the bed-place, drew his sword, and pointing to the breast of his wife, exclaimed—

"Are you not afraid?"

She instantly answered, "No.'

"Why?" said the officer,

"Because," rejoined the lady, "I know that this sword is in the hands of my husband, and he loves me too well to hurt me."

"Then," said he, "remember, I know whom I believe, and that he holds the winds in his fists, and the water in the hollow of his hands."—*Presbyterian.*

Our Chart.

If you would know whether the Bible be true in its teachings, you must do by it as you do by a chart. A chart is nothing but a piece of paper, and what good would it do for half a dozen captains to sit down on shore and discuss its merits? How can they know whether its descriptions are correct or not? Let them take it on board and prove it by sailing by it. That is a true chart on trial. If there is a rock where it says "rock;" if there is a shoal where it says "shoal;" if there is a current where it says "current;" if it is safe where it says "safe," then it is a true chart, no matter who made it, or how, or when, or where it was made.

It is the sea that is the best test of a chart, so is the human life the test of the Bible. Take God's word, in which human life is charted down, and measure character and conduct by it; measure your whole self by it, and see if it is not true. Would you know the truth of the Bible? Become a Christian. "If any man will will do my will," says Christ, "he shall know of the doctrine which I teach, whether it be of God."—*Selected.*

Young Folks.

The Beginning of Evil.

It was such a *little* thing,—
One slight twist of a crimson string;
But 'twas stealing all the same;
And the child who took it knew
That she told what was not true,
Just to screen herself from blame.
First a theft and then a lie,—
Both recorded up on high.

It was but a *little* sip,
Just a taste upon the lip;
But it left a longing there;
Then the measure larger grew,
And the habit strengthened too,
Till it would no curbing bear;
So the demon *Drink* decoys;
Soul and body both destroys.
It was but one *little* word,
Softly spoken, scarcely heard,
Uttered by a single breath;
But it dared to take in vain
God's most high and holy name.
So provoking wrath and death.
Soon the lips, once fresh and fair,
Opened but to curse and swear.

It was but one *little* blow—
Passion's sudden overflow,—
Scarsely heeded in its fall:
But once loosed, the fiery soul
Would no longer brook control;
Laws it spurned, defied them all,
Till the hands, love clasped in vain,
Wore the murderer's crimson stain.

Ah! it is the foxes small,
Slyly climbing o'er the wall,
That destroy the tender vines;
And it is the spark of fire,
Brightening, growing, curling higher,
That across a forest shines;
Just so, step by step, does sin,
If unchecked, a triumph win.

—*Southern Churchman.*

That's the Place.

There was a queer old gentleman at the academy on examination day. The Trustees seemed to think a great deal of him, and treated him with much respect; but the boys felt rather uneasy as his sharp gray eyes looked searchingly at each one of them, and they saw that he was listening carefully to their answers.

"I do wonder who that old chap is!" exclaimed Charley Vane, after the exercises were over and they were preparing to go home. "I declare he frightened me so I don't think I could have told the points of the compass, if he had asked me."

Harry Brown laughed. He did not look frightened; he had done his part well that day, and many admiring glances had rested on the boy who was called the best scholar.

The strange old gentleman was standing with one of the school officers in the play-ground as Harry passed out, with several other boys.

"Harry," said Mr. Raymond, stopping him, "I think this gentleman has left his cane in the hall up stairs. Will you look for it?"

"Certainly, sir!" and Harry went quickly up to school-room again, and returning with the cane, presented it to the gentleman with a polite bow.

"That's a fine boy," remarked Mr. Raymond, as Harry passed on towards the gate; "he is one of the boys we are proud of."

The old gentleman was following Harry with those stern, gray eyes. Just as the boys reached the gate, a young girl from the female department of the school was going out, and trying to open it, dropped one of her books. The other boys paid no attention, but Harry stepped forward, held open the gate, and picked up the book, handing it to her, with a pleasant remark. At that moment a carriage, containing several ladies, drove up. As they looked at Harry, he recognized them, and raised his cap from his head, with a graceful bow.

The old gentleman saw it all; but when Mr. Raymond said, in a pleasant way, "How few boys have such good manners!" he only replied,

"It's all very well; but let me see that boy at home; that's the place! Let me see him with his mother and sisters, and then I can judge of his good manners. If you want to know a boy's true character, see him at home; that's the place!"

The old gentleman brought down his cane with emphasis at these last words, and Mr. Raymond seemed rather disappointed that he did not appreciate more the "model boy" of their school.

But I think the old gentleman was right when he said "that's the place." Suppose we look into Harry Brown's home, and see how he appeared there that same evening.

He went into the room where his mother and sisters sat at their sewing. He threw his cap carelessly down on the table; he did not even say good afternoon, as he took it off. Perhaps he forgot it, or else he did not think it worth while—only his mother and sisters, you know.

"Well, Harry, did your examination pass off successfully?"

"Oh, yes, first-rate!"

Harry might have told the particulars of the examination, to interest his mother and sisters, as they had been unable to attend it; but he did not seem to think it necessary. He began to look around for a seat. Somehow the ladies' work had become scattered about on the different chairs, and it offended Harry's feeling.

"For pity's sake, can't you give a fellow a chair to sit on?"

Sister Ellen began to move her work. "Here is one," she said.

As Harry took the chair, a spool of cotton fell and rolled away. He did not pick it up, but sat down and opened one of his books. Surely, that did not seem like the boy who had so politely held open the gate and picked up the book for a young miss, half an hour before; but it was only Harry's sister this time, and perhaps he thought it foolish to be polite to *her*.

When Harry's father came home and asked him to look into the library for a magazine which had been left there, Harry did not do it with that "Certainly, sir," and that bright look which had so pleased Mr. Raymond in the afternoon, and which would have pleased his father still more, and helped to make home happy.

At the tea-table Harry did not think of those little acts of politeness which he would not have forgotten had he been taking tea with Mr. Raymond or the strange old gentleman, instead of *only at home.* He said, "Here, take it!" when Ellen did not see that he was holding the butter-plate towards her. And he neglected the little "please," and the "thank you," which are such necessary parts of politeness at all times.

Then, when Harry went to bed, he did not think it worth while to say, "good night," though he had been very careful to say a polite "good afternoon," before leaving school that day. In truth, Harry's good manners had been kept for those outside of his own home.

And that strange old gentleman knew how many boys had this fault. So, in a few years, when he wanted a book-keeper for his counting-house from the graduates at the academy, he would not select one until he had visited several at their homes, and become acquainted with their manners there. Then—to the surprise of all the school—he did not choose Harry Brown; "For," said he, "I don't want any boy about me who can't be polite to his mother and sister."

Boys, how many of you are like Harry? Some of you are, I know. Then bear in mind the words of the strange old gentleman: "Let me see that boy at home; that's the place!"

Do not think that home is the place where you can throw off all politeness, and be as careless and rough as you please. If there is a place on earth where you should wear your good manners, and be kind and polite, that's the place. If there are any persons to whom you should give your most polite words and kind attentions, those persons are your father, mother, and sister. Will you give more respect and attention to those outside than to the dear ones at home? Will you be praised for good manners by strangers, and cause those at home to think you rude and thoughtless? It will make your homes much more happy and pleasant, if you would wear your best manners always there. Do not omit any act of politeness there which you would perform elsewhere. Do not be ashamed to be polite at home; that is the best place in the world to you; that is the place where your best friends are; that is the place where your true character will appear; therefore, remember to cultivate politeness at home.—*Christian Instructor.*

Silence is the best course for any man to adopt who distrusts himself.

It requires greater virtues to support good than bad fortune.

Neither the sun nor death can be looked at steadily.

News Summary.

PACIFIC COAST ITEMS.

The *Commercial Herald*, in a long leader, written as a reply to a paragraph which recently appeared in The Occident, accuses us of going beyond our province as a religious paper to advise the people concerning what we consider their best interests in disposing of their grain. We advised farmers not to be scared by the representations of speculators into selling their wheat at a low price. This advice, though not in accordance with that given by the *Herald*, is sound, and we repeat it. Our figures we took from the *Sacramento Union*, a paper which, as it is published in the interests of the *people*, we then regarded, and still regard, as good authority in such matters.

The Board of Health, aroused by the statements of the city press, or by the stings of its own conscience, seems to have partially made up its mind to attend to its duties in relation to the small-pox. 21 physicians have been appointed to the work of vaccinating the people, and it is hoped that some of the regulations for preventing the spread of the disease will be enforced. Compulsory vaccination has been proposed, but it is not probable that so outrageous a proposition will be adopted.

A very disastrous fire, on Saturday last, consumed over 60 houses in the town of San Andreas. Loss estimated at $75,000. In Petaluma, on the 25th ult., the American hotel, the principal hotel in the city, was nearly destroyed by fire, together with several adjoining buildings. The loss to different parties was heavy, but much of it was covered by insurance. A hotel was also burned in Folsom on Sunday.

We take the following distances on the Western Pacific Railroad from a table furnished by the correspondent of the *Bulletin:* From San Francisco to Oakland, 6 miles; to Haywood, 19 miles; to Livermore Pass, 49 miles; to Stockton, 79 miles; to Woodbridge, 92 miles; to Sacramento, 124 miles.

Up Cook's Inlet they catch salmon, five of which will fill a barrel. No country in the world can equal Alaska for fine fisheries. Here, in Sitka, for the last four months, it has not cost any one a cent for fish, as they can go down to the fish-house every day and get all the fresh salmon they wish to take away.—*Cor. of Oregonian.*

The Assessor of Los Angeles County reports, among other items for 1867, 10 acres of peanuts, yielding 10,000 pounds; 113 acres of castor beans, yielding 169,000 pounds; 15 acres of tobacco, yielding 8,250 pounds; and four acres cotton, yielding 500 pounds.

Passengers can now go by cars from Sacramento to Winnemucca, Nev., a distance of 324 miles. They change cars at Wadsworth, the terminus of the first division, 135 miles west of Winnemucca. It takes 24 hours to make the trip.

The Teachers' Institute of Alameda will meet at Oakland, October 13th. That of Butte and Plumas at Oroville, same date. That of San Joaquin at Stockton, October 20th, and that of El Dorado at Placerville, October 27th.

The bar of rock at the entrance of the Dry Dock at Hunter's Point, has been removed by submarine blasting during the past week, and it is thought that in a few days the dock will be ready for use.

The Grand Lodge of the order of Odd Fellows in the United States will hold its next annual session in San Francisco, the members on this coast paying the expenses of delegates from Omaha.

The Ninth Annual Session of the order of Good Templars in the State of California has been held in Sacramento during the past week. Delegates were present from all parts of the State.

After October 1st, printed matter, newspapers, etc., on which it has been necessary to pay letter postage, will be forwarded by the overland route at the usual rates on other routes.

A New Employment for Steamboats.—The little steamer recently launched on Washoe Lake is used by sportsmen for chasing ducks.

It has been estimated that the sum spent at the bars of this State in a year amounts to $5 for each inhabitant.

To come overland from New York to San Francisco costs $280 in gold. Meals extra at $1 50 each.

The courts throughout the State are doing a large business in the way of naturalizing foreigners.

99 locomotives are in use on the Union Pacific Railroad, and 127 more have been ordered.

It is proposed to form a new county from the counties of Los Angeles and San Bernardino.

A horse-railroad is used to carry waste dirt from the mines at Gold Hill, Nev.

A large force of men is at work on the railroad from Petaluma to Santa Rosa.

Gilroy expresses a willingness to be county seat of Santa Clara County.

They have a medical school at Salem, Oregon.

TELEGRAPHIC.

Eastern.—The President has promised to send a force to Alabama to protect law-abiding citizens....A fire in Buffalo, N. Y., on September 28th, destroyed $150,000 worth of property....State fairs were held last week in Wisconsin, Iowa, Indiana, Minnesota and Kansas....It is now thought that the trial of Jefferson Davis will take place in Richmond in October....Several men were killed at Pittsburg on the 29th ult., by the explosion of a locomotive....A train of ten cars was destroyed by a nitro-glycerine explosion on the Atlantic and Great Western Railroad, on the 29th ult....A mob of rioters from a fishing fleet lately took possession of Portsmouth, N. H., but were conquered by the police after a hard fight.

Southern.—Latest news from Camilla shows that the recent attack on the negroes by the rebels was wholly without provocation. 31 negroes were killed and wounded....The Republican candidate for Mayor of Nashville was elected by 500 majority....More riots are threatened in New Orleans. ....A Bill to organize the Militia of Georgia was defeated in both houses. The Legislature will adjourn October 6th. ....The Governor of Louisiana is bitterly denounced by the Legislature, for having vetoed the Negro Equality Bill....A Republican Convention was broken up by armed forces, at Warrenton, Georgia....A line of steamers is to be established between Charleston, S. C., and Liverpool.

Personal.—Dr. J. W. McDowell, an eminent surgeon, died in St. Louis, Mo., on the 25th ult., aged 62....Reverdy Johnson is making speeches in England, which some sensible people do not hesitate to call silly...Ex-President Pierce is again very sick, and is not expected to recover....Rev. Henry Milman, D.D., Dean of St. Paul's Cathedral, London, a somewhat eminent divine and author, died September 24th, aged 77....Stanton is working for Grant in Ohio. He calls him the greatest general in the world....Gen. Butler has been nominated for Congress in the 15th Massachusetts District....Count Walewski, said to be a son of Napoleon I, died September 27th, aged 58.... Geo. B. McClellan, formerly a General in the Union Army, has arrived in New York from Europe.

The Indian War.—A detachment of U. S. soldiers encamped on the Dry Fork of the Republican River, was attacked on the 17th ult. Two officers and two soldiers were killed, and the commander, Col. Forsythe, badly wounded. Twenty soldiers were also wounded. 80 Indians were killed. ....General Sully has badly defeated the Indians in Texas....Gen. Sherman will issue arms and ammunition to the frontier settlers.

Foreign.—It is reported that the Grand Duchy of Baden has acceded to the North German Confederation....War is still predicted in Europe—about what no one seems to know....The French Government has given its official sanction to to the project of laying a telegraphic cable between France and America....The Fenians in Ireland are said to support the Tory candidates for Parliament....Pinard, Minister of the Interior, has forbidden the Spanish to pass through France, on their way to Spain....The Allied troops in possession of Humaita were blown up by a mine. A truce has been agreed upon....The Republic of Colombia has paid the United States $238,000 for damage done in the riots a few years ago.

The Spanish Revolution.—The revolution is daily gaining ground....Only small and unreliable portions of the army remain faithful to the Government....The entire navy has joined the insurgents....Queen Isabella is said to have abdicated the throne, in favor of her son....The Royal army at last accounts, was completely surrounded by the rebels and has probably been conquered and captured....General Prim is at the head of 100,000 insurgents....A statue of the Queen has been dragged through the streets of Madrid. ....The rebels are marching unopposed on the Capital.... A provincial Government has been formed.

SPECIAL NOTICE.

Webster's Unabridged Dictionary—Illustrated Edition.—No pains or labor could have been spared in making this edition what it is. We think this work, now, is all that we can expect in a dictionary. We give it our *unqualified commendation*, and hope to see a copy of it in every school-district, and in every editor's room, and in every family in Pennsylvania.—*Presbyterian Standard.*

CURRENT TOPICS.

Everywhere men are becoming thoroughly awakened to the importance of the Pacific Coast and its brilliant prospects of wealth and population. With this awakening comes naturally a fuller realization of our want of facilities for the spread of the Gospel. The harvest is large. We want laborers. There are many places where churches ought to be established. Yet we cannot take possession of these fields for want of men. Men cannot be had—partly because our condition and prospects are not fully understood in the East, but chiefly because it has been the case in the past, is now, to a great extent, and will be for several years to come, that many of the most promising fields of labor will not support a preacher, at least not permanently. They are new towns, in which public sentiment is changeable, and the people act spasmodically in support of the Gospel. They do great things one year; nothing the next. It is true this state of things will last but a few years. What to do in the meantime? There is a class of ministers in the East who could help us and at the same time do a good thing for themselves, if they knew it. They are in comfortable circumstances. They frequently hear of the wonderful advantages of our coast. They don't believe half they hear, but would like to see for themselves, could they afford the trip, what foundation exists for the boasts we lavish so freely on the outside world. Now is a favorable time for them to gratify their curiosity and do much good. Let them come and spend a year or two with us. We need their services. Rates of passage are low. There are localities where their services would be welcome and in part paid for. If, after a time, they leave us, they will carry back a fresh stock of enthusiasm, and new ideas of the magnitude of our noble country, which will well repay them for their visit. If, as is probable, they find it impossible to leave our hospitable shores, so much the better. They might stay at home and fare worse.

For several months past, the small-pox has prevailed in our State. In our city its ravages have been fearful. Those of our citizens who are wise are urged by prudence, the timid by fear, and all by the oft-repeated warnings of the press, to adopt precautionary measures against this loathsome disease. It is well that people should be alarmed. We should use all the precautions within our reach. Medical science, sanitary laws and regulations, if accompanied by the blessing of God, will accomplish much. Christians of ancient times had not a sufficient knowledge of science to enable them to adopt the regulations that prove so useful to us. They had however the same God, and when they were afflicted with pestilence and famine, they regarded them as sent by God, and from Him, with fasting and prayer they sought relief. In very many cases, if we credit the Scripture, their requests were heard and granted. Why do we not adopt the same course? In what respect do our relations with the Creator differ from those of the Christians of olden time? Are we more independent of His aid? Is he less or more willing to help us? Does our wonderful progress in worldly wisdom warrant us in expecting unsought relief? Is the world correct in its statement that we dare not ask a specific blessing because we have no faith that it will be granted? These thoughts are suggested by the remark of a friend that she has been present at divine service in several of our city churches, has listened to eloquent discourses and prayers on all sorts of subjects from the "Pacific Railroad" to "Paul's cloak," but has heard not a word concerning the scourge which is weighing so heavily upon us. This lady has not however, visited all the churches. Perhaps in some, special attention has been given to this matter. Why should this not be true of all?

Within the space of about two weeks the Annual Conference of the Methodist Church, the Association of the Congregational Church, and both the Synods of the Presbyterian Church of the Pacific Coast will have held their sessions. It could not be that these ecclesiastical bodies would meet at a time when the country represented in them has reached the most important crisis of its history, and not devise measures to answer, in some degree at least, the solemn demands it makes upon the Church. All of them have given evidence that they are aware of the pressure which cannot be turned aside without sin. In the Methodist Conference, the Home Missionary question awakened an enthusiasm that was unusual, even in that Church, which has ever made this portion of Christian labor a specialty. In the Synods there was a degree of zeal in respect to the spiritual wants of our population that promises greatly increased efficiency in this work. And our Congregational brethren, who have manifested a most commendable appreciation of its importance for two or three years past, seemed resolved to add to the vigor with which they have been maintaining Domestic Missions, while they are specially engaged in providing a Theological Seminary and other agencies for the supply of men and means for this service. This common purpose to be enlarged in Christian labors and usefulness, this real and practical union in spirit and object, though each denomination chooses to strive for it in the way it deems most effective, must be productive of great good. The coming year will be marked, as no preceding year has been, by the progress of religion, and by the wisdom which forestals evil in places that are to spring up as by magic, by the early introduction of those influences in the midst of which it cannot flourish. Let us be ever ready thus "to provoke each other to love and good works."

Appeals for money in support of the various agencies of the Church are so frequent that direct responses are hardly to be expected in all cases, yet when they come they are very pleasing evidence that it is not vain to call attention of our people to these means of doing good. It is too often presumed that all who would contribute to the benevolent funds, the names of which are mentioned from time to time in our papers, are informed respecting their purpose and wants. Sometimes we have complaints from those who are of this opinion, because we publish so much upon these subjects, since they are familiar. Occasionally, however, we receive grateful proof that even "line upon line," by way of informing those who read, and stirring up their minds to remember what they know, will not be wasted. Thanks are expressed for the knowledge thus communicated, and, more rarely, money is sent to the treasuries whose necessities are presented. Our allusion to the Fund for Disabled Ministers in our Church, in The Occident a short time since, was read by a gentleman who was not aware that any such attempt was made to relieve the feeble and aged servants of our Lord who can no longer preach His gospel, and he forwarded fifty dollars to be applied to so sacred a use, with a request that more may be told him about the manner of distributing the Fund, that he may give more. Genuine love for the Master and for all who are called by His name, has beautiful illustration in such instances, and were more pains taken to interest our people in the noble plans of the Church for the relief and salvation of men, these plans would be more thoroughly executed. Here is one advantage of a religious paper—of a church organ, in some sense, that goes out every week, freighted with information, and instruction, and encouragement, for a multitude who will receive these gladly.

Whatever view may be taken of the facts, it cannot be doubted that the manner in which "The Wickedest Man" in New York has been published in the papers of that city, and the religious notoriety that has been given him, have been unfortunate in their effect. If he is really converted, no advantage can arise from such heralding of all the details. If he was too cunning for the good men who have made him famous, and has used them as a means of advertisement which would have been impossible without their aid, nothing but evil can be the result. We should strive to bring even the "wickedest" under the power of the Gospel, and be discouraged from no attempt at their salvation; but if we succeed, let their works praise them, and grace will have all the more honor, while humility will be likely

to be cultivated in the hearts where depravity reigned.

Religious Intelligence.

PACIFIC COAST.

Methodist.—From the *Pacific Christian Advocate* we take the following statistics concerning the Oregon Conference, which includes Oregon and Washington Territory: The whole number of members is 3,416. Preachers 68. Increase in membership during the year, 225. Number of church buildings, 45. Amount of collections for all purposes, $1,700. Sunday Schools 83. Scholars, 3, 959. Average salaries of preachers, $760, of which the preachers pay $154. The Church is reported to be in a flourishing condition.

Reunion.—We understand that the Presbytery of Benicia, which recently met at Two Rocks, voted by a large majority against union with the New School Presbyterians on the proposed basis, expressing, however, by resolution, its willingness to unite on some more acceptable basis. The Presbytery of Stockton voted strongly in favor of the basis of union as submitted by the Assemblies. We regret that no account of the proceedings of these Presbyteries has been sent to us for publication.

Sunday Schools.—A Sunday School Convention was held in the Methodist church at Grass Valley last week. Addresses were made by Rev. Messrs. Wills, Martin, and Parker, and by Mr. Peters. The address of the latter gentleman, according to the *National*, was very interesting, and was listened to by the children with marked attention. An interesting feature of the exercises was singing by the children. The Convention, next year, is to be held in Nevada City.

Arizona.—It is said that there is only one Protestant preacher in Arizona. A flourishing Sabbath School is sustained at Prescott, and in the absence of regular preaching, several gentlemen of the city have agreed to read in turn sermons and moral essays. Judge Turner commenced the good work on a recent Sabbath, by reading a sermon. On another Sabbath, Rev. Dr. Humphrey of Louisville, Ky., preached. The meetings are held in the Court House.

San Jose.—The recent Fair given by the ladies of the Presbyterian Society was well attended, and netted $585 70. This was accomplished, says the *News*, "without the aid of 'lotteries,' 'post-offices,' or other pious frauds usually resorted to to raise the wind for pious purposes."

The San Francisco Baptist Association holds its 19th anniversary at San Jose, commencing to-day.

The German M. E. Church have filed a certificate of incorporation.

Detained.—We are sorry to learn that Rev. Mr. Carrington and his wife, who were to have sailed on the *Great Republic* on Saturday last, as missionaries of the Presbyterian Board in China, were unable to leave by that steamer. Mrs. Carrington was taken suddenly ill, so that her physicians considered it unsafe for them to sail. She is recovering, and their delay will probably be only till the ship of next month.

Santa Cruz.—The "Orphan's Fair" recently held in this place was highly successful. The proceeds were $800.

Baptist.—A meeting of the Baptist ministers of this city and those from the country who may chance to be present, is held every Monday evening, in the First Church.

The next meeting of the Baptist Association, is to be held at Napa. Rev. H. H. Rhees will preach the introductory sermon.

During the last 2 years 70 members have been added to the Baptist church at Salem, Oregon.

Episcopal.—A parish of the Protestant Episcopal Church has been organized at Santa Clara under the name of "The Free Church of the Holy Savior." A lot is to be purchased and a building erected.

A new bell weighing 1,020 pounds has been put in the tower of the church at Marysville.

Accident.—During the services in the Presbyterian church at Brooklyn, on a recent Sabbath, the chandelier fell, and the globe breaking, the oil caught fire. By prompt exertions, the flames were smothered before any serious damage was done.

Revival.—At the late State Camp Meeting of the Christian Church, held near Stockton, Elder McCorkle presided. He informs the *Gazette* that 51 new members were added to the Church during the continuance of the meeting.

Young Men's Christian Association.—At the close of the sermon in the First Presbyterian Church of Portland, Oregon, recently, a collection was taken for this Association. Over $100 were contributed.

Amador.—Three persons were added to the Presbyterian church in Amador, of which Rev. H. H. Dobbins is Stated Supply, at the last communion service, Sept. 26.

Howard Presbyterian Church.—Twenty persons united with this church last Sunday.

SYNOD OF THE PACIFIC.

The Synod of the Pacific met in Calvary Church, San Francisco, on Thursday, October 1st, at 7½ P.M., and was opened with a sermon by the retiring moderator, the Rev. Jas. S. McDonald of Sacramento, from Acts, 8: 35. "Then Philip opened his mouth, and began at the same Scripture, and preached unto him Jesus."

Including those who arrived at a later date, there were in attendance 28 ministers, and 7 ruling elders.

The Rev. J. G. Fackler was chosen Moderator, and the Rev. H. H. Dobbins, Temporary Clerk.

The first half hour of each morning session was spent in devotional exercises.

Various ministers of other ecclesiastical bodies were present, and were cordially invited to seats as corresponding members. The subject of

DOMESTIC MISSIONS

occupied a large share of the attention of Synod. Its action was as follows:

1st. The adoption of the report of the standing committee on Domestic Missions, viz:

The subject of Missions within our bounds is one of vast importance, and justly claims the most serious attention of this Synod.

The extent, character, and rapid development of the field under the care of this Synod; the power and boldness of infidelity in its various forms; the noble spirit of energy and enterprise evinced by other denominations, Congregational, Episcopal, Methodist and Baptist; the position of our Church on this coast; its real and great power for all work; the prospect for speedy union with the New School, augmenting the power of both, simplifying, economizing, and doubling the effectiveness of all our agencies; our lamentable failures heretofore, notwithstanding many efforts to supply the wastes with the ordinances and preaching of the Word, to extend and build up our Church throughout the entire field—failures not only lamentable, but disgraceful, and surely discouraging, considering the strength of our Church, and the success of other churches; are points, on which the committee feel that much might be said, and on which they would say much, if that could accomplish the work.

The committee have had no opportunity for conference on this subject. What is now proposed is simply the suggestion of the chairman and one member of the committee, and the suggestion is made with diffidence.

It is that this Synod adopt measures for securing a competent agent or evangelist, whose work it shall be to visit all parts of our field; to preach the Word to the destitute; prepare the way for the organization of churches; when possible, to secure supplies for fields vacant and promising; and, in connection with this work, to promote the circulation of our paper, and the educational interests of our Church.

It is believed that a man of experience, energy, and prudence, fully supported by Synod, and giving his whole strength and time to this work, would inaugurate a new era in the history of the Presbyterian Church on this coast. It is believed that such a man, so aided and employed, would raise the most, if not all, of his support in collections from the churches and fields visited by him; while the deficiency, more or less, if there should be any, would be more than made up in the support of our great enterprises, particularly of the paper and the College.

The first, and the main thing is to find the man; the second to provide for his support.

2. A committee consisting of Dr. Eells, Rev. Mr. Klink and Gen. Babbitt, was appointed to confer with Rev. Thos. Fraser respecting the Missionary agency contemplated in this action, or with any other man who may be selected for this service, provided Mr. Fraser declines to undertake it; and to suggest the means by which he may be supported.

REPORT OF COMMITTEE.

This committee reported: We have conferred with Mr. Fraser on this subject; and, while he does not give assurance that he will accept the agency, he has promised to consider the matter prayerfully, if a competent support can be secured to him. The committee therefore recommend that Synod appoint a committee with power, who shall endeavor to obtain a commission for our agent from the Board of Domestic Missions, on condition that one half his salary and travelling expenses (the whole amount to be $2,500 a year) be paid by the Synod, and to obtain pledges from our churches for the payment of this sum.

STANDING ADVISORY COMMITTEE.

It was afterwards

Resolved, That a Standing Advisory Committee, consisting of the Rev. Dr. Eells, the Rev. Mr. Fackler, and ruling elders, Roberts, Thornton and Latham, be appointed; and this committee be empowered to use whatever measures may to them appear expedient to promote the work of missions within our bounds.

INSTRUCTIONS TO COMMITTEE.

4. It was further

Resolved, That this committee be instructed to correspond with each church and minister belonging

to Synod, and learn by response from the same what amount of money can be relied upon for a fund, upon which they may draw, if necessary, in order to carry on and sustain the work committed to them.

FOREIGN MISSIONS.

Friday evening was devoted to services relating to the cause of Foreign Missions. Interesting addresses were made by the Moderator, and the Rev. Messrs. Carrington (who is on his way to Siam), Fraser, and McMonagle.

The report of the Committee on Foreign Missions was presented and adopted, as follows:

During the year past the Master has blessed the efforts of our church to spread the Gospel in foreign lands, and among the heathen in our own land. For this we render hearty thanks to the Head of the Church, and, as we go forward, God, in his providence, more and more fully opens the world for missionary effort.

It is, however, a lamentable fact, that our Board of Foreign Missions is again embarrassed with a heavy debt, the first instance in its history of a debt occurring in two successive years. Last year it was $36,000, this year $27,000. This surely ought not to occur, when an average contribution of a dollar per member annually in the church collections would prevent it. But, small as is this for each, our churches on this coast have failed to reach it. In the Minutes of the General Assembly 1834 members are reported in our Synod. The contributions were about $1,500, or 81½ cts. per member, and this in currency, equivalent to about 60 cts. in coin. It is quite an advance upon the previous year; but alas! how far short of giving as the Lord has prospered us.

We rejoice to have with us some who are about to set sail for heathen shores, as bearers of the glad tidings. We earnestly pray that they may be borne in safety to their destination, that they may have large gifts and graces for their work, and that their labors may be blessed in the salvation of great multitudes through our glorious Redeemer.

Again, would we commend the Chinese and the Indians in our bounds to the efforts of our people to make known to them the Gospel, by gathering them into our Sabbath Schools, and teaching them in families; and again would we ask the prayers, the contributions, and the labors of all, ministers, ruling elders, and people, for the advancement of this blessed cause.

THE CHINESE.

A further report in reference to the Chinese was adopted, as follows:

God, in His providence, has placed this people in the midst of us, and that, apparently, not merely as a temporary, but as a permanent part of our population. He thus calls upon the churches with a specially urgent call, to do what they can for their enlightenment and salvation. He gives also great encouragement in the measure of success which has attended the labors of our worthy and beloved missionary. A fact of great interest is that two, who were here brought to the Savior, have returned to China, and are there studying for the ministry, and that their life here has produced a marked superiority over men of the same class in their own land. Therefore, be it

Resolved, 1. That we give our cordial sympathy to our missionary to the Chinese in his labors, and that he has our hearty prayers for his great success in his work.

2. That all our people be exhorted to do what they can to bring them to the knowledge of the Savior.

An able and edifying sermon on the subject of foreign missions was preached before Synod on Saturday evening, by Rev. A. Fairbairn, for which the thanks of Synod were tendered to him.

The Treasurer's accounts were reported correct, and an annual assessment upon the churches, at the rate of five cents per member was ordered to be levied for the Synod's contingent fund.

CONGREGATIONAL SINGING.

Mr. D. Meeker, having, by permission, addressed the Synod on the subject of church music, it was

Resolved, That, in the mind of this Synod, it would be for the best interests of our churches that they do not depend upon choirs alone for executing the praise of God, but take all proper means to bring about congregational singing, according to the direction of Scripture, "Let the people praise thee, O God; yea, let all the people praise thee."

THE OCCIDENT.

The committee appointed last year, in conjunction with the Synod of Alta California, to secure the publication of a Presbyterian newspaper, reported their action; whereupon it was

Resolved, That the thanks of the Synod be tendered to the Rev. James Eells, D.D., for the able and efficient manner in which he has edited THE OCCIDENT (receiving no pecuniary return), in the midst of the cares and duties of his most important pastoral charge; also, to the Rev. E. B. Walsworth, D.D., associate editor, for his efficient co-operation.

A committee was appointed to bring in a minute in reference to the OCCIDENT, whose report was adopted, as follows:

Resolved, 1. That Synod now, as heretofore, are impressed with the importance of sustaining a religious newspaper, as an efficient auxiliary to the work of the ministry, and a most valuable means of conveying religious and moral instruction and information to our families and communities.

2. That the good work already done by the publication of THE OCCIDENT, and the measure of success and favor which it has secured to the present time, are in themselves sufficient reasons to encourage us to seek for its continuance, and the enlargement of its means of influence by such measures as may occur to the wisdom of the committee of the two Synods, to whom this subject has been referred.

3. That the members of the joint committee appointed last year be reappointed for the present year.

The Young Men's Christian Association extended an invitation to visit the rooms at any time, for which courtesy Synod tendered them a vote of thanks.

THEOLOGICAL SEMINARY.

The Rev. Mr. Veeder, presented a report which was adopted as follows:

The undersigned members of the joint committee appointed at the joint meeting held last year with the Synod of Alta California, to take into consideration the subject of a Theological Seminary, and to report thereon, would respectfully state:

That, with the exception of a single meeting at the time of the last Synod, at which no definite action was taken, the joint committee has held no meeting, and is therefore not prepared to make a report. The subject has, however, been a topic of conversation between different members of the committee; and, at a meeting called yesterday, in the absence of a quorum, the undersigned agreed to offer the following resolutions for the consideration of the two Synods.

1. That in view of the rapidly increasing wants of this coast, needing an increase of the ministry keeping pace with the rapid growth of the population; in view of the vital importance of purity of doctrine; and of a ministry thoroughly imbued with a knowledge of the doctrines of our own Church; in view of the prospect of an early union of the two branches of the Church, and of the fact that one of the chief causes of the original dissension was the introduction into the ministry of our church of large numbers of ministers not trained in our own Seminaries, or under our own ministry; and lastly, in view of the fact that there are many young men within our bounds, who might be turned into the ministry, were facilities for obtaining theological education properly provided; in view of these, and other weighty considerations, it appears that the importance of the early establishment of a Presbyterian Theological Seminary within our bounds can hardly be overated.

2. That while the way does not yet seem clear for the immediate establishment of such a seminary, early provision for theological education may and should be made, in connection with University College, which, by the action of its trustees, has lately been placed in connection with both branches of the Presbyterian Church, and which by the possession of property of great value, and by the progress it has made during the seven years of its existence, gives promise of permanence as a Presbyterian seminary of learning, and now presents itself as capable of being made the best instrumentality within our bounds for training up an able ministry for our church.

3. That this Synod regards the early endowment of one or more professorships, to be filled by men qualified to guide the studies of candidates for the ministry, as practicable, and will work in all suitable ways to secure such endowment.

W. W. BRIER.
P. V. VEEDER.

MISCELLANEOUS.

The Rev. A. W. Loomis was appointed to preach a sermon before the Synod at its next meeting, on the subject of Foreign Missions.

A complaint presented by the Rev. B. I. Lowe against the Presbytery of California for its action in a judicial case was sustained by the Synod.

The Rev. Messrs. Veeder, Eells, Thompson, Buel, and Woodbridge, were appointed a committee to bear fraternal assurances, and to confer with the Synod of Alta California.

The thanks of the Synod were tendered to the ministers, elders, and members of our churches in this city for their kind entertainment of its members during the sessions.

Synod then adjourned to meet in the First Presbyterian Church, San Francisco, on the first Tuesday of October, 1869.

JOHN EDWARDS, Stated Clerk.

Narrative of the State of Religion.

To your Committee on the Narrative has been assigned the duty of gathering into a condensed form a report of the working condition of our churches. From most of the brethren you have heard verbal reports, and your committee do not hope to be able to reproduce the glow of enthusiasm which their words kindled; nor yet faithfully portray the trials through which many have passed. In the experience of the brethren, the sunshine and the shadows have so blended that we are permitted to record some increase as the fruit of their labors.

DIVISION OF WORK.

The work of our churches naturally divides itself into the following:

1st. The preaching of the Word on the Sabbath.
2d. Prayer-meetings during the week.
3d. The work of the Sabbath School.

These are the arteries through which the life of the Church flows. Lay your hand on these, and you get the pulse-beat of the Church. Is there vigorous health? Then every one of these is liberally supplied, growing in strength and beauty.

WORK OF PASTORS.

The past year, in most of our churches, has been one of steady, earnest work. There has been scarcely anything that might properly be called a revival, while in many of them the additions have been very gratifying. Twelve churches report an

increase of 232 members, while but two churches report no additions.

Most of our churches report a steady increase in their congregations, larger collections for the Boards of the Church, and more general interest in benevolent enterprises.

PRAYER-MEETINGS.

Concerning prayer-meetings, your committee regret that the churches have not made fuller statements, so that we might be able to show more fully what is being done. In regard to this, we have but the general statement that the prayer-meetings are supported, and are interesting.

SABBATH SCHOOLS.

The same vagueness is found in the reports concerning the Sabbath Schools. This is to be regretted, as your committee have no doubt, if the facts could be obtained, that in both these departments—the prayer-meeting and the Sabbath School—we would find much cause for encouragement.

GROWTH OF CHURCH.

Of this we are assured, that God is owning the faithful labors of Christians in building up and multiplying our churches.

Within our bounds one new church is organized with 21 members. Three church edifices—one at Tomales, one at Bodega, and one at Santa Rosa—are being erected, at a cost of $22,000. Calvary Church, San Francisco, is also erecting a new edifice, at a cost of $120,000. Under the care of this church, there has also been erected a church building on Howard Street, between 21st and 22d, at a cost of $7,000. Arrangements are made to organize a church there in a few weeks.

From all this we have cause for devout gratitude for the past, and great hopefulness for the year to come.

All of which is respectfully submitted.

J. H. McMonagle, Chairman.

Action on the Minutes of the Gen. Assembly.

The Committee on the Minutes of the General Assembly beg leave to present the following

REPORT:

There is an unusually large number of subjects of vast importance presented for our consideration in these Minutes; subjects that should stir the understandings and hearts, and rouse to increased activity the members of this Synod; subjects that evidently tend toward a preparation of the whole Church of Jesus Christ for the wonderful demands of the age, and for the reception of the glorious things which prophecy has told us shall be the inheritance of the city of God in the future. We need not delay by a special naming or illustration of all these subjects. A little attention will make the discovery of them in the pages of these Minutes. There are, however,

THREE LEADING THEMES

that should claim the special consideration of this body:

1st. The benevolent operations of our Church, including all the plans and movements, expenditures and wants of our Boards.

2d. The debates in our late General Assembly in relation to the thrillingly important subject of the reunion of the New and Old School branches of the Presbyterian family.

3d. The Narrative of the state of religion within our bounds, in the widely extended limits of the United States.

We may not tresspass upon your time to say all that might, and perhaps ought to be said, in the way of pressing upon the consideration of all present the weighty things that are included in these topics.

BENEVOLENT OPERATIONS.

In regard to the benevolent operations of our church, there are several things to be noted:

(*a.*) The considerable increase in the contributions of our churches to our various Boards, over all previous years.

(*b.*) The increased number of our contributing churches.

(*c.*) A number of valuable legacies left to some of our Boards, during the year.

(*d.*) The important work that has been done among the freedmen, and the assistance given by our Board of Church Extension in the way of help to a large number of churches to complete their houses of worship.

DELINQUENT CHURCHES.

For all these things we ought to render thanksgiving to the great Head of the Church. But we have to mourn over the fact that there are hundreds of churches within our bounds which contribute not a dollar towards the support of any of our benevolent enterprises, and that so large a number of our people give almost nothing toward carrying forward the great enterprises of our denomination.

REUNION.

The second topic, namely, the question of reunion with our New School brethren, occupied a large part of the attention of the late Assembly, brought out a great deal of the talent of our church in debating it, and seemed to be the matter that called forth more feeling than anything else. The motion in regard to the reception of the basis presented by the Joint Committee of the two Assemblies was finally put, and was carried by a handsome majority.

FEELING ON THE UNION QUESTION.

There are three or four things indicated by the debate on this union question:

1st. A strong feeling of friendship on the part of the ministers and elders of our Church for the ministers and elders of the Church of the New School.

2d. An almost universal conviction that our New School brethren are honest in their avowals in regard to orthodoxy; that they hold and cherish the leading doctrines of our Confession of Faith, just as strongly and as lovingly as ourselves.

3d. That the period for uniting and forming one great and powerful organization, has almost arrived.

4th. That such a union would be promotive of both denominations referred to, and greatly advance the interests of the cause of our blessed Lord.

STATE OF RELIGION.

The Narrative of the state of religion within our bounds gives us the cheering intelligence that our Church in all her departments has been making rapid progress during the year. This is evidenced especially by the fact that, within the bounds of more than half of our Presbyteries, the Lord has been graciously pouring out his spirit; that a large number of the aged, and heads of families have been gathered into the fold of Christ; that the contributions, as already stated, have been increased, that the gospel has been carried into many destitute places; and that the Lord has been doing great things for us in various places in the heathen world.

In conclusion, your committee would suggest the following resolution:

Resolved, That we render thanks to Almighty God for the good things he has bestowed upon us in the past; that we feel ourselves called upon to double our dilligence; and that we should, in obedience to the will of our General Assembly, endeavor to inspire our people with a feeling of more entire consecration to God's service, and, if possible, enlarge, and render more universal, their contributions to the cause of righteousness.

A. Fairbairn, Chairman.

Correspondence.

Persecution in Japan.

On the 14th of July, the eve of our embarkation from Shanghai, an obscure rumor reached us of a fresh outbreak of persecution in Japan. Five days later we arrived at the islands, and I set myself to work to ascertain the details of those inhuman proceedings. It was true that persecution against native Christians had broken out afresh—the volcano, so long quiescent that its sides had begun to be adorned with fruitful vineyards, had suddenly burst into fearful activity. The Mikado had published a new decree, requiring the Daimios to surrender their Christian subjects for death or penal servitude.

Nine years ago, our minister, Mr. Harris, in the city of Yedo, expressed to me the opinion that the last Christian had suffered in Japan on account of his faith. The old law was unrepealed, but it would pass away as a dead letter; of this he had been assured by native princes when he endeavored to secure its repeal.

They were, no doubt, sincere, and he, no doubt, believed their declaration; but things have changed since then, and not for the better. The Tycoon, with whom the treaties were made, has been overthrown, and the civil power transferred to the Mikado. The latter, eager to conciliate his people by some popular measure, fulminates a new edict against the Christians, just as Roman emperors were wont to please their subjects by throwing Christians to the wild beasts.

The first instalment of sufferers consisted of 119 men and women, heads of families, who, on the 7th of July were put on board a Japanese steamer at Nagasaki, and carried out to sea, no one knows whither. The officers gave out that they were to be drowned, but it is believed that they were condemned to the harder fate of spending the rest of their days in the gloomy depths of the northern mines. One hundred more were kept in prison, soon to share the same or a harder fate, if they remain true to their faith, and the whole number registered and marked for destruction is 4014.

These facts I obtained from a Protestant missionary, Mr. Verbeck, a Roman Catholic Bishop, Mr. Petitgean, and the American Minister, Gen. Von Valkenburg. I also obtained a copy of a pamphlet which has been extensively circulated for the purpose of exciting the public mind against Christianity. A few sentences will serve as sample of its spirit: "They," (the Roman Catholics) says the writer, "employ some twenty men of letters, and equipping them as merchants or as pilgrims, send them out to propagate their faith. They make converts, either by giving money to the poor, by performing miracles, or by appealing to the carnal passions; so that very soon one or two hundred people are collected who no longer obey the Lord of the land, and go so far as to disregard all the proprieties of human society—a fearful state of things, indeed! In the same place, Americans and English have erected Protestant churches, and lay themselves out to deceive the most wise and illustrious men of our glorious country. They profess to teach astronomy, geography, artillery, medicine, etc., but all the time their real object is to instil the poison of the false religion.

On comparing the two religions, the Protestant is by far the worst. It sounds very well at first, but you find at length that it holds the same errors as the other, and does much more mischief."

I ought to remark here that those who have been arrested or proscribed, thus far, are all Roman Catholics; but they do not deserve our sympathy the less on that account. The above sentences show that the Japanese are far from making any distinction in favor of Protestants. When persecution is raised by a Pagan power against any body of professed Christians, it ought to be viewed as the common cause of all Christendom, and all the envoys of Christian States ought to be ready with their good offices to avert or alleviate the calamity. In this instance they have united in a protest; but that protest is, I fear, couched in very mild terms, or it would soon bring Japan to the stool of repentance. The rights of conscience should be recognized as equally sacred with the right of personal liberty; and persecution on religious grounds ought to be as promptly repressed as a revival of the slave trade.

In the seventeenth century no fewer than 30,000 Japanese were put to death in the vicinity of Nagasaki for their adherence to Roman Christianity, and Dutch Christians (?) to their lasting shame, aided in destroying those faithful martyrs. W. A. P. M.

S. S. Colorado, Sept. 9th, 1868.

The Chinaman.

[The following are sensible words, from the pen of a lady, on a subject which deserves to be kept constantly before the minds of Californians.—Eds.]

"Lo! the poor Indian!" in days past, was often the exclamation of sympathizing friends of the red man, cognizant of his wrongs, and the unjust and ungenerous treatment he received, both nationally and individually; and redress was sought for him in many ways, and help came to him through many avenues. The efforts of individuals, or religious organizations, however, can never wipe out the stains resting upon our policy toward the children of the forest, and we are repeating the cruel code in our conduct toward the Chinamen. Looked upon as an inferior, regarded as a degraded specimen of humanity, the Chinaman is oppressed and imposed upon continually; the wholesale term of "John Chinaman" robs him of his individuality, and these immigrants, many of them, regard it as insulting; subject to the derision of rude boys; not allowed to testify in our courts of justice (?); brow-beaten by imperious neighbors; accused of all the petty thefts, in many neighborhoods; robbed over and over again in the mining communities—they yet move among us a peaceable, industrious, self-relying people, without vindictiveness or revenge; seldom aggressive, and with a peculiar faculty for minding their own business. They are building our roads, developing our mines, cultivating our soil, spanning our continent with a gigantic railroad, and contributing largely to the development of the State. As domestics, they are steady, apt, and tidy—in the mountain towns we should be thrown on our own resources without them in this capacity—and yet how few families take any religious or personal interest in the instruction of the particular Ah Soon, or Hung Wo, who engineers the kitchen department.

We send missionaries to China, to convert the heathen from his idol worship, and lead him to a knowledge of the Savior who died for him. But when China comes to us, what effort do we make towards her conversion to Christianity?

"Why do you invite your Chinaman to be present at family worship?" questioned a lady; "he certainly does not understand what you say or read."

With shame I confessed that the idea occurred to me as the suggestion of the boy himself.

"What for you ask him God?" he questioned one morning, and upon my asking him if he would like to sit and hear, he gladly availed himself of the permission. To read and write also became a great object of ambition, and no matter how tiresome the duties of the day had been, Hung Nau invariably availed himself of the hour of study I gladly bestowed upon him in the evening. Since then it has occurred to me to ask a Chinaman, now and then, if he would like to go to church, and it is surprising to hear the questions asked in reference to the sermon and the minister.

"How him man *know* God?" was what puzzled Ah Wang, an intelligent Chinese, employed by a friend, and much thought and study was bestowed upon the proper mode of communicating how the knowledge of God enters into the heart of man.

In reference to death, the Chinaman has peculiar notions, and keen and quick-witted are many of them regarding the moral characters of those who profess Christianity.

The treatment of the Chinese, the apathetic indifference to their spiritual advancement; the want of effort to make them acquainted with the glorious provisions of the Gospel of truth; the disregard of all personal obligations toward them beyond mere dollars and cents, is partly, I doubt not, owing to their being so completely alienated in habits, language, and customs, from ourselves. But there is in the Chinese character good material to work upon, and if we would, individually, give the same missionary interest to those around and among us, as we do to the unconverted dwellers in Heathen countries; If we would take the same pains to give them the Bible and explain its teachings as we do to send it to the "isles afar off," why might not the results be as beneficial?

The foreign field of missionary labor is a noble and interesting one, and there are those peculiarly endowed with qualifications to render important service in this direction; but to "do the duty that lies nearest thee," is an axiom of Carlyle's too often overlooked, in the question, alas! so many of us ask, "Who is my neighbor?"

In their mining camps, the Chinese are subjected too often to the brutal jeers and personal violence of a class of white men who are a disgrace to the community at large. Only a month or two since a shocking and barbarous murder was done, on an inoffensive laundryman at Forest Hill, by one of these creatures; and yet there are those who look upon such things with indifference, because it was "only a Chinaman." I could multiply instances of this kind but the daily papers are full of them, and they have become crying evils.

It is perhaps in the minor morals, as they are sometimes termed, we can best teach Chinamen respect for Christianity in its outward observances, even before they comprehend its spirit.

I only sell to Chinamen on *Sunday*, says a storekeeper, because they don't know anything wrong in buying. But *you* do, my friend, and if you violate a principle to accommodate them, they will soon learn that a man who *professes* to keep the Sabbath and swerves for the sake of Mammon, is not as likely to deal plainly with them as the one who refuses to trade with them on that day. It is astonishing how soon a Chinaman learns the difference between a "go-to-church man" and a non-attendant at a place of worship. He knows as well as any, that the best illustration of Christianity, is in the fruits it bears, and example and precept bear the same relation to each other, in his mind, as they do in that of his more enlightened neighbor.

The facility with which a Chinaman learns to write the English language might be turned to good account by giving him Scripture verses to copy—as in his own language, the maxims of Confucius are frequently used as school texts.

The question so often asked "What are we to do with the Chinaman?" involves the idea of our moral responsibility toward them. Is it not wiser and safer to educate and enlighten them, than to "let them alone?" N.

SYNOD OF THE PACIFIC.

Christian and fraternal intercourse and sympathy and counsel have value in proportion as we are deprived of them. Those who may enjoy these at any time, often fail to appreciate the extent of their influence on them for good, while those who can enjoy them only on rare occasions, feel that these are among the most delightful that they know. It is for this reason, no doubt that brethren who are isolated by their labors in this new country, often spending months together without the cheer and support of even a visit from another, and becoming really lonely in the wide fields they attempt to cultivate, look forward to the annual meeting of the Synod with hope and pleasure. Were no more to be gained from these meetings than the encouragement and refreshment which are furnished to each one by his mere presence in the company and the magic effect of communion, there would be abundant reason why they should be held. The weary would find them an arbor to which it is most grateful to turn aside and rest awhile. The disheartened would find them the Appii Forum where the faces of brethren will inspire them with thankfulness and courage. The strong would find them an arena, in which they may take position with more complete assurance of progress. It is never wasted time, when those who come in from their toil, as did the disciples from their mission, are invited by their Lord to come apart, lay off their harness, and surrender themselves for a season to sympathetic converse with each other and with Him.

There are other objects, however, which need not collide with this, to be accomplished at these gatherings of the ministers and elders of the Church, and sometimes these have vital connection with its prosperity, and immediate bearing on the cause of Christ. There are times of special importance, as related to the plans that may be devised, and to the results if they shall be executed. In the judgment of those who have just enjoyed their accustomed opportunity for conference in the Synod of the Pacific, we have reached a period that must be so regarded, and subjects were discussed, and modes of advance were proposed, and conclusions were reached, that must give new impetus to our Church if the spirit of the Synod shall force its way into the many fields in which its members shall again take up their work. The demands of our denominational interests, that we may answer the expectations of those who look to us for the exercise of that vigilance which ought not to be wanting; the demands of the most attractive regions beyond what we have yet attempted to compass, all resounding with the voice of providence that we go up and possess them, for our Master; the call that comes back to us from the future upon which we almost begin to tread, that we prepare ourselves for its vast responsibilities, and lay deep and strong the foundations on which its superstructure is to be reared; and, more than all, the ever-emphatic command of our Lord, that we discern the signs of the times, and be worthy of such an era and such a land, seemed to leave no alternative for us. The conviction was unusual that our churches must do more, that our brethren in the East must help us more, and that there is no excuse for delay.

The report of the Committee on Domestic Missions gave the key-note to the meeting, and a plan for the more effectual and extensive usefulness of the Church in this department of effort was adopted, the fruit of which must be blessed, as it can hardly fail to secure the hearty support of those who apprehend the necessity for some more abundant labors in the destitute parts of the coast.

The recommendation that temporary provision be made for Theological instruction, in connection with the City College, which has been placed more directly under the supervision of the two Synods, deserves serious attention. As soon as may be, we should have a Theological Seminary, for ample facilities should be furnished for the rearing of a ministry for California, on California soil; but until we are able to endow such an institution we may endow professorships in the college for the education of ministers from among the graduates and others who may desire thus to serve God in the churches.

Nor is the least of the items which engaged the attention of the Synod, the discussion which took place respecting The Occident, and the action in which the sentiment of the brethren was embodied and expressed. The feeling was earnest and general, that we need and must have a paper, to be our organ and the representative of the Church, and that it should be amply sustained, and fully equipped with permanent editorial ability, that it may become a mighty engine in support of the truth, and in prosecuting the plans of our denomination. We trust this feeling will be no less earnest in the breasts of all, throughout the year. Nothing but this, and the blessing of God, is necessary to the complete establishment and success of the paper.

There were other points of much interest, which received the consideration of Synod, directly and indirectly, but we have not time to speak of them in detail. We should not omit to say, however, that in regard to the great question now pending, viz., union with the New School branch of the Church, quite as much feeling was apparent as at any previous session, and the hope was often expressed that union may be effected without delay, though some do not like the qualifying words of the first article of the Basis.

A delegate was appointed to represent the Synod in the Synod of Alta California, which convened on Wednesday evening of this week, and also a Committee on Conference upon those subjects in which the Synods have common interest. We shall hope to publish some account of the New School Synod next week, as all its deliberations indicate that it is in no respect behind any who feel that they are entrusted with the Gospel, as the saving power in the midst of the hosts who will find their homes on these shores.

Summary on Baptism.

In reviewing that portion of the discussion which we have now passed over, let me recall: 1st. That I have shown from the Scriptures that the Holy Spirit, the Author of inspiration, has employed the term *baptismois* (baptisms) to indicate the various ablutions of the Jews, the chief of which were sprinkling—some by pouring, some by washing, none by immersion, thus including all the divers ritual ablutions of the Jews for personal purification, under one generic term, *baptismoi*, as in Heb. 9: 10.

2d. That the Rabbinical purification before meals was by hand-washing, as proved by the prescribed tradition; by the superstitious stress laid by the Rabbis on this distinctive mode of purification; by its perfection and completeness in their estimation; by the entire absence of any reference to other modes of ablution before meals, either in the Scriptures or Rabbinical authorities; by the mention of conveniences in the household for this and similar modes of cleansing, but which were inadequate to cleansing by immersion; and by the reproof of the disciples by the Pharisees, in Matthew and Mark, for omitting the customary hand-washing. I am, therefore, constrained to insist that, as in Heb. 9; 10, in respect to the ablutions of the Hebrews, so in the Gospels in respect to the Jewish ablutions, *baptizo* and its cognates are used as generic terms to signify the traditional ritual purifications of the Jews, while the particular mode of their administration was not by immersion.

3d. In the baptisms of the Holy Ghost, which we have endeavored candidly and carefully to examine, at the Day of Pentecost, and at the preaching of Peter at the house of Cornelius, while it has pleased the Holy Spirit to manifest His presence by the figure of an effusion, and so to declare it in the sacred narrative for the instruction of those who should come after in all time, and while these manifestations are termed baptisms by the voice of the unerring Spirit, still there is no trace of an immersion, nor is there any plea made for an immersion by the ablest Baptist commentators; hence, in view of the narrative, I am authorized to conclude that the baptism of the Holy Ghost, the type of Christian baptism, was not by immersion, but by effusion; therefore, in view of these facts, I humbly submit that among the people who heard the teaching of our Savior and the Apostles, in the language which they spoke and wrote, *baptizo* was used as a generic term to indicate the use of water in ritual purification, and this being the essential idea, it was undetermined and uncontrolled by any particular mode, still less by the mode immersion, while in the case of the baptism of the Holy Spirit, the mode most emphatically was not by immersion, but by the figure of an effusion, while these ministrations, beyond all controversy, were termed in sacred writ *baptisms*.

If, then, we look at the ablutions of the Hebrews, which were performed by sprinkling, pouring and washing, we find that the inspired Apostle calls them baptisms; if we look at the traditionary ablutions of the Jews before meals, while the Scriptures and rabbinical authority shuts us up to one mode—hand-washing performed by pouring, we find this also designated by the evangelist as a baptism. If we have regard to the ministrations of the Holy Ghost at the Day of Pentecost and on the household of Cornelius, which were bestowed by effusion, we find that by the authority of Jesus Christ Himself, they were still termed baptisms. When, therefore, the revisers of the Bible Union, in their version, give immersion as the synonym of *baptizo*, in these and other cases, they have not only departed from the *usus loquendi* of the time in which the sacred writings were penned, "the great rule and law for the interpretation of language," but they have gone counter to the testimony of the sacred writings themselves, in that they have glossed the pure word with their own interpretations, and in the translation of *baptizo* by immerse, they have not only taken away the idea of purification invariably attached to *baptizo* by the inspired writers, but, by the use of this word immerse, they have prescribed a mode, and a particular mode—immersion—in which, as we have seen, they are not sustained by the facts of the Scripture, and have thus added to the sacred text, the ideas of their own private interpretation.

I only desire to add this note. One of two things must be true: either the Apostle was mistaken in the outpouring of the Spirit at the Day of Pentecost

being the promised baptism, or if it were the baptism promised by the Savior, then it came by effusion. Here, then, we would say to our Baptist brethren, if denominational requirements are satisfied in this effusion, and this faith finds in it the baptism—or, in their phraseology, the immersion—of the Spirit, let that same faith, helped along by Christian charity, be satisfied when we pour the baptismal water upon the subject in imitation of the Holy Spirit, which fell upon Cornelius, and a baptism—that is to say, an immersion—and the broad belt of distinction which separates Christendom vanishes at once to an impalpable line. But if I am told we will not be guilty of the folly of allowing an immersion in water when the water is only poured upon the person, I must reply: is it any worse folly than to claim an immersion in the Spirit when the text says, expressly and distinctly, the Holy Ghost fell on them as on us? But if I am told we will not be guilty of the solecism of allowing an immersion in water, when water is only poured upon the subject, I must reply: is the solecism any less flagrant in demanding an immersion in the Spirit when the text reads expressly and distinctly. "The Holy Ghost fell on them as on us?" F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Biography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Children's Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All such are requested to call and examine the publications of the Presbyterian Board at the Depository for the Pacific Coast, which has been established at the store of

Current Literature.

Life in the Argentine Republic.

Details that may be relied upon respecting a country of which little has been written are always valuable, and when these are given in popular style, they will be read more eagerly than almost any other form of reading for the people. But few, even of our intelligent citizens, have any definite information concerning the larger part of South America, and many are obliged to ask about the geographical position of States whose political changes are chronicled as a part of the current history of our generation, when their attention is arrested by the accounts of them in the papers. The Argentine Republic, or Argentine Confederation, as the government is sometimes called, situated in the southern portion of the American Continent, is but little known among those who have been at a distance from the commotions by which its history has been distinguished. The physical structure of the region, the peculiarities of the people, their revolutions and experiments, which have caused almost constant civil war for twenty-five or thirty years, the character of their leading civil and military men, and the prospect that permanence and prosperity may finally render the country what its best inhabitants have struggled to make it, are all discussed in the book whose title we have given above. It was written by Domingo F. Sarmiento, L.L. D., Minister of the Republic to the United States, a man most deservedly eminent among his countrymen, and honored by them as the one most able to advise and lead in all movements for their elevation and advantage.

The Spanish is finely translated by Mrs. Mary Mann, who had become interested in Colonel Sarmiento and in the Argentine Republic through the efforts of her husband, Horace Mann, to introdnce the boon of Common School Education into that part of South America, and Mrs. Mann has written an extended preface and a biographical sketch of the author, from which much knowledge may be gained respecting matters general as well as personal.

We have been greatly pleased with this volume and do not doubt that it will be read by many who may obtain from it some new views of the difficulties and trials of men who are striving for the civil and ecclesiastical freedom of the States of South America.

The Opium Habit.

This work is for the most part a record of experience. It collects the statements of distinguished men who have been victims of the habit, that these may become a beacon by which others may be warned away from the rock on which they wrecked so much happiness and ability for good. De Quincey, Coleridge, Blair, Robert Hall, John Randolph, Wilberforce and others most widely known are quoted with comments and suggestions and testimony, that are strong as revealing the extent of the habit in the various classes of society. We are not prepared to affirm that all the compiler says of these men is true, certainly representing some of them it is new to us, and we should be unwilling to believe it upon other than conclusive proof, yet the habit of opium-eating is known to be more general than many suppose, and it is thought to be more prevalent from year to year, especially among those of literary and sedentary pursuits. The publication of this book, therefore, may be useful, for its style and method are likely to make it popular. If intemperance in the use of alcohol is ruinous in its effects, as all know it is, and opium can be shown to be more ruinous, as is here attempted, those who are inclined to use it should take the warning, and desist while they can, for one of the principal and most sad effects of it, is that it destroys the tone and supremacy of the will, so that its victims lose the power of self-control. The work is published by Harper & Brothers, New York, and for sale by Bancroft, & Co.

Periodicals Received:

Putnam's Magazine for October. A first rate number. San Francisco: Bancroft & Co.

Family Treasure for September.

Good News for September. A new religious monthly that appears well, and has several valuable articles. Published by P. S. Wynkoop & Son: New York.

Godey's Ladies' Book for September. Philadelphia.

The Overland Monthly for October. Quite equal, and in variety of matter, superior to any previous number. We congratulate the publishers that they so fully answer the public taste in their Magazine. San Francisco: A. Roman & Co.

The Congregational Review for September. The leading article is an interesting, and in some particulars an able review of the New Baptist Version of the New Testament.

LITERARY ITEMS.

The Spiritualists, who started with an abhorrence for sects, are themselves fast crystallizing into one. Fresh evidence of the fact comes to us in *The Spiritual Harp*, a hymn and tune book of nearly 300 pages, prepared expressly for the use of their denomination, and published by William White & Co. of Boston. It is handsomely printed and seems to be well adapted for the purposes for which it was intended. As might be expected, Watts and the other standard writers of the Orthodox hymn-books are noticeably ignored, and their places supplied by numerous modern and "spiritual" poets, whose lyric and love songs have never been used as hymns before. This freedom of selection has brought together many fine poems and much flowery nonsense, all of which is set to easy and singable music.

Gen. Halpine (Miles O'Reilly), whose death was recently announced, is an illustration of the result of overwork. He used to boast himself able to produce more "copy" in a given time than any other man in New York, and indeed there were few journalists who could surpass him. And he imposed excessive tasks upon himself, so as to be driven to the use of stimulants to enable him to undergo the excessive strain on his nervous system, and maintain his reputation for speed. When his work was done, something was required to quiet the fever of mental excitement and produce sleep, and chloroform was the resort. An overdose caused his death. And so his great powers were sacrificed at an early age to this high pressure system of working.

The four chief monthly magazines in the United States are the *Harper*, the *Atlantic*, *Putnam* and the *Galaxy*. With regard to the pre-eminence of the first two, none will question; as to the others, there will be many doubts expressed. *Lippincott's* and the *Overland monthly*, among new ventures; *Hours at Home*, Frank Leslie's *Lady's Magazine*, and a great many more among the older periodicals, will assert their claims. But for the present we are prepared to maintain our assertion; though it only needs another month or two of such success as they have had to place both *Lippincott* and the *Overland* in the foremost rank.—*Springfield Republican.*

The Truckee *Tribune*, the Dutch Flat *Enquirer* in a new place and under a new form, has been received. It is much improved in appearance.

The Chicago *Tribune* and the Cincinnati *Commercial* are the most profitable papers in the country, outside of New York.

Magazine.—The editor of the *Advertiser* proposes to commence the publication of a monthly magazine at Vallejo soon. It will be local, original, and lively. Due notice will be given of the first issue.

Educational.

The Passing Campaign.

Pains should be taken to impress upon every young person's mind such an event as a passing Presidential campaign. Much pains will not be needed. Most mature persons have employed in this regard no particular care, and yet can run back over the campaigns which have occurred in their lifetime and recall each by some characteristic ditty, party badge, "log cabin," "hickory pole," or barbecue. But the matter is too important to be left to chance. The young person should be directed specifically to observe some song, caricature, procession, banner, or assemblage, of a nature calculated to excite his feelings or imagination, and thus rivet his memory. A campaign is worth remembering as a matter of historical knowledge. The elevation of a new name to the chief magistracy of the nation is one of the most important of the events of passing history. Not to observe the events of the present is as bad as not to read the events of the past. Every argument in favor of perusing the story of the campaign of 1348 is good as a motive for observing the campaign of 1868. The shame of not knowing, from the historian, the facts of the Jefferson election need by no means be so pungent as the mortification of not being able to recal for ourselves the facts of some similar event in our own time. But a passing Presidential election should be fixed in memory on another and personal account. It will form an excellent means of fixing the date of contemporaneous events of personal history. The campaigns of a man's lifetime form an excellent series of steps by which he may traverse again the events of his private career. Recurring regularly every four years, the date of any one of them is easily recomputed, if it slips the memory, and thus the coincident events of our own lives accurately fixed in point of time. Forty years from now your boy says: "Where was I in 1868?" He answers: "My history, or my neighbor here, tells me that that was the year of the Grant and Seymour campaign. I must then have been living in San Francisco, in such a street. I know this, for it was a procession for Grant, or Seymour, that my father waked me to see, as it passed our house, which was located on that street. Or, it was in the Fair building, near our house, on such a street, in San Francisco, that I saw medals and pins of Grant, or Seymour." The difference between a strong and a weak man, in life, can often be traced to the use or neglect of just such little painstakings as these on the part of parents. C. R. C.

Personal.

Rev. Mr. Van Doren of the Amoy Mission, China, preached last Sabbath in the Presbyterian church at Watsonville. He is on his way East on account of disease of the eyes, contracted by severe study in China.

Rev. Addison Jones and wife, of Santa Clara, have recently been expelled from the Baptist Church for free communion. He is gathering an independent congregation at Mayfield. We wish him success.

Mr. W. Renton, of Kitsap County, returns the largest income of any man in Washington Territory —$14,000. Five other men in the Territory have incomes exceeding $10,000.

Mr. H. L. King, one of our most respected citizens, met with an accident on Monday last, by which his leg was broken, and he was otherwise considerably bruised.

Mr. D. Rutherford has been elected President of the Cal. Railroad Relief Society lately organized. Mr. Wm. Masterman is Vice President.

Mr. J. W. Forbes has sold out the Virginia *Trespass* to parties who will publish the paper as a Democratic organ, called the *Safeguard*.

Mr. S. C. Hastings of Napa County has an income of over $25,000. There are 5 persons in the county whose income exceeds $10,000.

Rev. E. S. Lippett and Hon. Geo. Pearce discussed the political issues of the day, at Petaluma on the 23d ult.

Dr. Scudder delivered an address at the festival of the Howard Social and Literary Club on Tuesday evening.

Rev. E. C. Bissell, at the solicitation of his church and congregation has concluded to remain in this city.

Rev. I. N. Hurd preached at Chico last Sunday. He spoke in the evening on the mission work in India.

Dr. J. W. Linly of Klowa Hill, Colorado, was recently shot by a friend, who mistook him for an Indian.

Rev. J. W. Ross will labor in this State as a revivalist, under the auspices of the M. E. Church.

Rev. J. D. Driver of Oregon, has gone to Montana on a mission of the Bible Society.

The wife of Hon. A. H. Rose died at her home in Amador County last week.

Gen. P. E. Conner has returned from the East to his home in Stockton.

Dr. Robinson, of Jacksonville, Oregon, will soon move to Oakland.

Mr. Gary of Los Angeles, is feeding 100,000 silk worms.

Senator Cole has gone East overland.

A. ROMAN & CO.

Tea Cultivation.

The cultivation of tea is not general throughout the Chinese empire, but is confined to a particular region between the thirtieth and thirty-third degrees of North latitude, called the tea country. There are some plantations near Canton, but they are few, and those that do exist are of no great extent. The trees are planted four or five feet asunder; they have a very stunted appearance, and they are not allowed to grow higher than is convenient for men, women, and children, to pick the leaves. The gatherings take place from one to four times in each year, according to the age of the plant. It is only the difference in the times of gathering, and the manner of curing which causes the distinction in appearance, qualities, and value; those which are gathered earliest in the spring, make the strongest and most valuable tea, such as pekoe, souchong, etc., the inferior, such as congou, and bohea are of the latest gatherings—green, or hyson can be made of any of the gatherings, by a different mode of drying. The first gathering of the leaves begins about the middle of April, and continues to the end of May; the second lasts from midsummer to the end of July; the third takes place during the months of August and September. When the leaves are gathered they are put into wide shallow baskets, placed on shelves in the air, or wind, or mild sunshine, from morning till noon; then, on a flat iron pan, over a charcoal stove, ten or twelve ounces of the leaves are thrown at a time, stirred quickly with a short hand broom twice or thrice, and then brushed off again into the baskets, in which they are equally and carefully rubbed between men's fingers to roll them; after which they are again put into the pan in larger quantities, over a slow fire, to be dried a second time. When dried enough, the tea is laid on tables to be drawn or picked over, putting aside all the unsightly or imperfectly dried leaves, in order that the sample may be made even and marketable. To make single or hyson, the first two gatherings are chosen, and, as soon as picked from the trees, are put into the pan; next, rolled and spread thin, to separate the leaves, which adhere to each other; again well dried, spread, sifted, picked and fried two or three times more, (especially if it is damp weather,) before it is in a marketable state.

The Chinese drink their tea without milk or sugar; they partake of it plentifully at their meals, and very frequently in the course of the day. One mode of using it, among the higher ranks, is formed by grating into the cup, balls made of the most valuable leaves, cemented together by a tasteless gum.

The Crops.

We have news from all parts of the country in reference to the crops. The intelligence is highly favorable to the agricultural interests, as may be seen from the following summary. The wheat crop is, according to locality, from 25 to 50 per cent. larger than it was last year in West Virginia, Indiana, Ohio, Missouri, Kansas, Utah, Colorado, Montana, Illinois, Iowa, Wisconsin, Minnesota, New York, Pennsylvania, New Jersey, Maine, Massachusetts, Connecticut and New Hampshire, and the quality is regarded as excellent. In Georgia, South Carolina, Alabama and Texas the reports are not so good, the yield being indifferent. In Louisiana, Arkansas, Kentucky, Mississippi, Maryland, Southwestern Virginia, Central Tennessee, North Carolina, Delaware and Vermont, the crops have been an average one.

The corn crop in all sections of the country is reported to be very large, and the quality remarkably good. The yield this year, it is asserted, will be fully one-third more than last. This is especially the case in the Southern States.

The oat crop will be less than usual in New Jersey, Pennsylvania, Delaware, Maryland and Maine, on account of the rains. In Louisiana, Mississippi, Georgia, Florida, South Carolina, and the other Southern States, it will not be more than an average.

The yield of oats, however, will be large in Kentucky, Tennessee, West Virginia, Indiana, Missouri, Kansas, Ohio, Iowa, Nebraska, Wisconsin, Minnesota, Vermont, New York and Illinois, especially in the latter States.

The hay crop will yield more than the average returns, especially in Pennsylvania, New York, Indiana, Ohio, New Jersey, Delaware and Maryland, where the hay will be abundant and of excellent quality.

The barley crop will not be above the average. The potato crop is reported large and good. The hops in Pennsylvania, it is stated, have been killed by heavy mildew from the rains, and by lice.

The fruit crop, especially in the middle States, is very poor. The peach crop will not be half what it was last year, but in the extreme South it looks better. In New York the apple crop is more prmising than in any other State.

In the South, the sugar is said to be very promising, but very few canes were planted this year. Cotton has been injured by the caterpillar in Florida, but in other parts of the country the reports are encouraging.—*Philadelphia Instructor.*

Spring Balances—Incorrect Weights.—In nearly all the meat markets and many of the groceries and other shops where articles are sold by retail, are to be found some nice little contrivances for cheating the purchaser and adding to the gains of the buyer, called Spring Balances.

The spring balance was never intended to give value received; it is only convenient to show an approximation to the weight of the substance which is attached to the hook or placed on the suspended support, below. The spring balance is almost the only sort of apparatus that is of more value to the owner the longer it is used. The contrivance is so, for the reason that every strain on the tension of the spring causes it to bend a little easier than at the previous time it was bent; so that, admitting it furnished a true index of the weight of an article when it was new, it is certain that it will not do so after the lapse of a few months of use.

Not only is the spring balance inaccurate when compared with the lever balance, but it is after a little use, inaccurate when compared with itself; that is, it will require a greater weight to register the tenth pound on the scale than it did the first; for the reason that smaller quantities are much more frequently weighed than larger ones; or, again, if ten pounds are weighed separately they will not weigh ten pounds when put on the hook or support together.

No butcher or market man buys his meat by weight on a spring balance; and it is an outrage to sell it for from twenty to thirty cents per pound as indicated on such scales. The use of these balances is a fraud on fair dealing that communities should no longer tolerate. The Canadian government has already prohibited their use in the Dominion, and we hope that our State legislatures will move in the matter at their next session.

Get an Early Breakfast.—A bad custom is prevalent in many families, especially among farmers, of working an hour or two before breakfast, attending to "chores," hoeing in the garden, cutting wood, mowing, etc. This is convenient on many accounts, but it is not conducive to the health. The prevalent opinion is, that the morning air is the purest and most healthful and bracing; but the contrary is the fact. At no hour of the day is the air more filled with dampness, fogs and miasms, than about sunrise. The heat of the sun gradually dissipates these miasmatic influences as the day advances. An early meal braces up the system against these external influences. Every one knows the languor and faintness often experienced for the first hour in the morning and this is increased by exercise and want of food. We do not agree with the boarding school regime which prescribes a long walk before breakfast as a means of promoting health. Probably the best custom would be, to furnish every member of the family, especially those who labor out of doors, with a single cup of warm coffee, well milked, immediately after arising from bed. Then let them attend to chores, or mowing, hoeing, etc., for an hour or two, while the teams are feeding, and the breakfast preparing, They will feel better and do more work.—*Pacific Christian Advocate.*

Elm Bark for Tanning.—Elm bark is very generally used in Norway for making leather, and it is said the fine Norway gloves are prepared from the elm bark, and that the softness and beauty of the leather are attributable to this bark. The white willow is employed in Denmark for the hides used in the manufacture of fancy leather, the finished leather being impregnated with the oil of birch bark, which gives it a peculiar agreeable smell. It is a noteworthy fact that the Norway tanners use birch and willow in preference to oak bark.

Keeping Apples.—Mr. Pell, of Ulster county, the celebrated exporter of apples to Europe, recommends that apples, after having been carefully hand-picked in baskets, should be laid on the floor by hand, without pouring them from the baskets, until they are twelve or eighteen inches deep, and be left to dry and season three weeks, and then being carefully packed in clean dry barrels, they may be kept without rotting any reasonable length of time, and safely sent to any part of Europe or the West Indies.—*Presbyterian.*

Weekly Market Report.

Wednesday, October 7, 1868.

Flour—Sales of 1,000 bbls Extra, in lots, current rates. We quote jobbing rates for city brands as follows: Superfine, in sks, ₱ 196 lbs, $5@$5 25; Extra, in sks, $6@6 25.

Wheat—Sales include 1,000 sks choice shipping, to arrive, $1 85; 2,000 sks ordinary, $1 50; 4,000 sks choice shipping, $1 82½; 1,000 sks fair milling, $1 75; 2,000 sks choice white, $1 87½; 15,000 sks shipping, prior to arrival, private. We quote superfine or mixed lots at $1 50@1 55; ordinary to fair milling, $1 60@1 75; fair to choice shipping, $1 75@1 85; good to choice milling, $1 80@1 87½. At the close, 10,000 sks choice shipping reported sold at $1 85 ₱ 100 lbs.

Barley—Market continues firm at $2@2 25 ₱100 lbs, as extremes.

Oats—Sales embrace 350 sks fair, $2; 600 sks light, $1 90; 150 sks good, $2 12½; 250 sks choice, private; quotable at $1 90@2 15; 700 sks Oregon, $2 20 ₱ 100 lbs.

Potatoes—Sales of 250 sks Mission. $1@1 05; some lots of ordinary sold at 95c; a few choice lots have been placed at $1 10; 180 sks Bodega, $1 25; Carolina, $1 12½ ₱ 100 lbs.

Onions—Sales of Yellow, in lots, $1 76 ₱ 100 lbs.

Beans—We quote jobbing rates as follows: Bayo, 3½@3¾; Butter, 4@4½c; Pea, 3½@4½c; small White, 3@4c; Pink, 2½@3c; Red, 2½@2¾c ₱ lb.

Rye—Nominal at $2@2 10 ₱ 100 lbs.

Buckwheat—Nominal at $1 75 ₱ 100 lbs.

Mustard Seed—California Black is in light supply, especially choice quality; now quotable at 4c ₱ lb.

Bran—Is quick of sale from the mills at $22 50 ₱ ton.

Middlings—Fine sell at $37 50@40; feed descriptions, $32 50@34, with sales of 10 tons of latter quality.

Oil Cake Meal—Quotable at $30 ₱ ton.

Hay—One cargo of 250 bales choice sold at $14 50; range of market, 10@15 ₱ ton.

Dairy Products—California fresh roll Butter continues scarce at 55@62½c; pickled ranges from 40@45c. Cheese 16@18c for California dairies; small sales of new crop Eastern do, ex steamer, at 17@17½c; jobbing at 18c ₱ lb; Pineapple Cheese, 18@20 ₱ dozen. Eggs are firm at 60@62½ ₱ dozen.

Provisions—Bacon is jobbing at 14½@15c for California smoked; Oregon do, same price; California Hams, 16½@17c; Oregon do, 16½@17c; California Lard, 12½@14c ₱ lb.

Poultry—Live Turkeys are quoted at 15@20c ₱ lb; Hens and Roosters $7@8; Spring Chickens, $4 50@5 50; Ducks, $4@8; Quail $1@1 25 ₱ dozen; Geese, $2@$2 25 ₱ pair; Venison, 8@10c ₱ lb.

Wool—Sales for the week, by two of the leading receiving houses, 183,000 lbs fall shipping grade, 14½@16½ ₱ lb, outside price for strictly choice light clips.

Hides—Sales since last Wednesday reach 1,600 California dry at 14@15c. We quote Salted at 7c ₱ lb.

Tallow—Sales for the week of 7,000 fair to good Beef, 7¾@8c ₱ lb.

San Francisco Cattle Market.

The market presents no changes of interest. All descriptions are in good supply and the demand steady. Some dealers continue to quote 9c as the outside figure for choice Beef. We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8c ₱ lb.
do 2d do 6@7c ₱ lb.
Veal—Ranges from 6 to 10c ₱ lb.
Mutton—Is steady at 6@6½c ₱ lb.
Lamb—Steady at 8@9c ₱ lb.
Pork—Undressed, 4@5½c; dressed, 6½@7¾c ₱ lb, outside figures for milk or grain fed.

—*S. F. Bulletin.*

MINING.

The *Alpine Miner* thinks there will be in a short time a very great reduction in the cost of cutting galleries, shafts, &c., which will enable many ledges now valueless to be worked with profit. Some of the means of this reduction are; the use of machine drills, which in the great Mt. Cenis tunnel have reduced the cost of the work by two-thirds; improved qualities of powder which have already greatly cheapened the cost of mining; an improved quality of steel for the manufacture of drills.

The miners in the Mt. Diablo mines, says a correspondent of the *Bulletin*, make from $4 to $5 per day. Lying on their side or back, wearing nothing but a pair of pants, they work their way under the vein. They are healthy and seem to like their mode of life.

280 tons of ore taken from the Sierra Nevada Company's mine in Virginia City, was run through the batteries in 7 days and yielded, in gold and silver, $2,321. It costs only $2 per ton to work this ore, of which there is an inexhaustable supply.

A new mining district has been discovered about 110 miles southeast of Virginia City and near Walker Lake. There is plenty of water and timber in the district and indications of large quantities of gold. The district is called Black Mountain.

Mining property to the value of $550,000 has been purchased by the Consolidated Mining Company and English Company. The property consists of claims on Union Hill, Grass Valley. The document required $536 in stamps.

The "Hagan Super-heated Steam Process" is accomplishing wonders at the Enterprise Mine, Excelsior. Many believe that it is destined to supercede the Chlorination Process.

The Rutan furnace at Jefferson City, Montana, was run continually for 15 hours, and at the end of the time 500 pounds of crude bullion were taken from it.

The Silver City *Avalanche* says that the richest deposit of gold in Idaho or anywhere else, has been found a few rods back of its office on the Potosi ledge.

Three men are taking 1½ cords of dirt daily from the Kansas Lode, Quartz Hill, Colorado, which pays $60 per cord in gold. So says the *Denver Register*.

The Bullion Mining Company of Virginia have levied and collected assessments amounting to $750,000, and have not yet struck a pound of pay ore.

In the El Dorado ledge at Silver Bend, Nevada, exceedingly rich ore has been struck, some of it yielding over $6000 per ton.

The Seaton quartz mill near Drytown, Amador County, was recently destroyed by fire. The work probably of an incendiary.

Seventeen loads of rock from the Golden City ledge at Gold Hill, Nevada, were recently crushed and yielded $22 per ton.

Good ore is reported to have been struck in the Savage mine, and the strike has naturally raised the price of shares.

The Banner Mining Company, says the *Nevada Transcript* will add 10 stamps to their mill, making 40 in all.

A coal mine has been discovered about 15 miles from Victoria, V. I. The coal is of a good quality.

1800 barrels of lime have been burned on Butte Creek, Oregon, during the past summer.

Rich and extensive placer diggings have been found in Bush Valley, Plumas County.

A ton of ore from the Saratoga Mine in Lander Hill yielded $1,497.

Gold in paying quantities has been found on Clearwater River, Idaho.

New discoveries of gold are reported to have been made in Utah.

Coal has been discovered near St. Helena, in Napa Valley.

Snow is four feet deep at Laramie diggings.

RAILROADS.

The *Olympia Transcript* in comparing the facilities for building a road by the Central and Northern routes, shows that the latter has many advantages. On the Central route work can only be prosecuted with success at two points, viz., the ends of the road. On the Northern route there are 14 accessible points for operating crews of men at the same time; that is, 14 points at which supplies can be furnished by water without land transportation. This route crosses 6 navigable rivers and of course each crossing affords 2 starting points. Besides there are the starting points on Lake Superior and Puget Sound. Timber, coal and good water, which are so scarce on the Central are abundant on the Northern route. We are astonished at the rapidity with which the former road is being built, but when the latter shall be built as it will one day, we shall see more wonderful speed in railroad building.

On the C. P. R. R. the track is now laid to a point in Emigrant Cañon about 25 miles east of Winnemucca. The workmen have only material enough to keep them at work 4 or 5 hours per day. The graders have all passed Gravelly Ford. As Twelve Mile Cañon is a difficult place to grade, the *Winnemucca Argent* thinks it possible that the tracklayers may overtake the graders at that point.

The Pacific and San Bernardino Railroad Company has been incorporated with a capital of $2,000,000. This company proposes to build a road from San Bernardino to Anaheim landing, a distance of 60 miles.

The connection between the Napa Valley and Vallejo roads is to be made after all. The contract has been let to a new man and the work will be completed in a month.

The man who took the original contract for the San Jose and Santa Clara horse railroad has thrown up the contract, and the work is to be completed by other parties.

The Indians constantly annoy the graders on both branches of the Pacific road. A guard is to be furnished for their protection.

Swingle's ranch, a point about 9 miles from Sacramento, is the present terminus of the Vallejo and Sacramento Railroad.

The road from San Jose to Gilroy will, it is expected, be completed by December 1st. The grading is about finished.

Work on the road at Petaluma is progressing rapidly. Over 60 men are employed, and about 5 miles are already graded.

A contract for building the railroad from Vallejo to Healdsburg has, it is said, been let to responsible parties.

The total recipts of all the railroads in the United States, for the past year, is estimated at $340,000,000.

The Railroad works at Vallejo are not large enough for the work required, and are to be enlarged.

All the material for track and engines on the C. P. R. R. has arrived or is on the way to this coast

50 or 60 men are at work cutting the Idaho Central Road from Owyhee to the Pacific railroad.

The road to Sacramento will be completed within 30 days. The Y at Davisville is completed.

The *Pajaronian* thinks that the railroad will double the business and wealth of Watsonville.

The highest flight of the cars on the Pacific railroad is 8,680 feet, in the Black Hills.

The California Railroad Relief Society has been organized by the election of officers.

Montana will not be content until she can connect with the Union Pacific Railroad.

The depot of the Southern Pacific Railroad at Gilroy is nearly completed.

Forty saw-mills near Truckee are sawing lumber for the Central Pacific.

Iron enough for 3 miles of road crosses the Sierras every day.

1000 men are at work on the road from Salt Lake, west.

THE CROPS.

In nearly all parts of California the supply of threshing machines is not equal to the demand. Farmers are in a great hurry to get their grain housed before the rains, which, according to all indications will be earlier this season than usual.

At Dickason's ranch near Prescott, Arizona, 22 acres of barley yield 1,300 bushels. 15 acres of wheat yield 800 bushels, and 60 acres of corn yield 3,600 bushels. The ranch has been cultivated only 2 years.

During the month of September, 41,800 tons of wheat were shipped from this city. It was worth $1,620,000. This is the largest amount ever shipped from this port in one month.

The warehouses of Napa are being filled to their utmost capacity, farmers being unwilling to sell at the present low rates.

In Alameda County 90 tons of rasberries have been raised this season. They have sold on an average for 15cts. per pound, yielding over $27,000 from 60 acres of land.

In New Mexico the crops are generally abundant. In some parts of the Territory however, the ravages of the Indians have caused many farmers to abandon their ranches.

In Diablo Valley, Contra Costa County, 280 bushels of wheat were produced on 2½ acres of land this season. 112 bushels to the acre—a tolerably good yield.

Small quantites of hay and grain in Santa Clara County have been injured by the early rains, but the most of the crops had been cared for in season and escaped injury.

Harvesting is about finished in American Valley. Hay is very largely freighted from the valley to Gibsonville and La Porte. It is worth $40 per ton.

The wheat crop in Oregon is estimated at 5,000,000 bushels. 50 acres belonging to one farmer yielded on an averege 50 bushels to the acre.

The latest estimates place California crops as follows: Wool, 10,000,000 pounds; wheat 20,000,000 bushels; wine, 12,000,000 gallons.

Many of the farmers of Arizona have formed an association and bound themselves to sell no corn for less than 9 cents per pound.

The Los Angeles grape crop is at least a month later than usual.

There is a field of nearly ripened rice in Southern Utah.

In Arizona the crops are very satisfactory.

General Selections.

Little Feet.

Two little feet, so small that both may nestle
In one caressing hand—
Two tender feet upon the untried border
Of life's mysterious land.

Dimpled and soft, and pink as peach tree blossoms
In April's fragrant days—
How can they walk among the briery tangles
Edging the world's rough ways?

These white-rose feet along the doubtful future
Must bear a woman's load;
Alas! since woman has the heaviest burden,
And walks the hardest road.

Love for a while, will make the path before them
All dainty, smooth and fair—
Will cull away the brambles, letting only
The roses blossom there.

But when the mother's watchful eyes are shrouded
Away from the sight of men,
And these two feet are left without her guiding,
Who shall direct them then?

How they will be allured, betrayed, deluded,
Poor little untaught feet—
Into what dreary mazes will they wander,
What dangers will they meet?

Will they go stumbling blindly in the darkness
Of sorrow's tearful shades?
Or find the upland slopes of Peace and Beauty
Whose sunlight never fades?

Will they go toiling up Ambition's summit,
The common world above?
Or in some nameless vale securely sheltered,
Walk side by side with Love?

Some feet there be which walk Life's track unwounded,
Which find but pleasant ways;
Some hearts there be to which this life is only
A round of happy days.

But they are few. Far more there are who wander
Without a hope or friend—
Who find their journey full of pains and losses,
And long to reach the end.

How shall it be with her, the tender stranger,
Fair-faced and gentle-eyed,
Before whose unstained feet the world's rude highway
Stretches so strange and wide?

Ah! who may read the future? For our darling
We crave all blessings sweet—
And pray that He who feeds the crying ravens,
Will guide the baby's feet.

—*Florence Percy.*

Other People's Sisters.

Most women have by nature a special fitness for some particular one of the relations of woman's life. Some we had almost said, are born mothers; their foredoomed office is to bear children and then die of maternal worry. They never are themselves until they do have children, and the cares of rearing become a second nature to them—in fact, a sort of anxious dissipation, to which they are as desperately addicted as the person who officiates as father to the dear infants is addicted to his cigar. This sort of woman, of course, seldom shines as a girl. She is an ante-nuptial chrysalis, of the species of "quite-nice-sensible" girls who slides into matrimony before anybody dreams of it, and forthwith disappears from the world. Others—and oh! what glorious creatures they are, some of them—are utter, innate wives. These burst into full bloom on the wedding-day; that, and not the first christening, is the event of their lives. At forty they can play the old-fashioned pieces and sing the deer out-of-date tunes that their husbands love best. They educate their children as well as they can to please them and be like them, and the boy that is *so* like his papa they love very dearly; but they would pitch the entire brood out of the window *seriatim* for their husbands' sakes without a murmur. Then we have those who are nothing all their lives but sisters; who forget their spouses' dinners to kit their brothers' socks, and ever consider that their fathers and mothers have a prior claim on them over every one, and that all the world beside takes them subject to a paternal mortgage recorded on the register of the family Bible. Many are called, but only a select few chosen and predestined to be aunts. We seldom can foreknow these; we know that girls do eventually become aunts, but it is not in human nature to realize that aunts were ever girls. The fact is, they are a shy class, known in their essence only to their individual nephews and nieces; to all others, nice helpful bodies, quite agreeable persons, or old maids, as the case may be, and whom the philosopher has to triangulate, as it were, by a sort of pyschologic geometry—given one side of them and a couple of their angles, he infers the rest.

Another very large class, increasing daily, is that of those young female entities whose forte lies in some future state,

> "In the kingdom of Ponemah
> In the land of the Hereafter;"

who probably are cut out for angels, and are chiefly known by their singularly versatile and contented uselessness in all the various spheres in this life. But above these and beyond these, yet of them—human like them, indistinguishable from them by any one over eight-and-twenty, yet differing from the rest of womanhood in a subtle glorious way, with a difference indescribable to the ey—as a bottle of eau-de-cologne differs from a bottle of water—there are those blest and blessing girls whom the Providence that created bachelors has foreordained to be distinctively Other People's Sisters.

To attempt to initiate any one in the world into the peculiar charm of the most lovely relation in life, would be a deliberate and patent absurdity. It is one of those things like the bouquet of old claret, or spiritualism, or the Greek line of beauty, or Limburg cheese, or chiaro-oscuro, or Walt Whitman—perfectly simple and self-evident and splendid when you do understand the beauty of it, and utterly unintelligible when you don't. Perhaps the only generality that can safely be said of other people's sisters is that they are all natural darlings—darlings *par excellence*. One might think to fix them by their brothers. But, as it happens, other people's sisters do not imply brothers at all. They may have them—there is no reasonable objection, and it is not uncommon that they do—but they may just as well have none at all; it seems as though it ought to make a difference, but does not. When the brothers chance to exist, they are mostly ordinary young fellows enough, towards whom we are apt to find ourselves growing just a little extra-civil; for which civility we berate ourselves in private as mercenary wretches and hypocrites. And so we are. We don't like them, and we can't like them. They are the most cold-blooded creatures in existence. They've no conception of the charms of home. They stalk about the world totally blind to the fact that there is an angel in the house. They wear slippers of the angel's making, and linen of the angels's supervision, without a thrill. They spurn with contumely the offer of the angel to tie their cravats. Nay, most horrible of all, the angel can, and does put its arms around the necks of the brutes and kisses the apathetic monsters, and they mind it no more than—words fail at this last scene. But she, being an angel, loves them still; so for Titania's sake we try to endure Bottom, and are slightly over-civil as before. Only if we were they, what could budge us from the home fire-side? what power would avail to take us to the theatre, or make us play billiards so, or carry us to waste our time with other girls that had not one-millionth part of the fascinating ways of our own sister? And they can't see this. Utterly past finding out, isn't it?

When young men, we are, of course, almost all of us observant, and fond of studying human nature, and (as other people's sisters tell ours confidentially) remarkable readers of character. Thus we cannot but notice how peculiar a way other people's sisters have towards us, and what a winning way it would be if we were at all susceptible, It is very interesting (as a study)—very interesting, indeed. Their little hands have such a strange, shy way of coming out to meet ours when we call, as though they feared risk of being squeezed, and trusted themselves so gently to our excellent moral character. Then there is nobody like them for a companion to the theatre or the opera. They laugh so when we point out that funny nose in the second row of the dress circle. And they are fairly puzzled out of their wits when we tell them, with a great heart-thump at our boldness, that there is only one lovely girl in the whole place. They are so enthusiastic over the music, and so busy with the programme during the ballet. They enjoy the play the second time so much more than when they saw it with Uncle Georgie. They take our arm so provokingly, with just three wee glove-fingers resting on our coat-sleeves, and when we venture to scold them for it, are so meek and so interested to know why we should want a young lady to lean on our arm—it must be very tiresome—and when they do know the way we like best, keep on in their own way with such enchanting timidity. Then they have such delicacy of taste at Delmonico's. They never order anything solid nor heavy. They love ices and charlotte-russe, and adore pistachio cream and strawberries, and *meringue a la n'importe*, and they handle a silver spoon with such unconscious grace, and sip so exactly like bees on flowers, that we outline some verses on the spot, which are much admired in after years by the person to whom we may have dedicated them. And on the way home, if the night is fine, they so emphatically had just as lief walk as not, that we can't see any reason for denying ourselves the promenade home; and we do promenade home, and have compunctious pangs at the length of the walk; and they are so sure that they are not in the least tired that we reassure ourselves. And we decline to come in, and are alone with the moonlight, thinking how superfluously beautiful the world is, and how interesting human nature is as a study. And, like all true students, we resolve to master it. And we do for the most part master that particular branch of the very interesting study; and when we have, it is very, very apt to be the case that we end by concentrating on one bright particular personage our admiration for the whole class, and diminishing by one, income permitting, the number of other people's sisters.—*Round Table.*

MISCELLANY.

In a Balloon—Sensations of Travellers in Air.—"Are you not dizzy looking down from a balloon?" This is a question often asked, and its answer is, that dizziness or giddiness is something entirely unknown in aeronautic travelling, and therein is one of the most surprising facts in ballooning. You look down with the same steadiness and composure with which you look off from a mountain top. Another strange feature is that the balloon seems to stand perfectly still. Common sense teaches you that you are moving when the distance between you and certain objects is widening, but there is no other indication of the fact, nor is there in rising or falling in the atmosphere. Immersed in the air current and travelling at the same, or nearly the same velocity, the balloon seems relatively becalmed. This fact sufficiently explains the utter uselessness of sails and rudder. There is no wind to fill the one, nor fulcrum or resisting force for the other. No difficulty in breathing is experienced at a less height than two or three miles, by persons in health, nor is any other decided sensation felt under ordinary circumstances. There may be a slight ringing or closing of the ears with some persons at a less altitude, but in the upper regions a deafness is experienced. At the height of three and a half miles, the atmosphere is known to have just half the density it has at the surface, and there is, of course, the corresponding decrease of atmospheric pressure. At the surface a man of ordinary size is said to sustain an atmospheric pressure of 25,000 pounds, while at the height named it is reduced one-half, the change bringing with it many discomforts.—*Cor. Boston Journal.*

A Serpent Story.—An Anglo-Parisian journal states that a very singular occurrence has just taken place in the warehouse of the Messageries Imperiales, at Stora. A large case containing two serpents, directed to the Superintendent of the Zoological Gardens at Marseilles, was deposited in the warehouse for shipment. Whilst there a cat, ignorant of what the case contained, got into it. No sooner had it done so than the reptiles sprang at it with the rapidity of an arrow, and squeezed it to death in their immense coils; then relaxed their hold and commenced the process of swallowing. The male serpent seized the dead cat by the head, the female

swallowing the tail. It is well known that when serpents take into their mouth an object of a certain size, the conformation of the teeth and jaws is such that they cannot let go their hold. In the present case both snakes were thus brought face to face, the process of deglutition was arrested, and it became doubtful how the matter would end. At length the female snake made a desperate attempt to swallow the other, and in so doing was choked.

In corroboration of the above facts, the animals have been preserved in spirits of wine. The directors of the Zoological Gardens of Marseilles are going to bring an action against the Messageries Company for the loss of the serpents; whilst the owner of the cat demands that its skin should be given up to him as a matter of curiosity.

Wonders of the Gulf Stream.—There is a river in the ocean. In the severest drouths it never fails, and in the mightiest floods it never overflows. Its banks and its bottom are of cold water, while its stream is warm. The Gulf of Mexico is its fountain, and its mouth is in the Arctic seas. It is the Gulf Stream. There is in the world no other so majestic flow of water. Its current is more rapid than the Mississippi or the Amazon, and its volume more than a thousand times greater. Its waters, even far from the Carolina coast, are of an indigo blue. They are so distinctly marked that the line of junction with the common sea water may be traced by the eye. Often one-half of the vessel may be perceived floating in the Gulf Stream water, while the other half is in the common water of the sea, so sharp is the line and the want of affinity between these waters; and such, too, the reluctance (so to speak) on the part of those of the Gulf Stream to mingle with the common waters of the sea. In addition to this there is another fact: The fishermen on the coast of Norway are supplied with wood from the tropics by the Gulf Stream. Think of the Arctic fishermen burning upon their hearths the palms of Hayti, the mahogany of Honduras, and the precious woods of the Amazon and the Orinoco!—*Christian Instructor.*

One of the gravest of the boarders at the house of Mrs. Battlegash, in Brattle Square, who had been there but a week, came down one morning with a cloud on his brow and a paper in his hand. "Mrs. B.," he said, solemnly, "Do you keep a reputable house?"

"Of course I do," said that estimable lady, with a tartness almost equaling her rhubarb pies; "of course. Why?"

She looked very hot and bellicose.

"Because," replied he, "I have been here now but six days, and during that time there have been left at this house tracts against all of the deadly sins, none of which, I trust, are committed here, and for none of which I am willing to be held responsible. I have a reputation to lose, madam, and I do not wish, even by implication, to be supposed guilty of theft, profanity, intemperance, or—or—or, indeed, any venal offense. If this continues, I shall have to leave."

Paris and London.—The comparative statistics of London and Paris present a few features of difference, which are significant of the different characters of the two communities. The City of Paris contains about 2,000,000 of inhabitants, living in 50,000 houses. London has 3,000,000 of people, and about 360,000 houses,—the proportion of people to a house being five times larger in Paris than in the English capital. The London average is eight and the Paris average forty to each dwelling. The above shows the English preference for separate residences, contrasted with the naturally gregarious habits of the French. A grand democratic feature of French society—the strongest of all, in fact—is the custom of people of wealth and station living in one part of a house, while poor, struggling folks occupy the upper stories of the same. Respectable society in London shudders at such a thing.—*N. Y. Times.*

To an epitaph on a husband and wife, in an English graveyard, this holy text is added: "Their warfare is accomplished."

"Did any of you ever see an elephant's skin?" inquired a teacher of an infant class.

"I have!" shouted a six-year old from the foot of the class.

"Where?" asked the teacher.

"On the elephant," said the boy, laughing.

A Scotch girl went to her father to obtain his consent to marry the chosen one. "Ah, Jennie," said the old man, "it is a very solemn thing to get married." "I know it, father, I know it, but it is much more solemn not to get married."

A bright but rather pert boy went into a stationery store the other day, and asked the proprietor what kind of pens he sold. "All kinds," was the reply. "Well, then I'll take three cents' worth of pig pens."

THE WORLD.

"It's a very good world to live in,—
To lend, to spend, or to give in;
But to beg, or to borrow, or to ask for one's own,
It's the very worst world that ever was known."

To enrich the mind and purify the heart, to keep the tongue still and the arm active, to eat slowly and sleep quickly, this is the true philosophy.

Idleness is hard work for those who are not used to it, and dull work for those who are.

The love that has nothing but beauty to sustain it soon withers away.

How to find happiness—look in a dictionary.

Thomas H. Selby & Co.

IMPORTERS OF METALS,

As follows: Bar Iron, Cast Steel, Boiler Plate, Axles and Springs Tin Plate, Sheet Iron, Iron Pipe, Zinc, Water Cocks, Plumbers' Tools, Iron Wire, Rubber Hose, Tinman's Tools and Machines Blacksmith's do., Cumberland Coal, etc., etc.

Nos. 116 and 118 CALIFORNIA STREET.

SAN FRANCISCO AND PACIFIC

Lead Pipe and Shot Works,

Corner First and Howard Streets,

Manufacture Lead Pipe, Sheet Lead, Bar Lead, Shot, etc., etc.

Books

Of all kinds, on all subjects, conveniently classified, occupy one-half of the first story and the entire second floor of BANCROFT'S BOOKSTORE.

Stationery

Of every description, including all kinds of Writing Papers, Envelopes, Inks, etc., is sold at wholesale and retail at BANCROFT'S.

SAN FRANCISCO,

Importers, Manufacturers, and Wholesale and Retail Dealers in Metalic and Wooden Burial Caskets, Cases and Coffins, Coffin Trimmings, Hearse Plumes, Plume Sockets, etc., etc.

Sole Agents for Barstow's Patent Improved Metalic Burial Caskets and Cases.

Heuston, Hastings & Company,

ARE THE

FASHIONABLE CLOTHIERS

OF

SAN FRANCISCO.

SPECIALITIES.

PRICE AND GUARANTEE.

The largest and most varied stock of Gentlemen's Clothing, Furnishing Goods, Trunks, Bags and Valises, on the Pacific Coast. Every article sold, being of our own manufacture, is guaranteed. Having contracts direct with European and American Manufacturers of piece goods, we thereby effect a saving of fully 50 per cent. in wholesale dealers' profits, and are thus able to offer superior Goods at less than second-rate prices.

STYLES.

Having agents in London and Paris, we introduce the new styles in San Francisco simultaneously with their appearance in New York.

GOODS MADE TO ORDER.

For the accommodation of such as may desire, we have secured the services of a celebrated European cutter, and are prepared to make up piece goods in a style superior to any other house on the coast. Shirts, Ties, Collars, etc., made to order at short notice.

COUNTRY ORDERS.

Goods forwarded by Express to any part of the Pacific Coast on receipt of orders and measures; send for directions for measurement.

Heuston, Hastings & Co.

LICK HOUSE BLOCK,

SAN FRANCISCO.

United States Life Insurance Comp'y,

IN THE CITY OF NEW YORK.

Office, No. 40 Wall Street.

CASH ASSETS EXCEED $2,700,000.

This Company, having a Stock Capital, makes Insurances and Endowments with or without profits. Dividends to Policies with profits are equal to, or larger than those of other, or "Purely Mutual" Companies in available present cash value.

NEW AND IMPORTANT PLANS OF LIFE INSURANCE HAVE BEEN ADOPTED BY THIS COMPANY. SEE THE NEW PROSPECTUS.

Life Assurances, Endowments and Annuities in every form. Profits available after Policies have run one year, and annually thereafter. The reserved Cash fund, for re-insurance, is the largest known to or required by, the ablest and most experienced authorities in Life Insurance, thus affording undoubted security. A liberal non-forfeiture system, as to whole Life or Endowment Policies.

Policy Holders in this Company can use or apply the Dividends of profits in a greater number of ways than is afforded to Policy Holders by any other Company.

The law under which the company is Chartered, provides that if the Capital should, from any cause, become impaired to the extent of Twenty-five Thousand Dollars, or more, the Stockholders SHALL BE CALLED UPON TO MAKE GOOD SUCH DEFICIENCY. This is the only Cash Company in America which affords this safeguard to Policy-holders.

The assured in this Company are not personally liable as in Mutual Companies, which have the power of assessing their members or of reducing the sums insured, in case of deficiency.

CLERGYMEN, insuring in this Company, are allowed a Discount of TWENTY PER CENT. on first year's premium, and a liberal commission will be given on all Insurances influenced by them.

Agents wanted, on the most advantageous terms.

Forms and every information will be furnished by

B. J. DORSEY,
General Agent for the Pacific Coast,
Southeast Corner Sansome and California Sts., San Francisco.

FAMILY READING.

Grannie's Trust.

Dear Grannie is with us no longer!
Her hair, that was white as the snow,
Was parted one morning forever,
On her head lying soft and low:
Her hands left the Bible wide open,
To tell us the road she had trod.
With waymarks like footsteps to tell us
The way she had gone up to God.

No wonderful learning had Grannie.
She knew not the path of the stars,
Nor aught of the comet's wide cycle,
Nor of Nebula's dim cloudy bars;
But she knew how the wise men adoring,
Saw a star in the East long ago;
She knew how the first Christmas anthem
Came down to the shepherds below.

She had her own test, I remember,
For people—whoe'er they might be—
When we spoke of the strangers about us,
But lately come over the sea;
Of "Laura," and "Lizzie," and "Jamie,"
And stately old "Esselby Oakes,"
She listened, and whispered softly—
"My dear, are these friends meetin'-folks?"

When our John went away to the city
With patrons, whom all the world knew
To be sober and honest, great merchants,
For Grannie this all would not do;
Till she pulled at John's sleeve in the twilight
To be certain, before he had gone;
And he smiled as he heard the old question—
"Are you sure they are meetin'-folks, John?"

When Minnie came home from the city,
And left heart and happiness there,
I saw her close kneeling by Grannie,
With the dear wrinkled hands on her hair;
And amid the low sobs of the maiden
Came softly the tremulous tone—
"He wasn't like meetin'-folks, Minnie;
Dear child, you are better alone."

And now from the corner we miss her;
We hear that reminder no more;
But still, unforgotten, the echo
Comes back from that far-away shore;
Till Sophistry slinks in the corner,
Though Charity sweet has her due,
Yet we feel, if we want to meet Grannie,
'Twere best to be meetin'-folks, too.

The Captain and the Quadrant.

A godly man, the master of an American ship, during one voyage, found his ship bemisted for days, and he became rather anxious respecting her safety.

He went down to his cabin and prayed. The thought struck him, if he had with confidence committed his soul to God, he might certainly commit his ship to Him; and accordingly, he gave all into the hands of God, and felt at perfect peace; but still he prayed that if He would be pleased to give a cloudless sky, at twelve o'clock, he would like to take an observation, to ascertain their real position, and whether they were on the right course.

He came on deck at eleven o'clock, with the quadrant under his coat. As it was thick and drizzling, the men looked at him with amazement. He went down to his cabin, prayed, and came up. There seemed still to be no hope. Again he went down and prayed, and again he appeared on deck with the quadrant in his hand. It was now ten minutes to twelve o'clock, and still there was no appearance of a change; but he stood on the deck, waiting upon the Lord, when, in a few minutes, the mist seemed to be folded up and rolled away as by an omnipotent and invisible hand; the sun shone clearly from the blue vault of heaven, and there stood the man of prayer with the quadrant in his hand; but so awe-struck did he feel, and so "dreadful" was that place, that he could scarcely take advantage of the answer to his prayer. He, however succeeded, although with trembling hands, and found, to his comfort, that all was well. But no sooner had he finished taking the observation than the mist rolled back over the heavens, and it began to drizzle as before.

This story of prayer was received from the lips of the good Captain Crossby, who was so useful in the Ardrossan awakening; and he himself was the man who prayed and waited upon his God with his quadrant in his hand.

"Prayer makes the darkened cloud withdraw;
Prayer climbs the ladder Jacob saw,
Gives exercise to faith and love,
Brings every blessing from above."

Living by Rule.

Living by rule, as a Medo-Persian law, inflexible, is very unwise, especially if a person is in reasonable health. We have given a great multitude of counsels on the subject of health and disease, and in connection with the statement that we have not lost an hour from our office, on account of sickness, in a quarter of a century and more, many have inquired, with a good deal of interest, "Do you live up to the rules you give others?" Certainly not. Man is not a machine, that must be turned in a certain direction, or it will be destroyed; nor like a locomotive, which must run on one fixed track, or not run at all. The Architect of all worlds made us for acting under a great variety of circumstances, and in infinite wisdom and benevolence has given to man a mechanism of wonderful adaptability, by which he can live healthfully on land or sea; in the valley or on the mountain top; in the tropics or at the poles; on the barren rocks or in the rich savannas. Our modes of life must be adapted to our age, our occupation, and the peculiarities of our constitution. There are certain general principles which are applicable to all. Every man should be regular in his habits of eating; should have all the sound sleep which nature will take; should be in the open air an hour or two each day, when practicable, and should have a pleasurable and an encouragingly remunerative occupation, which keeps him a little pushed, and they are the happiest who are in this last category; at the same time, if a man accustoms himself to go to bed at nine o'clock, he need not break his neck or get into a stew if circumstances occur to keep him up an hour or two later now and then; and so with eating, exercise and many other things. No one ought to make himself a galley-slave to any observance; occasional deviations from all habits are actually beneficial; they impart a pliability to the constitution, give it greater range of healthful action. Don't go into a fit if dinner is not ready in an instant. Deliver us from a machine man, a routinist; "for which we ever pray."—*Hall's Journal of Health.*

A Sharer with Christ.

It is a sweet, joyful thing to be a sharer with Christ, in anything. All enjoyments where He is not, are bitter to the soul that loves Him, and all sufferings with Him are sweet. The worst things of Christ are more truly delightful than the best things of the world; his afflictions are sweeter than their pleasures, his "reproach" more glorious than their honors, and more rich than treasures, as Moses accounted them. Love delights in likeness and communion, not only in things otherwise pleasant, but in the hardest and harshest things, which have not any thing in them desirable, but only that likeness. So that this thought is very sweet to a heart possessed with this love. What does the world by its hatred and prosecution, and revilings for the sake of Christ, but make me more like Him, give me a greater share with Him in that which He did so willingly undergo for me? "When He was sought for to be made a king," as St. Bernard remarks, "He escaped; but when He was brought to the cross, He freely yielded himself." And shall I shrink and creep back from what He calls me to suffer for his sake? Yea even all my other troubles and sufferings I will desire to have stamped thus, with this conformity to the sufferings of Christ, in the humble, obedient, cheerful endurance of them, and the giving up my will to my Father's.—*Archbishop Leighton.*

Standing Fire.

A young soldier, going to his barrack-room to sleep for the first time, quietly knelt down to pray in the presence of his comrades. This act was the signal for a storm. Hisses, shouts, and whistling filled the room with hideous noise. Belts were thrown at the kneeling soldier, and one man leaped upon the bed and shouted in his ear. But he was unmoved to the end of the prayer, when he arose and silently went to his repose. The next night his comrades eagerly watched to see if he would dare to pray a second time. To their surprise, he again dropped on his knees, and they saluted him with the same noises as on the previous evening. He did not flinch however. The third evening he kneeled down and prayed, regardless of their continued mocking and noise. On the fourth evening the noise was less; on the fifth it was still less, and on the sixth one of the soldiers exclaimed—"He stands fire! he stands fire! He's genuine." After that no one disturbed him. He had overcome opposition—he had won respect.—*Presbyterian.*

Nelson.

Human Nature is ever very frail. No man ever had a stronger sense of it under the influence of a sense of justice, than Lord Nelson. He was loth to inflict punishment; and when he was obliged, as he called it, "to endure the torture of seeing men flogged," he came out of his cabin with a hurried step, ran into the gangway, made his bow to the General, and, reading the articles of war the culprit had infringed, said, "Boatswain, do your duty." The lash was instantly applied, and consequently the sufferer exclaimed, "Forgive, me Admiral, forgive me!" On such an occasion, Lord Nelson would look around with wild anxiety, and, as all his officers kept silence he would say, "What! none of you speak for him! avast! cast him off!" and then add to the suffering culprit, "Jack, in the day of battle remember me!" and he became a good fellow in future. A poor man was about to be flogged—*a landsman*—and few pitied him. His offense was drunkenness. He was being tied up; a lovely girl, contrary to all rules, rushed through the officers, and falling on her knees, clasped Nelson's hand, in which were the articles of war, exclaiming, "Pray, forgive him, your honor, and he shall never offend again." "Your face," said the Admiral, "is a security for his good behavior. Let him go; the fellow cannot be bad who has such a lovely creature in his care." The man rose to be a lieutenant.—*American Presbyterian.*

Sympathy.

He who has had experience of great and sore trials, and has borne them well, is the most cheerful companion of a sorrowing heart. Having sounded the depths of affliction, he can best guide his friend in them. Desponding Christian, in the river of Death, said to Hopeful, "I sink in deep waters; the billows go over my head; all the waves go over me." Hopeful said, "Be of good cheer, my brother; I can feel the bottom, and it is good." Having partaken of the affliction and of the consolation, such a one can bring a smile of peace and even joy upon a careworn soul, when prosperous friends would only deepen the gloom. Let the angel of the Lord encamp around me to deliver me, but give me the "Man of Sorrows" for my friend. I want a friend who has been stricken, smitten of God and afflicted. —*Adams.*

Deaths of the Apostles.

The following is the manner in which death overtook the Apostles: Matthew is supposed to have suffered martyrdom, or was slain in the city of Ethiopia. Mark was dragged through the streets of Alexandria, in Egypt, till he expired. Luke was hanged to an olive tree in Greece. John was put into a boiling cauldron at Rome, but he escaped death. He died a natural death in Ephesus, Asia. James, the great, was beheaded at Jerusalem. James, the less, was thrown from a pinnacle and beaten to death. Philip was beheaded. Bartholomew was skinned alive. Andrew was crucified and pounded while dying. Thomas was run through with a lance. Jude was shot with arrows. Simon was crucified. Matthias was stoned. Barnabas was stoned to death. Paul was beheaded by the tyrant Nero, at Rome.

Special Prayer.

Our fathers believed in special answers to prayer They were not stumbled by the objection about the inflexibility of the laws of nature; because they had the idea that when the Creator of the world promised to answer human prayers, He probably

understood the laws of nature as well as they did. At any rate, the laws of nature were his affair, and not theirs. They were men, very apt, as the Duke of Wellington said, to "look at their marching orders"—which, being found to read, "Be careful for nothing, but in every thing by prayer and supplication with thanksgiving, let your requests be made known unto God," they did it. "They looked unto Him and were lightened, and their faces were not ashamed."

Young Folks.

The Coming Man.

Beneath the shade of yonder tree,
With trowsers rolled up to the knee,
Seated beside the running brook,
"Fishing for bites" with line and hook,
Behold the boy whom Fate hath sent
To be our future President.

Whilst yonder youngster, with his kite,
Who seems to take supreme delight
Sending "messengers" up the twine,
Soon will use a telegraph line;
For this same jolly little wight,
Will oft in Wall street fly his kite.

And driving cows on yonder road,
With naked feet, like warted toad,
Painted by sunbeams ruddy brown,
Whistling "the tune the cow died on,"
You see the genius who, ere long,
Will "move a nation with a song."

Those boys now building yon rough raft,
Will railroads build, and ocean craft;
Out from that school-house daily pour
Statesmen and orators a score;
Who knows the wealth hid 'neath a hut?
What diamonds rough lie yet uncut?

—*Western Rural.*

Coming Down in the World.

It lies like a great pain and a great shadow on my heart, the way papa looks every day when he comes home from his business. He's grown so pale and thin, and has such a troubled, anxious, harassed look, that I can't bear to see it. If I sit down and talk to him about my doll, and my lessons, and the walks I've had, he don't listen as he used to, and draw me close up to him, and look in my face with his pleased smile, and pull my curls, and say, "Go on, Pussy," when I stop. I know, when I look up in his face, that he hasn't heard a word of what I've been saying; and last night, when I carried him the new stereoscope aunt Mary had sent me, he just turned away, and said:

"There, there, Effie; I can't be bothered with any such nonsense as that now!"

It just made me feel so bad that I sat down on a corner of the lounge and cried all alone by myself, and papa walked up and down the room. Suddenly he turned round and saw me.

"Why, Effie!" he said, and came right towards me, and took me up in his arms and kissed me. "Did papa speak cross to his little girl? She mustn't mind, for he's in a great, great deal of trouble now, and don't know what he says."

"Oh, papa, I'm very sorry! How soon will the trouble be gone?" I asked.

"God only knows, my dear child!" and he set me down, with *such* a sorrowful look.

Last night, when Guy and I were looking over that new book of "Pictures of the Principal Cities of Europe," mamma came in and looked at us a few moments, and the tears came into her eyes, and she wiped them away, and then she rose up suddenly and left the room, and I said to Guy, after we had looked at each other a moment—

"Did you see that, Guy?"

"Yes, I did, Effie," he said, and he looked as grave as an old man.

"Papa and mamma are in some great trouble; what does it mean, Guy?"

My brother is nine, while I am only seven, so I thought he might know more about the matter than I did.

"I think it's some trouble about papa's business, and he's afraid he'll lose all his property."

"Well, would that be anything very bad?" I asked.

"Effie, you talk just like a girl. Of course it would be very bad, indeed. We should be poor folks, and I don't know what would become of us."

"Then you'd have to go without the new pony papa promised you when you were ten; and I!—O, Guy, mamma said if I was a good girl until New Year's, I should have a party. How could I give that up?"

"Well, I hope it won't be so bad as that for either of us," answered Guy, and his face was graver than ever, and I thought he felt just as if he would like to cry—his heart is so set on the new pony.

There's a shadow over the whole house. I can feel it; and I go about on tip-toe, and don't speak above a whisper. I wish the old time would come back, when we all looked and felt happy; but, dear me, I haven't the heart to go around singing and playing, as I used to.

It's all come out at last; and I can't tell why, I don't feel half so bad as I did, though it seems as though I'd grown a great deal older and a great deal stronger, since last night. We were all sitting together, just at night—mamma, Guy, and I. Somehow, as it grew dark, my heart grew heavier, and I went and put my arm around mamma's neck, as she sat still and looked into the fire in the grate, and I said:

"Mamma, mayn't Martha light the gas, and then won't you play some pretty tune on the piano?"

She looked at me and smiled, and pinched my cheek, and I knew that she was going to say "Yes," and Guy started up and sprang to open the piano, when the front door opened and we heard papa's footsteps ring along the hall. They came right up stairs, toward the door, as Guy opened. Papa did not speak a word; he came right towards the fire; but I knew that something very bad had happened, as soon as I looked in his face.

"O; Willard, what *is* the matter?" exclaimed mamma, laying her hand on his arm.

He turned and said:

"Mary, the worst has come. I've gone under, to-day. I'm a poor man."

"Mamma grew very pale; the tears ran right over her cheeks; but she tried to smile, for all, and said—

Well, Willard, my dear husband, we won't despair. You've got this comfort: you've done the best you could."

I believe that I have," said papa. "I haven't wronged any man, and for myself alone, I could stand it; but, there's you and those dear children! O Mary, that's the thought that cuts me to the quick!"

"Don't let it, my dear husband. God will take care of us, and give us good, brave hearts to carry us through this time of trial."

"Why, Mary, I didn't suppose you'd take it like this;" and papa drew mamma to him.

I went up to them and asked:

"Papa, is it true we're poor folks now?"

"Yes, my little girl, papa has failed, and lost all his property, and he's only got mamma, and Guy, and Effie, to comfort him now."

"Well, papa, I don't believe it's so very bad to be poor. I'll go without my New Year's party, and wear my old dresses for a year."

"And I'll go without my pony," said Guy; and I knew it cost him more to give up this than it had me to let my party go.

"They've got your spirit, Mary," said papa, and he really smiled. "I begin to feel already as though we should weather the storm."

"Of course we shall," said mamma. "We must look the matter bravely in the face, and make up our minds to come down in the world cheerfully and submissively. It won't be so bad, after all, Willard. We'll break up here and go off into the country, and back to the dear old cottage where you found me twelve years ago. I can be happy there again with you and the children, and almost forget that I ever left it. Aunt Rachel will grow young in her old age, to have us back, and in the green fields and the sweet mountain air, our boy and our girl will forget to sigh for the lost luxuries of their city home."

"And we can keep a cow, can't we, mamma, and feed the chickens, and ride horseback on aunt Rachel's old gray, every day, can't we?" I asked.

Mamma laughed and kissed me.

"Yes, little girl, you can do all those things; and you and Guy must learn to take care of yourselves as much as possible, for we can't afford to keep but one girl, and there'll be no nurse, nor chambermaid, nor waiter any more; for we're poor folks, and shall even have to sell a great part of our furniture."

"Well, mamma, we couldn't put it in aunt Rachel's cottage, you know. But I'd quite as lief be there as here, for don't you remember, I cried when we came away last summer?"

"What a little philosopher!" said papa.

"And Effie, you and I can go and ride on farmer Watson's loads of hay, and we can go off into the woods for berries and nuts; and in the barn for eggs every day; and watch the little black ducks go swimming in the pond. O, I tell you, Effie, it'll be glorious!" cried Guy, clapping his hands.

"On the whole, I guess, Guy," I said, that it's better to be poor folks and live in the country. One can have such good times, you know!"

Papa and mamma laughed outright; but there were tears in mamma's eyes all the time; and at last she said:

"May-be it's for the best, after all, Willard. God may have sent this to make our boy and girl a better man and woman; for I have often trembled lest this life of ease and luxury should make them weak and selfish. As for you, dear, I've no fears. You'll get into business again, when the shock is over, and can take care of your little flock, for I'm resolved it shan't be much of a burden on you for the next five years. We will trust in God, and we shall weather the storm."

"So we shall," said papa, with a smile that was like his old one. "And, Mary, we shall learn one of life's grandest lessons—that there may be calm, peace, and contentment in *coming down in the world!*"—*From Grace and Clara, and other Tales* (*Pres. Board.*)

Charlie's Obedience.

Turning into a certain street, I saw a company of boys playing very earnestly, and evidently enjoying themselves greatly. One I noticed in particular, who seemed to be the leader of their sports; and just as I came up with them he was proposing a new game, and giving them instructions in regard to it. His whole heart seemed to be in the thing.

At this moment a window was thrown open in the house I was passing, and a sweet, gentle voice called,

"Charlie, your father wants you."

The window at once closed, and that mother, as I took her to be, immediately withdrew, without even stopping to see whether Charlie heard.

The boy was so busy that I doubted if that quiet voice would reach his ear. But it seemed she knew better than I. The words hardly escaped her lips when everything was dropped; the boys were left at play, and Charlie was soon within doors, where, of course, I could not follow him.

Charlie had learned to obey.

Always remember that a prompt, cheerful obedience is what you are to render parents and teachers. Do not wait to be spoken to the second time, but run at the first call.—*Observer.*

News Summary.

PACIFIC COAST ITEMS.

A large flouring mill, warehouse, and drug store are being built at Davisville. This is one of the promising towns on the Vallejo and Sacramento Railroad....Many new houses of brick and wood are going up in the village of Santa Clara....The Napa gas works are now complete, and pipes are being laid in the upper part of the town. There are 12 street lights. 75,000 feet is the amount of gas produced per month....Since the completion of the Valley Railroad, great improvements have been made in Calistoga. ....Business is excellent in Vallejo....A flume half a mile long is being built along the bank of the Truckee River, says the *Tribune*, for the purpose of floating lumber down to the railroad....Hornitos is being rapidly rebuilt....Property in Watsonville is daily increasing in value....The population of Corvallis, Oregon, is between 600 and 700....The Willamette Woolen Mills, in Oregon, are running night and day, and cannot fill their orders....In the town of Olympia, W. T., five newspapers are published....The Marysville Woolen Mills are at work exclusively on blankets....More building is being done at Haywood than in any previous season....Value of property in Sonoma County, $4,720,513. Los Angeles contains about 10,000 inhabitants....Silver City, I. T., has more than doubled in size and population during the past year, and is gaining now faster than ever. ....There are 200 houses in Gilroy. 30 more are being built....A fine brick school house is to be commenced immediately at Paradise City....A large amount of real estate has recently changed hands in Oregon City, most of it with a view to immediate improvement....A tub and pail factory has been established in Shasta....A steamer is being constructed at Utsalady, W. T., which will be 140 feet in length and have double engines. Several schooners are being built at the same place....At the recent sale of land in Vallejo, lots 50x100 feet sold on an average for $300....The increase in the value of real estate in San Francisco during the past year has been over $7,000,000. The present value on the assessment rolls is $65,452,965....Two vessels are on the ways at Steilacoom, W. T.....There is much activity at the various ports on Puget Sound. Many vessels are being built, and the lumber trade is good. There is much complaint, however, of want of help....Santa Clara was never more prosperous, nor business more brisk, says the *News*. ....Light draught steamers still pass without difficulty between Stockton and Tuolumne City....The whaling companies at Monterey are quite successful in their operations this season, having captured several large whales....Pinos Altos is the growing town of New Mexico.

The San Jose *Mercury* says that San Francisco capitalists have purchased a tract of 1,800 acres of fine land in Santa Barbara County, which they will divide into small farms to be sold to actual farmers. The Olympia (W. T.) *Transcript* thinks that capitalists would do a good thing if they would make such a movement in that Territory.

Among the practical advantages resulting from the recent ascent of Mt. Baker may be mentioned the discovery of vast supplies of coal and ice. Companies have been formed for the purpose of working the coal fields and supplying British Columbia with ice from the glaciers.

A "Professor" of legerdemain has been doing wonderful things in Amador County. One of his most successful feats, according to the *Ledger*, is to order a large number of posters printed, and then leave without paying for them.

A pear tree on Russian River has this season produced one crop of pears weighing a pound each, a second of pears of the size of hens' eggs, a third as large as hickory nuts, and is in blossom for the fourth crop.

Active movements are being made to arrest the shameful waste of timber on the public lands in this State.

An earthquake, with a rushing noise like a heavy rain and wind storm, was recently experienced in Ukiah.

One hundred and twenty-five school children were vaccinated in Virginia City one day last week.

There were 25 deaths in Stockton during the month of September. The usual number is about 7.

Sixty ox teams, with over 600 Mormon emigrants, arrived in Salt Lake City last week.

The sum of $13,000 has been raised in this city for the Peruvian sufferers.

Fifteen families from Napa have settled in Bear Valley, Merced County.

A Londoner has sent two mosquitoes to Sacramento in a letter to a friend. "'Coals to Newcastle' was nothing to that," says the *Morning Chronicle*.

The *Call* is rejoicing in the prospect of a first class libel suit.

TELEGRAPHIC.

Eastern.—An arrangement, to go into immediate effect, has been made by the P. O. Department to have all mail-matter carried overland....The Union Pacific Railroad is now completed and the cars running to Green River....A skeleton of a Mastodon has been discovered in Canada, on Lake Ontario, and of a Crocodile in Kansas. Both are much larger than any species now existing....The corner-stone of a new State House, was laid at Springfield Ill., on the 5th. The House is to cost $5,000,000....A London engineer who constructed the underground railways of London, has taken a contract to engineer the New York road....The 20th annual Convention of the Free Will Baptists met at Buffalo on the 6th. 400 delegates were present....A reception was given to Gen. McClellan in Philadelphia, on Thursday 8th inst....A fire in Troy, N. Y., on the 7th destroyed property worth $200,000.

Southern.—The Bill to prevent distinctions of color in public conveyances, etc., has been lost in the Georgia Legislature....The people of Cole County, Missouri, have retaliated on the Ku-Klux murderers by capturing and hanging four of them....New Orleans has been partly flooded by recent heavy rains....4,000 stands of arms, thought to be designed for the negroes of Arkansas, have been stopped at Memphis....The Georgia Legislature has expelled Beard, one of its members, he having more than one-eighth negro blood in his veins....The Governor of Alabama has signed the Registry Bill....Three men attempted to chastise Mr. Bently, teacher of a colored school in New Orleans. The consequence was a riot, in which 100 negroes were killed and wounded. The press of the *Progress* was destroyed and one of the editors was lynched. 15 Republicans were also killed by Democrats at Shreveport. 3 of the latter were killed....The Texas Camanches threaten war.

Personal.—E. V. Robbins, President of the Chicago Board of Trade, recently failed for $100,000....Sarmiento the newly elected President of the Argentine Confederation, is working hard to secure peace between Brazil and Paraguay....Sen. Cole reached Council Bluffs on the 3d, in 9 days from Sacramento....R. H. Dana Jr. will lead the opposition to Gen. Butler, in the 5th Massachusetts District ...Pierre Choteau, one of the oldest and wealthiest citizens of St. Louis, died on the 3d inst....Mrs Lincoln sailed for Europe on the 5th inst....Seward is said to consider the present time favorable for the acquisition of Cuba....Gen. Dyer has been relieved of the charge of the Ordinance Bureau until charges against him can be investigated.

Political.—A large and enthusiastic mass meeting has been held by the Democrats of Selma, Alabama....The Soldiers' and Sailors' Convention held a great mass meeting at Philadelphia, on the 1st, in favor of the Republican party. Gen Burnside presided....The Colored people held a National Convention in Boston, on the 5th....The municipal elections in Connecticut took place on the 5th, the Democrats being victorious. Both parties claim to have gained votes....The Democrats held on Monday, the largest meeting ever held in New York. 90,0000 people joined in the procession.

Foreign.—An unsuccessful attempt to assassinate the Viceroy of Egypt was made at Cairo, on September 30th.... Disraeli charges the Opposition with an attempt to destroy the Church of England, and re-establish Popery....4,000 people lost their lives in Ecuador during the late earthquake. ....There are rumors of a conspiracy to assassinate the Sultan at Constantinople....The World's Peace Congress meets at Rome on the 23d instant.

The Spanish Revolution.—The revolution seems a perfect success unless the insurgents should quarrel among themselves....A large part of the people desire a Republic. The General in command of the National Guard favors that form of Government. Gen. Prim approves it....A Provisional Government has been formed with EsPartero at the head, and Gen. Prim as Secretary of War. The Queen protests against this movement. She is at present at Bayonne, in France.

Current Topics.

The Board of Foreign Missions of the Reformed Church has adopted a plan by which the co-operation of the Church may be secured, that has some new features. The difficulty experienced by all such organizations is respecting the means by which their wants and work may be brought home to every individual. Only a few, in comparison with the whole number, are accustomed to manifest any sense of responsibility for the support of Missions. Only a few give, according to their ability, into the treasuries of our Boards. The ever increasing demand of the work cannot be answered while this remains true. Hence this attempt to press a conviction of personal obligation upon every church-member. The method proposed is "to form an association, or missionary society, in every church, through which every member, and every baptized person old enough to understand our foreign work, shall be called upon and requested to contribute to the support of our missions." The Committee express the opinion that if this business be entrusted chiefly to Christian women of the churches, it will be more regularly and thoroughly performed, than if committed to any others, and press the formation of such societies with female collectors without delay. The success of this plan will be watched by other denominations, as it is not unlikely that it will succeed. There may not be a necessity to form any new association within the church, in most cases, since the Church itself should be competent for all such work, but some mode, that shall be more effective in personally teaching every member, will both cultivate a missionary spirit more extensively among Christians, and add largely to the funds for the prosecution of the work.

The prominence given to Theological Instruction in the discussions and plans of different denominations at this time, proves that the leading minds of the Church are aware of the real demands to be met by us within the next few years. These demands include more than that ministers of the Gospel be supplied in the ratio that our country is being settled. They are more emphatic respecting the kind of ministers who shall have this sacred charge in trust. Many persons who remember the reverence with which clergymen were regarded in other days, and in the older portions of the land, may regret the fact, yet the fact must be confessed, that now and among us that reverence for the mere office is but little known. Preachers must command respect, for other reasons than because they have been licensed to preach. They must gain influence, not expect that it will attend them. They must be men of power, mental and spiritual, or they will soon drop into the ranks of other men to whom the public give little heed. The necessity for the divine injunction that they be "thoroughly furnished," was never more imperative than now, and our best, most learned, most practical, most devoted leaders in the Church should be selected to teach and train those who are to defend and urge on Christianity among the next generation. We mean *both* when we say *teach* and *train*, for a large part of the preparation necessary to success in the struggles of the coming years on the Pacific Coast, must be that acquisition of skill in the use of faculties and knowledge, that power with men as well as with subjects of thought, which shall be a pledge of ability to cope with the legion of opposers that must be encountered. We are particularly gratified with the election of Dr. Dwinelle by our Congregational brethren, as their first Professor in the Seminary they will soon have complete. He has a noble opportunity to do a noble work for the Master and the Church, he is himself well fitted for the service, and we trust he will soon have a number of young men under his tuition. In due time the other Churches will follow this worthy example, and they will be wise if they do not long postpone action in this direction.

Some of our farmers have doubted whether trees will attain any size in those portions of the State in which nature has not produced them. Those who have taken pains to set out locusts, and forest trees, have been ridiculed by their neighbors who deem themselves wiser than they. Those who have advocated the planting of trees upon highways, for ornamentation and comfort, have been told that they would grow only for a few years and then would die. The experiments of farmers in prairie regions of the Western States, after sufficient time has passed to test the question, are likely to dispel the fears of all who have been affected by them in this more recently settled country. They have found that not only forest trees, of the kinds found in the timbered lands of the same latitude, but pines and larches, and other species that are thought to be more difficult to cultivate, grow luxuriantly and give satisfactory promise of long life. The larch, especially, is highly recommended as valuable for fence, and for other uses where durability is required. Let no man who has an acre of ground, delay to plant liberally these gifts of God, that may completely change the present bare condition of our country into one of most attractive beauty.

On the 1st of October, a law was to take effect in Ohio, compelling all physicians to suspend practice who have never received regular diplomas. A vast number of men will find their occupation gone, and the public will gain much from their loss. It is real trifling with the life and comfort of the people, that so little study or skill is necessary that one may practice upon us when we are sick. Able physicians do not have credit for their attainments, while they are compelled to suffer from the incompetence of quacks, and sensible men are losing confidence in all who offer to cure us of our ills, because they find themselves so often imposed upon. All classes, save the imposters themselves, would be blessed by the enactment of a law in every State, as stringent as that now in force in Ohio.

Missions among the heathen are peculiarly successful, when within a few years the converts are gathered into churches, and made to feel something of their responsibility touching their countrymen. A native church, with a native pastor, and members enough for self-support and labor without, is a splendid and abiding monument of missionary fidelity and wisdom. Such a church is reported at Shanghai. It has forty members, and has selected one of the number to labor as an evangelist in the neighboring villages, to be supported entirely by the native Christians. There are similar churches in Amoy, and in other cities of China, from all of which the light shines forth with steady and increasing radiance.

A new element is to have a place in the tide of emigration to this country from the older nations of the world. Sometime since it was announced that a gentleman had arrived in New York from Turkey, the object of whose visit was to gain information respecting the probable advantage should a colony of Austrians decide to remove to this country. Later, an Armenian priest from Constantinople preached to a company of his countrymen in New York, more fully unfolding the plans that have been formed in relation to this colony. From this sermon, as translated for the reporters, it is learned that there are Protestantized Armenians at Constantinople in considerable numbers, who desire to remove to some land of religious toleration, and they are favorably looking towards the United States as the land they seek. The Southern portion of our territory resembles, in climate and natural productions, the region on the Mediterranean, which is now their home, and there is little doubt that a large colony will soon land on our shores. When emigration begins for such a cause, if the pioneers do not report disappointment, it increases at a rapid rate, and we may have thousands of this ancient people among us within a few years.

An attempt was recently made by two vile creatures of this city, whose very names are synonyms of infamy along the whole coast, to ruin the character and debauch the lives of two innocent persons, which was frustrated by the strength of their virtuous principles. Here, doubtless, the matter would have ended, and the conspirators escaped even the meager penalty which the law metes out to their crime, were it not for the efforts of the prosecuting attorney, Henry Byrne, Esq., whose address to the

jury tore away all the defenses which the sophistry of the opposing counsel had thrown round the criminals, and secured from the jury a verdict of conviction ten minutes after they had left their seats. One of the defendants' counsel charges that Attorney Byrne "bid for the applause of the populace, and he got it." We are glad to hear that the sentiments of Mr. Byrne's plea met with the hearty response of approbation from the people. We feel that more than this is due to him. We hold that he should be honored for this official effort by every lover of purity and virtue on the Pacific coast; that his name should be mentioned with praise in every circle, and that by the generous sympathy of the whole community he should be able to feel that his noble and successful endeavor in the exercise of his official capacity to shield the unprotected from the assaults of vice and libertinism, and punish these two infamous traffickers in female purity, has secured not only the applause of what the opposing counsel terms the "populace," but the earnest heart-felt approval and thanks of every true man and woman on the coast. We are confident that in Mr. Byrne's old age, no one official act of his life will stand out brighter in his remembrance than the successful prosecution of these two noted conspirators against the dearest interests of humanity.

Religious Intelligence.

PACIFIC COAST.

Chinese Missions.—A committee of 5 clergymen of the M. E. Church appointed by the Conference at its late session in this city, to oversee the establishment of a mission among the Chinese in our midst, have issued a circular on this subject addressed to all who feel an interest in the subject. The circular shows that whatever may be our *theories* respecting this people, the *facts* are that we have already 60,000 of them, that the number of arrivals is increasing, and, owing to the provisions of the new treaty, will continue to increase. It is too late to think of shutting out this Asiatic tide. The important question is how to imbue the Chinese with the spirit of our institutions, so that they shall become a useful portion of our nation. The natural method of accomplishing this result is by education. The Methodists have determined to commence this work in earnest. They have appointed Rev. Otis Gibson to take charge of the work. He will immediately begin the work of organizing schools and endeavoring to awaken an interest in the minds of the Chinese. The committee ask help from our citizens. The immediate necessities are 1st, a dwelling house for the missionary; 2d, a chapel and school-room for the proposed central school. Our Methodist brethren deserve the liberal support of all in their worthy undertaking. We wish them abundant success. Want of space prevents us from publishing the circular in full.

Debt Paid.—The liberal patrons and members of Howard Presbyterian Church in this city have recently, by active effort, succeeded in raising sufficient money to pay the debt of their church on Mission street. At the close of the services last Sunday evening, Rev. Dr. Scudder stated that $46,564 had been raised by subscription during the preceding week. This pays the debt, and leaves $1,000 as the foundation of a fund for building a vestry. The cost of the proposed building will be about $6,000, and it is hoped that this sum will be raised, and the vestry erected without a long delay. This Society has one of the finest and most convenient places of worship in the city, and being now free from debt, can hardly fail of great prosperity in the future.

Association of California.—This association held its annual meeting at the First Congregational Church in Oakland, commencing on Wednesday of last week. The meeting was well attended by the Congregational ministers of the State. Thirty-two clergymen were present and 21 delegates. Rev. Dr. Stone was chosen Moderator and also preached the annual sermon. The same degree of interest was manifest that has been experienced at the annual meetings of other denominations. Much important business was transacted. The next meeting is to be held at the Green St. Church in this city.

Lutheran.—A flourishing society of this denomination has been established in Oregon. A fine church edifice has lately been erected at Aurora for its use.

SYNOD OF ALTA CALIFORNIA.

The Synod of Alta California met in the Howard Presbyterian Church, San Francisco, on Wednesday, October 7th, at 7½ P. M., and was opened with a sermon by the retiring Moderator, the Rev. I. N. Hurd of San Francisco, from Matthew, 10, 16, "Behold I send you forth as sheep in the midst of wolves; be ye therefore wise as serpents and harmless as doves."

After the sermon the Synod was constituted by prayer.

The Rev. James Pierpont was elected Moderator, and the Rev. J. M. Alexander, Temporary Clerk. The first half hour of each morning session was spent in devotional exercises. Thursday evening was spent in hearing the narratives of the state of the Churches. At 2 P. M. on Friday, the Synod united in commemorating the Lord's Supper.

The following report was presented by the Committee on

THE STATE OF RELIGION.

Your Committee, to whom was assigned the duty of preparing the annual narrative of the state of religion within the bounds of the Synod, would respectfully report: The year now closed has not been marked by any striking evidence of spiritual prosperity. There is, however, great cause for thanksgiving and joy. Though no great revival has occurred, still the inspiring and guiding presence of the Lord has been manifest in our churches, in the increasing number of attentive hearers of the truth, the improved tone of piety, the stability of Christian character, the interest taken in prayer meetings, and the benevolent activity of the Church. The sabbath school work seems to be especially flourishing. Perhaps at no period in the history of the Church on this coast has the aggregate attendance on the means of grace been greater, or the growth of sabbath schools more noticeable. There is also a gratifying aggressive activity. Several churches have been built or repaired, others are in process of erection. This season of preparation, planting and silent growth will certainly in due season be followed by abundant harvest.

The lack of ministers to supply our vacant churches, and occupy the new and promising fields of labor on this coast is our greatest cause of regret and solicitude. The outlook upon the future is peculiarly cheering and hopeful. The present great immigration attracted by the sudden development of the agricultural resources of this state, promises to be a permanent contribution to our population. The nomadic and restless habits of the people are abating. This indicates more stability in the Church, and less itineracy in the ministry in the future.

Railroad communication is bringing our Churches into closer sympathy, so that the loneliness and isolation of the missionary life has nearly passed. We have also a paper devoted to the interests of the Presbyterian Church, and a prospect of a Theological School.

Your committee have alluded to these facts as encouraging signs of prosperity on account of which we should devoutly thank God, and feel encouraged for the success of His kingdom in the future, and consecrate ourselves anew to His blessed service.

Rev. F. Buel, agent of the American Bible Society, being present by invitation, gave an interesting report of the operations of

THE BIBLE SOCIETY.

The Synod adopted the following resolution:

That we greatly rejoice in the success reported by Brother F. Buel, agent of the California Bible Society, in the work of printing and distributing the Holy Scriptures among the nations of the earth by the American Bible Society, and in the marvelous Providential facilities now opened for their more extensive distribution, and especially in what has been accomplished in our own State, and that we pledge him our hearty sympathy and co-operation in his efforts to conduct and enlarge this work.

Mr. Wm. F. Peters, agent of the American Sabbath School Union, addressed the Synod on the subject of

SABBATH SCHOOLS.

Rev. L. Hamilton, by previous appointment, opened discussion on this subject, considering the relation of the Church to Sabbath Schools, and the best method of conducting such schools for adults, as well as for youth and children.

Rev. A. W. Loomis of the Synod of the Pacific by invitation, gave an interesting account of his Missionary work among the Chinese of California. Rev. Mr. Carrington under appointment as Missionary to Siam, was invited to sit as a corresponding member. The following report on the subject of

FOREIGN MISSIONS

was presented and adopted:

It is hardly necessary for your Committee to make an extended report upon the importance of giving the gospel of Christ to the heathen world. The command of Christ has a binding obligation upon every minister and upon every member of the Church of Christ. The spiritual status of the Church is measured somewhat by its action respecting the wants of the heathen. Your Committee would earnestly urge upon the members of the Synod to present the Cause of Foreign Missions to their people, hold a Monthly Concert of Prayer for the success of the Missionaries among the heathen and secure the distribution of such publications concerning our Foreign Mission work as will have a tendency both to enlighten and interest the Church in this Cause. The Committee on

THE THEOLOGICAL SEMINARY

presented the following report, which was adopted. That it has seemed best to the Committee to take no steps towards the establishment of a Seminary. We recommend, in view of the prospect of a speedy union of the two branches of the Presbyterian Church, the following resolution:

That the Trustees of the University College be requested to establish as soon as possible a Theological Department in that institution, and that we pledge our influence toward the endowment of the same. The Synod also resolved, That each mem-

ber of this Synod be requested to make earnest efforts to induce young men to enter upon a course of education for the ministry.

THE OCCIDENT.

The Committee appointed last year in conjunction with one of the Synod of the Pacific, addressed the Synod, setting forth the result of their efforts, and showing the basis on which THE OCCIDENT has been established and conducted.

A committee was appointed to bring in a report in regard to THE OCCIDENT, which was adopted, as follows:

Resolved, 1. That this Synod is fully conscious of the importance of a *home* Christian literature for our families, and all families into which it can be introduced.

2. That this Synod rejoices in the establishment and continuance of THE OCCIDENT, and pledges itself by every proper means to further its circulation.

3. That our ministers be requested to present by sermon or otherwise to to their people the importance os a suitable Christian literature, and in so doing present THE OCCIDENT.

An invitation from the Young Men's Christian Association to visit their rooms was received—for which the thanks of Synod were tendered.

HOME MISSIONS.

The Committee appointed on the subject of Home Missions, brought in a report which was adopted, as follows:

As this whole subject of Home Missions has, in previous meetings of the Synod, been so often and so ably presented, it does not seem necessary for us to make a lengthy report. Yet we cannot fail to call attention to the deep and active interest of the General Assembly's Committee on Home Missions, in behalf of California and Nevada. This Synod does most cheerfully recognize the fact that five new missionaries have been appointed for this coast since our last meeting. Such interest cheers us, and we take courage, and go forward. It seems to your Committee best that it should recommend the appointment of a District Secretary of Home Missions for the Pacific coast.

On motion, it was unanimously voted that Rev. A. M. Stewart be recommended to the Presbyterian Committee of Home Missions as a suitable person for District Secretary.

The thanks of the Synod were tendered to the Howard Church for their kind entertainment of its members during its sessions.

Synod then adjourned to meet in the Howard Presbyterian Church at San Francisco, at 7½ P. M. on the first Wednesday of October, 1869.

GEORGE PIERSON,
Stated Clerk.

EASTERN.

FINE PRESBYTERIAN CHURCH BUILDING.—The magnificent house of worship for the Third Church of this city is rapidly approaching completion. The entire cost will be about $250,000. The organ cost $10,000, and is one of the finest in the country. It is placed in the recess back of the pulpit. The choir will occupy a raised gallery, immediately in front of the instrument, and back of the minister's desk—the choir and organ being in full view of the congregation. The gallery will accommodate about three persons. The gas-light is to be supplied on a principle entirely new here—thirty-six "bull eyes" being placed at equal distances in the arched ceiling, each eye being so adjusted as to reflect its light upon a certain portion of the floor below.—*Pittsburg Banner.*

FAILING.—The Methodist papers announce that the venerable Peter Cartwright, after sixty-four years of uninterrupted labor, is at last failing in health. He has been a Presiding Elder for forty-nine years, and still holds that office in the Pleasant Plains District of the Illinois Conference. It cannot now be long before he will be called to cease from his labors.

ROMANISM IN AMERICA.—The *National Baptist* denies the accuracy of Mr. Parton's statistics of Romanism in this country. The Catholics count all members of their congregations as belonging to the church; the Protestants count only those actually connected with the churches, usually not over one-fourth or fifth of the congregations. Thus the relative strength of the two parties is not to be correctly estimated by the membership of the churches. Of Catholicism in Europe *The Baptist* remarks: "The intellect of continental Europe is not with the Pope, but with Voltaire. Multitudes acquiesce in Catholicism, as they would in Mohammedanism, so long as their practical ungodliness is tolerated by the priests; and the priests have not often troubled men who make no revolt against their authority."

REFORM IN BOSTON.—The notorious dance hall in Richmond street, hitherto the resort of the vilest of the vile, has been changed in its purpose, and is now the center of a religious and reformatory movement. Meetings are to be held every Sunday evening, and at times during the week. The exercises consist of singing, praying, and addresses, either by those who have already turned from the way of the wicked, or who are striving to get into the right path. Tracts are distributed freely. —*Traveller.*

BAPTIST SEMINARY.—The building of the Baptist Theological Seminary, now rapidly going up in Chicago, is to be of brick, two hundred and fourteen feet long, forty-eight feet wide and four stories high, and will contain one hundred and eight rooms for students, besides a boarding department and four residences for professors. It will cost about sixty thousand dollars. It is expected that the rent of its residences will endow one professorship.—*Pittsburg Banner.*

MISSION CHAPELS.—Dr. Prime stated, at a public meeting in this city, that the system of mission chapels has failed, and that *not one self-sustaining church had ever been produced thereby.* It is not strange. Caste has no place in the Christian Church; and, unless the members of an old church are willing to take their position as equal members, and not as patrons, in a new organization, it ought not to succeed.—*Independent.*

BOWDOIN COLLEGE.—Rev. Jotham Sewall, Professor in Bowdoin College, has returned home from his European tour. Professors Rockwood and Goodale, recently elected professors in that college, have entered upon their duties.—Ex-President Leonard Woods has returned to Brunswick, from his fifteen months' absence in Europe.

DEFICIENCY.—There is said to be an alarming deficiency in the receipts of the (Dutch) Reformed Board of Missions. The debt was $16,000 at the beginning of the financial year, and now at the end of the first quarter it is more than $25,000. The security fund of 30,000 has already been pledged as security for money borrowed.—*Zion's Herald*

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL
REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses, there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Religious Books.

A great variety of works in all departments of Religious Literature, such as Devotional Books, Bible Dictionaries, Sermons, Religious History, and Geography, Annotations, Commentaries, etc., published by the

PRESBYTERIAN BOARD OF PUBLICATION.

Also, a large assortment of Sunday School Libraries and Hymn Books, including THE HYMNAL, Presbyterian Psalmodist, Presbyterian Juvenile Psalmodist and Childrens Praise, to which the Publishers call the attention of

SUNDAY SCHOOL TEACHERS AND OFFICERS,

And of all who desire books in any of these departments. All are requested to call and examine the publications of the Presbyterian Board at the Depository over the Pacific Coast, which has been established at the store of

Correspondence.

Letter from Mendocino County.

GENERAL FEATURES.

This part of California presents so many and such broad contrasts with most other parts of the State, especially the central and extreme southern, that the difference is at once strongly impressed on the mind of the stranger. Instead of the hot summers and the dry, treeless valleys of the interior, and the equally timberless and still more arid plains and hill lands of the south, we find here a heavily wooded country with a climate near the coast somewhat humid, even in summer, and nowhere subject to extremes of heat or cold. From Russian River north into Oregon there stretches along the coast a belt of gigantic forest, consisting mostly of redwood, with some pine, spruce, etc., the more open country to the east being covered with scattered oak and pine. This timber belt varies in width from 10 to 20 miles, expanding towards the north until it spreads east over the entire country. Near the sea there are many little prairies and open glades covered with grass, or more often with fern, which afford good opportunities for settlement, the process of clearing these heavy timber lands being slow and tedious, and the expense great. The soil is nearly everywhere good, and in most places extremely productive, consisting largely of vegetable mold, which in many places, especially on the bottoms, is strong and deep.

LUMBER AND LUMBERMEN.

These forests constitute the great lumber field of Mendocino and Humboldt counties, in which is annually cut over 75,000,000 feet of lumber, worth in San Francisco, to which place the most of it is shipped, $15,000,000.

The lumbermen of this region come mostly from New England, the greater part from Maine, where they have been early schooled in this rough and laborious life. They are a hardy, powerful race of men, being superior in fine physical proportions and power of endurance to any other class in the United States, while in intelligence and morality they are, as a community, excelled by none.

There has been a considerable increase of population in this section during the past year.

INFLUENCE OF NATURE ON CHARACTER.

It is interesting and curious to observe to what an extent our pursuits and surroundings, such as climatic conditions, the physical features of the country, etc., are apt to influence not only the material development, but also the inner life of man. Amid these gloomy forests, shut out from the more exciting scenes of the world, constantly engaged in laborious toil, we find here a race with a conformation of character wonderfully like the rugged pursuits in which they are employed and the grand and primitive scenes around them. To fell these giant trees, to wrestle with mighty saw-logs and handle them so often when cut into lumber, to build and superintend these huge mills, gives expansion to the soul as well as the body—making men strong, thoughtful, self-reliant and independent.

In subduing nature, man learns to conquer himself, and in conquering himself is fitted for the conquest of others. As New England has been to the Union the school of advanced ideas, so will these solemn woods and fields of hardy labor become to California the nursery of strong, firm-knit, and during men. Having cleared away the forests and

vigorous, patient, and industrious, but less nomadic than the inhabitants of the South.

This incorporating so much of men's labor, and even life with the land, makes them love home—endearing to them the soil which with such great sacrifices they have wrested from the stubborn grasp of nature.

AGRICULTURE.

While lumbering is the principal business carried on here, agriculture, in its several branches of horticulture, grain, fruit, and stock raising, is largely engaged in, these pursuits being rapidly on the increase. The extent to which they are prosecuted may be gathered from the fact that there are now about 140,000 acres of land inclosed in this county, of which, perhaps, one-third is under cultivation; about 15,000 acres being planted to wheat, 4,500 to barley, 11,000 to oats, 7,500 to corn, 1,200 to potatoes, and 250 to hops, besides several thousand acres in the aggregate, to peas, beans, vines, vegetables, fruit trees, etc.

CROPS.

The following estimated yield to the acre will indicate the productiveness of the soil, viz: wheat, 15 bushels, barley 22, oats 34, peas 38. Potatoes average 6 to 12 tons, and hay 1½ tons to the acre. 30,000 pounds of hops were raised on 250 acres of ground; the product of butter having been 30,000 pounds, of cheese, 12,000 pounds, and of wool, 135,000 pounds.

There are estimated to be 10,000 grape vines, 18,000 apple and 13,000 peach trees in the county, besides large numbers of other fruit trees, strawberry vines, berry bushes, etc. Fruits of all kinds—more especially the apple, quince, and plum, thrive well. The peach and strawberry do well in most places, though the climate, more particularly near the coast, seems unfriendly to the grape.

STOCK RAISING.

Much attention is being given at present, to the rearing of Stock, for which the advantages are great in the open hill country east of the timber belt. It is computed that there are now 17,000 head of neat cattle in the county, besides 10,000 horses; 2,000 mules; 28,000 sheep and 22,000 hogs, besides great quantities of poultry, beehives, &c.

Hogs can be raised here very cheaply, subsisting and even growing fat on the acorns alone, in the Bald Hill region, being also fed on potatoes, oats, peas, &c.

QUALITY AND PRICE OF FARM PRODUCE.

The cereals grown here are of good quality, with the exception of wheat, which is often dark colored and apt to be damp, rendering a mixture with the drier grain of the South, desirable for milling purposes. Hops on the bottom lands flourish with but little care, considerable quantities planted the past season in the Russian River Country having yielded bountifully with a moderate expenditure of labor.

The bacon cured here has a good reputation in San Francisco, always commanding full prices. The rates at which many kinds of farm produce sell here are low as compared with prices in San Francisco; thus wheat brings less than a cent a pound; butter only 30 cents, and dried apples and peaches but 12 cents a pound. Eggs sell at 35 cents a dozen; loose hay at $7 per ton, a condition of things that would be materially altered for the better with

RAILROAD COMMUNICATION

established between this region and the metropolis, of which, as well as of wagon roads, built or projected, the lumber interest, fisheries, ship-building and many other matters pertaining to this and Humboldt counties I will speak in my next letter to The Occident.

H. D.

Ukiah, Oct. 10th, 1868.

Some Faults of the Daily Papers.

Has not the religious press, as one of its principal objects, the correction of evils in society at large; and does it not look toward some regenerating influences, by the blessing of God, from the steady adherence to *right* even when it receives censure perhaps, as too rigid in its strictures on many of the subjects the secular papers discuss, with perhaps no idea of the harm they do young minds, fresh to receive impression from almost every source?

Nearly every family subscribes to a daily paper—and it has pained and disgusted me frequently, to see the details of the brutal pugilistic encounters between prize fighters, in some of our most respectable dailies.

The shocking atrocities of such contests are heart-rending to every feeling of nature, and it is surely not worth while to parade them before the public, and thus foster a sentiment of indifference to such cold-blooded cruelty—or worse, perhaps an interest in the wicked champions, who so degrades their manhood. The lettered heading, naturally attracts the eye, although individually it may have no interest. Yet the paper lies open to the perusal of all—and for newspapers so largely circulated as are some of our prominent sheets, to give tone, and in a measure encouragement, to such things, seems wholly out of place. If the "press is the educator of the people"—surely its editors are responsible for the direction this education takes—and to give prominence to that which degrades a human being to the level of a brute, is incalculating a low tone of morals, and spreading abroad an influence at varience with the good order of Society.

These contests are, I believe, against the law, and yet they are detailed with a sickening minuteness, and often occupy whole columns, which might be filled with much more agreeable, if not instructive intelligence.

Editors are obliged to suit a variety of tastes, to consult differences of opinion, but public sentiment is moulded more, perhaps, by the daily paper, which finds its way to the breakfast table, and is often read aloud, than by extended reading, and, after the hasty perusal the parent gives it, the children often look it over, as they are apt to do the papers lying loose on the centre-table, and before the father is aware of it, the boy is posted, and goes to the mother whith some such question as what a "round" means, and whether a "bruiser" is a soldier, etc. To turn the attention of the inquirer from the subject, is generally the best means of inducing forgetfulness, but the seed has been dropped, and, alas! it may bear fruit. Who is responsible?

Nor are children the only ones who are demoralized by this class of publications. Many an unoccupied hour is whiled away over the morning or evening paper, and, by frequent repetitions, the eye becomes accustomed to the paragraphs so often encountered, and thus insidiously, the mind receives impressions of familiarity with descriptions of vice, which lose some faintest shade of their horror, too often dwelt upon.

We do not see the necessity of publishing such things at all. The evil of their non-suppression is enough. But if they do find their way into print, why not leave them to the obscurity of papers which do not find their way into homes? Every taint of

impurity, or coarseness leaves its trace, and in the aggregate, swells the sum total of human sin and depravity.

As the broad sea-shore is counted by its "grains of sand," so is the awful harvest of human iniquity the result of single seeds of impure and evil thoughts. It has become a question of deep consideration, with many reflective minds, whether it is not better to do without the news, political and commercial, than to receive it, mangled with such increasing records of vice and brutality. N.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

the 6th 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

STEAMERS FOR OCTOBER, 1868.

The following Steamships will be dispatched on dates as given below.

October 6th—COLORADO, Captain Lapidge, connecting with ALASKA, Capt. Gray.

October 14th—GOLDEN CITY, Capt. E. S. Farnsworth, connecting with OCEAN QUEEN, Capt. King.

October 22d—SACRAMENTO, Captain Parker, connecting with HENRY CHAUNCEY, Capt. Conner.

October 30th—MONTANA, Capt. J. M. Cavarly, connecting with RISING STAR, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship GREAT REPUBLIC, Captain Doane, will be dispatched on Saturday, October 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

San Francisco, Saturday, October 17, 1868.

SYNOD OF ALTA CALIFORNIA.

This Synod, whose session was held in this city, during the last week, was distinguished by the same interest which marked the other ecclesiastical bodies that have recently been convened here. Due attention was given to the routine business of Synod, but the manifest feeling of all was that much more must be done by them than can be included in this ordinary docket of business. The cause of our Lord on the Pacific coast must have a decided impetus during the year to come, because of the enthusiasm with which all denominations of Christians accept the new responsibilities imposed by the marvelous changes through which we are passing. The increase of our population, the necessity to establish churches in the new settlements springing up over the State, the necessity to strengthen and encourage the churches that are already formed, and the demands for general missionary labor from all directions, could not fail to awaken a new feeling of obligation in the hearts of those who know the facts. The Synod has had more missionary experience than have some of the other bodies whose late action is so promising, and this experience has been of a character to render the Committee on Home Missions cautious in their future movements, so that any plans they may adopt will be very carefully digested. It is indicative, therefore, of their clear conviction that these must be adverse, that they recommend the appointment of a distinct secretary to supervise this work within their bounds. We know well what constant and heavy drafts are made on the treasury of the Committee in New York, yet we know also the urgent need of this field at this crisis, and we trust the conviction of Synod will be accepted as the basis of their action, and we may soon have an efficient man here, in the New School branch of the Church, to work with Mr. Fraser, of the Old School, when work will tell so powerfully on the future of this coast.

There were several other subjects that received attention from the Synod, prominent among which was that of theological instruction, and a Committee of Conference with a similar committee of the other Synod was appointed, who were especially charged with this, as an important part of their commission. The Communion season on Friday afternoon was one of unusual solemnity, and the ordination of these young men to the ministry, on Sabbath morning, was a delightful *finale* of a session which seemed to grow in interest from the beginning.

We have now had our annual meetings for conference and counsel, and prayer. They have been meetings from which the brethren must have gone down to their respective places of labor as Moses went down from the mount of communion with the Lord. May we not hope that results which shall make glad the city of our God, which shall not only extend the influence and usefulness of our Church, but glorify Her Head, will be reported a year hence to the praise of that grace by which we are put in possession of so noble a field!

NO LITTLE DUTIES.

The word which gives assurance of growth in the economy which God has established, is *fidelity*. The principle which includes the entire range of duty is that announced by Jesus, when he said, "he that is faithful in that which is least is faithful also in much." Conscientious regard for every obligation, sensitiveness respecting the bearing and effect of every act, the desire and purpose that religion shall never be compromised, and Christ shall never be dishonored, leading us to feel our dependence upon God's assistance in all our course, are the stimulants, as they are the indices, of genuine devotion. For piety is not that which inclines a man to be a missionary, as distinguished from that which obliges him to feel that he should remain at home. But it is that which, whether he be among the heathen or with us, renders his life charming with the graces that spring from love to Jesus and to men, those beautiful attendants that throng from the most unseen walks of true obedience, as well as from those more public. Nay, it may be doubted whether these graces of little stature do not contribute most to the exquisite beauty which piety sometimes displays, and therefore God has commanded attention to the smallest duties, as we call them, to be a means of preparation for the companionship of angels. Certain it is, that those who are most like them are most careful to regard the obligations which have such effect upon the soul. It is not enough, then, for one to perform the chief duties enjoined in the Scriptures; the neglect of the rest mars his piety. No Christian should spend his time searching for the line between what *must* be done, and what *may* be done, by the servants of God. But few marks of the Lord Jesus are seen on those who manifest a selfish eagerness to shun everything that is not necessary to prove that they may claim his grace. We are commanded to be lights in the world, and God has told us how we may be full-orbed, and every point luminous. How many appear only in eclipse, the form even being imperfect, and a large part of the disc obscured by the shadows of selfishness which the world can see!

Temperance.—The Congregational Association at its late meeting took action on the subject of temperance, resolving that the Legislature of our State should adopt a law including, in brief, the principle that the retail vendor of ardent spirits should be held legally accountable for all the mischief to life and property directly traceable to the action of liquor sold by him, and, on conviction of such mischievous results, be assessed by the jury with satisfactory damages for the reparation of the injury.

The principle, I believe, to be most righteously correct. If people choose to deal in Alcohol, Arsenic, Strychnine, and they carelessly and recklessly sell to those who are not competent to make a safe and proper use of these poisons, let the dealer be held accountable for the mischief following his carelessness or heedlessness.

I do not see in my scope of vision the California Legislature which shall pass such a law, or the jury which shall convict, but perhaps the vital truth involved should be declared. B.

Unbelief A Marvel.

"And he marvelled because of their unbelief." Why did he marvel? First, all unbelief is sinful, and nothing in the universe is so marvelous as sin. Sin is the crime and curse of creatures whom God made to be like and with Himself in perfect blessedness forever; transgression of the best of laws, rebellion against the best of Beings; an offence against infinite majesty and unsullied purity; a foul stain upon immortal godlike spirits; a withering blight upon all that is fair, lovely, and glorious; a woe unutterable begetting woes innumerable, each one the parent of millions more, each one bearing the likeness of its progenitor, and propagating its like or worse, without evil, increasing, multiplying continually. More than all this, sin paralyzes the moral sense; blinds the mind to its own deceitfulness and hideousness; and while enveloping its miserable dupes in the strong folds of its own pollution, stronger than claims of iron, creates a passion which rushes to the monster's horrid embrace, and finds gratification is the charnel house of death.

> "Vice is a monster of so frightful mien,
> As to be hated needs but to be seen;
> Yet, seen too oft, familiar with her face,
> We first endure, then pity, then embrace."

Not so with beings capable of viewing it dispassionately, comprehending it fully, appreciating its turpitude and estimating its deadly power. If we could see it as God sees it, as Christ saw it, we would marvel, be horrified and terrified; for we would see ourselves.

But secondly, the most marvelous kind of sin is unbelief. For this nullifies the remedy devised and provided by infinite mercy and wisdom for the evils of sin; and thus necessitates the continuance of them through all eternity, augments the intensity of them, and multiplies them, by adding the unspeakable guilt and woe of salvation rejected; and who can measure that? That rational creatures should destroy themselves, drink poison, eat fire, take vipers to their bosom; fall from heaven and go down to hell by their own iniquity, that is, by their own hand, by sin, is marvellous. But when deliverance is proposed by the Lord, with every guarantee to satify the reason, pacify the conscience, revive and stimulate the despairing heart, to see all the provisions of infinite beneficence, and all the pleadings of infinite mercy, coldly refused and sullenly resisted, this is marvellous, this is what unbelief does. It never does less than this; it can do no less than this.

Unbelief has divers manifestations, degrees of criminality, deeper and darker shades, according to the privilege, knowledge, and grace bestowed. Hence, thirdly, the most marvellous kind of unbelief is unbelief in Christ. Christ, to the world, is the manifested God; to sinners, a revealed, living, all sufficient and loving Savior. As such, God offered him. As such, all perishing sinners, who have learned his name, may receive him to their hearts, and rejoice in the great salvation of God. This is faith: Its opposite is unbelief. By these two marks, all who have heard the name of Jesus, are known.

For four thousand years men perished through unbelief in God, revealed absolutely, but graciously. "The Lord, the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth, keeping mercy for thousands, forgiving iniquity and transgression and sin, and that will by no means clear the guilty." Then God sent his only begotten Son into the world, saying: "Let them hear Him." Beyond this, infinite power and love could not go. "God so loved the world, that he gave his only begotten Son that whosoever believeth on him might not perish but have everlasting life". No sin has now a darker hue and a heavier curse than unbelief in Christ. It is unbelief in God manifested to us, pleading with us, weeping over us, bleeding, dying for us, speaking to us from his cross on Calvary, from his throne in Heaven, by the gospel continually: "Come unto me, all ye that labor and are heavy laden, and I will give you rest." That dying men, perishing by their own fault, under a holy law, should not believe God, when, like a father, he pleads with them, declares that he has no pleasure in their death, beseeches them to turn and live, promises to cast out all their sins, to give them all the blessing of his love in this life, and the blessing of Heaven forever—is a mystery so dark, deep and terrible as to be utterly incredible if all history was not a continuous demonstration of the fact. Count-

less millions believe the groundless fabrications of their own dark minds, and the malicious falsehoods of devils, but not the word of the living God. It is not evident truth and goodness that men want. They want lies to give license to their lusts, and in them they take refuge. Do you want the proof? Read history, read it in God's book. And if you do not like that read it where you will. Search the libraries of the world. Master the records and philosophies of ancient times. And if you do not like them, do the work for yourselves; remembering that the only history worth writing is that which records the truth. The only philosophy worth making that which arranges truth. For four thousand years, man would not and did not believe God. And, therefore, he sent them his Son, that as a man he might speak to them, and plead with them; using all the authority and earnestness which God and man could use, to persuade, convince and satisfy. As the God, brother, and Savior, with everlasting life, the purchase of his dying agonies, and his Father's infinite grace, in his hands, he came into the world to supply every possible and every conceivable necessity of fallen man. And did they believe him? No! no! And you know they did not. O, is not this marvellous?—*Extracts from a sermon by Rev. Thomas Fraser.*

THE FAMILY PAPER OF THE PACIFIC COAST.

THE OCCIDENT.

In every true home there should be found a first class family paper—one to whose coming, father, mother, children will look with eagerness each week. Such a paper is

THE OCCIDENT.

Let all who desire such a paper, and are asking, "What paper shall I take?" read the following statement of facts:

THE OCCIDENT contains a greater amount and variety of reading matter than any other family paper on the Coast. It contains choice selections for all classes of readers. Both the child and the person of cultivated literary taste will find in each number matter which cannot fail to be interesting.

THE OCCIDENT is extensively quoted. No other weekly paper on the Coast furnishes so much matter, either original or selected, to the columns of other papers. Whole columns are frequently taken from one or another of its departments. No stronger proof of its excellence could be desired than the fact that it is so well appreciated by contemporaries.

THE OCCIDENT has a complete Agricultural Department, carefully culled from the best authorities, with all the current agricultural items of our own coast, and full market reports. The Mining Department is also very complete.

THE OCCIDENT gives a summary of Pacific Coast news and of Eastern and Foreign Telegraphic News. These items are not hastily thrown together, but are carefully prepared, and are consequently copied to a great extent. The Personal Department is the most complete collection of personal news to be found in the State.

THE OCCIDENT is the official organ of all branches of the Presbyterian Church, and contains full religious intelligence concerning the progress of all denominations. Although a religious paper, it is not sectarian. Its aim is to make men better and happier by the inculcation of the principles of the Christian religion.

THE OCCIDENT is universally admitted to surpass all other papers in the State, in typographical appearance and systematic arrangement of its contents.

Read what the papers say of

THE OCCIDENT.

"Has commenced its second volume, enlarged and improved and with excellent prospects. It is full of 'knews,' views, and family reading, and is ably edited."—*Brooklyn (N. Y.) Union.*

"It gives evidence of ability, tact, and judgment in its management."—*Cincinnati Presbyter.*

"An able paper of the same form as the *Statesman*."—*Philadelphia Statesman.*

"One of the best of papers."—*Zion's Herald, Boston.*

"Well filled with readable articles. An important accession to the literature of the coast."—*S. F. Bulletin.*

"Its typographical appearance is finer than that of any weekly paper published on this coast."—*Chronicle.*

"A periodical worthy of patronage."—*Sacramento Union.*

"It is already attracting a great deal of attention. Its original articles and judicious selections make it an intellectual treat."—*S. F. Fair Press.*

"The ability displayed gives promise of success."—*S. F. Times.*

"The best style of any weekly issued in San Francisco."—*Pacific Churchman.*

"An attractive sheet and ably edited."—*Placerville Mountain Democrat.*

"A welcome visitor in the homes of our people."—*Woodbridge Messenger.*

HYATT'S HAND-BOOK OF

Grape Culture in California,

Giving full and specific directions as to where, how, and when, to plant and cultivate a vineyard.

As the season is approaching for those who purpose going into the culture of the vine anew in California, or for those who wish to extend their vinicultural operations to make preparations therefor, they can find no better aid, and no source of information more valuable than to consult this highly approved Hand-Book of Grape Culture.

Following are some of the testimonials that have appeared in commendation of this useful and indispensable work:

A committee of the late Fair of the Mechanics' Institute of San Francisco, to which the work had been referred, speak thus:

"Your committee have examined Mr. Hyatt's Treatise on the Culture of the Grape, and believe it to be the BEST HAND-BOOK published on that subject for California vine culturists, and for which they recommend a Special Premium."

The California State Agricultural Fair, of 1867, awarded a Diploma to the author of this work, and also the San Joaquin Valley Agricultural Fair, at the same season.

OPINIONS OF THE PRESS.

The following are brief extracts fron some of the elaborate notices of this work:

The San Francisco *Daily Evening Bulletin* says:—"The book contains a choice collection of the best foreign and native varieties of the grape cultivation in California especially, as well as at the East. The many excellent works on Grape Culture in the Atlantic States are of little or no value in California, where an entirely different system and practice are necessary in vine growing and wine-making. This Hand-Book is intended to supply this deficiency. The author has taken great pains to investigate this subject, and to aid in the improvement of viniculture in California. Its appearence is timely, and it can hardly fail to meet a large and ready sale. It is attractively printed and elegantly bound."

Sacramento Union—"Hyatt's Hand-Book of Grape Culture is a California production that will probably meet a common want. The author takes the experience of the most noted vine-growers in the State as the warrant for his conclusions and suggestions, turns to account the recorded results of experiments made by the pioneers of this branch of industry, and in addition to giving full and minute instructions in regard to the planting of vineyards and the manufacture of wines, presents statistics which will enable the beginner to calculate the probable profits of successful grape culture."

The *Mountain Democrat*, whose editor, Hon. D. W. Gelwicks, is the present State Printer of California, speaks thus:

"HYATT'S GRAPE CULTURE.—We have received from the publishers, H. H. Bancroft & Co., San Francisco, a copy of this interesting and valuable work—a work greatly needed on this coast, and which every grape-grower should purchase. We sent it to a gentleman well known in this community, for his examination—a gentleman familiar with the subject, and largely engaged in the culture of the grape. He gives it the following cordial endorsement, and his endorsement ought to secure it a large sale:

'The limited time in which to examine Hyatt's Grape Culture, published by H. H. Bancroft & Co., San Francisco, has been sufficient, however, to satisfy me that it is a work which every grape-grower should have. No matter how well fortified we may be in our own experience and theory, we must acknowledge that we may adopt many of the author's ideas and suggestions with profit. The merit of the work certainly bespeaks for it a ready sale.

Respectfully, CHAS. P. JACKSON.'"

The Golden Era: * * * "With this book in his hand, the intelligent agriculturist can engage in the business of grape culture with almost the same chance of success as one who has bought his knowledge by expensive experience. * * * The practical information contained in the book would cost many hundred dollars to obtain in any other way. We predict for it a ready and rapid sale."

S. F. Daily Dramatic Chronicle: "The book is emphatically a California production, being written by T. HART HYATT, of this city, editor of the *Rural Home Journal*, and bearing the imprint, San Francisco: H. H. Bancroft & Co. It contains a large amount of valuable information, and should be in the possession of every vine-grower and wine manufacturer in the State. The usefulness of the volume, and its convenience for reference, are very much enhanced by a full and carefully prepared index."

S. F. Mining and Scientific Press: * * * "The book professes to be a complete manual, with instructions for the management of the grape and the manufacture of wine, and is especially designed for California. * * * The book contains a considerable amount of valuable information which is not generally found in such treatises."

S. F. Daily Times: * * * "The author seems to have exhausted his subject, particularly as it relates to viniculture in this State, and as the grape interest is just beginning to attract attention which is soon to become paramount among farmers, we regard the publication of the work as most opportune. No ranchman should be without it."

N. Y. Daily Tribune: "The author brings the result of many years' experience in foreign countries to the preparation of his work, and from his observations in climates similar to that of California, arrives at the conclusion that California is singularly favorable to the culture of the grape, and to all semi-tropical fruits, and that it will hereafter be distinguished as the land of the vine, the fig, the orange, the olive and the palm. His volume forms a capital, if not a complete manual, on the care of a vineyard, and it is enriched with much industrial information connected with the subject."

Lacon (Ind.) Home Journal: "This work is most *apropos*. It comes just as thousands, without any practical knowledge of the business, having planted vineyards, find themselves destitute of that information their intelligent care demands. All over the country this interest is growing, and probably the time is not distant when America will produce more, if not better, wines than any country in the world. The author, MR. THOMAS HART HYATT, is an enthusiast on the subject upon which he writes so pleasantly, and his book embodies just what every grape-grower would like to know—what every one must know, to cultivate the vine successfully."

Colman's Rural World, St. Louis: * * * "We merely want to introduce a new and interesting treatise on this subject to our readers, from the far-off shores of the Pacific—the Golden State of California. Its author is T. HART HYATT, editor of the California *Rural Home Journal*. He has had a large experience and observation in California and in the Old World. His style is entertaining, his directions clear, plain, and practical."

Rural New Yorker: * * * "Although most valuable to the California viniculturist, yet it helps to widen our knowledge of the

Current Literature.

Tablets.

Could we except a few articles which seem rather to have a tendency that we cannot approve, than any expressions of sentiment from which we must dissent, there are but few books of recent publication with which we have been more pleased than with this, written by A. Brownson Alcott, and published by Roberts Brothers, Boston. There is a degree of common sense and freshness, and practical worth, which commends it at once. Perhaps we do not like it the less, because summoned often, by the manner of statement, to query whether the author is really to be accepted; or because there is sometimes a boldness of utterance that excites thought and provokes discussion. Books are of value, not always in proportion to the knowledge they bring us, or the gratification they furnish, but also in proportion as they oblige us to use our own powers, and carefully define our ideas. An author may do more for a reader when he thus *educates* him, than when he only *informs* him, and he may do much with any theme, or series of themes, if this is his object and he have real ability. The writer of this book combines the two objects thus indicated, and in the variety of subjects presented by him there is material which any one may appropriate with profit. The following extracts will illustrate the style and contents of the work, which can be bought of H. H. Bancroft & Co.

Recreation.

Nature is wholesome. Without her elixirs daily taken we perish of lassitude and inanity. The fountains must be stirred to their depths and their torrents sent bounding along their sluices, else we sink presently into the pool of inertia, victims of indecision and slaves of fate. "Thy body, O well disposed man, is a meadow through which flow three hundred and sixty-five rivulets." Every pulse pushes nature's quaternion along life's currents recreating us afresh; the morn feeding the morn, Memnon's music issuing from every stop, as if the Orient itself had sung.

Nature is virtuous. Imparting sanity and sweetness, it spares from decay, giving life with temperance and a continency that keeps our pleasures chaste and perennial.

We come as a muse to our toil and find amusement in it; to a taskmaker whose company never tires. 'Tis life, the partaking of immortality. A day lived so, glorifies all moments afterwards. Long postponed, perhaps, the hour wearisome, till broke this immortal morning with engagements that time can complete never, nor compel, and whose importunity outlasts the hours.

Sleep, too, having the keys of life in its keeping. How we rise from its delectable divinations with eyes sovereign and anointed for the day's occupations. All our powers are touched with flame, all things are possible. But last night, the world had come to an end; the floods ebbed low, as if the fates were reversing the torch. How we blazed all the morning, to be cinders yesternight. Then came the god to rekindle our faded embers, the Phœnix wings her way to meet the rising dawn and embrace the young world once more. Sleep took the sleep out of us. From forth the void their rises a roseate morn upon us.

"Every day is a festival, and that which makes it the more splendid is gladness. For as the world is a spacious and beautiful temple, so is life the most perfect institution that introduces us into it. And it is but just that it should be full of cheerfulness and tranquility." Our dispositions are the atmosphere we breathe, and we carry our climate and world in ourselves. Good humor, gay spirits are the liberators, the sure cure for spleen and melancholy. Deeper than tears, these irradiate the tophets with their glad heavens. Go laugh, vent the pits, transmuting imps into angels by the alchymy of smiles. The satans flee at the sight of these redeemers. And he who smiles never is beyond redemption. Once clothed in a suit of light we may cast aside forever our sables. Our best economist of this flowing estate is good temper, without whose presidency life is a perplexity and disaster.

Counsels.

Faith and persistency are life's architects, while doubt and despair bury all under the ruins of any endeavor. You may pull all your paradises about your ears save your earliest; that is to be yours sometime. Strive and have; still striving till striving is having. We mount to heaven mostly on the ruins of our cherished schemes, finding our failures were successes. Nor need we turn sour if we fail to draw the prizes in life's lottery. 'It were the speck in the fruit, the falling of our manliness into decay. These blanks were all prizes had we the equanimity to take them without whimpering or discontent. The calamities we suffer arises not from circumstances chiefly, but from ourselves. If the dose is nauseous or bitter, 'tis because we are, else it were not drank off with the disgust we manifest. It is as ignoble to go begging conditions as to go begging bread. If too feeble, too proud or unapt to create these, one may make up his mind to dispense with any advantage that power on that side of life confers. Not a circumstance, like the animal whose place is nature is determined, but a creator of circumstances, may bring to his help freedom, opportunity, art to build a world out of the world in harmony with his wants. If his occupation is spoiling him 'tis the dictate of virtue as of prudence, to quit it for one that in maintaining shall enrich him also. He must be a bad economist who squanders himself on his maintenance; wasting both his days and himself. His gifts are too costly for such cheap improvidence. One's character is the task allotted him to form, his faculties the implements, his genius the workman, life the engagement, and with these gifts of nature and of God, shall he fail to quarry forth from his opportunities a man for his heavenly taskmaster? "The wise man does not submit to employments which he may undertake, but accommodates and lends himself to them only."

Nor is any man greatest standing apart in his individualism; his strength and dignity come by sympathy with the aims of the best men of the community of which he is a member. Yet whoever seeks the crowd, craving popularity for propping repute, forfeits his claim to reverence and expires in the incense he inhales. The truly great stand upright as columns of the temple whose dome covers all, against whose pillared sides multitudes lean; at whose base they kneel in times of trouble. Stand fast by your convictions and there maintain yourself against every odds. One with yourself, you are one with Almighty God, and a majority against all the world.

Literary Items.

A Carpet Tack Alphabet.—Rev. C. H. Wheeler, the Turkish missionary, took back with him to Harpoot a supply of carpet tacks to make books for the use of the blind Armenians in his field. A letter to *The Christian Mirror* describes the curious device by which they are made to do missionary work:

A very small, round-topped tack, thrust upright into a piece of pine board, represents the first letter. The same tack inclined to the top represents the second, and leaning to the bottom, the right hand and the left by turns, the next three. For the next four letters, one side of the tack is cut off, and the cut portion made to face by turns the top, the bottom, the right and the left hand. The half-headed tack inclined to the top, the bottom, the right and the left hand again by turns represents the next four letters. Essentially the same course is then pursued with the next two styles of tacks, and our alphabet is ready. Other sorts of tacks and variations of them then furnish points for punctuation and the numerals, and a piece of soft pine board for a page, we are ready to write a chapter of the Bible or a hymn for one blind reader, whose sensitive fingers will so learn to run along the iron and copper with almost as much speed and assurance as our eyes in reading the printed page. The page once committed to memory will be passed along to a second reader, or the tacks withdrawn, and like your printer's type, used for printing another page. In this way two or three dollars' worth of tacks may be made available for printing, if he chooses, all the chapters of the Bible, and the hymns of the hymn book, or anything else which is needed.

Facts of History.

In history, the great difficulty is to ascertain facts. For instances, there is a well-known book, set down in catalogues as "The History of the World, by Sir Walter Raleigh"—the popular belief being that he wrote it during the long imprisonment of twelve years which preceded his final and fatal visit to America. Only the first part of that history, ending with the second Macedonian war, about one hundred and fifty years before Christ, was written—being one-third of the original design. But Raleigh wrote very little of the work. Ben Johnson has recorded that "the best wits in England were employed in making this history." One day, when imprisoned in the Tower of London, laboriously consulting many volumes to ascertain the truth of some disputed occurrence, Raleigh heard the noise of a disturbance in the court beneath his window. Looking out, he saw the progress of a quarrel; a blow struck, rapier drawn, and a wound given. Presently came up a friend who gave him one account of the incident; and a second friend then came in and gave another—and totally different account—neither agreeing with what Raleigh himself had seen. "Heavens!" he exclaimed, "how can history be written? Here are three different versions of an event which has occurred only just now, which I saw with my own eyes, and I am searching in books for an accurate narrative of what is said to have taken place more than two thousand years ago!"—*Dr. McKenzie in Proof-Sheet.*

Fame.—Some years ago, the poet Longfellow was coming from his home in the morning, when a venerable-looking man accosted him, inquiring if he could tell him the location of the house which was formerly the headquarters of George Washington. "This is the house, Sir," replied the poet. "Do suppose I could get a chance to see the inside of it?" queried the old gentleman. "Certainly," continued Mr. Longfellow. "I reside here, and should be happy to show you over the premises." They entered, and passed the different rooms, and the historic associations of the place were pleasantly recalled by Mr. L. When he concluded, the visitor quietly turned around and said, "May I ask you your name?" "Oh, yes," responded the author; "my name is Longfellow." One would have supposed that the name of Mr. Longfellow must have reached the individual who was the recipient of so much courtesy; but, after musing a while, and repeating the name slowly two or three times, as if endeavoring to recall some past association, he exclaimed: "Any relation to the Longfellows of Wiscasset?"

Selections for a Newspaper.—Most persons think the selection of suitable matter for a newspaper the easiest part of the business. How great an error! It is the most difficult. To look over hundreds of exchange papers every week, from which to select, with due regard to character and variety, suitable matter enough for one, especially when the question is not what shall, but what shall not be selected, is no easy task. If every person who reads a newspaper could have edited it, we should hear less complaints. To an editor who has care about what he selects, the writing he has to do is the least of the labor.

The Letter H.—Two elderly ladies, without chignons, and with crinolines (a double offense in the eyes of fashion), were contemplating one of the family of the Falconidæ, at the zoological gardens in London. "There's a great howl for you!" said one. "Get along with you, stoopid!" rejoined the other; "That's not a howl, that's a beagle." The

controversy growing warm between them—"Ladies," interposed one of the officers of the society (as in the fable of the Chameleon), "you need not quarrel, for you are both in the wrong. It is neither a howl nor a heagle; the bird before you is an ork."

Aldo Pio Manuzio, commonly called Aldus, of Bassino, who printed in Venice from 1494 to 1516, did away with the monks' writing, improved the points of distinction, and first introduced the colon and semiculon. He had nine different kinds of Greek type prepared, and fourteen Latin ones. At his instance Francesco de Balogna cut the cursive writing known by the name of *Italics*, which appeared for the first time in his edition of Virgil, published in 1510.

Library Report.—The following is the report of the librarian of the Sacramento Library Association for the month of September: From the library there were drawn 336 volumes, classified as follows: Romance, 280; essay, 7; history, 19; biography, 4; poetry, 2; religious, 3; miscellaneous, 12.

The publishers of *Merryman's Monthly* have introduced a novelty in the Editorial line: They propose allowing their readers to select by ballot each month an editor for the magazine. No limits are assigned as to age or sex of candidates.

A Statistician has calculated that it would require a period of nearly four hundred years to read the titles of all the books contained in the various libraries of Europe, allowing one minute for each title.

The latest invention is said to be ink made from India-rubber. It has been suggested that writers inclined to stretch a story will make use of the article.

The *Yolo Mail* is the name of a new paper published in Woodland, Yolo county. Mr. C. Y. Hammond is the editor.

There are not so many papers in this country, by one hundred and fifty, as there were five years ago.

Educational.

Newspaper Teaching.

The father daily holds in his hand one of the best of text-books. We allude to the newspaper. The time spent over this, need by no means be lost even as far as the education of the children is concerned. Were the father to remember them, as well as himself, while seeking the news, he might greatly add not only to their improvement but also to his own pleasure. Some paragraphs might be made to yield warning. Such as the following, preach abstinence from the "weed." "The Commissioners of Lunacy, on Monday afternoon, pronounced Robert McElwain insane, and ordered him to be sent to the Asylum at Stockton. His malady is the result of an excessive use of tocacco." Such as the following (from an account of the Franklin House fire) is an illustration of the possible results of excessive drinking: "We are informed by one of the boarders who was among the last to leave the building, that he tried to wake up two men who were in a room adjoining his own, but they were in a stupid, drunken sleep, having but a short time before returned from a spree in the neighborhood. He was obliged to leave them on account of the stifling smoke and flames in close proximity." Indeed, even the very facts which the child will find substantially in his school-books, make a deeper impression when read from the father's honored oracle, the newspaper. Take the following item in relation to the carrier pigeon:

L'Epervier, a Belgian paper, gives an interesting account of the great pigeon race which takes place annually in Belgium. The King of the Belgians offers a valuable prize to the owner of the first bird in, and the Count of Flanders to the owner of the second, the total value of the prizes competed for being £760. This year one thousand five hundred and seven pigeons were conveyed from Brussels to Agen, a distance of more than 500 miles, and were then thrown up at five A. M. The first prize was not claimed in Brussels until the following day, when M. Grooters, of that city, presented his bird. A few minutes afterwards the same gentleman claimed the 3d, 5th, 7th, 11th, 15th 18th, and 21st prizes from the commissioners. By half-past nine A. M. twenty-one of the pigeons had reached Brussels.

Prayer on Preparing to go to School.

COMPOSED BY CALVIN, 1560.

Ps. cxix. 9. Wherein shall a young man establish his way? If he wisely conduct himself according to thy word. With my heart have I sought thee, allow me not to err from thy precepts.

O Lord, who art the fountain of all wisdom and learning, since thou of thy special goodness hast granted that my youth is instructed in good arts which may assist me to honest and holy living, grant also, by enlightening my mind, which otherwise labours under blindness, that I may be fit to acquire knowledge; strengthen my memory faithfully to retain what I may have learned: and govern my heart, that I may be willing and even eager to profit, lest the opportunity which thou now givest me be lost through my sluggishness. Be pleased therefore to infuse thy Spirit into me, the Spirit of understanding, of truth, judgment, prudence, lest my study be without success, and the labor of my teacher be in vain.

In whatever kind of study I engage, enable me to remember to keep its proper end in view, namely, to know thee in Christ Jesus thy Son; and may every thing that I learn assist me to observe the right rule of godliness. And seeing thou promisest that thou wilt bestow wisdom on babes, and such as are humble, and the knowledge of thyself on the upright in heart, while thou declarest that thou wilt cast down the wicked and the proud, so that they will fade away in their ways, I entreat that thou wouldst be pleased to turn me to true humility, that thus I may show myself teachable and obedient first of all to thyself, and then to those also who by thy authority are placed over me. Be pleased at the same time to root out all vicious desires from my heart, and inspire it with an earnest desire of seeking thee. Finally, let the only end at which I aim be so to qualify myself in early life, that when I grow up I may serve thee in whatever station thou mayest assign me. Amen.

Personal.

Rev. Dr. Dwinelle of Sacramento, was appointed by the Congregational Association at the recent meeting in Oakland, to the Professorship of Theology in the Theological Seminary to be established under the auspices of the Association. No better choice could have been made. Dr. Dwinelle is a man in every way fitted for the position, which he will occupy with credit to himself, and honor to an Institution the establishment of which is to mark a new era in the religious history of the Pacific Coast.

Prof. Agassiz is said by the Central City *Register*, to be delighted by his trip in Colorado. He finds strong confirmation of his glacial theory. He attributes to glaciers most of the coñons of the mountains.

Rev. Dr. Woodbridge of the Presbyterian Church at Benicia, was surprised last week by a Donation Party. The result of the affair was satisfactory, both in a social and pecuniary point of view.

Rev. J. B. Fish takes the place of Rev. Mr. Coplin as pastor of the M. E. Church at Watsonville. The *Pajaronian* speaks highly of the gentleman's ability as a preacher.

Rev. J. W. Atherton who has preached through the summer at Carson City, Nevada, has gone to Los Angeles to take charge of the Congregational Church in that place.

Rev. Mr. Fraser will, according to the *Appeal*, take charge of the Presbyterian Church at Carson City, Nevada. Mr. Fraser has been for some time a resident of Carson.

Rev. B. S. McLafferty has resigned the pastorate of the Baptist Church in Petaluma; cause ill health. The church has not yet accepted the resignation.

Rev. J. T. Wills, pastor of the Congregational Church at Grass Valley is about to sail for England. On his return he will bring his family to California.

Rev. J. H. Wilbur has been re-appointed for a term of 4 years, to the supervision of the Simcoe Indian Reservation in Washington Territory.

Mr. J. S. Clark, a young man born, raised, and educated in Oregon, delivered the annual address at the Oregon State Fair.

Mr. P. W. S. Rayle, a prominent lawyer of Napa, died last week of small-pox contracted during a visit to this city.

Rev. J. A. Daly will preach the sermon before the next meeting of the Congregational Association of California.

Mr. H. B. Miller, formerly editor of the Portland *Oregonian*, died recently in Nicaragua of Yellow fever.

Rev. James Woods of Healdsburg, has accepted a call to the Congregational Church at Antioch.

Rev. B. E. S. Ely of Healdsburg, has accepted a call to the First Presbyterian Church in Stockton.

Mr. W. C. Dougherty has been appointed Deputy Postmaster in this city.

Rev. Mr. Hume has resigned the charge of the Episcopal Church at Redwood.

Gen. Kirby Smith of rebel notoriety is said to be on his way to California.

Mr. Wm. A. Lentz has been appointed Postmaster at Petaluma.

The Plowboy's Soliloquy.

You scoff at my coarse, homely garb;
  Aye, call me a boor if you will,
And smile at my unpolished air—
  I'll cling to my husbandry still;
I care not for broadcloth and lace,
  Mock friendship and wheedling tone;
Some hands that are callous and brown
  Are freer from sin than your own.

'Tis true, in life's race you are fleet,
  While others more slowly must plod;
Tho' man you can cheat and deceive,
  Think not to impose upon God;
Those eyes will forever be sealed,
  Those lips shall have done with their boast;
Proud form, you're no better than mine—
  A handful of clay at the most!

"He's only a farmer," you say;
  "A rustic—a tiller of soil!"
Yea, truly, and you are a drone,
  Who gorges on other men's toil!
Round brows never kissed by the sun
  Death's dread, ghostly messengers lurk;
I envy not scions of wealth,
  Who think it disgraceful to *work!* —*Western Rural.*

Wheat Raising for Hog Raising.
